Mr. MATHIAS. Mr. President, I rise to add my support for S. 1551, a bill I introduced, to extend the Federal Physicians' Comparability Act of 1978 for 2 additional years. As my friend has noted, S. 1551 is intended to continue in law a program to address retention and recruitment problems as well as pay comparability problems which now exist among Federal civil service physicians. As it has already been noted, the administration supports extension of this act for an additional 2 years. In his letter to the committee on this subject, Donald J. Devine, Director of the Office of Personnel Management, noted that—

Federal agencies using the authority have all told us that the ability to pay the allowance has significantly helped them in their recruitment and retention efforts, and they urge continuation of the allowance authority in view of the continuing difficulty they are having in competing with non-Federal employers for doctors. I would like to offer a copy of the letter for the record.

Mr. President, I would also like to echo the comments of the chairman of the subcommittee regarding the need for more uniform implementation of the Physicians' Comparability Act. I have been advised by Dr. Walter Barquist, president of the American Academy of Federal Civil Service Physicians, that implementation problems in many cases have been serious and in some cases indiscriminate. Certainly, it is our hope that the Office of Personnel Management will more closely monitor the use of the bonus allowance program among the Federal agencies and that those agencies experiencing recruitment and retention problems will, indeed, make use of these provisions wherever identifiable problems exist.

Finally, I would also like to echo my understanding of the applicability of the legislation for the weeks that have passed since September 30, 1981. Clearly, the intent of Congress is that no bonus allowance be denied physicians who have entered into contracts since that date. Thus, with this intent of Congress clarified to authorize bonus allowances for the time period between September 30, 1981, and the date of implementation of this act, I am confident that any question about retroactivity can be answered.

MARY E. CARTER, DEBORAH M. ANDERSON, AND GREGORY ANDERSON; AND BETTY J. SCHULZ

Mr. BAKER. Mr. President, I send to the desk two resolutions and ask unanimous consent that the Senate proceed to their consideration en bloc. I might say parenthetically that both are routine resolutions which would authorize the payment of gratuities to the heirs of deceased Senate employees.

The first would authorize the payment of $2,471.73 each to Mary E. Carter, Deborah M. Anderson, and Gregory Anderson, children of John C. Henry, an employee of the Architect of the Capitol, a laborer assigned to duty in the Senate Office Buildings at the time of his death. The second would authorize payment of $5,774.25 to Betty Schulz, the mother of Scott Schulz, a staff assistant in the office of Senator PERCY at the time of his death.

The resolutions (S. Res. 263 and S. Res. 264) were read, considered by unanimous consent, and agreed to as follows:

S. RES. 263

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Mary E. Carter and Deborah M. Anderson, daughters of John C. Henry, and Gregory Anderson, son of John C. Henry, an employee of the Architect of the Capitol assigned to duty in the Senate Office Buildings at the time of his death, a sum to each equal to one-third of six months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

S. RES. 264

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Betty J. Schulz, mother of Scott Shulz, an employee of the Senate at the time of his death, a sum equal to 3 months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolutions were agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING APPEARANCE BY CERTAIN EMPLOYEES OF THE SENATE IN LITIGATION

Mr. BAKER. Mr. President, finally, I have a Senate resolution authorizing testimony by Roy C. Myers, and representation by the Senate Legal Counsel in the case of William P. Tavoulareas, et al. against the Washington Post Company, et al.

I sent the resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 265) authorizing testimony by Roy C. Myers, and representation by the Senate Legal Counsel in the cases of William P. Tavoulareas, et al. v. The Washington Post Company, et al., and William P. Tavoulareas, et al. v. Philip Prio, Civil Action Nos. 80–3032, 80–2387.

The resolution (S. Res. 265) was read, considered by unanimous consent, and agreed to as follows:

S. RES. 265

Whereas, in the cases of *William P. Tavoulareas, et al.* v. *The Washington Post Co., et al.* and *William P. Tavoulareas, et al.* v. *Philip Piro,* Civil Action Nos. 80–3032, 80–2387, pending in the United States District Court for the District of Columbia, counsel for plaintiffs have requested the testimony and production of certain documents by Roy C. Myers, an employee of the Senate;

Whereas, Title VII of the Ethics in Government Act of 1978, Public Law 95–521 ("the Act"), establishes the Office of Senate Legal Counsel and provides that the Senate may direct its Counsel to represent the Senate, its committees, Members, officers, or employees;

Whereas, by the privileges of the Senate

of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that testimony of an employee of the Senate is needful for use in any court for the promotion of justice and, further, that such testimony may involve documents, papers and records under the control of or in the possession of the Senate and communications, conversations, and matters related thereto, the Senate will take such action thereon as will promote the ends of justice consistently with the privileges and rights of the Senate: Now, therefore, be it

Resolved, That pursuant to section 704(a)(2) of the Act, the Senate Legal Counsel is directed to represent Roy C. Myers in connection with his testimony in the cases of *William P. Tavoulareas, et al.* v. *The Washington Post Co., et al.* and *William P. Tavoulareas, et al.* v. *Philip Piro*, Civil Action Nos. 80-3032, 80-2387;

SEC. 2. That Roy C. Myers is authorized to testify at deposition in the cases of *William P. Tavoulareas, et al.* v. *The Washington Post Co., et al.* and *William P. Tavoulareas, et al.* v. *Philip Piro*, Civil Action Nos. 80-3032-80-2387, and to produce documents requested of him, except concerning matters for which he and the Senate Legal Counsel or his representative determines are privileged from disclosure.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. BAKER. Now, Mr. President, I observe that the distinguished chairman of the Finance Committee is on the floor. Might I inquire of him if he is ready at this time to proceed to the consideration of the minimum benefit social security conference report?

Mr. DOLE. Mr. President, I am ready to proceed if the distinguished Senator from Louisiana (Mr. LONG) and the distinguished Senator from New York (Mr. MOYNIHAN) are also prepared.

Mr. BAKER. Mr. President, is the minority leader prepared to proceed at this time?

Mr. ROBERT C. BYRD. Yes.

SOCIAL SECURITY MINIMUM BENEFIT—CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on H.R. 4331 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4331) to amend the Omnibus Reconciliation Act of 1981 to restore minimum benefits under the Social Security Act, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, December 15, 1981.)

Mr. BAKER. Mr. President, I understand there are a number of Senators who wish a rollcall vote on this measure. I ask for yeas and nays on passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, the distinguished Senator from Louisiana is not on the floor, but I understand he is prepared to proceed. In the meantime, the Senator from Kansas will make a statement and perhaps by that time the Senator from Louisiana will arrive.

The PRESIDING OFFICER. The Chair recognizes the Senator from Kansas.

THE SOCIAL SECURITY AMENDMENTS OF 1981

Mr. DOLE. Mr. President, yesterday, the House-Senate conferees reached agreement on provisions of H.R. 4331, the bill to restore the social security minimum benefit. After several weeks of negotiations, the conferees agreed to fully restore the minimum benefit for all current recipients and to partially finance this change by extending the payroll tax on covered workers. Interfund borrowing on a temporary basis is authorized in the conference agreement to insure that the retirement and survivors' insurance trust fund can remain solvent next year by drawing on the resources of the disability and hospital insurance trust funds. Finally, several amendments offered on the Senate floor were accepted that should lead to improvements in the administration of the social security program.

As we all know, under the Reconciliation Act, the minimum benefit will be eliminated for all present beneficiaries in March and is eliminated for all future beneficiaries, effective last month. No person becoming eligible for old age or disability benefits after October 1981 will be entitled to the minimum benefit, and benefits payable to new beneficiaries will be based on their actual earnings.

The conference agreement restores the minimum benefit for all people eligible for benefits before January 1982 or whose benefits are based on a worker's eligibility or death before January 1982. The elimination of the minimum benefit for future recipients also becomes effective in January. Members of religious orders who have taken a vow of poverty and who were first covered under the social security program prior to the date of enactment would, however, maintain their eligibility for the minimum benefit for a 10-year period, as under the Senate bill, until December 1991.

To help finance the minimum benefit change, the conference agreement extends social security tax coverage to the first 6 months of certain sick pay. Conferees accepted a House proposal to extend the tax beyond the Senate amendment to cover not only sick pay received under an employer plan or system but also those payments made under a sick pay plan to an employee or any of his dependents by a third party (such as an insurance company) on account of the employee's illness. In the case where an employee has contributed to such a plan, however, only that portion of payments attributable to the employer's contributions will be taxable. This provision would be effective January 1982, although interest and penalties for failure to comply would be waved for 6 months in cases where late payments are not due to wilful neglect.

Regarding the tax reallocation and interfund borrowing contained in the Senate amendment to H.R. 4331, the conference agreement does not include reallocation of the social security payroll tax among the three trust funds. The authority for interfund borrowing is expanded to permit borrowing among all three trust funds, however, and the authority expires after 1 year.

In particular, the conference agreement would authorize borrowing of existing assets among the OASI, DI, and HI trust funds under the same conditions and requirements as provided in the Senate amendment except with regard to effective date. The borrowing authority would be effective from the date of enactment through December 31, 1982.

In the statement of managers, guidance is provided to the managing trustee for determining when borrowing is appropriate in order to best meet the need for financing benefits. The managing trustee is instructed to consult with the other trustees in making such determinations which should occur no less frequently than on a monthly basis.

Moreover, interfund borrowing should not make adjustments in the trust funds that insure benefit payments for a period of more than 6 months beyond the date of determination. It was the view of the conferees that interfund borrowing was a safety mechanism to insure benefit payments could be paid next year. The conferees do not intend that interfund borrowing should be used as a substiute for more comprehensive financing legislation in then near and long term.

In fact, several conferees, particularly the House conferees, were suggesting we have a lameduck session after the next election, in November of 1982, and address the entire social security problem at that time.

Although all of the Senate floor amendments to H.R. 4331 had merit, the conferees ultimately agreed to just four.

First, to facilitate the denial of disability benefits to prisoners, as enacted in 1980, the conference agreement would waive any contrary Federal or State laws to require Federal, State, or local government agencies to furnish to the Secretary of HHS the names and social security numbers of prisoners convicted of felonies.

Second, to improve the situation with regard to incorrect payments or overpayments, a provision is included that would require the Secretary of HHS to report to Congress within 90 days on actions being taken to prevent payments to deceased social security beneficiaries.

Third, the conference agreement makes it unlawful to alter, buy, sell, or counterfeit social security cards; increases the classification of card violations from misdemeanors to felonies; and increases the maximum penalty to $5,000 or 5 years in prison.

Finally, the Secretary of HHS would be required, by January 1, 1982, to enter into agreements with at least seven States for demonstration projects to train AFDC recipients as home health aides. The Secretary is currently authorized to approve up to 12 such projects.

Mr. President, while I am pleased an agreement has been reached that will make two quite widely supported changes—restoring the minimum benefit and authorizing interfund borrowing—I am disappointed that House conferees were unwilling to make the changes necessary to finance the restoration of the minimum benefit. Unlike the Senate amendment, which was passed by unanimous vote on October 15, the conference agreement does not maintain the financial condition of the trust funds in the next 5 years—the critical years—but actually worsens their condition. According to the social security actuaries, this agreement will, on net, cost the trust funds at least $1.8 billion over the next 5 years.

As others and I have said on many occasions, the financial condition of social security is critical. Under trustees' intermediate assumptions, $50 billion is still needed by 1990 to insure the barest level of solvency; nearly $100 billion is needed to restore current levels of reserves. Over the longer term, the situation only becomes more grave. The system's deficit is projected to equal 29 percent of expenditures over the next 75 years. Responsible action must be taken.

Despite my disappointment in the outcome of the conference. I support the conference agreement and urge my colleagues to vote for its passage. With the restoration of the minimum benefit behind us, and with another year or two of solvency provided by interfund borrowing, we have the opportunity to reopen and deal responsibly with the issue of social security financing.

Mr. President, finally, I understand that the task force on social security is about to be appointed by the majority and minority leaders in the Senate, by the Speaker and minority leader in the House and by the President. Therefore, it is our hope that the task force can finish its work in time so that we may address the problems—as we should have addressed them this year—no later than mid-1983. I found almost unanimous agreement among Republicans and Democrats, regardless of philosophy and regardless of their concern or lack of concern about the social security problem, that that should be done. Again, I indicate that this is one reason the interfund borrowing period was shortened. It was 10 years in the bill passed by the Senate; it ended up to be about 13 months.

The House Republican conferees very properly, in my opinion, insisted on a very short duration for interfund borrowing. It is their purpose to keep the pressure on all of us who have the responsibility to restore this system to what it should be.

Mr. President, I urge the adoption of the conference report.

I ask unanimous consent that excerpts of the statement of managers be printed in the RECORD that describe the provisions adopted by the conferees.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXCERPTS FROM CONFERENCE REPORT TO ACCOMPANY H.R. 4331, STATEMENT OF MANAGERS

INTERFUND BORROWING

Section 1

Present Law.—The present law tax rates for OASDI and HI, and the allocation of the OASDI tax rate between OASI and DI are shown below. No authority exists for administratively transferring funds from one trust fund to another.

PRESENT LAW OASDHI TAX RATES

	OASI	DI	HI	Total
Employees and employers, each (in percent):				
1982	4.575	0.825	1.30	6.70
1983	4.575	.825	1.30	6.70
1984	4.575	.825	1.30	6.70
1985	4.750	.950	1.35	7.05
1986–89	4.750	.950	1.45	7.15
1990–2004	5.100	1.100	1.45	7.65
2005 and after	5.100	1.100	1.45	7.65
Self-employed (in percent):				
1982	6.8125	1.2375	1.30	9.350
1983	6.8125	1.2375	1.30	9.350
1984	6.8125	1.2375	1.30	9.350
1985	7.1250	1.4250	1.35	9.900
1986–89	7.1250	1.4250	1.45	10.000
1990–2004	7.6500	1.6500	1.45	10.750
2005 and after	7.6500	1.6500	1.45	10.750

House Bill.—No provision.

Senate Amendment.—Section 101 of the amendment would authorize borrowing between the OASI and DI trust funds at any time prior to January 1991. The Managing Trustee, the Secretary of the Treasury, would determine when borrowing would be appropriate to meet the need to finance the benefit payments from these trust funds. The Managing Trustee would be authorized to borrow any amounts which he determines to be appropriate from either of these trust funds for transfer to and deposit in the other trust fund.

In any case where a loan had been made, interest would be paid by the borrowing fund to the lending fund at a rate equal to the rate the lending trust fund would earn on the unrepaid amount if the loan were a regular investment.

Whenever the Managing Trustee determined that the assets of the borrowing trust fund were sufficient to permit repayment of all, or part, of any loans made, he would make such repayments as he determines to be appropriate.

The Board of Trustees would be required to make a timely report to the Congress of any amounts borrowed or repaid (including interest payments).

Section 102 of the Senate amendment revises the distribution of social security taxes between the OASI, DI, and HI trust funds for 1982 and later, but did not alter the overall OASDHI combined tax rate under present law.

PROPOSED REALLOCATION OF OASDHI TAX RATES

	OASI	DI	HI	Total
Employees and employers, each (in percent):				
1982	5.185	0.715	0.80	6.70
1983	5.035	.665	1.00	6.70
1984	4.855	.595	1.25	6.70
1985	5.005	.595	1.45	7.05
1986–89	5.100	.600	1.45	7.15
1990–2004	5.150	.750	1.75	7.65
2005 and after	5.450	.750	1.45	7.65
Self-employed (in percent):				
1982	7.5150	1.0350	0.800	9.350
1983	7.3750	.9750	1.000	9.350
1984	7.2150	.8850	1.250	9.350
1985	7.5500	.9000	1.450	9.900
1986–89	7.6500	.9000	1.450	10.000
1990–2004	7.8550	1.1450	1.750	10.750
2005 and after	8.1750	1.1250	1.450	10.750

Conference Agreement.—The conference agreement does not include the Senate provision with respect to changing the social security tax rates or the allocation of the OASDI tax rate between the OASI and DI trust funds. The conference agreement would authorize borrowing of existing assets between the OASI, DI, and HI trust funds under the same conditions and requirements as provided in the Senate amendment except with regard to effective date for borrowing between the OASI and DI trust funds. Under the conference agreement, the borrowing authority would be effective from the date of enactment through December 31, 1982. In determining that borrowing under this provision is appropriate in order to best meet the need for financing the benefit payments under any of the three trust funds, the Managing Trustee should, after consultation with the other trustees, make such determination no less frequently than on a monthly basis. In no case shall such interfund borrowing make adjustments in the trust funds insuring benefit payments for a period more than six months beyond the date of such determination.

RESTORATION OF MINIMUM BENEFIT FOR CURRENT RECIPIENTS

Section 2

Present law.—The minimum benefit for all present and future beneficiaries will be eliminated. No person becoming eligible for old-age or disability benefits after October 1981 will be entitled to the minimum benefit. Benefits payable to new beneficiaries will be based on their actual earnings.

All other persons will be affected beginning with benefits payable for the month of March 1982. Their benefits will be recomputed based on their actual earnings record and according to recomputation procedures prescribed in regulations issued by the Secretary of HHS. In addition, persons aged 60 to 64 who are entitled to a minimum benefit for the month of February 1982 will become eligible for a special SSI benefit if they qualify under all SSI rules except that pertaining to age. The amount of the special SSI payment will be limited to the difference between the minimum benefit the individual received in February 1982 (without regard to the earnings test) and the recalculated benefit. These SSI payments will not be adjusted for increases in the cost of living, nor will these 60 to 64 year old persons become eligible for certain other benefits including State supplementation, food stamps, medicaid, or social services as a result of this provision.

This provision was adopted in section 2201 of the Omnibus Budget Reconciliation Act of 1981 (P.L. 97-37).

House bill.—The House bill would repeal section 2201 of the Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35), thereby reinstating the OASDI minimum benefit provision as it existed under prior law for both current and future beneficiaries.

Senate amendment.—Section 103 of the amendment would restore the minimum benefit for all people who are eligible for benefits before November 1981 and who are residents of the 50 States, District of Columbia, Puerto Rico, Guam, Virgin Islands, and American Samoa. Among this group of beneficiaries, those with governmental pensions would, beginning with benefits for June of 1982, have their minimum benefit reduced dollar-for-dollar for the portion of their governmental pensions above $300, but not below the amount of the benefit based on their actual earnings. This offset would apply only to the benefits of retired or disabled workers; it would not affect survivors' or dependents' benefits.

For members of religious orders who have taken a vow of poverty and who were first covered under the social security program prior to the date of enactment as a result of amendments adopted in 1972, the provision would apply the elimination of the minimum benefit for future recipients, only to those who become eligible after October 1991.

Conference agreement.—The conference agreement restores the minimum benefit for all people who are eligible for benefits before January 1982 or whose benefits are based on a worker's eligibility or death before January 1982. Also, the elimination of the minimum benefit for future recipients applies to members of religious orders who have taken a vow of poverty, who were first covered under the social security program prior to the date of enactment, and who become eligible after October 1991.

For current recipients to whom the minimum benefit would be restored, the conference agreement does not include the provision of the Senate amendment that limits the restoration to residents of the United States and does not include the provision reducing the minimum benefit dollar-for-dollar for those also receiving governmental pensions above $300.

EXTENSION OF COVERAGE TO FIRST SIX MONTHS OF SICK PAY

Section 3

Present law.—Payments made to or on behalf of an employee of a private employer on account of sickness or accident disability are subject to social security taxes and are treated as covered earnings unless they are either: (1) paid under a qualified plan or system; or (2) paid after the employee has not worked for the employer for more than six months. A qualified plan or system is one that applies to the employees of a firm generally or to a class or classes of employees. The existence of a plan or system is shown if the plan or system is in writing or is otherwise made known to employees (for example, through the medium of a bulletin board notice or the long and established practice of the employer). Other indications of the existence of a plan or system include, but are not limited to, contractual references to a plan or system, employer contributions to a plan, or segregated accounts for the payment of benefits.

With respect to railroad employment, the Railroad Retirement Tax Act, sec. 3201 et seq. of the Internal Revenue Code, excludes from taxable compensation the amount of any payment (including any amount paid by an employer for insurance or annuities) made to, or on behalf of, an employee or any of his dependents under a plan or system, on account of sickness or accident disability.

Under the Railroad Unemployment Insurance Act (sec. 2(a)) certain daily benefits are paid from the railroad unemployment insurance account for qualified employees for each day of sickness after the fourth consecutive day of sickness in a period of continuing sickness. In general, the daily benefit rate for such sickness is an amount equal to sixty percent of the employee's daily rate of compensation in a base year, but not less than $12.70 nor in excess of $25.00 per day. The maximum number of days of sickness within a benefit year for which benefits may be paid to an employee is one hundred and thirty (26 weeks). Under present law these sickness and disability benefits are not taxable compensation for railroad retirement tax purposes.

House bill.—No provision.

Senate amendment.—Section 104 of the amendment would remove the exclusion of certain sick pay received under a plan or system during the first six months the employee is off work. However, payments made by an insurance company would still be exempt unless the company is owned, to a substantial extent, by the employer, or the insurance company has an administrative-services-only contract with the employer under which the insurance company is reimbursed for sick payments actually made plus administrative expenses and profits. In addition, payments required by a workmen's compensation or temporary disability insurance law would continue to be exempt. This provision would be effective for sick payments made in January 1982 and thereafter. The treatment of payments made to an employee more than six months after the employee last worked would be unchanged from current law. Under the Senate amendment, sick payments made to employees covered by the railroad retirement system and sick pay benefits received under the Railroad Unemployment Insurance Act would continue to be exempt from railroad retirement employment taxes.

Conference agreement.—The conference agreement follows the Senate amendment extending coverage to certain forms of sick pay. In addition, the conference agreement would include in the definition of wages both for tax and coverage purposes, payments made under a sick pay plan to an employee or any of his dependents by a third party on account of the employee's illness. However, in the case where an employee has contributed to such plan, "wages" or "compensation" shall not include that portion of such payments attributable to the employee's contributions. It is the view of the conferees that such amounts are properly excludable in that they do not constitute remuneration for employment but rather represent a return on the premium contributions made by the employee. The conferees intend that rules similar to those provided in sec. 105 of the Internal Revenue Code (and regulation promulgated thereunder) shall apply in this instance. Payments which are received under a workmen's compensation law and those paid to an employee by either the employer or a third party more than six months after the employee last worked would continue to be excluded from the definition of wages, as under present law.

The conference agreement also provides that any third party (for example, an insurance company) that makes a payment, which is included in wages solely by reason of this provision, shall be treated as the employer with respect to such wages for purposes of social security and railroad retirement employment taxes. Thus, a third party payor will be responsible for the withholding of employee FICA taxes on wages up to the applicable maximum taxable wage base and for the remittance and timely deposit (as otherwise provided by law) of FICA taxes. However, the conference agreement establishes a specific statutory exception to this rule: the liability for the employer share of the FICA taxes will shift from the third party to the actual employer as soon as the third party payor has deposited the withheld employee taxes and notified the employer of the amount of sick pay made to the employee.

The conference agreement mandates the development of regulations which shall provide procedures under which, if the third party payor promptly withholds the employee portion of the taxes, deposits those taxes pursuant to the rules under section 6302 of the Code, and notifies the employer for whom services are usually rendered, of the payment, the employer (and not the third party payor) shall be liable for the employer portion of the tax and for providing written statements and other reporting requirements under Code section 6051. It is the intention of the conferees that these regulations provide that third party payors withhold the employee portion of the tax as payments are made and deposit such withheld amounts under the applicable schedule authorized by Code section 6302 (including information reports such as Form 941 and related forms) as if these amounts were paid out of the third party payor's own payroll. Further, the provision adopted by the conferees requires simultaneous notification of the employer of the amount of compensation paid to each employee. If these conditions are met, the liability for the employer portion of the payroll tax shifts from the party making the payments to the employer for whom services are normally rendered. Upon the employer's receipt of the notification of the payment made by the third party, such employer must deposit the appropriate employer taxes as if these payments were made out of his own payroll on that date. The conferees intend that the implementing regulations shall be promptly issued and that, having met the conditions specified in sec. 3(d), they will be relieved of the liability.

As a result, FICA and railroad retirement employment taxes on combined amounts in excess of the maximum taxable wage base could be withheld from employees and paid by employers. Under section 6413(c) of the Internal Revenue Code, employees who experience such overwithholding are eligible to receive refunds. The conferees expect that the Secretary will attempt to design proce-

dures whereby employers and third party payors can avoid withholding on combined amounts in excess of the maximum taxable wage base (both for FICA and railroad retirement taxes) and will implement these procedures by regulation.

The conference agreement provides that, notwithstanding any other provision of law (including certain payments made under the Railroad Unemployment Insurance Act), compensation for purposes of the Railroad Retirement Tax Act shall include all payments made to an employee or any of his dependents on account of sickness or accident disability during the first six months the employee is off work except: payments which are received under a workmen's compensation law; payments which are received under the Railroad Retirement Act of 1974; or benefits which are paid under section 2(a) of the Railroad Unemployment Insurance Act for days of sickness to the extent that such sickness is the result of on-the-job injury (as determined in accordance with standards prescribed by the Railroad Retirement Board).

In addition, the conference agreement provides that, for purposes of the taxes imposed by this provision, payments made under a state temporary disability insurance law shall be treated as remuneration for service.

Under the conference agreement, no penalties or interest shall be assessed for failure to make timely payments of taxes with respect to payments of sick pay made between January 1, 1982 and June 30, 1982 and which are imposed as a result of amendments made by this section, to the extent that such failure is due to willful neglect and such taxes are paid on or before June 30, 1982.

Finally, the conference agreement provides generally that the amendments made by this section shall apply to remuneration paid after December 31, 1981. However, these amendments shall not apply to any third party payment made to an employee pursuant to a contractual relationship of an employer with such third party which is entered into before December 14, 1981, if the third party's coverage for that employee's group ceases before February 28, 1982 and no third party payment is made to such employee under that contract after February 28, 1982. Since such payments would not be considered remuneration for purposes of these taxes, no employment taxes would be levied on such payments.

PENALTIES FOR MISUSE OF SOCIAL SECURITY NUMBERS

Section 4

Present law.—Criminal penalties are provided for: (1) knowingly and willfully using a social security number that was obtained with false information, (2) using someone else's social security number, or (3) unlawfully disclosing or compelling the disclosure of someone else's social security number. The crime is considered a misdemeanor and the penalty involves a fine of up to $1,000 or imprisonment for up to one year or both.

House bill.—No provision.

Senate amendment.—Section 110 of the amendment would add new acts considered to be a misuse of social security cards by making it unlawful to: (1) alter, (2) buy or sell, or (3) counterfeit social security cards, or (4) possess a regular or counterfeit card with intent to sell or alter it.

The provision would make all unlawful acts affecting the social security number or card a felony, rather than a misdemeanor.

It would increase the maximum fine for conviction of such acts from $1,000 to $5,000 and the maximum prison term from 1 year to 5 years.

Conference agreement.—The conference agreement follows the Senate amendment.

STATUTORY DEADLINE FOR IMPLEMENTING AFDC HOME HEALTH AIDE DEMONSTRATION PROJECTS

Section 5

Present law.—P.L. 96-499 authorized the Secretary to enter into agreemnts with up to 12 States for the purpose of conducting demonstration projects to train AFDC recipients as homemaker-home health aides. This provision was amended by P.L. 97-35 to require the Secretary to establish by October 1, 1981, such guidelines and regulations as may be necessary to assure that agreements with the States are entered into by January 1, 1982.

House bill.—No provision.

Senate amendment.—Section 113 of the amendment would require the Secretary to meet the January 1, 1982 deadline for entering into demonstration agreements with at least 7 States.

Conference agreement.—The conference agreement follows the Senate amendment.

INFORMATION WITH RESPECT TO PRISONERS

Section 6

Present law.—Beginning October 1980, disability insurance benefits cannot be paid while individuals are imprisoned for conviction of a felony, except where the individual is satisfactorily participating in a rehabilitation program which has been specifically approved for that individual by a court of law and which is expected to result in his being able to engage in substantial gainful activity upon release and within a reasonable period of time. Such individuals are also not eligible for student benefits. However, benefits can be paid to dependents of prisoners, just as if the prisoners were receiving benefits.

The law also provides that impairments, to the extent that they arise from, or are aggravated by, the commission of a crime, cannot be considered in determining whether a person is disabled, and impairments arising while an individual is in prison cannot be considered for purposes of disability as long as the person remains in prison.

In order to implement this law, the Secretary of HHS requires information from penal institutions with which to identify the relevant prisoners. In some cases, providing this information without the consent of the prisoner possibly violates various privacy acts.

House bill.—No provision.

Senate amendment.—Section 108 of the amendment provides that, without regard to any contrary Federal or State law, Federal, State, or local government agencies must furnish the name and social security number of any prisoner convicted of a felony, when the Secretary of HHS makes a written request to the agency for that information.

Conference agreement.—The conference agreement follows the Senate amendment.

REPORT TO CONGRESS REGARDING PAYMENTS TO DECEASED PERSONS

Section 7

Present law.—Social security benefits terminate with the month in which a beneficiary dies. Benefits are not payable for that month.

House bill.—No provision.

Senate amendment.—Section 109 of the amendment would require the Secretary of HHS to report to Congress within 90 days after enactment on actions being taken to prevent payments to deceased social security beneficiaries.

Conference agreement.—The conference agreement follows the Senate amendment.

Mr. MOYNIHAN. Mr. President, as Senators on both sides of the aisle will, I am sure, acknowledge, this effort did not begin as a bipartisan enterprise. It nonetheless has ended as one. I wish to express what I am sure is the appreciation of many—I hope all—Members of the Senate to the distinguished chairman of the Committee on Finance, who had the not always easy task of acknowledging positions made on this side and advancing his own and others' views on his side of the aisle; such that we come to the Senate with a unanimous judgment of the conferees on our side that follows the unanimous report from the Committee on Finance. I hope it is received in the bipartisan manner that has been, now, finally consummated.

I make two points, Mr. President. The first is that I hope in the aftermath of this almost year-long debate, begun in March, we can agree that the integrity of the social security funds and the system extends to the proposition that at no point should the revenues of that system be used for purposes elsewhere in the budget. The effort to cut benefits by as much as 40 percent for persons entering the system come January did not respond to a need of the system, the social security system, but, rather, the anticipation of budget deficits in this next few years that has since become public and, indeed, has become publicly acknowledged, perhaps inadvertently, by the Director of the Office of Management and Budget in his celebrated interview in the Atlantic Monthly.

We now have a basis to go forward, Mr. President. We established in the conference the proposition that there needed to be larger revenues in the system. We almost wholly compensated for the restoration of the minimum benefit. Much more importantly, we established a system that the principle of social security is a contract. You do not take benefits away from persons who have been receiving them, who have every reason in the very near term to expect them. This is a long-run system. One person in seven in the Nation depends on it. Changes have to be made in a careful and considered fashion. It may be that we have not found how much turmoil is aroused by the other approach. We can now do what needs doing in an appropriate manner.

Mr. President, I should like to call attention to the statement that the chairman of the committee made about discussion in the committee of conference of a congressional session following the November elections of 1982 that might be exclusively devoted to this subject. It need not be called a lame-duck session. That was a term that was used up until 1934 when the elections took place in November and Congress reconvened in January and routinely continued, if I recall, until the 25th of March.

In any event, there was a long session automatically held after elections and before a new Congress, already elected to office. Can we not call it a special session of the Senate that would confine itself to this matter and approach it with the recommendations that the representatives of the President's Commission might bring to the matter?

This is indeed an opportunity. We have to some degree created a necessity, because the interfund borrowing, which was proposed by the Senator from New York and the minority leader last Sep-

tember, extends only to the end of calendar year 1982; and what needs to be done, at least in 1983, can perhaps best be done in November–December of the preceding year.

A second matter, not as consequential to the social security system but certainly worth noting, is that while the committee of conference accepted our position that the counterfeiting of a social security card should be a felony and now will be—this was a measure which I had proposed 3 years ago—it inexplicably declines to accept what was in the original legislation I introduced in the last Congress, the companion provision that it should be made difficult if not impossible to counterfeit such cards.

Social security cards continue to be the same pasteboard cards that were issued in 1935 to the first recipients. I received mine in 1940, as I recall. There is not the least effort to make them durable, much less difficult to reproduce, and they are counterfeited routinely.

The General Accounting Office, in a report of December 1980, estimated that some $15 billion in fraudulently obtained benefits occur each year; and these fraudulently acquired benefits typically involve—not in all cases, but typically involve—a counterfeited social security card.

The cost of replacing these cards in the routine of doing business each year, just choosing a different style, would be minimal. It would be a sum that is not even calculated in our considerations of social security cards.

Mr. William Driver, in September of 1980, wrote to the then-chairman of the subcommittee, Senator Gaylord Nelson—whom we all miss in this Chamber—concerning two bills I had introduced and said, "If you simply were to use notepaper, as it is called, bank notepaper, there would be an extra cost of approximately $1.2 million a year."

This would mean that cards newly issued and cards issued to replace older cards that have been lost could begin immediately and, at the minimum cost, begin to appear in the system. How fast they would appear might surprise some colleagues.

Over the next 5 years, we will issue or replace 46,597,000 cards. The production is somewhat less than 2 to 1. For nearly every two new cards issued, an old card is replaced.

Social security cards are basic to American identification arrangements. They are not identity cards, but social security numbers are widely used for purposes as extensive as serial numbers in the armed services, drivers' licenses, library cards, and are required to obtain AFDC benefits and to enter Veterans' Administration hospitals. Holders of Treasury bonds have to present their social security numbers. They are used in connection with motor vehicle registration routinely. In some States, to become a registered voter, you give your social security number; also, upon opening bank accounts, charge accounts, and the like, a social security number is required.

In 5 years, a quarter of the cards in circulation would be of a kind that cannot be counterfeited.

What a mysterious position for the Administrator of the system to take, as he did yesterday, in opposition to this measure. It goes back to the early convictions of the founders of social security that, somehow, this must not be a form of identification. It has become one, and an altogether agreeable and acceptable one. It is what the American people choose and do not object to.

If the object of preventing the $15 billion in fraud—obviously, not all of that is going to be prevented—but if the reason the administration does not want to spend the $1.2 million is economy, then, surely it is a bizarre economy measure. If waste, fraud, and abuse—a subject of which we hear an ever-increasing amount of rhetoric—is a real concern, why not address it in this simple and forthright manner? I hope that within the Social Security Administration this measure has not become a point of concern because illegal aliens working with counterfeit social security cards in fact contribute to the system and receive no benefits from it.

It certainly is unworthy of the administration to object to a simple, forthright measure of this kind for purposes they are not open about—if, in fact, that is one of their concerns. If that is not one of their concerns, the whole matter becomes inexplicable. Even so, this can be addressed in our major review of the program, and I have the understanding of the conferees that it will be.

Finally, Mr. President, we have to note that the conferees did not accept our sense-of-Congress statement that no future changes will reduce social security benefits to anyone now receiving them. I hope that that rejection does not augur a position in the House, which I do not believe it does, that we will do anything of the kind.

Benefits may have to be adjusted so that they do not rise as rapidly as they have in the past owing to some miscalculations in the past. That is the very different thing from taking away from Americans entitlements they have received under law and which they have every expectation that they will continue to receive.

Congress made a mistake when it voted to abolish the minimum benefit, which involves people utterly in need. Had it done so, the costs in supplementary security income and medicare and medicaid would have nearly outweighed the advantage of the reduction in the minimum benefit.

However, the principle was much more important than the particulars, and the principle has been sustained. I think it does not contravene the spirit of this conference report to say that it would not have been sustained, I fear, had it not been for the firmest opposition to the matter from this side of the aisle. But the episode concludes in bipartisan agreement, and I hope that the report of the committee of conference will be so received. I hope we will put ourselves, you might say, on notice that this is a matter not concluded but, rather, begun; that we have a year ahead of us.

We should see whether we can get ourselves together as a commission to devise some long-term proposals—and there will be some short-term matters to be dealt with—and if we can genuinely consider now the prospect of a special session of Congress to deal with this most special of American national social insurance programs.

I know there are those who would think there are better things to do with November and December. Yet, if once in 50 years the social security system requires that kind of effort, I am sure there will be a good-hearted and good-faith effort to join in it, especially and not least from my friend from Colorado, who is the distinguished chairman of the Subcommittee on Social Security.

I see that he has arrived, and I see that he is all smiles. I take that to be satisfaction at the outcome of the conference and anticipation of the success of a special session.

Mr. ARMSTRONG. Mr. President, I wonder how many Senators recall Parkinson's law of committee procedure. We all remember that Parkinson postulated in his law of administration that works expands to fill the time allotted to it. Certainly, that is applicable to the social security bill.

However, I think the more applicable reference is what Parkinson said about how committees function. He said that if a committee is confronted with decisions about a mule barn and a cyclotron, it will dispose of the cyclotron within 15 minutes after it convenes and spend the remainder of the time working on the mule barn.

He said the reason for this is that nobody really understands cyclotrons, but everybody has some opinion about the size, shape, utilization, painting, and remodeling of mule barns. So it is a natural tendency for committee members to focus on that.

This conference report is a good illustration of that. We have ducked the main issue and handled some really minor housekeeping things which were easy to agree on. Not that these are inherently unworthy. I do not oppose the conference report. I will vote for it. But I think it is a travesty to suggest that we have fulfilled our responsibility.

Every day, every minute, every second, social security is running deeper and deeper into the red. It is going into the red, I am told, at the rate of something like $12,000 a minute—not 8 hours a day, but around the clock, 365 days a year.

The situation is growing perceptively worse in the fund balances. Instead of meeting the problem with a permanent solution, we have provided for a limited period of interfund borrowing. I support that, under the general premise of making the best of a bad situation, as another stopgap measure; but I think it is important for Senators to understand that it is nothing more than a stopgap measure.

The fact we were able to achieve even that much is in large part a tribute to the statesmanship, scholarly, and political mastery of our chairman, the Senator

from Kansas. He has shown once again his great ability to get people together, to talk things through and find out some way to resolve a complicated and potentially divisive issue, and I cannot fault him on that. The fact that we were able to get something out of this and at least restore the minimum benefit and have the interfund borrowing portion and, as has been noted both by the Senator from Kansas and the Senator from New York, we have largely paid the cost of doing so, I think is a tribute to Senator DOLE's leadership and the cooperation of other Members.

But I return to the main issue, where we started on this matter earlier in the year, and that is what are we going to do about social security? Even today there remains some doubt, I guess, in the minds of some people as to whether or not we have to actually do something or whether or not we sort of have to muddle through with some stopgap and halfway measures.

Just for the record and for the benefit of anybody concerned with the long-time crisis, I want to make this point: Despite all of the political rhetoric that has flowed on this subject, despite the charge that somehow political terrorism is being used or there has been grandstanding or somebody is attempting to use social security funds to balance the budget or we are trying to balance the budget on the backs of the poor, the fact is social security is going broke. It is doing so in slow motion. It is a large fund, and it takes a long time for this kind of a fund to go over the brink, but it is losing $12,300 every minute, and unless action is taken at some point we will not be able to fully pay the benefits we have promised to the 36 million recipients and their families.

The exact month at which the fund will finally end with interfund borrowing, go broke and run out of money, is a matter of some conjecture. But I would suggest, one of our witnesses before the subcommittee made the point very well, that we should not be debating when the last dollar will be spent; that to argue whether or not the very last dollar in the system will be spent and the fund will be insolvent a year from now or 2 years from now or 5 years from now or 25 years from now begs the issue of our trustee responsibilities.

There is a group which is legally and technically the Board of Trustees of the social security system. But in the larger sense, in the sense of our moral obligation as Members of the Congress of the United States, we are the trustees of this social security system and it is up to us to provide the adjustments in the social security financing structure and the benefits and eligibility standards that will permit funds to meet its long-term obligations.

The report which we are considering today does not do so. It is just a stopgap which restores the minimum benefit to those now receiving it, and provides for the interfund borrowing, both of which are desirable but neither of which addresses itself to the long-run problem.

Even so it may be that this bill has a silver lining, and that had been alluded to by at least one of those who has already spoken, and that is the question of whether or not by the adoption of this bill and the manner and atmosphere in which it has been adopted will tend to diffuse the political donnybrook which has resulted from the proposals submitted by the President on May 12.

As many of you know, I faulted the President for his proposal in one very significant respect. I thought his plan was a masterpiece of bad timing. It arrived on the Hill at exactly the moment when there had been a very divisive and a very vigorous struggle over the budget in the House of Representatives.

The Speaker of the House and others in the House were looking for an issue to jump on, and they jumped on this one, and in response to that initiative a lot of people jumped on the President's proposal and really criticized it—and while I did not agree with it fully, I think really criticized the President's proposal—more than it deserved and, as a consequence, we have spent all year trying to somehow recreate the sort of bipartisan atmosphere in which it will be possible to legislate on this subject.

Mr. President, I would like to pay tribute, as we shut down this issue for the year, to a number of people in this Chamber and in the other body of both parties who have approached it in that spirit of bipartisanship. That is what it is going to take to solve the social security problem. So to the extent that this conference report and this faltering step that we take today contribute to that effort I certainly think it is worthwhile.

It will be my hope and my purpose as we resume deliberations of this issue in the Senate, in the committee, and in whatever forums there may be for discussion of social security needs and reform to do so in a low key and bipartisan way.

However, I must say this: If we are treated next year to a resumption of the kind of partisan attacks that we have seen this year then I can guarantee that the Senator from Colorado is going to respond in kind.

Finally, Mr. President, I heard something during the last few minutes which caused me great concern. For those who are wondering why my hair is standing on end, it is because I thought I heard somebody say something about a lameduck session next year. I hope that we could have assurances from whatever proper authorities there may be that we are not going to have a lameduck session. Certainly to plan for such a thing a year in advance is, in my view, irresponsible. As I have pointed out at some earlier time to Senators, I think the notion of a postelection or lameduck session is unwise under almost any circumstances short of a true national emergency such as war or a natural disaster.

To have such a session simply means that after an election people who no longer possess fresh and valid charters from their constituents are nonetheless summoned back here to legislate, or to be more direct about it, people who have either retired from office or have been voted out of office by their constituents come back to legislate for a couple of months.

While this is technically legal and is certainly precedented, it is not a good practice, in my opinion.

It has not been long the custom of Congress and it would not be a good tradition to get started. We have done it at some time in the past. My view is, first, it is wrong in principle because it does have a bunch of people who are lameducks or whatever you want to call them legislating, and that is not a good practice. It is not consistent with the ideals of representative democracy.

Second, it does not seem to produce high-quality work. That I guess is in the eye of the beholder, but in the eye of at least one beholder it smacks of illegitimacy and produces poor results. So I would be hopeful we would not be forced to resort to a lameduck session next year.

Mr. President, again with my appreciation for those who made it possible for us to take even this modest step toward the conference report, I will urge its adoption.

Mr. MOYNIHAN. Mr. President, I rose to say that the matter we bring to the Senate this afternoon from the committee of conference did not begin as a bipartisan effort, but it ended as one, and I would have thought—I could be wrong, and I am happy to hear wherein I was if that is the case—because I certainly did not intend it—I would have thought my remarks were bipartisan. I do not feel that the response of the distinguished Senator from Colorado, who is the chairman of our subcommittee, of which I am the ranking member, were in any way similar to that suggestion on my part.

I see the Senator has returned and I am happy because I would not want to speak in his absence.

The Senator began by referring to the President's proposal to reduce social security by 40 percent in January for persons retiring at age 62—the majority of persons who do retire take their retirement before age 65—as a masterpiece of bad timing. It could have been done, if it had been calculated, a little bit better.

This is reminiscent of a statement made by the Counselor to the President, Mr. Edwin Meese, which was reported in the New York Times of September 25, 1981. Referring to that masterpiece of bad timing, he is quoted as saying:

It was not the policy aspect that was the problem. It was the fact that the selling of it, the marketing of it, which is not my domain, was the problem.

It did not happen on his watch, it did not happen in his part of the operation.

The people who worked to market it were guilty of a masterpiece of bad timing. I think these are remarkably convergent observations.

Let me then take the time of the Senate to read from "The Education of David Stockman." Remember, we said that the proposal to slash benefits by 40 percent did not respond to the crisis of the fund in the 1980's, but to the need to get revenue to offset deficits elsewhere? But here is from page 45, after describing the original proposal, and this is Mr. Greider speaking.

Despite the political uproar, Stockman thcught a compromise would eventually emerge because of the pressure to "save" social security. This would give him at least a portion of the budget savings he needed.

May I repeat this for the benefit of the Senators:

This would give him at least a portion of the budget savings he needed.

Not for social security, not for social security, let me repeat, but to work out the aftermath of the collapse of the Trojan horse.

I continue, and now we are quoting Mr. Stockman:

I still think we will recover a good deal of ground from this. It will permit the politicians to make it look like they are doing something for the beneficiary population when they are doing something to it which they normally wouldn't have the courage to undertake.

Quoting Mr. Greider:

But there was less "courage" among politicians than Stockman assumed. Indeed one politician who scurried away from the President's proposed cuts in social security was the President. Stockman wanted him to go on television again, address the Nation on social security's impending bankruptcy and build a popular constituency for the changes. But White House advisers did not.

Quoting Mr. Stockman again:

The President was very interested in the reform package and he believed it was the right thing to do.

The problem is that the politicians are so wary of the Social Security issue per se that they want to keep him away from it, thinking they could somehow have an administration initiative that came out of the boondocks somewhere and the President wouldn't be tagged with it. Well, that was just pure naive nonsense . . . My view was, if you had to play this thing over, you should have the President go on TV and give a twenty-minute Fireside Chat, with some nice charts . . . You could have created a climate in which major things could be changed."

The White House rejected that idea. Ronald Reagan kept his distance from the controversy, but it would not go away. In September, Reagan did finally address the issue in a televised chat with the nation; he disowned Stockman's reform plan. Reagan said that there was a lot of "misinformation" about in the land, to the effect that the President wanted to cut Social Security. Not true, he declared, though Reagan had proposed such a cut in May. Indeed, the President not only buried the Social Security cut he had proposed earlier but retreated on one reform measure—elimination of the minimum benefits—that Congress had already, reluctantly, approved.

Mr. President, it is not necessary to be partisan about this, but it is possible. Only just this last weekend, the distinguished majority leader of the House of Representatives, speaking about this particular article, asked a painful question. He said:

If the Director of the Office of Management and Budget knew the degree of deception involved in that early proposal, was he the only one in the White House who did?

Perhaps "deception" is too strong a word. And yet "imminent bankruptcy," et cetera, et cetera, et cetera, was used, language that did terrify people. And here it is in print just as we said.

It was nothing to do with the state of the social security fund. It was meant to save money to offset deficits elsewhere in the budget.

Now, that is the fact. It is an acknowledged fact. My Lord in heaven, it usually takes three official biographers before you find out that that is really what Cordell Hull had in mind in 1937. We might have waited until the year 2020 to learn this. But it happens we just learned it a month ago. And what we learned was what we knew.

I did not come to this floor in anything other than a spirit of bipartisan compromise of saying we have done good work and saying there is work yet to be done. But I do not think that what happened last May was a masterpiece of bad timing. I do not share the view of the counselor to the President that it was the marketing of the program, not his responsibility, as he made it. Let me repeat Mr. Meese's statement.

It was not the policy aspect that was the problem. It was the fact of the selling of it, the marketing of it, which is not my domain, was the problem.

Now, in bringing this matter to the floor, after a unanimous decision of the Committee on Finance and a unanimous conferees' vote on the Senate side of the conference committee, I would hope we put behind us a policy, the thought that this was all just a mistake in timing or in marketing. If it continues to be the purpose of the administration and the majority in this body sharply to cut the social security system of our country, reduce benefits of the people now receiving them, then the year has, indeed, not had the success I thought it had.

I thought that when we vote on May 20 by 96 to zero not to do that, that those were good faith votes on the other side of the aisle. And I am sure they were. But I wonder, was that a vote against a mistake in timing or a mistake in policy? Was there, in fact, no mistake in policy but merely bad marketing, bad selling of it?

Perhaps we have not come to the end of our division here. Perhaps there is not a bipartisan judgment that the system needs to be attended to. But can it be, without impairing it? I would hope that that is not so.

But if it is, let it be understood that this side of the aisle is now alerted to that prospect. If we have to smash the efforts next time as we smashed them last time, we will. We are not going to break word with the American people. We put this system in place against a bitter opposition of the persons opposite. And if that opposition, after 45 years, is still there and the face of a 6-month healing effort has not healed at all but simply has become more concealed, only to come up once a decision has been made, well, we shall still be here and social security will still be here.

We went through something that I had hoped we would never go through again—attempt to use the retirement benefits of the American people for the political purpose of offsetting a deficit that came about through political miscalculations, economic miscalculations. That money does not belong to the Budget Director. It does not belong to the Congress or the President. It belongs in the social security trust fund. It is not to be used for other purposes. Attempts to use it were brazen, it was declared in this Chamber, then this was revealed by Mr. Stockman. I came to this floor this afternon to say, "Well, fine that is behind us. We have a bipartisan support. We have worked to do it and we will do it. And if it can be done in a special session, fine. If a special session is not appropriate, fine. But it has to be done. But whenever we do it, ours will not be the work of dismantling the social security system."

And if we cannot have an understanding on that, we shall have war over it. We smashed the last effort; we will smash the next one. We did not do it with any pleasure. We did it out of a sense of duty and responsibility and understanding of this system. We did not put it in place because we did not know what it was.

We know perfectly well that the President's message of May 12 was exactly what Mr. Stockman told Mr. Greider, that it was an effort to give him at least a portion of the budget savings he needed. Now, it is not often in the history of political debate that a charge made in a partisan atmosphere is so quickly confirmed to have been true.

I rose on this floor where the majority leader is sitting on May 20 and said that this is not an effort to save the social security system; that this is an effort to save the collapsing budget prospects of the administration. They knew perfectly well that they were asking for vastly more reductions in benefits and payments in the 1980's than they could ever reasonably think they would need to maintain a balanced fund situation. And then, after the 1990's, social security would go into a period of approximately 25 years of surplus, after which there would be a new period of deficit.

I stood right there and I said that this is not for social security, this is to produce savings in the budget. And in the Atlantic Monthly, you read exactly, within days, that Mr. Stockman was saying that to Mr. Greider.

We have been prepared to forget all about that and say let us ascribe it to the first year in office, which is never the easiest of transition for anyone to make. But if we have not put that behind us, if it is still ahead of us, let it be on the record that we are still here and we are alerted. We are committed to this program. We are not obsessive about it.

The Members on this side went to that conference committee proposing to raise funds to offset the minimum. We have not hesitated to do things that are not easy to do. It is not easy for us to impose on sick pay the ordinary level of FICA taxes.

It is the fact, as I understand it, and I believe I am correct in this, that the original exemption was made in order to encourage the adoption of sick pay provisions. They were not common in the 1930's. They were rare. They are common

now. It is defensible social policy to say that they should be treated as any other income because they are designed to be as any other income.

It would have been easy to say there was not a single chance, but if the effort of May 1980 was simply a masterpiece of bad timing and if it was not the policy aspect of the problem, that it was the fact that the selling of it, the marketing of it, was the problem, then we have a turbulent time ahead indeed. If that is to be, so be it.

Mr. President, I will not detain the Senate any longer. The distinguished ranking member of the Committee on Finance is present, as is the minority leader. I simply want to say I came on this floor in the spirit of compromise and bipartisan understanding of a common responsibility, and I expect that will survive this little exchange. But no one should be proposing that the Members on this side will not be aware of what has been said, alerted to what might be done, and, indeed, if we have to go through the events of the last 8 months once again, we will go through the events of the last 8 months once again.

I would hope, Mr. President, that we could proceed in the spirit of the Finance Committee's original report and the committee of conference, which is a bipartisan effort to secure the system and to restore to the American people a shamelessly damaged understanding of the fundamental soundness of the social security system. It is sound because, as the distinguished Senator from Louisiana has said, Congress will keep it sound. Nothing larger could be said but in the history of human institutions, that is a very powerful statement. I thank the Chair.

The PRESIDING OFFICER. The Senator from Louisiana, Mr. LONG.

Mr. LONG. Mr. President, I support the conference report on the bill H.R. 4331. The main element in this legislation is the restoration of the social security minimum benefit. Under this provision, that benefit will be preserved for all those who are already on the benefit rolls or who become eligible before the end of this month. On several occasions over the past year, I offered and supported amendments to assure that the minimum benefit would not be taken away from those already receiving it. Many of these people are quite old and have been depending on that income for many years. I am pleased that agreement has been reached on legislation to avoid that unfortunate situation.

The conference agreement also includes an extension of social security taxes to cover sick pay. This provision will partially offset the cost to the trust fund from the restoration of the minimum benefit. In addition, the conference agreement allows for interfund borrowing through the end of next year. Clearly further action by the Congress will be needed to assure the soundness of the program, but these provisions do give us some time to take the needed actions. I urge the adoption of the conference agreement.

Mr. DECONCINI addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. DECONCINI. Mr. President, I rise in support of the conference report on H.R. 4331. The conference report does restore the minimum benefit for those presently receiving it and for those who qualified before December 31, 1981. Those retiring after this year would not be eligible.

On at least five occasions a majority saw fit on this floor to oppose the restoration of this benefit. I applaud them for supporting the President's change of heart in this effort and restoring the minimum benefit for those presently receiving it. I wish we had not tinkered with this in the first place. There was no justifiable reason. With strong commitments on a bipartisan basis on both sides of the aisle, the President on many occasions had said this was a safety net and would not be touched. Then we not only touched it but we hammered away at it.

In total, this is an improvement. I think it is best left alone when you have a commitment not to change the basic structures, and I think the social security system is such a basic structure, at least as it relates to the benefit side.

We ought not to be making those alterations.

On the side of financing and the management of those funds there are many alterations that must be considered, but as far as reducing the benefit, raising age limitations, eliminating or substantially reducing the cost of living, we can do better here in balancing the budget.

I just came from the Foreign Operations Appropriations Conference Committee. We will indeed, I suspect, agree on a conference report from that Appropriations Subcommittee that will be a larger foreign aid bill under this administration than it was under the previous administration.

It is hard for me to face retirees, people who have worked and paid in their hard-earned money into the social security system, and then be asked that to balance the budget we must make some alterations or reductions.

I am glad to learn that most of the more onerous provisions in the Senate version of H.R. 4331 have been removed. For example, the offset for those receiving Government pensions was removed during the conference. However, the provision taxing the first 6 months of sick pay remains. This reduction in benefits and the failure to provide minimum benefits for future retirees causes me some concern. But in the spirit of getting the restoration of the minimum benefits, restored almost to what they were, I will reluctantly support the conference report, for unless we pass this measure those presently receiving benefits will have them terminated.

Mr. MOYNIHAN. Mr. President, in order that the record might be clear, might I say that the exemption of sick pay was included in the law in 1939, not in the original 1935 legislation. My understanding remains that it was done to encourage the adoption of this provision at a time when it was not common.

SOCIAL SECURITY

Mr. ROBERT C. BYRD. Mr. President, 2 weeks ago, President Reagan addressed the White House Conference on Aging. In that speech, the President made some amazing statements about the record of his administration on social security.

The President began:

> Maybe you can understand my frustration . . . to be portrayed as somehow an enemy of my own generation. Most of the attack has been centered around one issue, social security.

Less than 4 months into his term, last May, the President asked Congress to cut social security benefits by more than $88 billion over the next 5 years. The administration asked Congress to immediately slash retirement benefits for Americans having to retire before the age of 65 by 40 percent. Eight days after the administration formally proposed its $88 billion benefit cut plan, the Republican-controlled Senate rejected it, by a unanimous vote of 96 to zero. Yet, late into the summer, the administration continued to assume these deep benefit cuts in its budget.

At the Conference on Aging, the President said:

> There's been political demagoguery and outright falsehood, and as a result, many who rely on social security for their livelihood have been needlessly and cruelly frightened.

Again, the President is right. In announcing the administration's plan of $88 billion in social security benefit cuts, it was Health and Human Services Secretary Schweiker who said:

> The crisis is inescapable. It is here. It is now. It is serious.

In defending the administration's May plan, it was OMB Director Stockman who testified before the House Ways and Means Committee:

> The question before Congress is whether the 36 million Americans who currently depend on the Social Security system can count on any check at all in less than two years hence.... The most devastating bankruptcy in history will occur on or about Nov. 3, 1982.

Yet, by the administration's own estimates, the May social security plan called for deeper benefit cuts and greater savings than might be needed to insure the financial solvency of the system. In its plan, the administration appeared to be using the revenues of the social security system to balance the Federal budget.

Many of us read the December issue of the Atlantic Monthly. This time, David Stockman said:

> The Social Security problem is not simply one of satisfying actuaries . . . It's one of satisfying the here-and-now of budget requirements.

At the Conference on Aging, the President said:

> In October of 1980, I pledged that I would try to restore the integrity of social security and to do so without penalty to those dependent on that program. I have kept my pledge and intend to keep it.

Today, we are taking a major step toward helping the President begin to keep that campaign pledge—as many of us have attempted to do throughout this session. The President asked Congress to cut the social security minimum benefit payment for retired Americans as part of his Federal budget-cutting plan. He asked for it and OMB Director Stockman fought for it.

The integrity of social security—and the overwhelming success of the system—is dependent upon the trust, confidence and predictability that promised benefits will be paid. Yet, as part of its Federal budget-cutting bill, in which the Congress was to cut waste, fraud and abuse, the administration asked Congress to take away a basic social security retirement benefit from some 3 million retired Americans.

The minimum benefit was designed to be a safety net under social security, to insure an adequate retirement pension for America's lowest-income workers. Over half the minimum benefit recipients are over the age of 70; 75 percent are elderly women. Over half a million Americans over the age of 80 have been receiving the minimum benefit for at least 15 years.

Democrats in the Senate attempted to prevent the minimum benefit from being eliminated by the administration's budget-cutting bill. OMB Director Stockman fought forcefully and consistently for complete across-the-board repeal. In an official statement, OMB described the pension payment as a "pure windfall for recipients," saying that financially needy retirees had a safety net of public welfare assistance to fall back on after their hard-earned retirement income was slashed.

On at least five votes in the Senate this year, Democrats fought to prevent elimination of the minimum benefit. Five times, we were defeated by Members from the other party, marching in lockstep to David Stockman's marching orders. Senate Democrats would have welcomed Republican votes in the fight to preserve the benefit, but partisan politics, directed from the OMB, resulted in partisan votes time and time again, on this, as well as other matters.

Two months after the House voted 404 to 20 to restore the minimum benefit cut—hardly what one could characterize as a partisan vote—and on this same night that Senate Democrats had been defeated, by only two votes, in their fifth attempt to preserve the benefit, the White House changed its mind and asked that the benefit be restored.

This change in thinking came only after it became clear that Democrats would not give up on this question—that the issue would not go away—and after it was clear that Congress would eventually act to restore the payment. Such action was inevitable.

In times of a partisan Senate, where straight party line votes seem to be the order of the day, this bill represents a victory where victories, for Democrats, appear to be scarce. And it is a victory to cherish because it is one springing from legitimate and strongly held policy disagreements regarding the future of social security.

It is a victory of the senior citizens of the country and I congratulate the Senate on what will soon be a vote to restore that minimum benefit payment.

Mr. President, I ask unanimous consent that a part of the special report of the Democratic Policy Committee listing the votes this year on the minimum benefit be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

SPECIAL REPORT

SOCIAL SECURITY VOTES, 1981

Minimum benefits

No. 50 Riegle, et al, amendment to restore $800 million in 1982 outlays and $900 million in 1983 outlays to maintain current payments for Social Security minimum benefits and offsets these amounts by savings in administrative costs. Defeated 39 to 55. 91 percent of Democrats voted yea; 100 percent of Republicans voted nay. (S. Con. Res. 9, Budget Reconciliation, 1981–83, March 30, 1981)

No. 160 Riegle, et al, amendment to limit repeal of Social Security minimum benefit to new beneficiaries. Defeated 45 to 53. 89 percent of Democrats voted yea; 92 percent of Republicans voted nay. (S. 1377, Omnibus Reconciliation, 1981, June 23, 1981)

No. 207 Dole motion to table Riegle, et al, amendment to restore Social Security minimum benefits to persons enrolled prior to December 1981. Tabled 52 to 46. 91 percent of Democrats voted nay; 92 percent of Republicans voted yea. (H.J. Res. 266 (H.R. 4242), Economic Recovery Tax Act of 1981, July 21, 1981)

No. 248 Chair ruling that Moynihan, et al, motion to bring up bill to restore Social Security minimum benefit is not in order in that no bill from the House may be considered on day received unless by unanimous consent. Chair sustained 57 to 30. 79 percent of Democrats voted nay; 100 percent of Republicans voted yea. (H.R. 4331, Social Security Minimum Benefits, July 31, 1981)

No. 249 Robert C. Byrd motion to adjourn for one minute as a means of considering Social Security Minimum Benefits bill. Motion rejected 37 to 49. 95 percent of Democrats voted yea; 100 percent of Republicans voted nay. (H.R. 4331, Social Security Minimum Benefits, July 31, 1981)

No. 284 Hatfield motion to table the Sasser, et al, amendment reducing the travel budgets of non-defense agencies, taking with it the second degree Chiles, et al, amendment continuing Social Security minimum benefits for current recipients. Tabled 46 to 44. 95 percent of Democrats voted nay; 92 percent of Republicans voted yea. (H.J. Res. 325, Continuing Appropriations, 1982, September 24, 1981)

No. 315 Passage of bill restoring the minimum benefit for current recipients except those with monthly government pensions in excess of $300 and allowing interfund borrowing. Bill passed 95 to 0. (H.R. 4331, Social Security Minimum Benefits, October 15, 1981)

Mr. MOYNIHAN. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Yes, I yield.

Mr. MOYNIHAN. Mr. President, I congratulate the minority leader, who has been steadfast in this matter, without whose leadership and conviction there would be 3 million Americans, a third of whom are over 80 and have no other source of income, whose meager incomes would be substantially reduced. That is meager. It is not hyperbole. We are talking about poor people who would be reduced to welfare and are not now. If the distinguished minority leader goes home for Christmas with nothing else to look back on for the year, it would be a more than successful one for any normal person, not that he is not a normal person, but even so, I thank him.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator, who, as ranking member of the Senate Committee on Finance, led the way, offered the amendments, was chief sponsor and author of the amendments, and provided the direction for the rest of us to follow. I personally thank him. The Senate is in his debt. The elderly citizens of this country will never cease to remember the services he has given in this regard.

Mr. DOMENICI. Mr. President, I yield myself 2 minutes.

Mr. President, I shall vote for this conference report that restores the social security minimum benefit, permits interfund borrowing among all of its trust funds, and makes other changes. The President has given his support to this bill and it obviously has broad congressional support.

However, as I said when the committee bill was considered on the floor, I am truly disappointed that we cannot agree on a wider range of proposals necessary to the soundness of social security. After all that this Congress has accomplished, we failed on perhaps the most important issue facing us. The bill today is merely a bandaid on a very serious wound.

I am also disappointed in this report from a budget standpoint. This bill will cost about $400 million in fiscal year 1982, undoing a portion of reconciliation. We are also conceding that the $4.2 billion in additional social security savings assumed in the first and second concurrent budget resolutions cannot be achieved.

Chairman DOLE plans on considering further changes to social security in the near future. I congratulate him and the other Senate conferees for their commitment and dedication.

Let us face a few realities, Mr. President. This bill does not solve the underlying financial problems of the social security system. The President knows this; the Congressional Budget Office has stated this; the House and Senate know it; and the public had better understand it. We will have to act again, and soon, to save the social security system and reassure millions of elderly and disabled recipients that their benefits will continue.

How soon? Mr. President, the estimates vary. Depending upon the estimate, social security could be in deficit in 1983 even with the legislation now before us. It all depends upon the economic recovery of the country. If economic conditions are even slightly worse than projected, we could be facing urgent social security financing problems even sooner.

I have confidence that Chairman DOLE and the Finance Committee can muster cooperation on this issue. I truly hope that everyone in this Chamber will join in support of the committee's efforts to address the social security financing dilemma. No partisan benefit will accrue to anyone if we allow social security to go bankrupt.

The administration has clearly indicated its willingness to discuss and consider all possible solutions to social security. I think that is a wise judgment. Social security must be separated from partisanship and discussed in an open and honest manner.

But Congress must show responsibility and act soon. Frankly what we are doing today is a short-term quick fix which contributes very little to solving longer-

run problems. The next time we work on social security, Congress will need to be far more courageous than it is being today.

Mr. President, it is interesting. I was not present when all the remarks about what has gone on in the past regarding the minimum benefit episode were given, but I think everyone should understand it from the standpoint of the single most important issue about social security, which is the solvency of the trust funds. It is interesting to note that when you finally analyze what has been done, this has been an excellent exercise in solvency, because the end product means that Congress will take care of what they perceive to be a commitment, and also, on a net basis, the trust fund is not going to lose any money over the next 3 years.

Regarding the major solvency problem that we are going to confront, I do not construe this present episode and one excellent exercise to solve a great deal of the solvency problem. But it is interesting for all that has been said here on the floor, and from the little I have heard, that there was some intent to hurt people and that we should live up to our commitments. As a matter of fact, some additional revenues were found; some changes were made and what we have now is a minimum benefit acceptable to everyone that at least does not cause the trust funds any further deficits in the next 3 years.

Mr. MOYNIHAN. Would the Senator yield for one remark? I simply want to express the appreciation of the conferees and the Committee on Finance for his generous comments.

Mr. DOMENICI. I am sorry, Mr. President. I did not hear Senator MOYNIHAN.

Mr. MOYNIHAN. I simply want to express the appreciation of the conferees and the Committee on Finance for his generous comments.

Mr. DOMENICI. I say, thank you very much, to my good friend from New York.

Mr. MOYNIHAN. I hope my friend from New Mexico has not developed a hearing impairment with respect to kind words.

Mr. DOMENICI. Mr. President, my head is so filled with numbers that I unintentionally immunized it from kind remarks. I apologize.

Mr. President, I believe the central issue that we are going to have to face up to, and I guess each could say it in his own way, is indeed, are we going to live up to a commitment to the social security recipients of this country? Perhaps there are different ways of looking at that. I think the central issue is not of a budgetary nature but that this commitment is to the solvency of the fund, both the solvency of the medicare fund and of the fund that disburses the retirement and disability checks to our millions and millions of beneficiaries.

I regret that people constantly state that there is no real budget reason for looking at it. I want to state from my standpoint, Mr. President, the only reason that I think it relates to the budget is that we must address the nature, the quality and quantity of the reserve that is established to assure the commitment to pay benefits. That is what makes it part of budgetary debate. I want the Senate to know that this Senator does not look at it as chairman of the Budget Committee, from the standpoint of balancing budgets. But I say, I cannot disassociate, unless you want to take that out from under the budget of the U.S. Government, the responsibility for prudent reserves, stability of all three trust funds from budgetary consideration.

It was Lyndon Johnson who put social security into the consolidated Federal budget, and many people think it should come out. I do not think so. I believe that a budget item of this magnitude, with solvency of the trust funds, is indeed an integral part of looking at the Federal budget. Since that solvency is impacted by economics, by unemployment, by the level of employment, by growth, by inflation, and by interest, it certainly should be considered in the total package as we look at and share our responsibility, as a Budget Committee, to this institution and to the American people.

It is in that context that I hope those who are standing on the floor, on both sides of the aisle, saying that they are concerned about social security, will join hands, rather than forming some kind of irreconcilable chasm between us.

If we focus on the reality of the solvency of the fund and address that issue as we look at social security, I can assure you that we will have joint efforts at living up to the commitment everyone is speaking about. The commitment is not for the next 10 years. It is not just to those who are beneficiaries. It is also to those millions upon millions who are paying into that fund now and will be paying for 20 or 30 years. Both must be assured that the fund will be there to make its basic payments and live up to its basic responsibility.

Mr. MOYNIHAN. Mr. President, I say to the chairman of the Budget Committee, of which I am a member, that he makes perfect sense in what he has said.

An expenditure of this magnitude cannot be neutral with regard to the budget. It is part of the activities of the Federal Government, whether you print it in one volume or two. Generally speaking, it is desirable that there be an adequate surplus in the trust funds—probably not a huge surplus.

I can imagine some future budget director about the year 2010 finding that social security payments are taking more money out of the economy than he would wish to be the case. It could happen. It certainly is the case that for many years Presidents had a rather easy time of things because there was that small but not insignificant surplus.

The Senator from New York would not contradict anything the Senator from New Mexico has said.

Mr. DOMENICI. Mr. President, I say to the Senator from New York that I think where we may differ in the future, and it will all come out as his committee, under the leadership of the distinguished Senator from Kansas—and when the blue ribbon commission is actually operative—the differences will come out only with respect to how critical is the solvency issue. Is it 10 years down the line? Is it 3 years? Is it 15 years? Have we, by interfund borrowing, brought the proximity of insolvency closer? Is there some way to once again disassociate the two? But, obviously, sooner or later, we have to address that issue.

I wish we never had to do so. I wish I could stand here and say you did not have to raise any revenue to offset the cost of the minimum benefit, but you did. I do not think you did because you like to go through an exercise in raising revenue. I think you went through it because there is a genuine concern on the part of your committee, and obviously on the part of your counterparts in the House, that we cannot afford any significant outlays, at least without maximizing that day of reckoning.

That is what I said in commending the Senator.

Obviously, that is a different situation from the one we had when we started reconciliation some 7 or 8 months ago. We had the minimum benefit, with no new revenues. It was broader when you brought it back, and you narrowed it somewhat and paid for it. With the interfund borrowing, and no other kinds of reforms being looked at for a while, how close is the system to insolvency or serious solvency problems?

I think you could have a date in mind today and be absolutely looking at the facts as you see them. I could have a closer date in mind as to when that would occur, and I think I would be entitled to the same.

I hope that, in the next 24 months, we will arrive at the same conclusion, or that a compelling majority of both Houses will arrive at the same conclusion, with reference to this, and then address it.

Mr. HUDDLESTON. Mr. President, I support the pending conference report which would restore the social security minimum benefit to some 3 million beneficiaries nationwide. It is a benefit which never should have been repealed in the first place, and I am pleased that this body and the administration are finally giving the serious consideration due to a proposal to reinstate it. The House has already voted to do so, and I believe that we in the Senate have the responsibility to do the same.

The American people support the concept of reduced Federal spending, and on the whole, judging from the countless people I have heard from in Kentucky, would support some rational adjustments in the social security system if need be. It is the irrational cuts, particularly that of the minimum benefit, that they are not willing to stand by and support.

The financing of the old age and survivor's insurance trust fund does need to be strengthened; no present or future statistics dispute this. What is more, anticipated problems may surface much sooner than we would like to believe. All this depends on the ability of the economy to rebound and respond to what we all hope will be the successful effects of

the administration's economic policy on this country.

At issue, however, is not whether changes should be made, but how. I believe and have consistently stated that this can and should be achieved without severe reductions in benefits to those now receiving them and without reducing promised protection for those now contributing to the program. The massive and piecemeal cuts proposed by the administration to solve the problems facing the social security system have done just the opposite; they have been examples of using a meat ax instead of a scalpel to perform necessary surgery.

In the President's televised message to the Nation on September 24, we finally had a glimpse of what the administration has meant all these months in its referral to the truly needy. In fact, the main impact of the proposal to repeal the minimum benefit would fall on somewhere around 1.3 million elderly poor beneficiaries who would be forced to find other sources of assistance, most probably SSI or some form of State welfare.

It does not seem to me to be good, sound policy to deny benefits to elderly poeple who have been living for years on benefits we have pledged them and who have no ability to otherwise compensate for the loss of income proposed. And forcing them onto welfare or State public relief rolls is not the answer either.

There are other ways to bring the social security system out of immediate threat of insolvency than to drastically cut benefits to individuals who were paying into a system that claimed it would aid them in their retirement. I believe that the interfund borrowing mechanism endorsed by the Senate Finance Committee, and more recently, by the President, is one which will allow us to take a serious and indepth look at the long-term financing of the system without placing the bulk of the responsibility of these problems on those least able to bear it.

I believe too that the 15-member task force proposed by the President will now have the time and resources which are integral to the formation of reasonable and workable answers to the future of social security.

Mr. President, the American people, by electing us to represent their interests in Washington, placed a trust in us. They have every right to expect us to uphold that trust, and in fact, to insist upon it. They have already experienced a violation of that trust in an administration that promised no changes in social security and then pushed through to passage benefit reductions which would collectively constitute the most severe cuts in the history of the system.

The implications for such a blatant violation of that trust are very serious. Should the American people get used to this game of chance where the tables can turn on them in the matter of seconds? I believe not. I urge my colleagues to join in this effort to restore the minimum benefit to those now receiving it and in so doing, some of the lost confidence and trust of the American people in their elected representatives.

Mr. HEINZ. Mr. President, first, I commend the manager of this bill.

I note the presence on the floor of several Members who have been instrumental in bringing about this work product—the chairman of the Finance Committee, Senator DOLE; the chairman of the subcommittee, Senator ARMSTRONG, who now occupies the chair; the ranking minority member on the subcommittee, Senator MOYNIHAN.

Senator DOLE and Senator MOYNIHAN are not occupied with the responsibilities of the chair at this moment, and I wish to bring to their attention a problem that was brought to my attention earlier today regarding page 13 of this bill, where I believe there has been an inadvertent drafting error.

I think Senator MOYNIHAN and Senator DOLE will recall a discussion involving ourselves and Mr. Spahn, and I think the transcript of that discussion will show that at our meeting of the conferees on this bill yesterday, we had reached a clear understanding that the waiver of interest and penalties referred to in section 3(f) of the bill would be granted automatically in all cases of the delinquent payment of the payroll tax on sick pay prior to June 30, 1982, unless it could be shown that late payment was due to willful neglect.

I ask my colleagues if that was their understanding as well.

Mr. DOLE. That is our understanding.

First, I thank the distinguished Senator from Pennsylvania, one of the conferees, for raising this issue in conference. He is correct. There is a drafting error that failed to remove the words involving "reasonable cause." That was the agreement reached by the conference.

It was the view of the conferees that the tax should be made effective in January and that interest and penalties for failure to comply should be waived for 6 months unless the late payment is due to willful neglect.

Mr. MOYNIHAN. That is my understanding, too.

Mr. HEINZ. I think the record we make here is clear: that there is no burden on the employer in having to show that he has reasonable cause. The burden, as I understand it, would be on the enforcement agency of this bill to show willful neglect.

Mr. DOLE. That is the understanding of the chairman of the conference, and I think it is the understanding of the other conferees.

Mr. MOYNIHAN. That is the understanding of the Senator from New York.

Mr. HEINZ. I thank my colleagues. I appreciate it.

Mr. President, the conference report now before the Senate is one which I suspect everyone in this Chamber will be able to support. With this action we can end the discussion of the minimum benefit and act positively to assure that the 3 million individuals who now rely on this $122 a month to continue receiving it without interruption. While I am pleased that we can at last send this bill to the President, I am disappointed that the Congress has been unable to agree to any measures which could help alleviate social security's pressing financing problem.

It was my hope, and I believe the hope of my fellow conferees on this bill, that we could retain the minimum benefit without losing any of the short-term savings we achieved in the Omnibus Budget Reconciliation Act earlier this year. This bill was never intended to provide any solution to social security's short-term problems, but it should have at least been neutral in its impact on the trust funds. Unfortunately, this bill not only does nothing to improve the trust funds, it actually ends up costing the trust funds $1.7 billion between now and 1986. Given the highly charged atmosphere surrounding the social security issue this year, I am persuaded to conclude, albeit reluctantly, that this package is the best compromise we can expect. At least it leaves us with no illusions—it can not get social security through the decade, it cannot even get it through the next 5 years. In fact, the Congress will be lucky if we are spared the agony of wrestling with social security again before the next election.

Mr. President, this bill does nothing to lessen the urgency of social security's financing problems. Interfund borrowing for 12 months only postpones the inevitable depletion of the old age, survivor's and disability funds until the end of next year. Before then the Congress must come to grips with the need for additional revenues or savings in the old age and survivors insurance and the hospital insurance program.

Even if we had authorized interfund borrowing until the end of the decade, we would still only have about 97 percent of the revenues needed in all three funds to cover outlays and maintain a 2-month reserve cushion under intermediate assumptions. I consider this an optimistic assessment. In fact, if you look at the performance of the economy this year, it is clear that we will be lucky to see an economy as healthy as the intermediate assumptions forecast.

This year's price increases appear to be exceeding wage increases by more than was forecast. And the rising rates of unemployment and declining growth rates are cause for concern in reviewing next year's forecasts.

The real problem in social security, however, is not the short term deficits in OASDI. These deficits are small by comparison to the deficits we will see in medicare in the next decade; and they are temporary. After 1990, an already scheduled increase in the payroll tax rate will restore the solvency of OASDI for another 25 years. At the same time, medicare will be headed for imminent and permanent depletion. We cannot allow this to happen. Medicare has been the foundation for improved health care for millions of older men and women. It has vastly contributed to the better health that now prevails among the elderly and it is vital to their continued well-being. But if we look beyond this decade, we can clearly see that medicare's financing problems dwarf the difficulties we have in OASDI, either short range or long range. Between now and the turn of the century, OASDI will actually have on average an annual surplus, while medicare will have, on average, large annual deficits twice as large as the surpluses in OASDI.

In the next 25 years, under intermediate assumptions, OASDI will average a surplus of $8.1 billion a year in constant 1981 dollars. Over the same period, the hospital insurance fund will average a deficit of $16.1 billion a year (constant dollars). If you extend the period to 50 years or 75 years, the differences are even more extreme. For instance, over the next 50 years, the average annual deficits in HI are 10 times as great as those in OASDI.

The medicare financing problem, and the short-term and long-term deficits in the old age, survivors, and disability insurance programs are now matters to be taken up by the bipartisan task force the President called for in his nationally televised speech on September 24. I urge the task force and the Congress to work quickly. The confidence of the American people in social security and in the Congress is dwindling rapidly. It is unfair to those who have retired and those about to retire to keep up this atmosphere of alarm and uncertainty indefinitely. And ultimately, it can only weaken public support for the social security system to drag the country through these prophecies of gloom and doom year after year. This bill will give the Congress a brief respite we need from the politics of social security to consider options for resolving the system's problems. I urge my colleagues to support this conference report and then to take advantage of the opportunity this affords us for addressing social security's problems more objectively in the next session.

Mr. DOLE. Mr. President, it is my understanding that there is an agreement that there will be no vote before 4 o'clock. Is that correct?

Does the Senator from New York know of other speakers on his side?

Mr. MOYNIHAN. I am not aware of any.

Mr. DOLE. Mr. President, I thank the distinguished Senator from New York and others who have participated in the discussion—the Senator from Colorado, the Senator from Pennsylvania, and others. The Senator from Kansas was necessarily absent for about 30 minutes.

Mr. President, we have a responsibility, those of us on the committee and those who may serve on the task force—I understand that some in this body will be on that task force—to come to some resolution of this very important problem.

We were told in the last few days that we will soon reach the point when social security will take up about 23 percent of the total budget. It is a large item that needs to be addressed.

I do not suggest, as the Senator from New York has indicated a number of times, that we should balance the budget on the backs of social security.

That is not in the interest of current beneficiaries or future beneficiaries. But all of us certainly have some responsibilities to restore the solvency of the social security program. I hope we can soon go to work in that area.

(Mr. HEINZ assumed the chair.)

Mr. MOYNIHAN. I wonder if I could ask the distinguished chairman what has he heard about the status of our task force, commission, board of inquiry?

Mr. DOLE. The Senator from Kansas understands it is about to be hatched.

Mr. MOYNIHAN. About to be hatched?

Mr. DOLE. Not axed but hatched.

Mr. MOYNIHAN. Is it hoped that the Senator from Kansas is to be a member?

Mr. DOLE. That is a possibility, but I cannot speak for the majority leader. I base my supposition that the appointments will soon be made on the fact that we are at the end of the session. There is some effort to conclude that procedure before the session ends.

Mr. MOYNIHAN. May I say it has been suggested to me by the minority leader that I be a member, and I said I would be proud to serve on it. I hope the President will be careful about the persons he chooses, and I know he will be. There is a long tradition of bipartisan concern among both parties. There are persons of experience in both parties, and I hope we might see a mixture in the Executive appointments that reflect that 45 years, and I am sure we will.

Mr. DOLE. Right. The Senator from Kansas heard a number of names under consideration, including such constituents of the Senator from New York as Alan Greenspan and others with considerable knowledge in the area.

Mr. MOYNIHAN. Alan Greenspan would be a superb appointee from some point of view. He is not likely to make my life easier, but he might sharpen my wits a bit, as he frequently does.

Mr. DOLE. It is only a rumor. I like to start rumors if I cannot do anything else, and I can start a few rumors while we are waiting to check out the votes. I understand that process is now under way.

The Senator from Iowa (Mr. JEPSEN) is on his way to the floor to make a brief statement on the conference report. So while he is about to enter the Chamber I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. JEPSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JEPSEN. Mr. President, a great deal has been said on the floor today regarding the real status of the social security trust funds. In addition, we have heard Members tell us how it was only through the efforts of our Democratic colleagues that the minimum benefit was saved. I think it important, Mr. President to try and get this whole issue in perspective. I do this, because it is my solemn desire, along with my colleagues, to see social security handled in a bipartisan manner. I am afraid, however, that in light of the comments made here this afternoon, this may prove difficult.

I therefore would like to quote from a Democratic study group report. It is a fact sheet dealing with social security.

It is a factsheet dated October 17, 1977, from the Democratic Study Group. These are the Democrats now in 1977, and the factsheet reads as follows:

The social security system currently faces two financing crises, long term and short term. Since 1975, due to the high rates of unemployment (which curtail social security revenues) and the equally high rates of inflation (which cause increases in social security benefits), the OASI and DI trust funds have experienced annual deficits; i.e., expenditures have exceeded income. Thus, the funds have had to eat into their reserves. Projections show that if no action is taken, the DI trust fund will be exhausted in 1979 and the OASI trust fund will run out in 1983.

The long term crisis is primarily caused by the sharp decline in the birth rate, along with an increase in average life expectancy and a trend toward earlier retirement. These trends mean that the number of people working and paying social security contributions in the future will be smaller in relation to the number drawing benefits. For example, today there are about three workers for every person getting social security benefits; the next century is expected to have only about two workers for every beneficiary. Consequently, the cost of the program per worker will rise.

What is most important about this statement, Mr. President, is the fact that it was made in 1977. The date of this factsheet is October 17, 1977.

The other point I would like to make, Mr. President, deals with the social security minimum benefit. Included in this same report is a list of amendments to be offered by House Members. Under the following heading "Minimum Benefit," the following Democratic proposal appears:

MINIMUM BENEFIT

If the universal coverage provisions are stricken from the bill, Rep. Corman will offer an amendment to eliminate the minimum benefit from the social security program.

Arguments for the Amendment.—Proponents of the amendment argue that if universal coverage is striken from the bill the minimum benefit must be eliminated to address the problem of "double dipping." Eliminating the minimum benefit will cut off the windfall social security benefits received by many retired civil servants. The minimum benefit is often paid to governmental employees who either moonlight or retire early and work just long enough under social security to meet the minimum eligibility requirements. As of December 1975 about 45 percent of civil service retirement annuitants also received social security benefits, and more than a quarter of them were receiving the minimum.

As we all know, Mr. President, universal coverage for Federal employees was not enacted. Thus, the Democratic alternative to this proposal was elimination of the so-called minimum benefit.

As I mentioned when I began my remarks, I would hope that social security could be dealt with in a responsible, bipartisan manner. Unfortunately, the rhetoric which has surrounded the debate thus far has only served to muddy the issue. Instead of trying to lay blame for the problems, for surely social security has been in trouble for a long time, we should lay aside the rhetoric and get down to restoring the system to its proper financial stability.

I thank my colleagues for listening to these interesting comments made by the Democrats in 1977. I think it gives us all some food for thought.

I thank the Chair.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. JEPSEN. Yes.

Mr. DOLE. I want to thank the distinguished Senator from Iowa for bringing

that material to the floor. There has been on the part of some on the other side—not all—a suggestion that somehow Republicans dreamed up this elimination of the minimum benefit. Some suggest that we are heartless and cold and do not care about low-income Americans. But by eliminating the minimum benefit we were trying to address some of the problems outlined by the distinguished Senator from Iowa. We did not give up until we got to conference on the theory that if, in fact, you have a sizable Federal, State, or local pension, you should not also receive a minimum benefit. You should receive your earned benefit but not the minimum.

But the House would not accept that. I only regret that I did not have that DSG document in conference. It would have been very helpful, and I appreciate the Senator from Iowa's diligence in furnishing this material.

Hopefully, those who cover this story will take note of the history of the minimum benefit elimination and will properly indicate that there are politics in social security. There always will be.

But, as the Senator from Iowa points up in his final statement, we do have a bipartisan obligation. I do not believe most senior citizens really care, when it comes to dealing with social security, what our party affiliation may be. I do not believe that the 115-million working Americans, Americans paying into this system, are interested so much in politics as in trying to find some way to preserve this system.

Based on the statement by the Senator from Iowa and others today on the Senate floor, I hope that we will accept that responsibility.

Social security is a highly politicized issue, no doubt about it. We can lay the blame in a number of places. The point is we have not addressed the social security problem. It is a matter of great concern to the Senate Finance Committee. I do regret, as chairman of that committee, that we have been unable to make any movement on social security except for the few changes made in the reconciliation bill. These changes were largely due to the efforts, I might say, of the chairman of the Budget Committee and others.

So we are going to do our best to work with Republicans and Democrats to forge meaningful change in the social security program—not to cut benefits but to restrain the growth in some areas so that those who now rely on social security and will rely on the program in the future can be assured that the system is sound.

To conclude, I urge my colleagues to support the conference agreement in full knowledge that the possibility of insolvency is right around the corner. The near-term financial condition of social security is revealed most clearly by recent projections of the "trust fund ratio"—the ratio of reserves in the system to the potential payout. In a sense, this statistic tells us whether we have sufficient money to pay benefits.

The historic level of these reserve ratios is instructive and points to the need for financing reform. We have always felt we should have a "fully self-sustaining" system—that is, enough money on hand to insure benefits can continue to be paid without interruption.

In 1950, we had a fund reserve equal to 10 years worth of benefits. The reserve ratio was 1,157 percent of potential payouts. In 1960, the ratio was 186 percent. In 1970, the ratio dropped to 94 percent, and many in public life were quite concerned that the system was less than secure. In 1975, the combined fund ratio dropped to 68 percent, and after a major financing bill was passed in 1977, the ratio fell to 29 percent at the beginning of 1980, and to 23 percent at the beginning of this year. It now stands at 20 percent of annual outgo—just 2 months worth of benefits. It is projected to fall continuously.

If the reserve ratio ever dropped below 9 percent, the fund would not have sufficient funds to pay the benefits in the upcoming month. This is a tragic situation that should never be allowed to occur.

Some have said that we have no short-term financing problem because under current law, or as in the conference agreement, reserves should "only" fall to the range of 12 percent of the projected payout in 1985, according to CBO. This is simply not enough money to slip by, however.

The CBO believes that if we start a year with as little as 12 percent of needed funds, the normal swings in income to the fund that occur from month to month will plunge the ratio below 9 percent during the year. That is, the normal swings in income to the system, due to such factors as changes in the unemployment rate, will probably not permit the payment of benefits during 1985. If the CBO economic assumptions are at all optimistic, of course, then we will have a serious problem much sooner.

CBO does not believe we will slip through with current law and this package. As I have stressed on several occasions, we have a short-term problem of major proportions that we are not addressing here.

I thank my colleagues.

Mr. BRADLEY. Mr. President, I am pleased to vote today to restore social security minimum benefits to current beneficiaries and to those who become eligible by the end of 1981.

The administration's insistence on ending the program threatened significant hardship for many low-income elderly individuals and couples who count the $122 monthly minimum benefit as an important source of income. Even the administration admitted that over half a million beneficiaries had incomes low enough to qualify them as "truly needy" and make them eligible for other assistance programs. But the administration excused this sudden harsh action by saying that these older Americans could simply go to their local welfare offices, stand in line, cope with the many confusing forms, document their income and expenses, and eventually receive aid.

The fact is that these older Americans would be sufficiently discouraged or embarrassed by these requirements that not very many of them would apply for aid. The administration admitted as much—rather cynically, in my opinion—when they estimated that the cost of new assistance for these eligible low-income elderly would not be very great due to this discouragement factor. Phasing out the program was never considered; the administration wanted up-front savings and only total elimination of the program would bring the dollars needed to offset the administration's growing budget deficit.

Mr. President, despite Democratic attempts to continue social security minimum benefits to current recipients, the Congress did pass the administration's proposal to eliminate the program in the Reconciliation Act last summer.

However, as legislators began to hear from their constituents about this particularly rash bit of budget cutting, they started questioning the wisdom of ending minimum benefits for those already receiving them. The result is the legislation now before us for final passage, which would undo the earlier harmful action. Moreover, this legislation would not discriminate against those beneficiaries who are receiving Government pensions, earned through many years of dedicated public service. Nor would it reduce family benefits, as earlier proposed.

Mr. President, today we have the opportunity to correct a mistake. Many older Americans have endured months of worry about their financial status. That worry should never have plagued them; the administration's proposal should never have been passed. Mr. President, I am pleased to join my colleagues in easing the minds of these older Americans by restoring the social security minimum benefits on which so many of them depend.

Mr. DECONCINI. Mr. President, I am pleased to cosponsor S. 1944, a bill introduced by Senator LEVIN which amends title II of the Social Security Act to provide that disability benefits cannot be terminated prior to exhaustion of administrative remedies unless current medical evidence substantiates such a termination.

According to a newspaper report, the administration recently estimated that up to 25 percent of those receiving social security disability payments are physically able to work. The article went on to say that John Svahn, Social Security Administrator, told a House subcommittee that of 55,000 final decisions made by the end of September, 26,000 were ordered taken off the rolls. Mr. Svahn was quoted as saying that a substantial number of appeals are anticipated.

I do not believe that too many would quarrel with the proposition that those who are capable of engaging in "substantial gainful activity" should not be receiving social security disability benefits—I would not. Thus, the administration's effort to ferret out those who should not be receiving disability benefits is commendable. However, even the most avid ferreter, one assumes, would have the necessary medical evidence to document a termination of one's disability benefits.

Apparently, current medical evidence is not high on the priority list of those

who have the responsibility for ferreting. In a survey of those most familiar with the review process for making an eligibility determination several cogent conclusions were reached. This survey conducted by members of Senator LEVIN'S staff resulted in the following conclusions.

First. Persons have been terminated from the Disability rolls even when they meet the medical listing of the Social Security disability program.

Second. Hundreds of terminations were the result of staff error. Hundreds more were as a result of arbitrary decisions rendered by overworked, untrained staffers.

Third. State agency employees revealed they were instructed to meet quotas.

Fourth. Beneficiaries are being terminated from the rolls even in some cases where the findings of the consultative exam and the treating physician is that the patient cannot even perform the normal day to day functions of living. Many of these terminations were beneficiaries over the age of 55, with a good work history prior to their disabling condition and had been on the rolls 2 or 3 years.

Fifth. Beneficiaries are being terminated from the rolls without any current medical findings. Determinations are being made based on file findings—in many cases there has been no physical-medical examination of the beneficiary from 6 months to 1 year or more.

It is appalling that numerous terminations of disability benefits are based on scanty or no medical evidence at all, and in many instances are arbitrary decisions of overworked and untrained staff, made because a quota must be met. Further, these kinds of decisions affect some of the most vulnerable of our citizens. The National Commission on Social Security in its final report stated:

Those receiving Disability Insurance benefits tend to be older workers; 73 percent of those on the Disability Insurance rolls at the end of 1977 were over the age of 50; 58 percent were over the age of 55. Many have progressive impairments that are not likely to be reversed. Many have limited educations and job skills and few prospects for transferring to new occupations before retirement.

Mr. President, it saddens me that lives must be severely disrupted and in some cases taken before we feel compelled to act. Senator LEVIN cited in his introductory statement, as I did in the RECORD last February, the suicide of an Arizona constituent who took her life 2 days before an appeal reversal decision arrived in the mail. Other similar examples, both in Arizona and throughout the Nation, could be given, but rather than such recitations, what is needed is prompt actions on S. 1944.

What could be more fair, more equitable, more humane, than to simply require that disability benefits should continue through the appeals process unless a current medical examination attests to a change in the medical condition of the beneficiary which would support the conclusion that the beneficiary is capable of engaging in substantial gainful activity. I urge my colleagues to support S. 1944.

Mr. MITCHELL. Mr. President, the conference committee on the minimum benefit has taken a number of positive steps. First, it has restored the minimum benefit for all current beneficiaries. Second, it has averted a crisis in the financing of the social security system next year by authorizing borrowing among the three trust funds. Finally, it pays for most of the additional costs incurred by the restoration of the minimum benefit through a reform in the treatment of sick pay.

Based on President Reagan's original budget request, the Congress eliminated the minimum benefit for all beneficiaries in the Reconciliation Act. I opposed this action, both in the Finance Committee and on the Senate floor. Although budget cuts are necessary, they should not come at the expense of the neediest of the elderly. Many individuals changed their employment and retirement plans, based on the expectation of receiving the minimum benefit. Recalculating the benefits of these retirees imposes a major burden and breaks a commitment made by the Federal Government.

The conference version of the bill is much more equitable than the action taken in the Reconciliation Act. The conference version restores the minimum benefit to all retirees who would have been eligible for minimum up to January 1, 1982. Most of the additional costs resulting from this move will be covered by extending the social security payroll tax to the first 6 months of sick pay.

I am pleased that the conference retained an amendment that I offered in the Finance Committee. This amendment delays the effective date for elimination of the minimum benefit for members of religious orders by 10 years. These individuals are much more likely to have work histories in covered employment that result in earned benefits less than the minimum. This is due to vows of poverty these individuals take and because they have been covered by social security only since 1972. I believe that these circumstances are unique and that this legislation should reflect that fact. I am also pleased that the conference version does not single out retired Government employees to receive less than the minimum benefit. The Senate version would have reduced the minimum benefit for retired Government workers by the excess of their pensions over $300.

Another important provision of the conference version is the 1-year authority for interfund borrowing. Even under optimistic economic assumptions, a transfer of revenues among the three trust funds would have been necessary to avert a financial crisis in the social security system in the near term. A shortfall was forecast for the retirement fund because the Congress, when it last allocated the payroll tax rate among the trust funds, did not earmark a sufficient amount of revenues for the retirement fund. This problem is best addressed by allowing a transfer among the trust funds rather than by cutting benefits or increasing taxes.

I commend the conference committee for its actions. It has addressed the most pressing issues facing the social security system. With no action, the minimum benefit would have been eliminated and the retirement fund would not have adequate reserves to pay monthly benefits some time next year. By approving the conference report, Congress can restore public confidence in its ability to deal with the problems confronting the social security system.

Mr. KENNEDY. Mr. President, I am pleased today to join with my colleagues in supporting the agreement of House-Senate conference. This report endorses what many of us on this side of the aisle have been saying for months. The administration's social security proposals went far beyond what was needed to solve the trust funds' short term problems. The administration's plan to penalize early retirees and cut benefits for other senior citizens was nothing more than a veiled attempt to balance the budget on the backs of the elderly.

I just want to point out that I, along with the vast majority of my colleagues on this side of the aisle, have supported the proposal to permit interfund borrowing since the day the administration announced its ill-conceived cuts in social security.

Senator MOYNIHAN, Senator CHILES, and I offered an amendment to authorize interfund borrowing. It was defeated 51 to 54, with only one Republican voting with us.

We said that interfund borrowing would address the immediate short-term financing problem in the system and permit consideration of the potential long term problems in a calm, deliberative fashion. Secretary Schweiker, in testimony before the Finance Committee, supported this idea. Four former directors of the Social Security Administration supported it at a policy forum I held back in May when the President first announced his program.

For the last 7 months the senior citizens of this country have been told by the administration that the system was verging on collapse and that the financial crisis required immediate draconian cuts in benefits. But when we read the concessions of David Stockman we learned the real motives of this administration. As Stockman confessed, he was desperate to find the budget savings that were needed to offset the giveaways to the oil companies and windfalls to the rich in the tax bill the administration so eagerly embraced.

But this time the politicians listened to the people and rejected the Reagan-Stockman plan.

The proposal before us also restores the minimum benefit for current beneficiaries. The President said in his address to the Nation last September that he was asking that the minimum benefit be restored, implying that the Congress had taken steps to eliminate it.

I think we should again set the record straight.

The President's budget request called for eliminating the minimum benefit.

On six separate occasions Members of this body had the opportunity to restore the minimum benefit. On each occasion, the majority of Republicans voted against those amendments.

In a letter to Senator BYRD last July, the President suggested that "opportunistic political manuvering especially designed to play on the fears of many Americans" lay behind initiatives to restore the minimum benefit.

The public did not accept that explanation then and does not believe it now. Senior citizens know that it was the administration who wanted to cut benefits and concerned Democrats who worked to restore them.

I am pleased that so many of my colleagues are now willing to change their minds and their votes.

I commend the work of the conferees. I believe the proposal worked out by the House and Senate offers a reasonable and responsible solution to the financing problems facing social security in the short term.

It is a significant departure from the administration's draconian proposals and a significant victory for our Nation's senior citizens. Our action here today renews our Nation's contract with those seniors who have paid in to social security over the years and now rely on those benefits.

Our action here today reaffirms this Nation's commitment to maintain a financially sound social security system without cutting benefits. Our action should reassure all those still working who doubt whether social security will be there when they retire.

Over the months my Democratic colleagues and I have argued that we cannot allow a questionable economic program to undermine and endanger the financial security of those citizens now retired and those workers about to retire. I am pleased that today so many of my Republican colleagues now see the wisdom of our arguments and will vote to protect the integrity of the social security system.

Senator BENTSEN. Mr. President, I would like to take just a moment to congratulate my colleagues Chairman DOLE and Senators LONG, MOYNIHAN, ARMSTRONG, HEINZ, and DANFORTH for having reached a workable compromise on the bill now before us. I am pleased to cast my vote one more time in favor of retaining the minimum social security benefit for the more than 3 million retirees now receiving these benefits, and to lend my support to an interfund transfer provision designed to alleviate the immediate financing difficulties of the retirement fund.

While I continue to believe that we in the Congress must be prepared to take on the difficult but necessary task of strengthening the future solvency of the social security system, I will not endorse modifications that force those now retired to bear the brunt of such changes through cuts in their monthly benefits. Our objective must be to strengthen the social security system for the long term and to insure Americans that their Government is capable of and determined to live up to its commitments. Any other approach to this issue would constitute a breach of trust with the 150 million American workers and retirees who built this country and whose retirement plans depend on a sound and equitable social security system. I urge my colleagues to join me in support of the agreement reached by the conferees.

Mrs. HAWKINS. Mr. President, today the Senate will vote on the conference report to H.R. 4331, the Social Security Amendments of 1981. Once again we address the issue of whether or not to restore the minimum benefit which was eliminated in the Omnibus Reconciliation Act of 1981.

Ever since the elimination of the minimum benefit, I have consistently supported its restoration. On July 21, 1981, I voted to restore the minimum benefit. Again, on July 23, 1981, I voted to restore the minimum benefit to current beneficiaries. And on October 15, 1981, I voted to restore the minimum benefit.

It is with reservation that I vote in favor of this conference report. I will vote for the measure because it restores the minimum benefit for eligible beneficiaries retiring before January 1982.

Unfortunately, beneficiaries who retire later will not be so fortunate. I do not believe this is fair. The Congress should also honor its prior commitments at least to those planning to retire soon who have long counted on the minimum benefit when planning their retirement.

Furthermore, the conference report proposes interfund borrowing from the date of enactment through December 31, 1982. Permitting interfund borrowing for 1 year should not qualify as even a stop gap measure, it is just a temporary deferral from real decisionmaking.

The Senate amendment to H.R. 4331 would have authorized borrowing between OASI and DI trust funds until January 1991. This temporary decision does not really address the short term financing problems of the social security system. The Congress will have to act again prior to final adjournment of the 97th Congress.

In addition, when the Senate considered H.R. 4331, I expressed my opposition to limiting further the maximum received when a primary wage earner with dependents retires or dies. For this reason, I am pleased by the action taken by the conference committee to eliminate this unfair change.

Mr. President, although we need to authorize interfund borrowing for longer than 1 year and restore the minimum benefit to others not covered by this bill. I will vote for the report. However, the benefit from restoring the minimum benefit to over 3 million people outweighs the omissions I have stated.

Mr. DOLE. Mr. President, I know of no other requests for time.

Mr. MOYNIHAN. Mr. President, I know of no requests on our side.

Mr. DOLE. The yeas and nays have been ordered.

The PRESIDING OFFICER. The question is on agreeing to the conference report. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Maryland (Mr. MATHIAS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Montana (Mr. MELCHER) is necessarily absent.

I further announce that, if present and voting, the Senator from Montana (Mr. MELCHER) would vote "yea."

The PRESIDING OFFICER (Mr. JEPSEN). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 96, nays 0, as follows:

[Rollcall Vote No. 486 Leg.]

YEAS—96

Abdnor	Ford	Moynihan

NOT VOTING—4

Goldwater	Melcher	Tower
Mathias		

So the conference report was agreed to.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. METZENBAUM. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the majority leader.

THE SENATE'S SCHEDULE

Mr. BAKER. Mr. President, if I may have the attention of the Senate for a moment, I shall try to outline my hopes for the schedule of the Senate for the remainder of this day.

Mr. President, it is not possible, in my judgment, to finish and adjourn sine die today. It will be necessary to go over until tomorrow.

I hope, however, that before this day is over we could do the following things:

A Senate joint resolution to be offered by the distinguished Senator from Arizona (Mr. DECONCINI) which has been cleared, I believe, on both sides for action by unanimous consent, and I propose to do that assuming that the clearances are complete on both sides immediately after this announcement is complete and before we go to the next major item of business.

After that, Mr. President, I hope that we can proceed to the consideration of the agriculture appropriations conference report, to be followed by the military construction conference report, to be followed by the Department of Defense appropriations conference report,

to be followed by the identities bill, the agents identification bill.

That is a full platter, Mr. President, but I think it is possible to do and if we are to finish and adjourn sine die tomorrow, I think it is necessary that we try to complete at least this much of the Senate's work tonight.

Mr. President, I am also advised by the distinguished chairman of the Committee on Indian Affairs that there are two other related resolutions dealing with Indian matters which are cleared and that also should be offered or disposed of at this time. I propose that we deal with the DeConcini resolution and then the two resolutions to be offered by the Senator from Maine (Mr. COHEN) and then proceed to the agriculture appropriations conference report.

Mr. BIDEN. Will the Senator yield for a question?

Mr. BAKER. Yes, Mr. President, I am glad to yield.

Mr. BIDEN. Is it the leader's hope that all five matters he spoke of will be brought up and dealt with by the end of the day or the end of business tomorrow?

Mr. BAKER. I hope we can do them today. I am told the Indian affairs matter will not take more than perhaps 5 minutes. The agriculture appropriations bill, I think, can be done promptly. Military construction I am told can be done quickly. We do not get to one that is going to take a long time until we get to the Department of Defense appropriations bill.

Mr. President, I know of the Senator's concern for the agents identities bill, but we ought to get to that by 5:30, I think. I hope we can proceed as expeditiously as possible.

Mr. DOLE. Mr. President, may I address a question to the distinguished majority leader?

Mr. BAKER. I am happy to yield to the Senator from Kansas.

Mr. DOLE. Mr. President, this does not preclude, depending on how fast other things are disposed of, taking up such matters as the black lung matter, does it?

Mr. BAKER. No, by all means. I urge Senators to do that, and any other matters that must be dealt with or that can be dealt with. I hope Senators will come forward and offer them. I have not put a request to limit action to these items but rather gave this list as an illustration of what I hope we shall be able to do tonight. I hope as well we can do other matters, including ones the Senator from Kansas spoke of.

Mr. DOLE. Mr. President, there is black lung, plus others coming over from the House side that we can act upon, if possible.

Mr. BAKER. Mr. President, I hope if we get on with these things, we can be out by 7 o'clock tonight.

Mr. SIMPSON. Mr. President, may I inquire of the majority leader if there is a place on the agenda for the consideration of the Nuclear Regulatory Commission authorization measure?

Mr. BAKER. Mr. President, I thank the Senator from Wyoming. Not on today's schedule, but I fully assure the Senator I shall ask——

Mr. SIMPSON. There will be a period after 2 o'clock tomorrow when the ranking member of the subcommittee (Mr. HART) will not be present after that time.

Mr. BAKER. I tell my friend that it is my present intention to ask the Senate to come in at 10 o'clock tomorrow. It is my hope then to go to the NRC measure immediately after that.

Mr. SIMPSON. I thank the majority leader.

Mr. President, I ask unanimous consent that the Senator from Arizona may proceed with the matter I discussed.

The PRESIDING OFFICER. Without objection, it is so ordered.

EFFECTIVENESS OF PLAN FOR JUDGMENT TO SAN CARLOS TRIBE

Mr. DECONCINI. Mr. President, I thank the majority leader.

I send to the desk a Senate joint resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 136) to validate the effectiveness of a plan for the use or distribution of funds appropriated to pay a judgment awarded to the San Carlos Tribe of Arizona.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

Mr. COHEN. I object, Mr. President.

The PRESIDING OFFICER. The objection is heard.

Mr. DECONCINI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. BURDICK. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

EFFECTIVENESS OF THE PLAN FOR JUDGMENT TO SAN CARLOS TRIBE

Mr. DECONCINI. Mr. President, I ask unanimous consent that it be in order to proceed with consideration of Senate Joint Resolution 136.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object. Mr. President, has the distinguished chairman of the committee resolved his questions?

Mr. COHEN. Yes, Mr. President.

Mr. BAKER. I have no objection, Mr. President.

The PRESIDING OFFICER. Without objection, the resolution will be stated.

The assistant legislative clerk read as follows:

A Senate joint resolution (S.J. Res. 136) to validate the effectiveness of a plan for the use or distribution of funds appropriated to pay a judgment awarded to the San Carlos Tribe of Arizona.

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. DECONCINI. Mr. President, I thank the chairman of the Select Committee on Indian Affairs, the Senator from Maine (Mr. COHEN) for permitting this matter to proceed, as well as the ranking member, the Senator from Montana (Mr. MELCHER) and also the majority and minority leaders. This measure has been cleared with both the majority and the minority. It is self-explanatory. Because Congress will adjourn before Thursday, the San Carlos Apache Tribe of Arizona will not be able to disperse funds recently awarded to it by the Court of Claims. This is because the 60-day review period will not terminate in the House until Thursday, December 17. This measure will validate the distribution plan so that the funds can be distributed even if the Congress adjourns prior to December 17, 1981.

Mr. President, I move adoption of the joint resolution.

The PRESIDING OFFICER. The question is on engrossment and third reading of the Senate joint resolution.

The joint resolution (S.J. Res. 136) was ordered to be engrossed for the third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution with its preamble is as follows:

S.J. RES. 136

Whereas, pursuant to Public Law 93-134 (Act of October 19, 1973; 87 Stat. 466; 25 U.S.C. 1401), the Secretary of the Interior or his designee submitted a plan on October 7, 1981, for the use or distribution of funds appropriated to pay a judgment awarded to the San Carlos Apache Indian Tribe of Arizona.

Whereas, such plan has not been disapproved by congressional action;

Whereas, such plan has lain before the Senate for the requisite period of sixty (60) legislative days as provided by Public Law 93-134 but sixty (60) legislative days in the House of Representatives will not expire until December 18, 1981, after the Congress has adjourned; and

Whereas, it is the purpose of this resolution to validate the effectiveness of the plan which was submitted to the Congress pursuant to Public Law 93-134.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the plan for the use or distribution of funds awarded the San Carlos Apache Tribe of Indians in Docket No. 22-H before the U.S. Court of Claims is hereby declared to be valid and effective as of the date of enactment of this Resolution and such plan is declared to have been validly submitted and is exempted from any further review.

Mr. DECONCINI. I move to reconsider the vote by which the resolution passed.

Mr. EAGLETON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DECONCINI. Mr. President, I thank the Chair.

Mr. BAKER. Mr. President, it appears that the other two resolutions dealing with Indian affairs are not quite ready. I trust they will be ready before long. In the meantime, I ask unanimous consent that the Chair lay before the Senate the conference report on agriculture appropriations.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATION, 1982—CONFERENCE REPORT

Mr. COCHRAN. Mr. President, I submit a report of the committee of conference on H.R. 4119 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4119) making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, December 15, 1981.)

Mr. COCHRAN. Mr. President, I am very pleased that, at long last, we have before us today the agriculture, rural development, and related agencies appropriations bill for fiscal year 1982 conference report. This has been a long and difficult budget year, demanding extraordinary time and efforts by both the staff and the members. We have succeeded, however, in finally shaping this measure to a very fine balance between unprecedented budgetary constraints and the ever-growing demand for continued progress in agricultural technology, soil conservation, rural development, addressing food needs here and abroad, and the many other goals represented by programs funded in this bill.

Before proceeding any further, I commend the distinguished Senator from Missouri (Mr. EAGLETON), who, as ranking minority member for the subcommittee, has contributed so much to the consideration of this measure. His experience and sound judgment were invaluable in making the many difficult decisions required to achieve the spending targets confronting us.

Mr. President, the bill provides $23 billion in budget authority and $19.5 billion in outlays. This is a reduction of $317 million from the original conference report level for budget authority and $212 million less in outlays, thereby matching the level provided for this bill in the recently approved continuing resolution. As was discussed during the consideration of that measure, the administration has made a commitment to sign any regular appropriation bill which conformed to the continuing resolution level, and I have been assured by the Office of Management and Budget that the revised conference agreement that we have before us today will be recommended for signature by the President.

The specific reductions to achieve the savings I have just discussed are enumerated in the modification of amendment No. 112 of the bill, and are listed in a table which I request unanimous consent to have printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD as follows:

	H.J. Res. 370	Proposed committee amendment	
	BA	BA	Outlays
In Whitten resolution:			
(C) Office of Governmental and Public Affairs	$359,000	$359,000	$359,000
Scientific activities overseas	200,000	5,000,000	1,000,000
Hatch Act	5,744,000	2,500,000	2,500,000
Special grants	912,000	912,000	91,000
Animal health grants	240,000	240,000	240,000
Competitive grants	680,000	680,000	136,000
Smith-Lever	8,935,000	4,000,000	4,000,000
Renewable resources	120,000	1,000,000	950,000
Public Law 480	44,141,000	103,528,000	103,528,000
RHIF restoration	32,199,000	97,000,000	18,000,000
RDIF restoration	8,162,000	24,000,000	
Other options:			
(C) WIC	38,920,000	38,920,000	38,786,000
ARS	18,120,000	10,000,000	9,500,000
Farmers Home, S & E	11,297,000	6,000,000	5,700,000
(C) Economic Research Service	1,640,000	1,640,000	1,558,000
(C) Statistical Research Service	2,151,000	2,151,000	2,043,000
Food Safety and Inspection Service	13,130,000	5,000,000	4,750,000
Food and Drug Administration	13,281,000	4,000,000	3,800,000
Animal and Plant Health Inspection Service	11,375,000	4,000,000	3,800,000
SCS, conservation operations	12,592,000	4,000,000	3,800,000
FCIC, administration and operating expenses	4,800,000	2,400,000	2,280,000
ASCS, CCC transfer	(12,560,000)	(5,000,000)	4,750,000
Total		317,330,000	211,571,000

Mr. COCHRAN. Mr. President, these reductions to the original conference agreement have been made in programs and activities which are in the best position to absorb them. I cannot assure the Senate that they will be of minimal or inconsequential impact, because there is no way that such savings can be achieved without substantial impact on some very valuable programs. I do believe, however, that these specific reductions are much less disruptive and far better than the indiscriminate across-the-board reductions which will occur under the continuing resolution.

As modified, the conference agreement is $200 million less than the House-passed version of the bill, and is $247 million less than what was originally passed by the Senate. The total budget authority contained in this measure is more than $2.8 billion less than was provided for these same programs last year, $1.2 billion less than the President's March budget request and is about $300 million more than the amount requested in the September budget revision. In other words, it achieves nearly three-quarters of the President's budget authority savings.

Mr. President, I am pleased to say also that the amounts provided will still allow us to make significant progress in the critical area of agricultural research. The measure we have before us provides more than $969 million for research and extension, an increase of $39 million over last year. For soil and water conservation, this bill provides nearly $800 million to continue to make needed technical assistance and cost-sharing efforts to promote practices which will protect and enhance our Nation's soil and water resources. These are critical investments in the productivity of American agriculture and must be maintained if we are to continue to have food at reasonable cost for our own citizens, as well as enough to share with commercial markets and the hungry overseas.

Mr. President, this bill also provides $10.3 billion for the food stamp program, which includes $206 million for a new block grant program for Puerto Rico. This is the full amount of the budget estimate. It should be made clear, however, that the administration has indicated that a supplemental request for this program totaling $900 million will be submitted this spring.

Mr. EAGLETON. Mr. President, the agriculture, rural development, and related agencies appropriations bill is our Nation's food bill. Through the many feeding programs which are funded in this bill—food stamps, the special supplemental feeding program for women, infants, and children (WIC), the school lunch program—literally millions of Americans receive their daily sustenance. Through the many programs funded in this bill which are directly or indirectly related to the production of food—agricultural research and extension, the soil conservation program, and the lending programs which provide farmers with working capital—we continue to assure that the food production in our Nation is adequate to not only feed our own people, but millions throughout the world as well.

I am convinced the conference agreement originally worked out on the agriculture bill was the best possible under the current budgetary situation. It did not accept the drastic reductions proposed by President Reagan last September. In fact, that agreement represented a reduction in funding of almost $2.6 billion from the fiscal year 1981 level of funding and $1.7 billion below the budget proposed by President Reagan in March of this year.

Funding for soil conservation in that agreement was below what it was last year. Funding to protect our Nation's agriculture from pests and disease outbreaks was cut below last year. Funding for agricultural research and extension was below levels necessary to keep pace with inflation. Funding for the domestic feeding programs was almost $1.8 billion

below last year's level, and funding for the food for peace program used to provide the minimum of food aid to those who are starving to death throughout the world was cut by almost $65 million below last year's level. This was hardly what I would consider a bloated bill.

Even with these reductions, though, the indication from the White House was that we had been too generous—too generous to the land-grant universities that perform some of the finest research carried out in our Nation; too generous to the soil conservation programs which are aimed at slowing the alarming rate at which we are losing our topsoil; and too generous to the pregnant women and infants who receive food supplements under the WIC program.

The proposal the House has now sent to us reduces the original conference agreement by $317 million in budget authority. It achieves the compromise level of the savings the White House indicated they wanted from this bill almost exactly. The proposal before us is far from perfect. It does mean that soil conservation, agricultural research, extension, the Food and Drug Administration, and many other programs are not cut as much as they were in the last continuing resolution, and it means that many programs will be supported at levels higher than the President's September budget request.

This proposal cuts the level we originally provided for the WIC program by $38.9 million. Although this means that the 2.2 million participation level we had wanted to achieve will not be attainable, it does mean that participation will be able to increase modestly over current levels. This is a vast improvement over the President's September budget proposal which would have cut almost 700,000 people from the program.

It should be clear, though, Mr. President, that to achieve the budget savings demanded by President Reagan and to provide even the modicum of protection being provided to these domestic programs, the food for peace program has had to absorb an even deeper cut than President Reagan proposed. We are protecting domestic programs and, let me not be misnuderstood, these are programs I believe deserve protection. We are protecting them in literally taking food from the poorest people in the world. That, apparently, is what we have come to in this Nation. Mr. President, it is a sad day.

Mr. COCHRAN. Mr. President, I move that the conference report be adopted.

The PRESIDING OFFICER. Is there further debate?

Mr. EAGLETON. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is there further debate? If not, the question is on the adoption of the conference report. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. EXON. (when his name was called). Mr. President, on this vote I have a pair with the Senator from Montana (Mr. MELCHER). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withold my vote.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Maryland (Mr. MATHIAS), and the Senator from Texas (Mr. TOWER), are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Montana (Mr. MELCHER), is necessarily absent.

The PRESIDING OFFICER (Mr. DANFORTH). Does any other Senator desire to vote?

The result was announced—yeas 75, nays 20, as follows:

[Rollcall Vote No. 487 Leg.]

YEAS—75

Abdnor	Glenn	McClure

Mathias		

So the conference report was agreed to.

Mr. COCHRAN. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. EAGLETON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. COCHRAN. Mr. President, I ask unanimous consent that the Senate consider the amendments in disagreement en bloc.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The amendment in disagreement will be stated.

The legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 15 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$8,596,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 23 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$225,548,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 30 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$314,381,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 35 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows: "not to exceed $8,983,000 shall be available for the Mediterranean fruit fly program and".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 94 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows: ", of which not to exceed $500,000 shall be available for the pilot supplemental food program when authorized by law."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 112 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: ", and ceilings on full-time equivalent staff years established for or by the Department of Agriculture shall exclude overtime as well as staff years expended as a result of carrying out programs associated with natural disasters, such as forest fires, drought, floods, and other acts of God: *Provided*, That notwithstanding any other provision of this Act, appropriations under this Act for the following agencies or activities shall not exceed:

"Governmental and Public Affairs	$8,628,000
Agricultural Research Service:	
Salaries and Expenses	432,410,000
Scientific Activities Overseas (Special Foreign Currency Program)	----------
Cooperative State Research Service:	
Hatch Act payments	141,109,000
Animal Health and Disease programs	5,760,000
Special grants	21,899,000
Competitive grants	16,320,000
Extension Service:	
Smith-Lever payments	219,376,000
Renewable Resources	2,000,000
Animal and Plant Health Inspection Service:	
Salaries and Expenses	277,382,000
Food Safety and Inspection Service	323,250,000
Economic Research Service	39,360,000
Statistical Reporting Service	51,636,000
Agricultural Stabilization and Conservation Service:	
Salaries and Expenses (Transfer from Commodity Credit Corporation)	(309,000,000)

Federal Crop Insurance Corporation:	
Administrative and Operating Expenses	117,600,000
Farmers Home Administration:	
Rural Housing Insurance Fund Reimbursement	707,967,000
Rural Development Insurance Fund Reimbursement	180,040,000
Salaries and Expenses	276,418,000
Soil Conservation Service:	
Conservation Operations	310,809,000
Special Supplemental Food Programs (WIC)	934,080,000
Public Law 480	1,000,000,000
Titles I and III	(325,127,000)
Title II	(674,873,000)
Food and Drug Administration:	
Salaries and Expenses	328,032,000

"Provided further, That, where applicable, the reductions made by this provision shall be applied proportionally to each appropriation account and activity, unless justified in writing and concurred in by the House and Senate Appropriations Committees".

Mr. COCHRAN. Mr. President, I move that the Senate concur en bloc in the amendments of the House of Representatives to the amendments of the Senate numbered 15, 23, 30, 35, 94, and 112.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Mississippi.

The motion was agreed to.

Mr. COCHRAN. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senate is not in order.

The majority leader.

Mr. BAKER. Mr. President, I wish to commend the distinguished managers of the bill for handling an important matter in a very expeditious way in the waning hours of this session of Congress.

MILITARY CONSTRUCTION APPROPRIATIONS, 1982—CONFERENCE REPORT

Mr. BAKER. Mr. President, according to the announcement I made earlier, I ask that the Chair now lay before the Senate the conference report on military construction appropriations, H.R. 4241.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4241) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, December 15, 1981.)

Mr. BAKER. Mr. President, it is my hope that this matter can be dealt with promptly. I am advised it should not take a great length of time. After we finish with military construction, it is my intention to ask the Senate to go to the Department of Defense appropriation conference report.

Mr. LAXALT addressed the Chair.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. LAXALT. Mr. President, I am pleased to support the conference report on H.R. 4241 making appropriations for military construction for fiscal year 1982.

The conferees have agreed to provide $7,059,260,000 for military construction and military family housing requirements during this fiscal year. The conference agreement represents a decrease from the Senate-passed bill of $256.8 million; an increase over the House-passed bill of $171.7 million; and a figure of $241.3 million below the President's amended budget request. However, let me point out that at the recommended amount, this bill represents an increase of $1.7 billion over last year's bill and is the largest military construction bill ever agreed to by the Congress.

Mr. President, I believe that we have provided funds for the most valid requirements presented in the budget. We have been able to provide the Defense Department with a sizable increase over last year's bill and yet come in under the President's budget in budget authority and in outlays.

Let me provide some highlights of the conference agreement at this point:

With regard to the MX missile, the House agreed to the Senate recommendation to delete the requested $19.3 million in planning and design funds. However, the conferees stated that the Air Force is free to use the $92 million deferred from fiscal year 1981 MX planning and design funds. In addition, the conferees agreed to language requiring the Defense Department to report to the Committees on Appropriations with all plans and costs relative to the interim basing of the MX in the existing silos.

The conferees agreed on the importance of the efforts to maintain stability in the Persian Gulf/Indian Ocean area through the use of the rapid deployment force. In agreeing to this, the conference approved $440.7 million for facilities and design at Diego Garcia, Egypt, Somalia, Kenya, Oman, and Lajes Field, Portugal.

Concerning Ras Banas, Egypt, the conferees strongly support the need to continue efforts to develop an RDF base at Ras Banas. The conferees have provided $14 million for planning and design and recommended that this planning be accelerated. In addition, the conferees have recommended that the Secretary of Defense consider using his contingency fund, if necessary, for any urgent requirements at Ras Banas. The conferees also stated that the committees will be receptive to reviewing requirements in Egypt through supplementals, again, if necessary. The conferees deferred the funding for Ras Banas solely on the basis that planning and design was still in its earliest stages and estimates were not adequate to provide the detail necessary to make sound recommendations.

Concerning the request for land acquisition at Fort Carson, Colo., the conferees agreed to provide $28 million to allow the Army to acquire the land so badly needed for training purposes at Fort Carson.

The $32 million request for a land lease at the Mariana Islands was deferred without prejudice. It was the decision of the conferees that this project could be deferred until fiscal year 1983 without any harm to national security. The conferees feel that this project should be made a part of the defense agencies' request in fiscal 1983 rather than the Navy's budget submission.

The conferees agreed to delete the funds added by the Senate for the aeropropulsion systems test facility at the Arnold Engineering Development Center in Tennessee. However, the conferees directed the Air Force to move forward with this facility and recommended several sources of reprograming for the funds needed. The committees will continue to carefully review this project.

The conference agreement provides $55.1 million for the first phase of construction on a major building program for the National Security Agency at Fort Meade, Md.

And finally, the conferees agreed to provide the Guard and Reserve components with $311.4 million for fiscal year 1982. This amount represents an increase of approximately $75 million above the budget request and emphasizes the conferees' agreement that the Guard and Reserve are indeed a vital part of the total force concept for the Armed Forces. This substantial increase will provide the Guard and Reserve forces with some of the modern facilities necessary for them to be at the state of readiness required of them.

Mr. President, I believe that we have brought to the Senate a fine piece of legislation providing $7.1 billion for military construction appropriations in fiscal year 1982. I urge my colleagues to support this conference agreement.

Mr. President, I now yield to the distinguished ranking minority member of the Subcommittee on Military Construction, Mr. SASSER, for any comments he may wish to make regarding this conference report.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. SASSER. Mr. President, I thank the distinguished Senator from Nevada for yielding to me.

Mr. President, I want to commend the distinguished chairman of the subcommittee, Senator LAXALT, for his leadership in presenting this conference report.

The military construction appropriations conference report is $241 million under the budget estimates, yet it pro-

vides the largest military construction funding in history.

The chairman has covered the highlights of the conference agreement in his remarks. However, I would like to discuss one item of interest.

The conferees have approved report language which directs the Air Force to request reprograming from three other specified programs from which funds are available to provide the shortfall funding for the aeropropulsion systems test facility at Arnold Engineering Development Center in Tullahoma, Tenn. The Congress previously enacted the authorization bill which provided an $80 million authorization for this project.

Mr. President, because this project is located in my State, I have taken a special interest in reviewing this situation. Upon learning of the significant cost increase on this project, I ask the staff of the subcommittee to make a thorough review of the facts which surround this cost increase.

The staff reported to the subcommittee that, while serious errors in early project development had been made, there exists today no alternative but to complete the project.

In addition, because of the magnitude of this cost increase, I asked the General Accounting Office to review the situation. The GAO will be reporting to the Congress at a later date on their findings. However, preliminary findings indicate that the Air Force failed to provide proper oversight during the early development of this project.

I have also toured the facility personally and was briefed at the construction site.

The Appropriations Subcommittee and the Authorization Subcommittee held joint hearings to receive testimony from the Air Force on this item. Air Force Gen. Clifton Wright made what I believe to be a compelling statement on behalf of completing this project.

The funding mechanism approved by the conferees will allow this project to be completed and will allow work to continue uninterrupted.

The conference report does make clear, however, that the committees want to receive detailed justifications for each funding increment before reprogramings are approved.

Mr. President, I am concerned with the magnitude of this overrun. The mistakes of the early 1970's should not have occurred. But based on Air Force testimony, the Congress has determined that it is in the national interest to complete this project as soon as possible as it will enhance national security.

I urge the Department of Defense to come forward with a reprograming request as soon as possible so the House and Senate committees can act on the next increment of funding for the facility.

Mr. President, I also urge the Air Force to include any further shortfall requirements for this project in the fiscal year 1983 budget proposal. The Department of Defense is responsible for the errors which occurred on this project, and we expect the Department to come forward with a budget request and detailed justifications for any additional requirements which may be needed in fiscal year 1983 so that further funding for this project can be considered through the regular budget process.

Mr. ROBERT C. BYRD. Mr. President, today is a happy day for the people of the south Charleston area of West Virginia. The passage of the 1982 military construction appropriation bill marks the final congressional requirement necessary to initiate an important economic development project for that area.

A few years ago, we were faced with a situation in South Charleston wherein Volkswagen of America, which employs 100 people locally, expressed the need for additional capacity for automobile parts stamping operations. The only reasonable way to meet this need was for the plant to expand onto adjacent property which is now occupied by the Army and Marine Reserve centers. Such an expansion would provide up to 500 new jobs in addition to the 700 employees currently working at the Volkswagen plant. The Department of Defense has been working with me on this project, and it was concluded that because the three Reserve centers in the South Charleston area were built more than 30 years ago at scattered sites and were overcrowded, they did not well serve the needs of the Army, Navy, and Marine Corps Reserve programs. So, there was a unique opportunity to work for a modern and more efficient combined Armed Forces Reserve center and at the same time to accommodate the Volkswagen expansion and boost the economy of the South Charleston area.

I am pleased today, that after many months of planning and effort in the Senate, the green light for the new Reserve center and Volkswagen plant expansion is imminent. Provision for this new center was made at my request, supported by Senator RANDOLPH, in both the 1982 military construction authorization bill and the appropriation bill in the Senate. The amendments have now been agreed to by both Houses of Congress, and the two bills have been sent to the White House. I am hopeful that, within a week or so, this legislation will be signed into law by the President.

Mr. BRADLEY. Mr. President, I am delighted that the military construction appropriations bill provides $18 million for barracks modernization at the Fort Dix Army Training Center.

Fort Dix, as you know, is the last remaining basic training facility in the Northeast-Midwest. In addition to its important basic training program, it is one of the critical locations in the event of an emergency mobilization. Given the importance of enhancing the Army's ability to respond in the event of mobilization, the proximity of Fort Dix to McGuire Air Force Base makes its of essential strategic importance.

The lack of any construction since 1973 has left Fort Dix in need of basic modernization to permit them to continue the outstanding basic training they currently provide.

Earlier this year, the Secretary of the Army made a prudent decision to cease any consideration of closing the basic training program at Fort Dix. Indeed, more recently the Army decided to reassign five basic training companies from Fort Gordon to Fort Dix.

The surge in training activities at Fort Dix makes the accelerated modernization program even more important. I am very pleased, therefore, that the conference committee has agreed to the need for these funds and I want to thank the Senator from Nevada for his assistance in this matter.

Mr. President. I ask for the yeas and nays on the conference report.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays are ordered.

The question is on agreeing on the conference report. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Maryland (Mr. MATHIAS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 96, nays 1, as follows:

[Rollcall Vote No. 488 Leg.]

YEAS—96

Abdnor	Ford	Mitchell

NOT VOTING—3

Goldwater	Mathias	Tower

So the conference report was agreed to.

Mr. SASSER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The amendments in disagreement will be stated.

The legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 11 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: "$64,703,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 15 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: "$280,235,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 24 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

SEC. 122. It is the sense of the Congress that the administration should call on the pertinent member nations of the North Atlantic Treaty Organization and on Japan to meet or exceed their pledges for at least a 3 per centum real increase in defense spending in furtherance of increased unity, equitable sharing of our common defense burden, and international stability.

Mr. LAXALT. Mr. President, I ask unanimous consent that the amendments in disagreement be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LAXALT. Mr. President, I ask unanimous consent that the Senate concur en bloc to the amendments of the House to the amendments of the Senate numbered 11, 15, and 24.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LAXALT. I move to reconsider the vote by which the Senate concurred in the amendments of the House to the amendments of the Senate.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I should like to take this opportunity to commend the distinguished managers of this bill, the Senator from Nevada (Mr. LAXALT) and the Senator from Tennessee (Mr. SASSER). They have handled the conference report in what I think is an expeditious way, and I am happy at the result.

DEPARTMENT OF DEFENSE APPROPRIATIONS, 1982 — CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on H.R. 4995 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, December 15, 1981.)

Mr. PROXMIRE. Mr. President, I ask for the yeas and nays on the conference report.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I could not present this conference report without calling to the Senate's attention the very serious obstacles and the problems we had in producing an acceptable bill before this session of Congress adjourns As we all know, there is a continuing resolution in effect which does carry defense appropriations into February 15 and Congress could have gone home without completing this bill.

I commend the House conferees for their cooperation in overcoming serious obstacles and producing an acceptable bill before this session of Congress adjourns. I particularly wish to commend the chairman of the House Defense Appropriations Subcommittee, Mr. ADDABBO of New York, and the ranking minority member of that subcommittee, Mr. EDWARDS of Alabama. It clearly would have been impossible to resolve all the difficult issues involved in this bill in a single marathon conference session that lasted one complete day, without their skillful cooperation. This was the attitude reflected by all conferees, for that matter, Senate and House Members alike.

My special thanks as well to the former chairman and now the ranking minority member of the subcommittee, the Senator from Mississippi (Mr. STENNIS). Like all conferees, he not only helped us prepare for the conference for several days prior to the time we went to conference, but he has worked long, late, and hard to achieve the conference report and was willing to present a bipartisan approach to this conference which brings us here today.

Mr. President, the conference report we are bringing to the Senate today culminates a long and arduous struggle to deliver the biggest ever peacetime appropriation bill for the armed services, defense agencies and related activities.

There was a wide gulf between the Senate and House versions of this bill as we took it to conference, not only in the obvious dollar differences but in the important policy issues. But there was a determination on both sides of the conference committee to resolve these policy differences quickly and fairly, and I believe the agreement we present now is a sound product that manages in nearly every instance to preserve the better qualities of each version of the bill.

MAJOR AGREEMENTS

Mr. President, the total funding recommended by the conference committee is nearly $199.7 billion. This is more than $2.2 billion above the House allowance and some $28.3 billion above appropriations to date for fiscal year 1981. Although the conference agreement does fall $8.9 billion below the Senate amount, a good part of that reduction involves mandatory pay costs and funding increases based on inflation projections and cost overruns that can be considered in a supplemental appropriations bill next session.

Mr. President, the amount agreed to in conference falls nearly $1.2 billion below the President's September request. That is less than 1 percent off the military spending package of nearly $201 billion contained in the President's budget. In my judgment, that represents a strong endorsement of the President's defense initiative and his strategic program. This is particularly so when we recognize that nearly $500 million of that budget reduction is based simply on cost savings resulting from adjustments in fuel price projections.

This year, the Senate broke tradition and recommended funding in this regular bill for the military pay raises authorized by Congress, which went into effect in October, a provision normally reserved for the supplemental appropriation bill that comes later in the fiscal year. At the request of the House conferees, the Senate did agree to defer the $4.8 billion included for pay costs, recognizing that this funding will have to be approved in one form or another before the year is out.

The Senate also agreed to forego the $1.6 billion added to the President's budget to sustain a 10-percent inflation rate, which the Appropriations Committee considered more realistic. The House conferees did not attempt to challenge the validity of the Senate's projections but, requested us to present these items and preferred to consider these requirements in a supplemental funding measure.

The Senate, meanwhile, sustained several important features of its version of the bill. The Navy's shipbuilding and conversion funding, for example, was resolved at $672.5 million above the House allowance. Nearly half of this—$300 million—was for allocation to the Coast Guard to address its own urgent shipbuilding needs and other capital equipment requirements, particularly in the area of the Coast Guard cutters.

Mr. President, I ask unanimous consent that a comparative table of the conference agreement on the Defense appropriation bill be printed in the RECORD displaying the various amounts by appropriation account.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

		Budget Estimates FY 1982	New BA House	New BA Senate	New BA Conference	Conference compared with Estimates	Conference compared with House Bill	Conference compared with Senate Bill

Mr. STEVENS. Mr. President, there were more than dollar differences involved in conference, as I said earlier. I am pleased to report that the Senate's language designed to control costs of the B–1B bomber and to insure a wide array of basing options for the MX missile was retained intact. And the House agreed to our language designed to insure a high priority for development of the advanced technology bomber.

Let me touch briefly on some other important features of the conference agreement now before us:

There is more than $250 million over the budget in this bill to bolster equipment and supplies for the National Guard and Reserve forces.

An additional $42 million is in the bill, as proposed by the Senate, to increase Guard and Reserve personnel end strengths.

In all, funding for military personnel is nearly $641 million over the House, most of it in funding restorations that we thought were critical to military readiness.

An increase over the House of nearly $222 million for operations and maintenance, including substantial increases for Air Force flying hours and Navy ship maintenance, was approved.

Some $497 million in research and development increases over the House, including important elements of the President's strategic communication, command, and control package, was sustained.

REPROGRAMING PROCEDURES

Mr. President, let me draw the attention of the Senate to an important issue that was resolved in conference but was inadvertently omitted from the statement of the managers in the rush to complete this bill. I am speaking of revised reprograming guidelines recommended by the Senate. We proposed various levels of increases in the threshold below which the Department can shift funds without obtaining advance reprograming approval from the committees.

The House did not agree entirely with our recommendations, but we were able to negotiate a realistic readjustment to the Senate-proposed thresholds, which I should like to detail at this point in my remarks so that there is a clear legislative record on this understanding.

For military personnel, the reprograming threshold is increased from $5 to $10 million; for procurement increases, the threshold is also raised from $5 to $10 million; and for research and development increases, we have moved the threshold from $2 to $4 million. There was no change agreed to for reprograming thresholds involved in new starts.

An important provision also agreed to in conference provides that only one reprograming is permitted within a given activity each year within the threshold. This new provision requires the Department to seek prior approval for any subsequent reprogramings, without regard to thresholds, once one reprograming under the threshold is approved.

No agreement is perfect, Mr. President, but I believe the agreement we present today reflects a solid endorsement of the President's readiness and modernization initiatives for the Armed Forces and our Nation's defense capabilities.

Mr. President, I cannot emphasize too much the working relationship that all members of the committee have had with the distinguished Senator from Mississippi (Mr. STENNIS). At this time, I yield to him for any remarks he may care to make concerning the conference report.

Mr. STENNIS. Mr. President, I am sure that everyone has found this conference report very nearly satisfactory to their thinking, even though there were emergencies to start with. Some of the money difference will come back in this fiscal year, as the Senator from Alaska has stated, and that is part of a pattern we have been operating under. I will not dwell on items of that kind.

SEVERAL SENATORS. May we have order?

Mr. STENNIS. Mr. President, I will defer to these people if they wish to speak now.

The PRESIDING OFFICER. The Senate will be in order.

Mr. STENNIS. Mr. President, this has been an outstanding year of activity. I wish to emphasize, first, my supreme satisfaction that we stood together as a parliamentary body and prepared and passed and now have in final form an appropriation bill for our vast, worldwide military preparedness and operational program.

It is ridiculous to think that we would spend the greater part of a year here authorizing a program and safeguarding it and providing for it in every way we could think of, and then to walk off and leave it here, without an appropriation bill that fit in with the pattern and carried out the basic law that we passed with reference to this vast program.

So there is the idea of letting it run through whatever may be the rule with reference to other programs. I hope we never, never rely, except for a few days at a time, on a continuing resolution to operate our military preparedness and defense program.

Mr. President, the groundwork here is laid, though, for the need to appropriate vast sums of money, great sums of money that are going to start coming due in a big way the second year, the third year, and the fourth year. We have to make room and make preparation for them.

The shipbuilding program one might say is fully launched by this bill. We have not agreed yet on the MX basing, as we know. We have not agreed on the bomber problem fully and other things about the cargo aircraft. I am not as strong on the vast cargo carrier as some. But those matters are to be settled later in some form and they are going to be expensive, also.

So we cannot just ignore the fact of the ship program itself, and it is a fine program, but it is going to take many billions of dollars to complete it. A 5-year program is just a beginning. But to carry out to its ultimate form this 600-ship Navy that we glibly at times talk about, we are getting up to $22 and $24 billion to complete that by the year 2000.

So, I warn now, we have to go to saving where we can if we are going into this vast program and continue it because there we have to have quality and that means top prices and increased prices. Every year there have been increased prices. This year I think we suffered a $4.5 billion increase just in inflation, extra costs of 37 military programs that we had in being.

So that just indicates the far-reaching effect of this plan. It does meet an extraordinary situation. I hope we are wise enough to apply it. It has taken a great deal of work, most of which was done by someone else, not by me, and I give credit to those who helped work on it. I think every member of our Armed Services Committee really put in a lot of hard digging and hard work and judgment making, negotiation, persuasion, and everything that goes with these tough problems. I do not mean we solved them all. We found a fine attitude in the House committee over there, which is the subcommittee on this bill. It is one of the outstanding units I think of in the entire Congress.

So I commend again the Senator from Alaska for the tremendous grasp that he has of these problems. He is already familiar with them but he has mastered them now.

The Senator from Oregon has done an extraordinary year's work as chairman of our Appropriations Committee and the Senator from Texas has moved forward greatly as chairman of our Armed Services Committee.

Mr. President, I do not want to detain the group any longer. I thank the Senator from Alaska for his fine work. I yield.

DEPARTMENT OF DEFENSE BILL NOW IS WITHIN BUDGET LEVELS

Mr. PROXMIRE. Mr. President, I intend to vote for this fiscal year 1982 Defense appropriations conference report. The conferees have worked hard to pare this bill down to a total that is within the President's budget request. Given that fact and the importance of funding the major ongoing programs for the Department of Defense, I shall support this bill.

When the Department of Defense appropriations bill came to the Senate floor it was $7.6 billion above the request of the President and the Office of Management and Budget. The President had increased the bill by $29.4 billion over last year, not an insubstantial amount by any calculation. I do not think that anyone has accused President Reagan of overlooking or shortchanging the Defense budget. And yet the Senate decided to go over the President's request by $7.6 billion, a figure which was again increased on the floor to almost $8 billion.

The House bill was more modest in nature and within the budget at $196.6 billion. The compromises reached in the conference were heavily weighed on budgetary reasoning, to bring this bill down to a total that was within the request of the President. In order to do this it must be recognized that some of the increases proposed by the Senate simply have been pushed off to a supplemental bill early in 1982.

The pay raise which went into effect on October 1, 1981, obviously must be funded. So this $4.8 billion, or whatever amount remains after DOD absorbs some portion of it, will have to be included in a supplemental bill. The same applies to any increase in inflation during the interim period. The $1.6 billion Senate add-on for a higher inflation rate of 10 percent will have to be reflected to some degree in a later bill.

These two items alone represent $6.4 billion that has been postponed for consideration until next year. Therefore, one must look at this bill realistically. It does not fund all of the programs for fiscal year 1982 that have been approved by Congress nor does it fully take account of the current inflation rate in defense programs. We may be within the budget when this bill passes, but there will be a substantial supplemental bill during the winter.

Mr. President, there are many positive elements in this bill. Not the least of these is the emphasis placed on manpower issues. We have increased the package of incentives necessary to recruit and retain an All-Volunteer Force. We have recognized that special skills demand special attention in the form of bonuses and pay.

We have reinvigorated the National Guard and Reserves with a package of amendments which will begin to support their requirements. If the Guard and Reserves are to be thought of as part of the total force, then we have to give them the fiscal resources to carry out their missions. We have only started to understand and make commitments to resolve this problem.

While this bill rightly continues an emphasis on manpower, it wastes the taxpayers' money on certain procurement items. I continue to believe that resurrecting the B–1B bomber is a serious mistake. The resources committed to this project are desperately needed for other programs. At best the B–1B will consume over $40 billion for a useful penetration life of 4 or 5 years. If we were serious about stressing the defenses of the Soviet Union, we would have accelerated the Stealth bomber and canceled the interim measure—the B–1B.

The conferees should be commended for deciding to reorient the MX program. The hard silo option involved a commitment of $5 to $7 billion for a limited number of missiles and a questionable degree of increased security. The administration should recognize the need to accelerate its decision on a final basing mode for the MX be it deep silo, patrol aircraft or some new form of mobility.

I am pleased that the conferees decided to drop the Senate amendment which would have increased the B–1B and MX items by $115 million for cost growth over and above inflation. This cost growth has not yet occurred. It would have been a precedent of mammoth proportions if the Congress were to have agreed to pay cost growth in advance on any Government project. There would be no incentive to program managers to restrain cost growth if they knew that Congress had anticipated them and fully funded any future problems. This was a budget busting precedent without equal in recent years. Should we start funding waste, fraud and abuse in future bills just because we know it exists? I think not and am pleased that the conferees agreed.

In sum, Mr. President, this bill deserves the support of the Senate. It establishes the basis for our defense posture for the next year. I could not support it while it was significantly above the President's budget, but I support it now that the totals have been reduced to proper budgetary proportions.

Mr. DOMENICI. Mr. President, I take this opportunity to comment upon the relationship of the two defense-related appropriation conference reports which the Senate has approved today—the defense appropriation bill, H.R. 4995 and the military construction appropriation bill, H.R. 4241—to the current budget situation.

Although a great deal of attention has been given to the size of the defense budget, few Members of the Senate would argue that defense has not experienced real decline during most of the last decade. Thus, while we are increasing our defense effort, it is an increase well deserved in view of the world situation.

I would like to compliment the chairmen and ranking members of the Defense and Military Construction Subcommittees, Senators STEVENS, LAXALT, STENNIS, and SASSER, for the excellent manner in which they have handled their bills and kept them both within the President's September requests. Indeed, the defense bill is actually $1.2 billion below the request in budget authority and $1.2 billion below the request in outlays after prior-year action and later requirements are considered. The military construction bill is $200 million below the request and outlays are at the request after prior-year action is considered.

The managers of these two bills have done an excellent job in seeing to our national defense in a manner consistent with budgetary guidelines. I applaud their actions and congratulate them.

Mr. President, I ask unanimous consent that a table showing the relationship of these two conference agreements, together with possible later requirements, to the congressional budget and the President's budget requests be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. DOMENICI. Mr. President, I compliment the chairman, the distinguished Senator from Alaska, who chaired the subcommittee and went to conference on this bill. He is proud of this effort and I think we should be proud of him and all of those who helped him.

This bill obviously begins to address the military needs of this country but when you look back at where we were and how we got to this evening, I think everyone would agree that it has been a masterful performance and for those who think they have not been concerned about saving money obviously it is the largest ever, but even with the full knowledge that it does most of that which we need done, it has come in under the President's September request as the distinguished Senator from Alaska has indicated.

I think that bodes well for the future in terms of the appropriation process being the way to handle these matters, not continuing resolutions, and not any

other approach but leaving it in their good hands.

I have an analysis of both bills in terms of the budget process and the September request. Both are in under the September request in both authority and outlays.

I commend Senator STEVENS, Senator LAXALT and their respective ranking minority Senators who helped them.

EXHIBIT 1

H.R. 4995, DEPARTMENT OF DEFENSE APPROPRIATION BILL CONFERENCE AGREEMENT, 1982

[In billions of dollars]

	Fiscal year 1982	
	BA	O
Outlays from prior-year budget authority and other actions completed		49.3
H.R. 4995, conference agreement	199.7	121.8
Possible later requirements: DOD civilian and military pay raise	5.6	5.5
Total for Defense Subcommittee	205.3	176.6
First Budget Resolution level	214.3	178.5
Senate-passed level	209.6	178.8
House-passed level	203.0	175.4
President's March request	214.3	180.6
President's September request	206.5	177.8
Defense Subcommittee compared to:		
First Budget Resolution level	−9.0	−1.9
Senate-passed level	−4.3	−2.2
House-passed level	+2.3	+1.2
President's March request	−9.0	−4.0
President's September request	−1.2	−1.2

H.R. 4241, MILITARY CONSTRUCTION BILL CONFERENCE AGREEMENT, 1982

Outlays form prior-year budget authority and other actions completed		2.5
H.R. 4241, conference agreement	7.1	2.0
Possible later requirements: None		
Total for Military Construction Subcommittee	7.1	4.5
First Budget Resolution level	8.0	4.6
Senate-passed level	7.3	4.5
House-passed level	6.9	4.4
President's March request	8.0	4.7
President's September request	7.3	4.5
Military Construction Subcommittee compared to:		
First Budget Resolution level	−.9	−.1
Senate-passed level	−.2	
House-passed level	+.2	+.1
President's March request	−.9	−.2
President's September request	−.2	

Mr. STEVENS. Mr. President, I am pleased to hear that statement from the Senate Budget Committee chairman.

I emphasize to the Senate that we have not used any mirrors. The items not in this bill, but included in our amendments and deleted in conference with the House were items that were not budgeted, but they were authorized and as such we will face budget requests for them. But we have not saved money on this bill by taking out items that were irrelevant to the budget process. This bill is truly and I emphasize that it is truly below the President's September mark. He had already reduced the outlays by $2 billion. This reduces the outlays I think the chairman will agree with me about $1 billion.

Mr. DOMENICI. The Senator is correct.

Mr. STEVENS. Although we are $1.2 billion below in budget authority, we were conscious of the items we kept out of this bill in order to try and meet some of the outlay problems that other committees faced frankly and we have come in here with a large bill and we are not over the budget either in outlays or in budget authority. We have left at least $1 billion below the September mark of the President which already was $2 billion below the President's March budget mark as far as budget outlays are concerned.

I have no hesitancy in saying that notwithstanding that fact, this bill is balanced and does in fact meet the national defense requirements of this country.

I would warn that in the outyears, because we have started massive programs, that we face funding crises in the years 1983, 1984, and 1985, which will be substantial. That is what the Senator from Mississippi said and he knows what he is saying. We listened to him. I listened to him particularly because I know if JOHN STENNIS sees trouble coming I better get prepared for it. There is trouble coming in this budget.

But this year, and I state it again, this year we are under the budget both in budget authority and budget outlay. Where the Senator from New Mexico asked us to come back was at least at or below the budget so there would be no problem with regard to the continuing resolution, and our committee has done so.

I yield to the Senator.

Mr. PRYOR. Will the distinguished Senator yield for a question with respect to the legislation before us at this time?

Mr. STEVENS. I would be glad to do so.

(Mr. SPECTER assumed the chair.)

Mr. PRYOR. I would like to ask my friend from Alaska, who has done such an outstanding job in the legislation, shepherding it through this body and over in the House, about a particular amendment that I do not see present in the bill. That was an amendment I offered to this legislation during the debate on the defense appropriation bill relative to contractors who do business with the Department of Defense, who have been able to charge their lobbying expenses back to the taxpayers.

I know the Senator from Alaska graciously accepted this amendment on the floor of this body. It went to conference. I do not see it in the legislation at this time in final form, and I wonder if the Senator can give an explanation as to what happened to the lobbying amendment.

Mr. STEVENS. Mr. President, I am pleased to respond to the Senator. I regret to inform the Senator that his amendment, which was section 776, was not included.

The conferees, as indicated in the report, felt that inclusion of such a detailed legislative matter in an appropriation bill violated the jurisdiction of the legislative committees involved.

We did, however, agree that the appropriate legislative committees should hold hearings and give careful consideration to the revisions in the law regulating lobbying activities.

I might say to the Senator, who was the author of the amendment, that we agreed because we are the prime targets of the lobbying activities the Senator sought to address. Both the chairman of the House subcommittee and I have agreed to send a letter to the legislative committees stressing the importance of holding hearings and presenting to the House and the Senate the revisions of the laws regulating lobbying activities which should be presented specifically to include those that the Senator has mentioned, detailing the problem of billing the taxpayers for the costs of lobbying activities.

I am hopeful the legislative committees will respond. We did not delete this because we disagreed with the Senator but because of the problem of the legislative committees and the requirements to deal with other matters in the lobbying laws beyond those addressed by the Senator's amendment.

Mr. PRYOR. I thank the Senator from Alaska. If I might be permitted to make one observation. it is this: I do not recall that the issue of the point of order as to legislating on an appropriations bill was mentioned, but that is history now.

The real point I would like to make to my colleagues and to the distinguished floor manager of the bill and the distinguished Senator from Mississippi (Mr. STENNIS) is that today contractors who do business with the Department of Defense have the best of both worlds.

They have the best of both worlds two ways: One is when they actually deduct legitimate business expenses in the area of lobbying, and I do not question that. I think that is a legitimate tax deduction, if it is cleared by the IRS.

But, second, the thing that is so repugnant to me about the system we have operated under for so long is they are not only satisfied with that particular interpretation of the IRS or that particular way of doing business, but they want to go the second step. They want to gouge the taxpayers for a second time by saying that any lobbying expenses they can justifiably charge off to the American taxpayers will be built into the base cost of the contract.

We have seen time and time again by the General Accounting Office, and by those people who audit the contractors and the Defense Department, millions of dollars being charged back to the taxpayers, placed on the backs of the taxpayers, and this increases the profit of the defense contractors in the end.

We had one defense contractor, for example, in our office just a few days ago who said if the so-called Pryor lobbying amendment were kept in the defense appropriation bill for 1982 this would be his last trip to Washington.

We asked the question, "What do you mean your last trip to Washington?" He said, "We won't be able to come anymore and lobby on these matters which affect our national defense or our particular company."

We said, "That is not what the Pryor lobbying amendment is all about. The Pryor amendment says that you can still deduct the expenditure and maybe not pay it in income tax, but it also says, furthermore, that this expense will not be charged to the taxpayer."

This particular contractor said, "Well, that is the way we have done business all these years, and that is the way we hope to continue doing business at this time—business as usual."

Furthermore, he made an odd statement in addition to that which I thought about a great deal. He said, "You know, if your amendment stays in this bill we are just going to totally abolish our political action fund, our PAC committees."

We said, "Why would you do that?" He said, "We would not be able to lobby you as we have in the past and lobby other Members of the Senate and the House, and we would have to destroy the way we have done business in the past."

I just wanted to bring this one personal story to the attention of my colleagues in the Senate at this late hour so that we might realize how very important this particular amendment is.

I can only say how grateful I am to the Senator from Alaska for attempting to push this measure through the authorizing committee, and let the authorizing Committee on Armed Services look at this matter and hopefully bring it not only to a fruitful but to a successful conclusion in early spring.

I thank the Senator for yielding and I thank him for being direct in answering my questions.

Mr. STEVENS. The Senator's amendment was argued for in conference not only by me but by the distinguished Senator from Mississippi. He did speak out about the work Senator PRYOR had done on this amendment. I want to assure you that we do not disagree with the concept. We did not raise the point of order on this legislation because we felt our legislative committee should raise that if it were to be raised in this instance. It was not. But in the House there was a question raised, and we must recognize the rights of committees in the other body.

But I would say to you that in the exposure that we have in dealing with money and in the volume, the sheer size, of this bill, the number of lobbyists we come in contact with is astounding, and from my point of view—I do not know about the rest of the Senate, but from my point of view—I believe those activities that relate to obtaining contracts in which the contractors make a profit should be a legitimate business deduction from their income. But I do not think it should be part of the defense contracting cost to add to it the cost of the lobbying activities or whatever activities they engaged in to obtain the contract from the Government in the military area.

I pledge to the Senator that we are in agreement. We will work with you. As I said, the chairman of the House subcommittee, Mr. ADDABBO of New York, and I have agreed to send a letter to the legislative committees. We will appear and testify with you and urge the legislative committees to move. But I do not believe we can expect to get a partial amendment to the lobbying laws through the House. The House wants a comprehensive revision of the lobbying laws.

Mr. PRYOR. Mr. President, if the Senator will yield for one additional observation on this point, I would like to express my appreciation to my distinguished friend from Alaska for his assurances. In addition, I wish to inform him and my colleagues that this evening I am introducing a bill so that we will have something to work from next spring. We will have the proper committee atmosphere to accomplish this purpose. I will introduce this piece of legislation this evening.

Mr. STEVENS. Does the Senator from Mississippi wish to respond on this item?

Mr. STENNIS. For just less than 1 minute.

Mr. President, let me say to the Senator from Arkansas that I was attracted to his amendment and I stopped at this very chair and listened. The thought came up about legislation on an appropriation bill. Really I was tied up on something else and went off, and I was willing for it to get a chance to run the gauntlet. It received a great deal of favorable attention and discussion in our conference.

I am certain his thought has considerable merit. It is an idea that is timely and is on its way with considerable headway. I certainly wish him well as he pushes it, and I will watch him and follow him.

Mr. PRYOR. I appreciate that.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I wish to congratulate the managers of this bill, together with the staff.

The distinguished Senator from Georgia (Mr. NUNN) and I were delegated by the Senate Armed Services Committee to work with the conferees on those programs which had classifications, which precluded complete disclosure of all details during the debate on the floor and during the course of deliberations of the conference. I wish to assure those Senators supportive of these various programs in the classified areas that, in my judgment, this bill adequately funds those programs.

I, again, express appreciation for the cooperation of the managers of the bill and those staff members that assisted in this evaluation.

Mr. STEVENS. Mr. President, I see the distinguished Senator, who is the author of the amendment that really paved the way for the passage of this bill, Senator COHEN, is in the Chamber. I want to thank him and again point out to the Senate that the amendment that he authored here with Senator NUNN has survived and is in fact in the final version of this bill.

But I would be remiss if I did not point out that for the first time that I have known of, the Defense Subcommittee has as members four Senators who are new Senators. In my time, I cannot remember a new Senator going on the Appropriations Committee in his first year. We not only have these members on the Appropriations Committee, but they are on the Defense Appropriations Committee, which, again, in the days when I joined this body, we waited several years to get on the Defense Appropriations Committee. They are on there.

I cannot comment effusively enough on the work that Senators ANDREWS, KASTEN, D'AMATO, and RUDMAN have done as working members of this subcommittee. Each one of them has made a major contribution to our subcommittee.

Without trying to downplay the contributions of the other three, I point out that the Senator from New Hampshire, in my opinion, has developed probably the best expertise in the area of high technology in defense weapons systems in a short period of time than has any other person I have ever known. He will be, I think, known to the Senate before long as the Senate's expert in this area. He has devoted a great deal of time and effort to this subcommittee. I cannot remember him missing even a subcommittee hearing. He has been very attentive and I personally am very grateful to him for his help.

Mr. LEVIN. Mr. President, when this bill was before the Senate, I voted against it. Reluctantly, I must also vote against this conference agreement. I do so for essentially the same reasons which compelled me to oppose the Senate bill.

First, I believe this bill seriously underfunds critical readiness needs and conventional force requirements in order to support unnecessary and ill-conceived strategic nuclear programs. Instead of funding Persian Gulf readiness programs, we have sunk billions into the MX missile without having any idea of how we should base it. Instead of funding the research needed to accelerate the delivery of the Stealth bomber. we have sunk billions into the B–1 bomber knowing full well that it will have only a brief lifespan and relatively little military utility. The original Senate bill and this conference report have seriously tilted the balance of power—not between ourselves and the Soviets, but rather between our conventional forces and our strategic programs.

In addition, Mr. President, I believe that this conference report seriously underestimates costs in some critical areas. The Senate bill at least recognized that we needed to provide for inflation and scheduled pay increases. This conference report short changes both of those items and, as a result, both guarantees a significant supplemental request next year and has the effect of distorting the true costs of this defense program.

Mr. PELL. Mr. President, I have decided with great reluctance to vote in favor of the defense appropriations conference report which is before the Senate. It is in many ways the budget buster I voted against December 4. However, I would point out that it is a substantially better bill than the $208 billion measure that passed the Senate 11 days ago.

The conferees have worked hard under great time pressure to reduce the level of spending by $9 billion from the amount in the Senate-passed bill. The conference report represents an increase of only $2.3 billion from the House bill and, while I continue to believe this bill is execssive from the standpoint of national defense requirements, it is far closer to a realistic level of military spending than was the Senate bill. Additionally, there are several areas in the bill which have received the strong support of the conferees, and which I believe are vitally necessary for our national defense.

This conference report contains $315 million in funding for the Trident program—a level much closer to the amount needed to keep that key program moving

forward without serious delays. Additionally, I commend the conferees for including the $300 million in funding for the Coast Guard's shipbuilding program. This is a long-overdue recognition of the Coast Guard's contribution to our Armed Forces, and I hope similar or greater amounts will be included in all future DOD appropriations bills.

While I have great reservations about the huge sums this bill contains for the B–1 and MX programs, and would have preferred a smaller bill, on the whole the conferees have done a good job in resolving differences between the House and Senate bills in favor of restraint. There is much in this bill that is urgently needed to modernize our conventional forces, and improve their state of readiness. The conference report goes further than I would like, but there is much that is good in it, and I have reluctantly decided to vote for it.

Mr. STEVENS. If there is no one else who wishes to talk about the conference report, Mr. President, I ask that the conference report be agreed to.

The PRESIDING OFFICER. The question is on agreeing to the conference report. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Maryland (Mr. MATHIAS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 93, nays, 4, as follows:

[Rollcall Vote No. 489 Leg.]

YEAS—93

Abdnor	Ford	Moynihan

NOT VOTING—3

Goldwater	Mathias	Tower

So the conference report was agreed to.

Mr. STEVENS. I move to reconsider the vote by which the conference report was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask that the clerk state the amendments in disagreement.

The PRESIDING OFFICER. The clerk will state the amendments in disagreement.

The bill clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 24 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$4,985,400,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 31 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$1,087,950,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 36 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$1,911,100,000: *Provided*, That notwithstanding any other provision of this Act, after the head of the agency concerned gives written notification of a proposed multiyear contract for the purchase of the UH–60A Black Hawk aircraft to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives, such contract may not then be awarded until the end of a period of 45 days beginning on the date of such notification,".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 39 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$2,381,900,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 40 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$3,721,971,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 54 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: "for acquisition, construction and improvement, Coast Guard, $300,000,000, to be allocated to the Coast Guard: 'Acquisition, Construction and Improvements';".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 55 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$117,500,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 62 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$117,500,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 67 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$13,818,998,000 of which $102,800,000 shall be available only for a classified program, and".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 68 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: "and $1,801,000,000 shall be available only for purchase of B–1B aircraft when the President certifies to the Congress that it is feasible to accomplish the program for the purchase of 100 B–1B aircraft at a total program cost of not to exceed $20,500,000,000 (in constant fiscal year 1981 dollars), or in such other amount as the President certifies and explains to the Congress, and such funds for the purchase of B–1B aircraft shall remain available during any quarter that the total program cost of 100 B–1B aircraft is included in any Selected Acquisition Report required for the B–1B program for the previous quarter by section 811 of the Department of Defense Appropriation Authorization Act, 1976 (10 U.S.C. 139 note),".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 72 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed in said amendment, insert: "$4,559,550,000, of which $624,400,000 shall be available only for a classified program".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 87 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

"SEC. 765A. None of the funds made available by this Act shall be used in any way for the leasing to non-Federal agencies in the United States aircraft or vehicles owned or operated by the Department of Defense when suitable aircraft or vehicles are commercially available in the private sector."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 89 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken by said amendment, and insert:

"SEC. 770. None of the funds appropriated in this or any other Act shall be available for obligation to reimburse a contractor for the cost of commercial insurance that would protect against the costs of the contractor for correction of the contractor's own defects in materials or workmanship."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 93 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: "773".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 96 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken, and insert:

"SEC. 775. None of the funds appropriated by this Act for the pay of Reserve and National Guard technicians based upon their employment as technicians and their performance of duty as members of the Reserve components of the Armed Forces shall be

available to pay such technicians a combined compensation in excess of the rate payable for level V of the Executive Schedule: *Provided*, That for purpose of calculating such combined compensation, no military compensation other than basic pay will be included.".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 101 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: "778".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 107 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

"(b) No funds appropriated by this Act may be used for the transfer of a technical data package from any Government-owned and operated defense plant to any foreign government, nor for assisting any such government in producting any defense item currently being manufactured or developed in a United States Government-owned, Government-operated defense plant manufacturing large caliber cannons."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 109 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

"SEC. 783. None of the funds available in this Act shall be used by the Secretary of a military department to make a contract for the purchase of administrative motor vehicles that are manufactured outside the United States or Canada unless the contractor was selected through competitive bidding without a differential in favor of foreign manufacturers: *Provided*, That this section does not apply to contracts for amounts less than $50,000, nor to existing contracts."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 110 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

"SEC. 784. None of the funds appropriated in this Act may be made available through transfer, reprogramming, or other means for any intelligence or special activity different from that previously justified to the Congress unless the Director of Central Intelligence or the Secretary of Defense has notified the House and Senate Appropriations Committees of the intent to make such funds available for such activity."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 115 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: "787".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 116 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: "788".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 117 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: "789".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 118 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: "790".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 120 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: "791".

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate concur en bloc in the amendments of the House to the amendments of the Senate numbered 24, 31, 36, 39, 40, 54, 55, 62, 67, 68, 72, 87, 89, 93, 96, 101, 107, 109, 110, 115, 116, 117, 118, and 120.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the Senate concurred in the House amendments to the amendments of the Senate.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. STEVENS. Does that completely clear this bill as it was brought to us from the House?

The PRESIDING OFFICER. That clears the conference report.

Mr. STEVENS. I am indebted to the Chair.

THANKS TO THE STAFF

Mr. President, I call the attention of the Senate to the fact that we have a new chief of staff on our Defense Appropriations Subcommittee. He is not new to the Senate. He is Dwight Dyer. This is the first bill in the Defense Subcommittee he has handled, along with Fred Rhodes, who has managed that bill on the Democratic side of the aisle for many years. These two men, Dwight Dyer and Fred Rhodes, Mr. President, have done excellent work. The Senate must be aware of the detail that is in this bill and the days and days that they worked together on a bipartisan basis to assure that we could do what we have done.

We brought this bill out of conference in 1 day and it has pased both the House and the Senate without question by any Member on either side that required a vote. I think that is a record and they are primarily responsible for that result.

And my commendation certainly extends to the full staff, to Susan Shekmar to Wayne Schroeder, to Sean O'Keefe, and to Norma Perna, Mazie Mattson, and Jane McMullan. All put in long hours to bring the bill to this point.

Mr. SCHMITT. Mr. President, will the Senator yield?

Mr. STENNIS. I do yield.

Mr. SCHMITT. Mr. President, I want first of all to second the comment by the distinguished Senator from Alaska relative to the staff and the cooperation that members of the subcommittee received from that staff. I also compliment the Senator from Alaska and the Senator from Mississippi and everyone who participated so directly and continuously in this conference and the formulation of the bill itself.

Mr. President, even though it was accomplished in roughly 8 hours of continuous session—that is, the conference report was agreed to by the conferees—every item in conference was seriously considered and considered in the presence of most of the members of the conference, if I am not mistaken. So it was not as if this bill were rushed through the conference in any way whatsoever. There was serious discussion on almost every issue of consequence in this conference report.

Mr. President, I compliment the Senator from Alaska again for having made sure that that occurred and our colleagues on the House side made sure it occurred, believe me. It worked, and I think we all ought to feel not only thankful that it was done but also that we have a bill that will further rejuvenate the Nation's defenses.

THANKS TO SENATOR STEVENS

Mr. BAKER. Mr. President, I take this opportunity to commend the distinguished Senator from Alaska. He has persevered in a difficult assignment and brought to us a bill that has now passed the Senate by a substantial margin and resolved an issue that, earlier this year, even a few weeks ago, many predicted would not be resolvable in this session of Congress. It was a major accomplishment by the Senator from Alaska and his counterparts on the minority side. I thank Members on both sides of the aisle for their tireless effort in bringing this matter through both Houses to conference and now to passage.

Mr. THURMOND. Mr. President, I congratulate the able Senator from Alaska for the magnificent leadership he provided in this defense appropriations bill. This bill has been handled with much skill and it contains, I think, an adequate appropriation to take care of our Defense Establishment. This was no easy task to attain.

I feel we can be very proud of this bill and what the President can do under this bill for the defense and security of our Nation.

Mr. McCLURE. Mr. President, I, too, commend the Senator from Alaska and the staff on both sides of the aisle that worked on this. I might just comment that, at birth, this bill was bigger than Lily, but I think Lily is growing faster. I compliment the Senator from Alaska on both efforts.

Mr. STEVENS. I thank the Senator.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I had announced earlier that I hoped today to be able to do a number of things. That is the Agriculture appropriations conference report, the military construction conference report, the Department of Defense appropriations conference report, and the identities bill. We have done all those now except for agents identities. I am sure, to the grave disappointment of some Senators, I am going to suggest now, particularly since it is snowing outside, that instead of doing the identities matter tonight, we now go to the foreign

assistance conference report which is here and available and we shall deal with identities on tomorrow.

CONFERENCE REPORT ON INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT OF 1981

Mr. BAKER. Mr. President, I submit a report of the committee of conference on S. 1196 and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. SPECTER). The report will be stated.

The bill clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD).

Mr. BAKER. Mr. President, I ask for the yeas and nays on the conference report.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, in addition to the foreign assistance authorization conference report, there may be other matters we can deal with, but I am unsure at this time.

I did not mean to imply that there will be nothing else. I simply meant to say that I am substituting the foreign assistance conference report for the identities bill.

I hope we can transact other matters, and I expect the Senate to be in session until 7:30 tonight.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I yield to the Senator from Illinois.

Mr. PERCY. Mr. President, I understand that the conference report on economic and military assistance is the pending business.

The PRESIDING OFFICER. The Senator is correct.

Mr. PERCY. Mr. President, the House-Senate conferees met for 2 days and last night agreed to all provisions of this conference report, S. 1196.

This bill contains authorizations for appropriations of $5.9 billion in fiscal year 1982 and $5.9 billion in fiscal year 1983.

These levels represent about $800 million in reductions from the President's original foreign aid request and is consistent with his revised request.

The bill provides the President with $3.8 billion in security assistance programs in each year for strategically important countries like Israel, Egypt, Turkey, the Sudan, and Pakistan. In this sense, this bill is related to the Defense appropriations conference report just passed by the Senate. Both help protect U.S. national security interests.

The bill provides a new grant military aid program and authorizes the special defense acquisition fund. This fund should shorten the lead time for deliveries of U.S. arms to our allies.

The bill also authorizes development assistance funds of $1.6 billion in each fiscal year. These programs complement the security assistance program and provide for longer term economic security in the developing world.

The bill also provides authorization for the Public Law 480 food-for-peace program and for the Peace Corps. The Peace Corps would be separated from ACTION under the provisions of this bill.

The bill also provides the President with additional flexibility to conduct foreign policy. For example, it lifts the repeal of foreign aid prohibition on Argentina and Chile after certain certifications are made by the President. The bill also repeals dozens of outmoded provisions and consolidates and reduces reporting requirements.

Both military and economic assistance is provided in El Salvador, but the President is required to make several certifications related to internal developments there before such aid can be provided.

The bill contains funds for the President's new initiative with regard to Pakistan. At the same time, it strengthens U.S. nuclear nonproliferation policy by providing a strict cutoff of assistance if a nonnuclear country should detonate a nuclear device or should receive delivery of a nuclear weapon.

Funds are also included for important congressional initiatives relating to aid to Poland, Costa Rica, and Tunisia.

Mr. President, this is a well-balanced bill. It provides adequate economic and military aid with the concept of budget restraint in mind. It provides for additional Presidential flexibility without giving up congressional prerogative. This bill serves the national security interests of the United States. The administration strongly supports its adoption.

Mr. President, I take this opportunity to thank my committee colleagues on both sides of the aisle, and certainly my distinguished friend and colleague, Senator PELL, of Rhode Island, who has been a power of strength in all of these matters this year.

This has been a very demanding year on the Foreign Relations Committee but in this bill and in other bills, although we have not always agreed, we have always abided by our word. We tried to see that we had fair representation of all opposing points of view, and when we were ready for the vote, we had the vote. That has expedited the work of this conference.

I wish to pay great tribute to our colleagues in the House of Representatives who did attend all of the conference meetings in full force and who contributed significantly to this bill. I particularly wish to commend my colleague, the chairman of the House Foreign Affairs Committee, Congressman ZABLOCKI, who acted as chairman of our conference with exemplary skill.

Mr. CRANSTON. Mr. President, there is one segment of the conference report I have a very strong interest in. Title VI of S. 1196—which derives from S. 1015, the Peace Corps autonomy bill that I introduced on April 27, 1981—provides for the separation of the Peace Corps from the ACTION Agency. Enactment of this measure will mean the fulfillment of the goal which I and the many, many friends of the Peace Corps throughout the Nation have long awaited.

As I have said several times over the past year during the several debates in this Chamber on this matter, I can think of no more fitting present to bestow upon this magnificent program during this, its 20th year than to give it the independence necessary to restore it to the strength and vitality it once enjoyed. So, today is indeed a long awaited, joyous day for the Peace Corps.

LEGISLATIVE BACKGROUND

Mr. President, let me briefly recount the steps that led to the inclusion of these provisions in today's conference report.

For some time—prior to this administration—there has been a great deal of unhappiness regarding the placement of the Peace Corps within the ACTION agency. Many individuals felt that President Nixon's original decision to place the Peace Corps within the ACTION Agency was a calculated move to downgrade and eventually eliminate the Peace Corps. During its early years within the ACTION Agency, the Peace Corps lost much of its visibility. It did not even have its own stationery then. Many people wondered if the Peace Corps still existed.

The situation had improved somewhat by the time the Carter administration took over, but there continued to exist strong feelings that the Peace Corps was ill-served in the ACTION Agency bureaucracy. These concerns led the House in 1979 to pass legislation to remove the Peace Corps from the ACTION Agency and place it in the then newly forming International Development Cooperation Agency.

The Senate did not approve similar proposals—partly because of opposition to placement of the Peace Corps in an international development agency and partly because of the issuance of a new Executive Order No. 12137 in 1979 which was aimed at giving the Peace Corps autonomy within the ACTION Agency. Many of us in 1979 expressed our desire to give the new Executive order a chance to work. Unfortunately, it did not resolve the problems inherent in the relationship between the ACTION Agency and the Peace Corps.

The ACTION Agency, not the Peace Corps, retained control over critical functions such as recruitment and communications. This arrangement was costly to the Peace Corps in terms of dollars as well as morale and efficiency. Internal Peace Corps budget projections have indicated that after one-time separation costs of about $900,000, the Peace Corps will save $1 million annually after it is freed from the ACTION bureaucracy.

The nomination early this year to be Director of the ACTION Agency of an individual with a substantial background in military intelligence training and overseas military intelligence operations was also a matter of grave concern to many friends of the Peace Corps. Throughout every administration since the Peace Corps was first established, there has been a firm commitment to complete and total separation of this program from intelligence activities.

There has also been an equally strong commitment to avoiding even the appearance of a connection with intelligence activities. The nomination of the new Director of the ACTION Agency breached this longstanding policy and provided additional impetus for the move to separate the Peace Corps from the ACTION Agency.

Thus, on April 27, 1981, I introduced S. 1015 to separate the Peace Corps from the ACTION Agency. This measure was cosponsored by Senators from both sides of the aisle, including Senators PELL, MATHIAS, BIDEN, SARBANES, TSONGAS, BAUCUS, KENNEDY, DODD, GLENN, BRADLEY, BOSCHWITZ, LEVIN, and HART.

On May 13, the Foreign Relations Committee approved S. 1015 and incorporated the identical text in S. 1196, the measure before us today.

On June 17, I offered the text of S. 1015 as reported as an amendment to the Department of State authorization bill, S. 1193, and it was approved by the Senate after a motion to table the amendment was defeated on a vote of 45 to 52.

On October 22, the Senate again approved these provisions as part of S. 1196 by defeating—on a vote of 39 to 48—a motion to strike these provisions and by tabling—on a vote of 49 to 37—an amendment to delay until October 1982 the effective date of separation.

My statements on these matters appear in the RECORD daily editions for April 27, June 17, and October 21 and 22 beginning at S3986, S6370, S11797, and S11875, respectively, and I call the attention of any colleagues to my explanation in those debates of the importance of and reasons in support of Peace Corps autonomy.

With the House approval last week of almost identical provisions—by rejecting on a vote of 155 to 258 a motion to strike these provisions from the House foreign assistance authorization bill, H.R. 3566—separation of the Peace Corps from the ACTION Agency had received a strong bipartisan endorsement in both bodies.

The Congress, in these several votes taken this year, has now spoken clearly and unequivocally in support of Peace Corps autonomy, and enactment of this conference report will make this long-awaited goal a reality.

CONFERENCE AGREEMENT

Mr. President, the Senate and House provisions regarding the Peace Corps were very similar, with only a very few differences.

First, the Senate bill contained several provisions, all of which were retained in the conference agreement, dealing with employee rights including the transfer of personnel from the ACTION Agency general schedule personnel system to the Peace Corps foreign service-based personnel system. These latter provisions are derived from section 5 of Public Law 89–134 which established the unique, unified Peace Corps personnel system, and the conferees expressed in the joint explanatory statement accompanying the conference report the intent that these provisions be implemented in a similar fashion.

Second, the conference report includes an amendment to these Senate provisions to clarify that the transfer of personnel under these authorities would not be subject to the provisions of subparagraph (B) of section 7(a)(2) of the Peace Corps Act. Subparagraph (B), sometimes referred to as the "in and out" rule, generally prohibits an individual who has been employed by the Peace Corps from being reemployed until he or she has been out of Peace Corps employment for a period of time equal to the duration of that individual's preceding tour of Peace Corps employment. Under the conference agreement, this limitation would not apply so as to bar the transfer from the ACTION Agency to the Peace Corps, in connection with enactment of the separation legislation, of a particular employee who was previously employed by the Peace Corps.

Third, the conference agreement contains a provision—derived from the House amendment—requiring that the Director of the Peace Corps continue to perform the functions the Director was performing on December 14, 1981—the date the conference reached agreement on this bill. In other words, the President would not be authorized to withdraw from the Director of the Peace Corps responsibilities which had previously been delegated to the Director of the Peace Corps.

Finally, Mr. President, the Senate bill and the House amendment both provided that the separation would be effective immediately upon enactment and included provisions for various reports to be made to the appropriate committees of the Congress and the Comptroller General on implementation of the separation legislation and for the Comptroller General to oversee that implementation.

CONTRIBUTIONS OF MANY

Mr. President, in closing I want to pay tribute to those individuals who have worked so very hard for enactment of this measure. Great credit goes to Sargent Shriver, the first Director of the Peace Corps, and William Josephson, one of the Peace Corps' founding fathers and a former Peace Corps General Counsel, for their tireless work on behalf of this matter and on behalf of the Peace Corps generally.

On the Senate side, the distinguished chairman of the Senate Foreign Relations Committee (Mr. PERCY) and its most able ranking Democratic member (Mr. PELL), as well as my colleague and good friend from Maryland (Mr. MATHIAS), have all steadfastly supported this effort. My very good friends and colleagues on the Foreign Relations Committee and the two former Peace Corps volunteers now serving in the Senate, the Senator from Massachusetts (Mr. TSONGAS) and the Senator from Connecticut (Mr. DODD), have also worked very hard for enactment of this measure, and their experience and commitment to the Peace Corps contributed greatly to this body's careful consideration of the issues involved.

In the other body, great thanks are owed to the distinguished chairman of the House Foreign Affairs Committee (Mr. ZABLOCKI) and the member from Washington (Mr. BONKER), a long-time champion of Peace Corps independence legislation, who so ably guided these provisions through that body.

Finally, I want to express my appreciation to the many staff members in both bodies who have worked with great dedication and persistence on these provisions over this year—Margaret Goodman of Chairman ZABLOCKI's staff, Holly Burkhalter of Representative BONKER's staff, Gerry Connolly, Gerry Christianson, and Bob Russell of the Foreign Relations Committee staff, as well as those staff members assisting me who have devoted seemingly endless hours to this legislation—Susanne Martinez and David Krawitz, as well as Ed Scott and Jon Steinberg, each of whom, incidently, has served as Deputy General Counsel of the Peace Corps.

CONCLUSION

Mr. President, I wish for the Peace Corps renewed vitality, strength, and dedication to the principles upon which this wonderful program was founded. In adopting this conference report, the entire Congress is joining in these sentiments.

The Peace Corps has always represented the best that is within the American people—the willingness to give of themselves for the betterment of mankind. I hope that with the separation issue behind us the administration and those of us in the Congress who believe so strongly in the idealism from which the Peace Corps draws its greatest strength will unite in support of this program.

The Peace Corps is not and never has been a partisan program. It has always enjoyed broad bipartisan support, and I believe and hope that this support will continue and grow and that we will see in the next decade renewed commitment and support for this truly inspiring program of people-to-people assistance, love, and mutual understanding.

Mr. PELL. Mr. President, I join with the chairman of the committee, the senior Senator from Illinois, in supporting this conference report.

I congratulate him on the expeditious way he went through it, and on the give and take that was evident at the con-

ference. I think we have a good final product which is midway between the House position and the Senate position.

I suggest we vote upon it.

Mr. PERCY. Mr. President, have the yeas and nays already been ordered? We are ready for the vote.

The PRESIDING OFFICER. The Senator is correct. The yeas and nays have already been ordered.

The question is on agreeing to the conference report.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Maryland (Mr. MATHIAS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The PRESIDING OFFICER. Is there any other Senator in the Chamber who wishes to vote?

The result was announced—yeas 55, nays 42, as follows:

[Rollcall Vote No. 490 Leg.]

YEAS—55

Baker	Gorton	Murkowski
Biden	Hart	Packwood
Boschwitz	Hatfield	Pell
Bradley	Hawkins	Percy
Bumpers	Hayakawa	Quayle
Chafee	Heinz	Riegle
Chiles	Huddleston	Rudman

Eagleton	Mattingly	Zorinsky
East	McClure	
	Melcher	

NOT VOTING—3

Goldwater	Mathias	Tower

So the conference report was agreed to.

IMPOSITION OF MARTIAL LAW IN POLAND

Mr. PERCY. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 268) on the imposition of martial law in Poland.

Mr. RANDOLPH. Mr. President, we cannot hear. The Senate is not in order.

The PRESIDING OFFICER. The Senate will be in order.

Is there objection to the immediate consideration of the resolution? Without objection, it is so ordered.

The Senate proceeded to consider the resolution.

Mr. PERCY. Mr. President, I offer this resolution on behalf of myself and Senator MOYNIHAN, the principal cosponsor, and Senators ABDNOR, BENTSEN, BRADLEY, COHEN, D'AMATO, DECONCINI, DODD, DOMENICI, DURENBERGER, EAGLETON, HEINZ, HUMPHREY, KENNEDY, LEAHY, LEVIN, METZENBAUM, MITCHELL, MURKOWSKI, NUNN, SPECTER, THURMOND, WALLOP, WEICKER, and ZORINSKY.

Mr. MOYNIHAN. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. PERCY. Mr. President, all Americans are saddened and anxious about the severe setback to Poland's courageous and inspiring renewal process represented by the imposition of marital law. This represents a sharp break with the practice, throughout the 18 months of Poland's renewal, of resolving problems throughout negotiation and compromise.

I am hopeful that General Jaruzelski and the people around him will indeed put the interests of the Polish people and nation first, that they mean it when they say there will be no return to the conditions prevailing before August 1980, that they are committed to the reform process, and that they will implement martial law provisions with regard for the civil and human rights of the population.

It is, frankly, too early to tell. But there are worrisome signs already in the Government's widespread detentions, in the abrogation of many civil rights, and in the cutting of most internal and external communications.

It is very timely therefore for the U.S. Senate to put down a marker now, that the attitude of the American people toward the present Government in Poland will be directly related to evidence of its commitment to continuation of the renewal process, and of its treatment of the Polish people.

The PRESIDING OFFICER. The Senate will be in order.

Mr. MOYNIHAN. Mr. President, as the principal cosponsor of the resolution under consideration, may I add the simple statement, which I am sure is a judgment to be shared by this entire body, that the Senate does deeply desire that we might see Lech Walesa on Polish television.

His apparent disappearance, the reports that he has been placed under house arrest, have not been confirmed, is ominous, and I will return to that point in a moment.

Mr. President, may I offer the view that this is a time when we all share the profound sense that there are right things to say and wrong things to say, publicly, about the events unfolding in Poland. There should be no doubt about our determination and resolve to stand for a measure of decency and respect as it concerns the relations amongst nations. There are standards of international law, there are standards of decency to which civilized nations adhere, and the United State of America will not tolerate flagrant violations of those standards.

As to the events evolving in Poland, I make the point that we have stated over and over that the foreign policy of our Nation is contingent in part on the manner in which other nations conduct their domestic affairs. We do not consort with nations which violate, flagrantly, the civil and human rights of their own citizens. Neither do we abide by ruthless, totalitarian practices which are designed, in the very least, to intimidate and harass the legitimate aspirations of those who struggle to be free.

I make this point, Mr. President, because we have witnessed over the past year a series of developments in Poland which have been truly staggering in their importance to the free world. There was a time when I, and a good many others, held the notion that a totalitarian system would never assent to political reform and economic reform which challenged the institutional structure of that system's society.

Over the last year in Poland there have been profound changes in Polish society which call that notion into dispute. There has been recognition of a free and independent trade union movement. There has been open and, to a degree, unfettered debate over the role workers may play in managing the economic affairs of the enterprise.

These developments have been cause for optimism in the West. They have been a signal that there might be common grounds upon which the peoples and governments of nations, East and West, might carry on productive dialog. This hope has been, indeed, stronger than at any time before in the history of relations between the socialist and democratic nations.

Poland, we should remember, has a proud history of popular efforts to reform, to improve, to change—from the struggle for the institution of free workers councils in 1956–58, to the argument over economic reform in 1970 which led to greater attention to the needs of Polish consumers, to the flowering of the Solidarity organization and an undeniably democratic movement in Poland during the past 22 months.

Mr. President, there is, thus, a history here we should recognize. A cherished sentiment among the Polish people that there are alternatives to the Stalinist, command-oriented political economy which has stifled progress and freedom in so many other totalitarian societies.

Tonight, Mr. President, the Senate of the United States associates itself with this struggle of the Polish people. It makes the statement contained in this resolution not from a sense of confrontation, but from a perspective of compassion for those who are now laying the achievements of the past year on the line.

The purpose of this resolution, more than anything else, Mr. President, is to say to Poland, and indeed to all those who might victimize Poland, that the whole world is watching. The progress

and the liberty which was beginning to shine in Poland will not be darkened so long as the world notes and supports the valiant struggle to the Polish workers. And the world will never forget, never forgive if even darker forces now seek to extinguish that light. Mr. President, we await the outcome of the struggle in Poland and we say, as a united Senate, that the institutions of our Government, the President, and the Congress, stand mobilized to do what we may in the name of freedom, and in the name of common decency.

Mr. President, there are materials which I should wish to submit for inclusion in the RECORD at the conclusion of my statement and I would also note, as I did earlier, that the first step the Polish authorities might take to alleviate the profound concern and anxiety in the West is to show us that Lech Walesa continues his extraordinary work as a spokesman for Polish workers. Let them put Lech Walesa on the air so that we all might hear an accurate report of where the negotiations stand. It would be a beginning to the process which must occur if we all are to avoid a most serious and disruptive crisis in world affairs.

Mr. President, I commend the Senator from Illinois (Mr. PERCY), and I say that it is an honor and a distinct privilege to have cooperated in the drafting of this resolution, which I now proudly join in cosponsoring.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMITTEE IN SUPPORT OF SOLIDARITY

We, the undersigned, declare: At midnight on December 13th, 1981, the Polish army and police raided the offices of the Independent Trade Union "Solidarity"; thousands, perhaps tens of thousands of people, were arrested in their homes. The Prime Minister, Minister of Defense and First Secretary of the Polish Communist Party in one person, General Jaruzelski, declared martial law.

Polish society, in whose overwhelming support Solidarity has its strength, has exercised tremendous restraint in the face of countless acts of provocation on the part of the government. In the course of its sixteen months of existence, Solidarity has committed *NO* illegal acts; it has rigorously respected the Polish constitution and all the forms of political life accepted in civilized societies. Each and every voice from Solidarity, even if termed "radical" by the communist party or the western media, has been no more than the exercise of that right to free and open discussion of national affairs which is guaranteed by the constitution. The party and the government, on the other hand, have violated almost every agreement they have signed; they have also violated the basic right of all citizens to freedom of expression.

The present events are NOT the "internal affairs of Poland." The Soviet Union has been intervening in Polish internal affairs since 1944. The Junta of General Jaruzelski, by linking the arrests of Solidarity members to those of former party officials, is clearly attempting to blame Solidarity for the thirty-six years of indolent and devastating communist rule which have brought Poland to economic collapse. The strikes called by Solidarity have resulted in the loss of one day's work in sixteen months; the losses due to mismanagement and lack of supplies have resulted in the loss of over twenty days of work.

We appeal to every democratic government, and to all those who believe in the Polish people's right to basic freedoms, immediately to halt all transactions, economic and other, with Poland, until every member of Solidarity is freed.

STANISLAW BARANCZAK.
JOSIF BRODSKY.
LESZEK KOLAKOVSKI.
CZESLAW MILOSZ.
SUSAN SONNTAG.
THOMAS WANZLOUTS.
ADAM ULAN.

When we signed the Gdansk Agreements at the end of September 1980, it was in the hope that from this moment the method of governing in Poland would change, that the process of economic collapse would be stopped, and that society would regain its voice. Our hopes were misguided. In the course of sixteen months, out of twenty-one points of accord only two have been realized. During this time negotiations took place concerning both minor matters, such as work conditions, and those of fundamental importance to the state, such as economic reform. None of these accords were realized. For sixteen months the government was on strike. The Polish authorities took no action whatesoever towards strengthening the economy; instead they blamed Solidarity for thirty-six years of indolent and incompetent economic management.

For thirteen months we waited for the enaction of the law on censorship; for twelve months we waited for the law on self-management. A year was needed for negotiations concerning the law on higher education and on economic reform. And for the law on trade unions we have now been waiting sixteen months.

In the course of the past month the government has been trying to undermine the fundamental right by working people in August 1980—the right to strike. Solidarity has no access to the media, which are controlled by the communist regime. In an atmosphere of endless attacks and insults from the authorities, the strike, the political strike, became the sole remaining weapon. (In 1981, strikes took up little more than one working day.)

It is hardly surprising that Polish society has no confidence in the government. Since none of our accords, our hopes or our expectations have been realized, we have with increasing frequency had to demand structural changes in the system of government. At the end of last week these demands led to a call for a national referendum on the degree of confluence on the part of the people in the existing government.

It must be stressed that neither Solidarity nor any of the dissident organizations in Poland have ever made any statements concerning the Warsaw Pact or the Council for Mutual Economic Aid.

The authorities have involved us in countless provocations. Some examples: the October 1980 crisis provoked by the refusal to register Solidarity as a trade union; the March 1981 assault on Solidarity representatives during their visit to the National Council in Bydgoanon, where they had been invited for talks; the November 1981 incident in Silesia, where so-called "unknown agents" scattered containers of poisonous gas—70 workers were subsequently hospitalized. There is no lack of examples. The current attack is yet another attempt to stifle Solidarity and deprive Polish society of the limited freedom which it fought for and won in August 1980.

KIROSLAW CHOJECKI.

Mr. PERCY. I thank my colleague from New York for the deep concern he has expressed today.

The PRESIDING OFFICER. Who yields time?

Mr. PERCY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. PERCY. I withhold that request for just a moment.

Mr. JEPSEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. JEPSEN. Will the Senator yield for a question?

Mr. PERCY. I am happy to yield.

Mr. JEPSEN. In the judgment of the Senator from Illinois, is there anything in this resolution anywhere which indicates an approval or sanction by this resolution of any type of an embargo being singled out in any way? The resolution refers to "except for humanitarian reasons."

Mr. PERCY. I do not believe that there is anything in here that would in any way call for or countenance an embargo. The section most pertinent would be section 3:

(3) recent events call into question the suitability of the further provision of assistance to the government of Poland except for humanitarian programs.

That is simply stating a fact. I have previously, on the floor of the Senate today, at some considerable length, developed the fact that this is the exact kind of case where, if the Government of the United States decides to take action, it must take action across the board on anything and everything, and not simply, once again, singling out, as was done several years ago, agriculture to bear the full price and the full burden of implementing our foreign policy.

This is simply a statement of what the executive branch has decided to do at this time. I think we want to make eminently clear that many of us feel very strongly that agriculture should not bear the burden.

Mr. JEPSEN. Mr. President, there have been rumors, and that is not uncommon around here, that there would be a possible trade embargo with regard to the Polish situation. I called the Department of Agriculture and they reiterated a statement made by Secretary Block today on the Reagan administration's keeping the trade channels open, that the American farmer will not be singled out to bear the financial burden of an embargo.

I want to be certain that this Senate does not go on record with anything that will be regarded as being contrary to that.

Mr. PERCY. Mr. President, in view of the fact that there may be some under the impression that the last vote on foreign assistance was the last rollcall vote, I see no reason for the yeas and nays, and I would suggest that we have a voice vote on this resolution.

Mr. MOYNIHAN. Would the distinguished Chairman allow me to observe that were we to have a rollcall vote, I am sure it would be unanimous.

Mr. PERCY. There would be no question about it.

Mr. PELL. Mr. President, ever since July 1980, when workers in Gdansk began a historic strike, Americans have watched the unfolding drama in Poland with a mixture of hope and concern. The reason for hope has been obvious: the

formation of a Polish free trade union movement has demonstrated the determination of Poland's people to lift from themselves the terrible burden of economic and political repression under which they have labored so long. The cause for concern has been equally clear: though gallant and necessary, the national effort to bring greater freedom to Poland has raised the dual specter of domestic violence and Soviet intervention.

Thus far, neither has occurred. But recent developments are both sad and ominous. By declaring martial law and suspending basic civil freedoms as well as newly-won union rights, the government of Prime Minister Jaruzelski has dealt a tragic blow to the aspirations of the Polish people. It has also created an immediate danger of civil strife, which could in turn invite Soviet action.

As of today, we cannot know how severe the Polish Government will be in acting to impose order. Nor can we yet gauge the full extent or nature of resistance among the Polish people. What we must hope to encourage, however, is some continuation of the process of negotiation and compromise which has carried Poland without bloodshed through the tumultuous months since the summer of 1980. The landmark agreement reached then between government and labor was made possible because as defense minister, General Jaruzelski refused to use Polish troops against Polish factory workers. Poland's great question today is whether the same General Jaruzelski, as head of the 20-member military council which now controls the Polish government, will continue to demonstrate such flexibility and restraint.

Given the great uncertainty that surrounds current developments in Poland, American actions must necessarily at this point be limited. But certain steps are appropriate. In imposing martial law, Poland's new military council declared that it does not intend to return Poland to the system against which workers arose in 1980. American policy must make clear that Poland's future relations with the West will depend on how well this promise is kept. We should also, in concert with our allies, reiterate to the Kremlin the extreme gravity with which we would respond to Soviet intervention in Poland. Finally, we need to consult further with our allies to insure a coordinated Western response to any eventuality.

Mr. President, the stakes in Poland could hardly be higher than they are today. At issue is the welfare of the entire Polish nation and possibly the future of East-West relations. In large measure, the outcome of the crisis will be determined in Poland by the Poles themselves. But as events unfold, our own actions could have significant bearing. I therefore intend to vote for this resolution both as an expression of deeply-felt American concern and as the outline of a prudent American policy.

Mr. KENNEDY. Mr. President, I am pleased to join as a cosponsor of this sense-of-the-Senate resolution against repression in Poland.

This resolution expresses the deep concerns of this body—which I believe are shared by the Congress and the American people—about the imposition of martial law, the promulgation of new and repressive emergency measures, and the arrests of labor union leaders in Poland.

None of these actions are acceptable to the Polish people or to international opinion, Mr. President. This resolution makes clear our opposition to these actions. It supports an early and peaceful and popularly supported resolution of the problems faced by the Polish nation. It opposes outside interference of any kind in Poland. And it relates future U.S. dealings with the Polish Government to the avoidance of violence and bloodshed and to the Polish Government's respect for a full and legitimate role for the Solidarity Labor Union and its commitment to the continuation of reforms in Poland.

These are all important elements of an effective United States and Western policy toward Poland, Mr. President, I was pleased to work with the chairman of the Senate Foreign Relations Committee and sponsor of this resolution, Senator PERCY, and I express appreciation for his agreement to the provision which I had suggested involving the full and legitimate role of Solidarity in Poland's future.

Mr. President, the achievements of Solidarity have brought new hope to the Polish nation and to all who care about the cause of Polish freedom. Whatever developments may occur in these difficult days, we know that the flame of liberty can never be extinguished—not in Poland, not in Eastern Europe, not even in the Soviet Union.

I call upon all my colleagues to support the resolution presently before the Senate, and through this resolution, to express their support for the cause of freedom and liberty in Poland and throughout the world.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, may I ask the distinguished chairman of the Foreign Relations Committee to add me as a cosponsor?

Mr. PERCY. Mr. President, I ask unanimous consent that the distinguished Senator from Virginia be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. I would like to ask the Senator from Illinois a question, if I might.

I refer to paragraph 3 of the resolve clause.

The PRESIDING OFFICER. Will the Senator use his microphone?

Mr. HARRY F. BYRD, JR. It says, "recent events called into question the suitability of the further provision of assistance to the Government of Poland."

My question is, what assistance does the U.S. Government now give to the Government of Poland?

Mr. PERCY. Well, it has been essentially food assistance. This is large-scale sales, on the order of $700 million. The Government of Poland has made a request for continuing the assistance on extended or concessional credit terms. That is the request that is now being taken under advisement by the administration.

They have announced, as of yesterday, that everything that was in the pipeline destined for Poland will stay in that pipeline, but they are for the moment suspending consideration to the new request Poland has made for food assistance.

Mr. HARRY F. BYRD, JR. Essentially with food. What else besides food is this country going to give in the way of assistance?

Mr. PERCY. It is essentially food in that program.

Mr. HARRY F. BYRD, JR. The Government of Poland does not get assistance from the United States in the way of economic assistance or any other assistance except for food?

Mr. PERCY. That is the bulk of the program.

Mr. HARRY F. BYRD, JR. Is there any technology going to Poland?

Mr. PERCY. Not under an AID program.

Mr. HARRY F. BYRD, JR. I thank the Senator.

Mr. RANDOLPH. Will the Senator yield?

Mr. PERCY. I am happy to yield.

Mr. RANDOLPH. Mr. President, I strongly support this resolution and I ask to be included as a cosponsor.

Mr. PERCY. Mr. President, I ask unanimous consent that Senator RANDOLPH be added as a cosponsor and also Senators EXON and BURDICK.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Also I wish to add as a cosponsor the Senator from Ohio (Mr. GLENN), and the Senator from Florida (Mr. CHILES).

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Several Senators addressed the Chair.

Mr. SARBANES. Mr. President, may I be added as a cosponsor?

Mr. PERCY. Mr. President, I ask unanimous consent that I may add the Senator from Maryland (Mr. SARBANES) as a cosponsor.

The PRESIDING OFFICER. Without objection. it is so ordered.

Mr. MOYNIHAN. Would the distinguished chairman simply ask for those who wish to be added as cosponsors?

Mr. PERCY. Will those Senators wishing to be added as cosponsors please list their names with the clerk?

(The following names were added as cosponsors:)

Senators Bumpers, Burdick, Byrd, Harry F., Jr., Byrd, Robert C., Chafee, Chiles, Cranston, Dixon, Dole, Exon, Ford, Glenn, Gorton, Jepsen, Johnston, Kasten, Matsunaga, Melcher, Packwood, Pell, Pressler, Randolph, Riegle, Sarbanes, Sasser, Schmitt, and Williams.

Mr. DURENBERGER. Mr. President, for more than the past year, Americans have watched the events in Poland with a mixture of admiration and concern: Admiration for the courage of Polish citizens fighting for basic human rights and concern over the possible consequences of their brave stand.

Our admiration and concern were heightened this past weekend with the imposition of martial law by the Polish Government. The situation is serious; we all hope and pray that it is resolved peacefully and quickly.

The events in Poland have a special meaning for me. My great-grandfather was born in Pilchowice, 25 miles from the birthplace of Pope John Paul II. Several of my relatives still live near Pilchowice. A cousin spent 9 years in a Siberian prison camp and another cousin works long hours in a coal mine. Part of the irony of life in Poland is that despite my cousin's hard labor in the coal mines, he and his family cannot get enough coal to keep them warm in the winter.

As well as anyone, I am aware of the harshness of life in Poland. As closely as anyone, I have followed the events in Poland, watching each development with that same mixture of admiration and concern shared by other Americans, especially other Polish Americans.

Those emotions, though as deeply as they may be felt, must not be our guide in determining America's response to this latest crisis. So far, President Reagan and this country have responded with firmness and caution. That is a wise course to follow until events dictate otherwise.

For the sake of all those people in Poland for whom we care so much, we must work quietly to snuff out a smoldering fuse. That is the route President Reagan has chosen and it is the right one.

We will pray for the people of Poland and we will take the appropriate diplomatic steps. Right now, that course is in the best interests of the people of Poland.

Mr. President, I ask unanimous consent that two editorials—one from the December 15 Minneapolis Tribune and one from the December 15 St. Paul Pioneer Press be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD as follows:

[From the Minneapolis Tribune, Dec. 15, 1981]

HOW TO RESPOND TO THE CRISIS IN POLAND

Martial law in Poland has destroyed what shreds of meaning remained in the country's formal name. The Polish People's Republic is in crisis not only because of years-long ineptitude and corruption in an authoritarian system that demonstrably does not represent its people. The crisis also has erupted because workers in that supposedly socialist state want a say in running it and last week called for nationwide free elections. In response, the government displayed unusual efficiency. The breadth and severity of the weekend clampdown point to carefully drawn plans, not a spur-of-the-moment reaction to the latest demands by Solidarity union leaders.

People everywhere will sympathize with Prime Minister Jaruzelski's plea that Poles "restrain the phantom of civil war" and build bridges rather than barricades. But the barricades are the abandonment of all pretense of civilian government, the arrests of dissidents and former government officials, the harsh restrictions on travel, communications, public gatherings. The government's actions testify to failure instead of strength, to fear instead of confidence. And though Solidarty's 9 million members may be forced to bend, their movement is unlikely to be broken. Therein lies the risk—to Poles, to their neighbors and to many other countries and institutions.

So far, the United States has responded with appropriate prudence. President Reagan and Secretary of State Haig have expressed their concern and have given clear but nonprovocative warnings against Soviet intervention. No responsible Western leaders suggest the use of armed force to prevent a Soviet move, but neither is the non-Communist world an isolated spectator.

Poland's strong Catholic Church, reinforced by a Polish pope, provides a unique avenue for moral suasion. Moreover, the West is bound to Poland by cultural and economic ties. An immediate issue is the rescheduling, planned for this week, of $2.4 billion of the $26-million Polish debt to Western banks and governments. And the Reagan administration must weigh a request by the Polish government for an additional $700 million in economic aid—roughly the same as the total granted to Poland all this year.

Soviet-Polish ties are far closer, and the dilemma for the Soviets is correspondingly greater. With the largest and best-equipped army of any Soviet ally, Poland remains of paramount importance to the Soviet Union. Yet for more than a year the Soviets have not responded to Solidarity's challenge as they did to the stirrings of self-determination in Hungary in 1956 and Czechoslovakia in 1966, when in each case the Soviets sent in their own military forces. This is not to rule out that possibility now. In undoubted collaboration with Moscow, the military leaders in Warsaw have dropped one shoe; further confrontation in Poland could cause the other to drop, bringing in Soviet troops.

Western leaders must watch, wait and seek quietly to defuse the crisis. The steps are limited but important. Urge the Polish government and Solidarity leaders to back away from ultimatums. Keep open the door to debt renegotiations. Point out the impossibility of providing aid in the midst of a Polish government crackdown. Push for remedying the economic mismanagement that has hobbled Poland for years. And advise the Soviet Union what it should already know—that an invasion of Poland would do enormous damage to trade and other relations with the United States.

[From the St. Paul Pioneer Press, Dec. 15, 1981]

POLAND'S MARTIAL LAW

The imposition of martial law by the Polish government could hardly be described as unexpected. The government and Solidarity, the Polish independent union movement, had been moving toward confrontation in fits and starts, but inexorably, for more than a year.

Most of the questions being asked in the West involve the Soviet Union. Was the Polish government's move forced upon it by Moscow, or did Warsaw act on its own in response to a challenge to its existence? Is this Moscow's way of overturning all the gains made by Solidarity, or does the Polish government intend that some of them shall survive the period of martial law? Has the Soviet Union outfoxed the United States and the West in a calculated maneuver to keep the situation one of purely Polish domestic concern, thus inhibiting any Western attempt to carry out its threats of "grave consequences" for Soviet intervention?

We cannot know the answers now, though certainly we can speculate that most or all these elements were present in the Polish government's decision to act. Nor are we ever likely to know the answers with any degree of certainty unless resistance to martial law finds the Polish authorities unable to cope and the Russians move in. There is no doubt the Kremlin is pleased by the Polish government's action, and will be even more pleased if Solidarity and the forces of discontent it represents are permanently subdued, but to say the Soviet Union dictated the move, as many in the western media are saying, is to make as-yet unwarranted assumptions.

Much depends on the Polish Catholic church—even on Pope John Paul II—and the direction in which it tries to steer the Polish people. If it seeks accommodation and compromise to avoid violent popular reaction (and these are objectives which have marked its successful course since World War II), Poland's long revolt against its Communist masters, their failures and their hated privileges, could cool from near the boiling point to a slow simmer.

More depends on the government itself. If under martial law it cannot shorten the food lines, find decent housing, improve health care and destroy the hated Communist-Party "class system" that makes rich men out of bureaucrats and ignores the workers it is supposed to represent—in short, unless communism can overcome its own failures—nothing the church or "moderate" Solidarity leaders can do will put down the fires.

The odds are that the Soviet Union will be content to stand by for the present, to see how well the Polish authorities handle their problems. They have to be hoping they do their job swiftly and thoroughly.

A wait-and-see attitude is all to Moscow's advantage. For one thing, it puts the United States in a perplexing situation. Washington cannot take action against Moscow—to embargo all trade, for example, or even to seek some sort of diplomatic censure—and it must now wrestle with the question of going ahead with economic aid to the Poles. That is, America cannot take such action unless and until it has substantive proof that Moscow directly instigated the Polish martial law. And no such evidence may exist.

Americans should be careful not to misinterpret the nature of the Poles' rebellion against Communist government. It is not a simple case of wanting to replace communism with capitalism, western style. That there are those within Solidarity who would like that sort of capitalism is probably true, but Solidarity is a complex amalgam of a wide variety of views, right to left, including some to the left of orthodox communism.

Solidarity represents a revolt not so much against the theory of communism or even its practice as against its many and manifest failures and, with particular bitterness, against its profound abuses. As in other Communist countries, communism brings with it a distinct class system, with privileges for party and government "biggies" that are the more galling because Communism professes to be the means of eliminating class distinctions and privileges.

In Poland these privileges have become especially scandalous. Party and government officials live high on the hog in a land with serious long-term food and housing shortages.

In his martial law decree, Prime Minister Wojciech Jaruzelski hinted that the government would act to eliminate these abuses of power and position. Among those put under arrest were a number of the high-riding bureacrats and party members, including a former party secretary. If he means what he says, he may go far toward placating the people and undercutting Solidarity's strength. If he does not, the country may drop into that abyss he has been so fond of describing as imminent.

That there is a powerful sentiment in Poland against communism itself, however, cannot be denied. But it is not likely that, even had Solidarity been able to have its way, the Poles would have returned to old-fashioned capitalism. Rather, it is likely they would have sought a socialism with more control vested in the unions (there is a strong streak of syndicalism in Solidarity) and far less in central government planning, Moscow-style.

It is possible some such system may yet evolve in Poland, but the eventual shape of the Polish economic system is hardly the main issue right now. Today the issue is survival as a society with at least some freedom, even within the Soviet sphere, to determine its own fate.

Mr. ABDNOR. Mr. President, we are all aware of the state of emergency that exists today in Poland. The Communist government has jailed the leaders of the free Solidarity Union and threatened the people of Poland with execution if they protest this violent crackdown with strikes or public gatherings.

Despite the fear that the Polish people must live with day after day, they know that they have the full support of the American people. Over 200,000 persons have signed a petition circulated by the College Republican National Committee, stating complete support for the people of Poland to retain their inalienable rights.

And although the Communist Party is attempting to stifle freedom of expression by banning all public gatherings in Poland, the College Republicans have held public rallies of support for Solidarity in 12 States across the Nation. Twenty-seven such rallies were held in November and many more are planned in the coming weeks.

I commend the College Republican National Committee for this nationwide campaign of support. The world must know how firmly we stand behind those who desire their birthright of freedoms that we so often take for granted.

Mr. President, I am also proud to cosponsor with the distinguished chairman of the Committee on Foreign Relations, the senior Senator from Illinois, a sense of the Senate resolution expressing grave concern with the imposition of martial law in Poland and the imminent threat of outside interference to Poland's renewal.

Mr. LEVIN. Mr. President, earlier today, I wrote to President Reagan and Secretary of State Haig indicating my support for the general tone they had adopted relative to the current situation in Poland. In that letter, I also spelled out some of the problems I have with certain components of our policy. I ask unanimous consent that the letter appear in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., Dec. 15, 1981.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I support those of your efforts which suggest America's compelling interest in the emerging Polish crisis while expressing the hope that this matter can be resolved by the Polish people themselves.

I do, however, have problems with three specific components of the approach we have adopted. I hope that you will consider these concerns and, to the extent possible, incorporate them into the future actions of the Administration.

First, in terms of food aid, I do not understand the reasoning behind Secretary Haig's announced decision to hold in abeyance any decisions for future PL 480 food assistance. Obviously, the food shortage in Poland is one of the factors driving the current conflict. Thus, while we are urging all parties to "cool down" and engage in peaceful discussions, we threaten the very food shipments which can help make conditions bearable and help reduce a primary cause of tension. The only result I can see flowing from a delay in additional food aid is an increase in the frustration of the Polish people, a corresponding increase in government repression, and an increasing possibility of a direct Soviet military involvement. Accordingly, Mr. President, I would hope that you will make clear that the United States will continue and even increase food aid to the Polish people. There is no reason, and no benefit, associated with attempts to punish the Polish people for the acts of their government.

Second, I am concerned about the fact that the Administration has ruled out any American military response to a Soviet invasion of Poland. I understand that the geo-politics of the region makes any effective American response unlikely. But I see no reason to make Soviet strategy easier by announcing that we will not consider a military response, either in Poland or elsewhere, in the event of overt intervention of Soviet troops into Poland. I am not calling on the Administration to threaten the Soviets by pledging that we would respond militarily to an invasion. But I am suggesting that we ought not rule out such a response. It is better to keep the Russians guessing.

Third, I am concerned about our failure to be more specific about some of the economic consequences which would flow from a Soviet invasion while we should not limit our response to these specifics. I believe that your Administration ought to make it clear that a Soviet invasion would be met, for instance, with a total embargo on American trade with the Soviets, including the cancellation of the current wheat deal. Similarly, I believe your Administration should seek to obtain from our European allies their commitment to support a similar embargo, including cancellation of the natural gas pipeline proposal.

Mr. President, in this Christmas season, the Polish people are in the process of giving a gift of hope to freedom-loving people around the world. I believe that we need to make sure that they understand—and the Soviets understand—that their gift is appreciated and that we are willing to go to great lengths to guarantee that the Polish people will share the same gift this Christmas.

I appreciate your attention to these comments and suggestions.

Sincerely,

CARL LEVIN.

RUSSIAN-SPONSORED OPPRESSION IN POLAND

Mr. THURMOND. Mr. President, today in Poland the dead hand of Joseph Stalin animates a puppet Polish general, Wojciech Jaruzelski, as he works the will of his Russian master.

At his side, Soviet Marshal Victor Kulikov, First Minister of Defense of the Soviet Union, stands astride Poland insuring that Russian orders are obeyed.

The Polish people, who felt the warm breeze of freedom during this summer, now again face the harsh winter of Russian tyranny.

This is the background against which I speak. Yet, some suggest that the actions of the past few days are not sanctioned by the Soviet Union.

Their naivete is astonishing. The Soviet Union has two armored divisions already stationed in Poland, communications and helicopter units have recently reinforced them, and more than a week ago the Soviet marshal arrived to oversee the arrest and terror tactics of the Jaruzelski dictatorship.

Very little of the true state of affairs has reached the American public. The extent of censorship imposed by the Polish dictatorship makes clear again that there is indeed an Iron Curtain across Europe which enslaves the people of the Soviet bloc.

We have learned, however, in sketchy accounts that at least 3,000 of the Solidarity and intellectual leadership are under military arrest. We are informed that Solidarity leader Lech Walesa has not been arrested but is negotiating with the government.

Other accounts advise that Walesa is a "guest" in government quarters, but the quality of his freedom is largely of academic interest when an entire nation has been jailed—while the West learns again the forgotten lesson: Communism is the enemy of freedom in whatever form freedom takes and wherever freedom appears.

Even now Polish workers throughout the country are striking back at oppression. Their courage is an example for us all and a monument to the unrelenting desire of man for freedom.

But, words are many and actions far too few.

The United States, as leader of the free world, has an obligation to the Polish people and to all oppressed nations which cannot be discharged by words. I am pleased that the President and others in authority in the executive branch are considering a wide range of actions intended to punish the Soviet Union and the regime in Poland for this new assault on a people who ought to be free. For these people much should be done.

First, I urge that action taken by the administration be uniform and not involve only one form of sanction. A range of steps must be considered and should be implemented.

Second, the administration should seek only those punitive measures which most directly damage the Governments of the Soviet Union and of Poland and which least directly prejudice the ordinary people of either country.

Among the actions available to the United States, I urge the administration to consider specifically the following:

First, termination of the strategic arms negotiations now under way in Geneva, Switzerland;

Second, curtailment of the travel privileges of Communist bloc diplomats and employees stationed at the United Nations;

Third, denial to Poland and to the Soviet Union of any further bank credits, private or public, or any other international monetary assistance which may be within the control of the United States;

Fourth, imposition of a complete and effective embargo of all high technology exports to the Soviet Union or other

Warsaw Pact nations coupled with a cancellation of all existing export licenses under which the goods are to be exported but have not yet been delivered;

Fifth, stepped up support for anti-Communist forces in Central America and southern Africa at a level sufficient to roll back communism in those regions; and

Sixth, renewed efforts to block the Soviet oil and gas pipeline into West Germany for the purpose of maintaining the security of NATO forces.

In Congress, too, there are actions in which Congress can take the initiative.

The Senate and the House of Representatives should consider rules or other procedures to limit the accessibility to Congress of intelligence agents of the Soviet Union and other Soviet bloc countries. I, today, joined with Senator DENTON in introducing a bill which would have that effect.

Congress, too, should take a more active role in exposing the extent of Soviet KGB influence in the present Polish Government, in other nations of the Warsaw Pact, and in many so-called neutral Third World nations.

Finally, Congress should, to the maximum extent possible, inform the public of the scope and extent of KGB activities within the United States.

These actions, then, represent initial steps well within the power of the United States. These steps would serve to extract a price for the Stalinist attack on the people of Poland.

If we do nothing, or if we do little, the world will be confirmed in its growing belief that communism, once imposed, can never be overturned and that a nation under Soviet domination can never be freed, once enslaved.

But if courageous steps are taken communism can be turned back and freedom regained.

The PRESIDING OFFICER. The question is on agreeing to the resolution. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Maryland (Mr. MATHIAS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Delaware (Mr. BIDEN) and the Senator from Colorado (Mr. HART) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 95, nays 0, as follows:

[Rollcall Vote No. 491 Leg.]

YEAS—95

Abdnor	Byrd, Robert C.	Dole

NOT VOTING—5

Biden	Hart	Tower
Goldwater	Mathias	

So the resolution (S. Res. 268) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 268

Resolved,

Whereas the American and Polish peoples share a deep and abiding friendship;

Whereas the imposition of martial law and the suspension of workers' rights in Poland on December 13, 1981, constitute grave abridgements of the human rights and civil liberties of the Polish people;

Whereas it is the clear and unassailable right of the Polish people collectively to determine their own future: Now, therefore, be it

Resolved, That it is the Sense of the Senate that—

(1) the American people desire an early and peaceful and popularly supported resolution of the issues which have led to the imposition of martial law in Poland;

(2) the American people deplore the imposition of martial law in Poland, the suspension of the rights of workers to organize and peaceably to defend their interests, and the arrests of leaders of Solidarity, the free trade union;

(3) recent events call into question the suitability of the further provision of assistance to the government of Poland except for humanitarian programs.

(4) it is the right of the Polish people to resolve their own problems without outside interference of any kind;

(5) the support of the American people for continued U.S. dealings with the present government of Poland will relate directly to the degree to which the Polish government avoids violence and bloodshed, and demonstrates by its actions its respect for a full and legitimate role for the Solidarity labor union and its commitment to the continuation of Poland's reforms;

(6) the President and the Secretary of State should continue to stress this U.S. position in all dealings with Polish officials;

(7) the President and his Administration should consult intensively with our allies to develop a concerted and sustained response to the threat to the democratization process in Poland.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, there will be no more record votes tonight.

Mr. President, I wish to commend the distinguished chairman of the Foreign Relations Committee and the distinguished Senator from New York (Mr. MOYNIHAN) for their initiative and efforts on this important resolution. The unanimous vote of the Senate just recorded I think underscores the gravity of the situation and the commitment Members of the Senate have to the contents of this document.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, there are three other measures that can be dealt with tonight.

There are two bills that can be dealt with by the distinguished chairman of the Indian Affairs Committee. There is one that will be dealt with by the distinguished chairman of the Banking Committee.

Mr. President, after that it is contemplated that the black lung bill will be called up and made the pending business and will be pending when we return in the morning.

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business tonight it stand in recess until the hour of 10 a.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I yield the floor so that the Senator from Maine may proceed with the matters at hand.

The PRESIDING OFFICER. The Senator from Maine is recognized.

SUBORDINATION BY U.S. INTEREST OF MINERAL INTERESTS OF THE OSAGE INDIAN TRIBE

Mr. COHEN. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 4926, which is a bill to provide for a subordination by the United States of the mineral interests of the Osage Indian Tribe of Oklahoma as necessary for the construction and operation of the Skiatook Dam and Lake in Osage County, Okla.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 4926) to authorize the Secretary of the Army to acquire, by purchase or condemnation, such interests in oil, gas, coal, and other minerals owned or controlled by the Osage Tribe of Indians as are needed for Skiatook Lake, Okla., and for other purposes.

The PRESIDING OFFICER. Without objection, the bill will be considered to have been read twice and the Senate will proceed with its immediate consideration.

Mr. COHEN. Mr. President, I rise today to ask for immediate consideration of H.R. 4926, a bill to provide for a subordination by the United States of the mineral interests of the Osage Indian Tribe of Oklahoma as necessary for the con-

struction and operation of the Skiatook Dam and Lake in Osage County, Okla.

It is of the utmost urgency that Congress enact this legislation before the Christmas recess. The Corps of Engineers and the Osage Tribal Council have agreed on the value to be paid the Osage as compensation for the acquisition of this subordination and both the corps and the tribal council support this legislation.

Mr. President, this legislation does not involve any cost to the Government other than the $7.4 million that will be paid to the Osage Tribe from funds available to the Corps of Engineers authorized by other legislation. I urge the immediate enactment of this legislation.

Mr. BOREN. Mr. President, I first commend the distinguished chairman of the Select Committee on Indian Affairs, the Senator from Maine, for his expeditious handling of this very important piece of legislation.

H.R. 4926 represents the culmination of nearly 3 years of hard work to finalize an agreement between the Osage Tribe of Oklahoma and the Army Corps of Engineers for the completion of Skiatook Reservoir in northeastern Oklahoma. Under the provisions of a Federal court ruling, it is necessary for Congress to acquire a subordination of the Osage mineral rights before tribal lands can be flooded and the Skiatook project completed. H.R. 4926 provides for a settlement of $7.4 million in acquiring this subordination.

When completed, Skiatook Reservoir will provide much needed water to a rapidly growing section of Oklahoma. Over 10 communities have already applied for water from the Skiatook project, and the list is expected to grow. These communities presently depend on the city of Tulsa to supply their water needs. Since existing supplies are already becoming overextended, it is essential that the Skiatook project be completed as quickly as possible.

I express my special thanks to the Osage Tribe for its cooperation and assistance in working out the details of this agreement. I know the tribal leaders join with me in saying that this legislation represents a fair and equitable solution which serves the interests of all Oklahomans.

Mr. NICKLES. Mr. President, I wish to commend Senator COHEN for the outstanding job and also my colleague, Senator BOREN, for the cooperation in moving this important piece of legislation to the forefront and hopefully to final passage.

Mr. President, I support the legislation now before the U.S. Senate which will authorize the Secretary of the Army to acquire a subordination over the mineral rights owned by the Osage Tribe of Oklahoma in order to complete the Skiatook Reservoir in Osage County, Okla.

The bill represents the culmination of many months of effort by members of the Osage Tribe, the Corps of Engineers, and legislative staff of the House of Representatives and the U.S. Senate. The cooperation exhibited by all connected with this issue is an excellent example of the democratic process.

The Osage Tribe and the Corps of Engineers negotiated an agreement which will permit oil and gas recovery from the public use lands except the damsite area. The United States will, in turn, compensate the tribe for the subordination by a payment of $7.4 million.

This legislation is necessary because the courts found, in the case of the *United States* v. *Winnebago* Tribe of Nebraska, 542 F.2d 1002 (8th Cir., 1976), that the United States is not authorized to acquire mineral rights to Indian trust lands without a clear expression of congressional purpose to permit such acquisition. Construction had already started on the Skiatook project which was authorized in the Flood Control Act of 1962 when this judgment was handed down by the courts.

Again, I wish to commend the Osage Tribal Council and the Corps of Engineers who diligently pursued the agreement that will allow the completion of the Skiatook reservoir now over halfway. I also wish to express my appreciation to Senator COHEN, the chairman of the Select Committee on Indian Affairs, and the members of his committee staff in their assistance to see rapid enactment of this legislation.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 4926) was ordered to a third reading, was read the third time, and passed.

Mr. BOREN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. NICKLES. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING THE DISBURSEMENT OF CERTAIN TRUST FUNDS OF THE LAC COURTE OREILLES BAND OF CHIPPEWA INDIANS

Mr. COHEN. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 4894, a bill authorizing the disbursement of certain trust funds of the Lac Courte Oreilles Band of Chippewa Indians.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 4894) to authorize the Secretary of the Interior to disburse certain trust funds of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. COHEN. Mr. President, I rise today to support H.R. 4894, a bill which would authorize the Secretary of the Interior to disburse certain trust funds of the Lac Courte Oreilles Band of Chippewa Indians to satisfy tribal indebtedness.

Mr. President, the Select Committee on Indian Affairs has held a hearing on the Senate companion to H.R. 4894 (S. 1890) and reported the bill on Friday of last week. We believe this bill to be a responsible short-term solution to the problems which the tribe has encountered in the administration of programs under the Self-Determination Act.

Although the tribe should be commended for initiating this solution, the Congress should be aware that the problem is not limited to the Lac Courte Oreilles Band. On the contrary many tribes have experienced great difficulty in coping with the method of accounting that has been used to determine costs under the Self-Determination Act. This is a serious problem and should be the subject of further attention by Congress in the next session of the 97th Congress.

As I noted earlier, the Select Committee on Indian Affairs has held a hearing on this matter and has reported legislation dealing with it. The committee's bill corrects and clarifies the House bill.

UP AMENDMENT NO. 796

Mr. COHEN. Mr. President, I send to the desk an amendment in the nature of a substitute and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Maine (Mr. COHEN) proposes unprinted amendment numbered 796.

Mr. COHEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert, in lieu thereof, the following:

"That the Secretary of the Interior shall, at the request of the governing body of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, pay to the State Bank of Drummond, Drummond, Wisconsin, a portion (not to exceed 20 per centum) of the funds of such tribe derived from awards of the Indian Claims Commission in dockets numbered 18-C and 18-T which are deposited in the United States Treasury to the credit of such tribe in trust accounts numbered 14x9228 and 14x9728. Such payments shall be used for the sole purpose of covering or reducing an overdraft on an account (designated "general fund") maintained by such tribe in such bank which was incurred by such tribe in support of the administration of Federal contracts.

"SEC. 2. In the event that the United States acts to adjust the accounts of Indian tribes or organizations administering Federal conracts for the overrecovery or underrecovery of indirect costs, the Secretary of the Interior, at his discretion, may reimburse the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, in whole or in part for any disbursement made under the first section of this Act."

Mr. COHEN. Mr. President, the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of northwestern Wisconsin includes approximately 1,800 tribal members living on or near the reservation. The band has been actively acquiring Federal grants and contracts from the Bureau of Indian Affairs and other agencies since the late 1960's in order to provide services to its members. The current Federal policy of Indian self-determination encourages operation by tribes of programs to provide services to their members.

However, the award of such grants

and contracts to the Lac Courte Oreilles Band has led to a situation where the band is in serious financial trouble due to the indirect costs associated with them. This stems from the following situation. For Indian grantees and contractors, including tribes, Indian organizations, and Indian-operated schools, that have an indirect cost rate, that rate is applied to grants and contracts—percentage rate times the amount of the direct costs of the grant or contract—and this amount is the theoretical indirect cost recovery.

However, few grants and contracts allow the full recovery, so the actual indirect cost recovery is often much less than the theoretical recovery. But the grantee or contractor is held accountable as if it received the theoretical recovery, and the indirect cost rate for the following year is reduced by the percentage to reduce the indirect cost income to make up the difference between the theoretical and actual recoveries for the previous year.

Some program legislation contains explicit restrictions on the reimbursement of particular costs and some Federal awards are subject to laws that limit the amount of indirect costs that may be charged against them. Other Federal agencies negotiate lesser indirect cost rates for contracts and grants when there is no such limitation or restriction in law. But accepting the indirect cost rate established pursuant to the indirect cost proposal, the tribe or other contractor or grantee agrees that it is the responsibility of that entity to collect the indirect costs applicable to each of its programs or projects, that any such costs that are not collected must be funded with its own funds, and that for the purpose of computing the amount of the carry forward for the next year, it will be assumed that all in direct costs applicable to all programs have been recovered.

Year after year of covering the differences between the actual indirect cost expenses and the amount recovered, coupled with a smaller and smaller indirect cost rate each year to make up the difference between the theoretical and actual recoveries, can and does lead to more and more use of tribal funds to administer Federal programs. This is further exacerbated for the next year's carryforward when a tribe or organization recovers more indirect costs under the negotiated rate for certain programs than were actually incurred. Although State and local governments have sources of revenue to cover these costs, tribal governments often do not have unrestricted resources which they might use to fund the indirect costs not reimbursed through the indirect cost rate. As a result, many tribes and organizations are on the verge of financial collapse.

The Lac Courte Oreilles Band of Lake Superior Chippewa Indians has been coping with the indirect cost problem and the resulting cash flow problem by authorizing the State Bank of Drummond, Drummond, Wis., for the last 2 years to merge the various accounts of the band into one balance for the purpose of offsetting overdrafts in any account. This allowed the bank to consider all of the band's separate accounts together so that an overdraft would happen only when the sum total of all checks presented for payment exceeded all deposits.

This arrangement will work as a short-term way of coping with the band's indirect cost problem until December 31, 1981. The Federal Deposit Insurance Corporation will require all overdrafts to be reported with no offsets between accounts effective January 1, 1982.

The band had a general fund bank balance deficit of $493,487 as of September 20, 1981. Representatives of the band have traveled to Washington during the fall of 1981 in search of a remedy for this problem. It has been determined that the only alternative to pay the indebtedness is the use of judgment funds held in trust for the band.

H.R. 4894 would authorize the Secretary of the Interior to disburse Lac Courte Oreilles trust funds, at the request of the band, to pay to the State Bank of Drummond not to exceed 20 percent of funds in specified trust accounts. The Congressional Budget Office has indicated that the 20-percent portion subject to the provisions of the bill is $534,000.

H.R. 4894 will solve the immediate indirect cost problem for this one band. However, it does not solve the basic problem and the band and other tribes could subsequently find themselves in similar circumstances unless an administrative or legislative solution is found to the indirect costs problems tribes face.

The Select Committee on Indian Affairs will schedule hearings on the subject of indirect costs next session. In the meantime, I urge my colleagues to support my amendment to H.R. 4894 which is an amendment in the nature of a substitute to make technical, correcting, and clarifying changes, including a correction of one of the trust account numbers. The Select Committee on Indian Affairs has reported companion legislation, S. 1890, and this amendment to H.R. 4894 would conform the bill to the provisions of S. 1890, as reported. I urge passage of the bill, as amended, as an emergency measure to prevent the bankruptcy of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin.

Mr. President, I move adoption of my amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Maine.

The amendment (UP No. 796) was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time, and passed.

Mr. COHEN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

APPOINTMENT ON BEHALF OF THE PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The Chair, on behalf of the President pro tempore, appoints the Senator from Oregon (Mr. HATFIELD), the Senator from Maryland (Mr. MATHIAS), the Senator from New York (Mr. D'AMATO), the Senator from New York (Mr. MOYNIHAN), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Kentucky (Mr. FORD), and the Senator from Washington (Mr. JACKSON) to the Franklin Delano Roosevelt Joint Committee on Arrangements pursuant to House Concurrent Resolution 220.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, could I inquire if the distinguished Senator from Utah is prepared to proceed to the matter that he has?

INTERNATIONAL BANKING FACILITY DEPOSIT INSURANCE ACT

Mr. GARN. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 4879.

Mr. BOREN. Mr. President, reserving the right to object, I wish to inquire of the Senator from Utah what the subject matter of this legislation is.

Mr. GARN. This is the international banking facility. It has been cleared and reported unanimously by all members of the Banking Committee. Senator PROXMIRE is here in the Chamber to manage for the minority.

But it has to do with setting up international banking facilities to allow foreign deposits to be accepted and only foreign loans to be made.

There is a lot of business we are losing to foreign banks and we prefer to be able to allow our banks to compete.

Mr. BOREN. It does not relate in any way to the depository deregulation?

Mr. GARN. No, it does not. I would not bring up that this late at night.

Mr. BOREN. I will not object.

The PRESIDING OFFICER. The bill be stated by title.

The legislative clerk read as follows:

A bill (H.R. 4879) to clarify the treatment of international banking facility deposits for purposes of deposit insurance assessments and to remove certain limitations on the mortgage loan purchase authority of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Banking, Housing, and Urban Affairs with amendments, as follows:

On page 4, after line 18, insert the following:

(b)(1) Section 305(a)(2) of the Federal Home Loan Mortgage Corporation Act (12 U.S.C. 1454(a)(2)) is amended by inserting after the third sentence thereof the following: "With respect to any transaction in which a seller contemporaneously sells mortgages originated more than one year old prior to the date of sale to the Corporation and receives in payment for such mortgages secu-

rities representing undivided interests only in those mortgages, the Corporation shall not impose any fee or charge upon an eligible seller which is not a member of a Federal Home Loan Bank which differs from that imposed upon an eligible seller which is such a member.".

(2) The amendment made by paragraph (1) shall take effect on January 1, 1982, and shall apply to commitments entered into on or after such date.

On page 5, line 19, strike "(b)", and insert "(c)";

On page 6, after line 11, insert the following:

TITLE III—MISCELLANEOUS

SEC. 301. Section 625(a) of the Depository Institutions Deregulation and Monetary Control Act of 1980 is amended to read as follows:

"SEC. 625. (a) Except as provided in section 608(b), the amendments made by this title shall take effect upon the expiration of two years and six months after the date of enactment of this title.".

SEC. 302. Section 206 of the Depository Institution Management Interlocks Act is amended to read as follows:

"SEC. 206. (a) A person whose service in a position as a management official began prior to the date of enactment of this title and who was not immediately prior to the date of enactment of this title in violation of section 8 of the Clayton Act is not prohibited by section 203 or section 204 of this title from continuing to serve in that position for a period of ten years after the date of enactment of this title. The appropriate Federal banking agency (as set forth in section 209) may provide a reasonable period of time for compliance with this title, not exceeding fifteen months, after any change in circumstances which makes service described in the preceding sentence prohibited by this title, except that a merger, acquisition, increase in total assets, establishment of one or more offices, or change in management responsibilities shall not constitute changes in circumstances which would make such service prohibited by section 203 or section 204 of this title.

"(b) Effective on the date of enactment of this title, a person who serves as a management official of a company which is not a depository institution or a depository holding company and as a management official of a depository institution or a depository holding company is not prohibited from continuing to serve as a management official of that depository institution or depository holding company as a result of that company which is not a depository institution or depository holding company becoming a diversified savings and loan holding company as that term is defined in section 408(a) of the National Housing Act. This subsection shall expire ten years after the date of enactment of this title.".

SEC. 303. Section 313 of the Depository Institutions Deregulation and Monetary Control Act of 1980 is amended to read as follows:

"ALASKA USA FEDERAL CREDIT UNION

"SEC. 313. The provisions of section 5 of the charter of the Alaska USA Federal Credit Union which would terminate the eligibility for membership in the Credit Union of the enrollees and employees of certain corporations shall not be effective.".

SEC. 304. The fourth sentence of section 235(h)(1) of the National Housing Act is amended—

(1) by inserting "(i)" after "except";

(2) by striking out "or" after "March 31, 1982," the second place it appears and inserting in lieu thereof "(ii)"; and

(3) by inserting before the period after "1974" the following: ", or (iii) pursuant to other commitments issued on or before September 30, 1981, where housing under this section is to be developed on land which was municipally owned on September 30, 1981, and where a local government contributes at least $1,000 per unit of funds obtained under title I of the Housing and Community Development Act of 1974 and at least $2,000 per unit of additional funds to assist housing under this section".

Mr. GARN. Mr. President, today we have before us H.R. 4879 which has passed the House of Representatives and has been unanimously approved by the Senate Banking Committee. The bill combines several matters which were already under consideration by the Senate Banking Committee—including a provision which would exempt deposits at International Bank facilities from FDIC insurance assessments and one that will facilitate the continued operation of FreddieMac and FannieMae mortgage SWAP programs.

The IBF deposit exemption was developed by the distinguished Senator from New York, ALFONSE D'AMATO and introduced by him in S. 1508. Both the IBF and the mortgage SWAP provisions were incorporated in S. 1720, but due to the vital need for passage this year the committee urges that they be considered separately.

As of December 3, 1981, the Federal Reserve Board has authorized the establishment of U.S. international banking facilities so that banks could offer international banking services in the United States as competitively as those offered in foreign financial centers. Under the rules adopted by the Federal Reserve Board on June 18, an IBF may accept deposits from and provide credit to foreign residents or other IBF's without being subject to reserve requirements or regulation Q interest rate ceilings.

However, the very narrow margins of IBF's have required changes in both State tax laws and Federal deposit insurance laws if American banks are to compete effectively on American soil. Approximately one-half of the business which will be conducted by IBF's consists of interbank placements that typically carry margins of one-sixteenth of 1 percent. The spreads on loans to be made by IBF's will generally be in the range of three-eighths to five-eighths of 1 percent.

Nineteen States including the District have already made, are in the process of making, or require no changes in their tax laws to facilitate the establishment of IBF's—they include California, Connecticut, the District of Columbia, Florida, Georgia, Hawaii, Illinois, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, Texas, and Washington.

Title I of H.R. 4879 would exempt deposits at American bank IBF's from the one-twelfth of 1 percent FDIC insurance assessment. Under the International Banking Act of 1978 and FDIC insurance regulations, very few foreign bank branches in the United States are required to maintain FDIC insurance.

Unless we act today the IBF's already established by American banks in 17 States may be assessed for insurance premiums on December 31 and may be forced to discontinue operations. So unless we act, foreign bank IBF's in America will have an advantage over American banks—and the Federal Reserve has already received 139 notifications of foreign international bank facilities already operating on American shores. Thus title I of H.R. 4879 (originally S. 1508) will insure that American bank IBF's will remain competitive and remove a significant disincentive to the establishment of IBF's.

The legislation is fully consistent with the present structure and long-standing purpose of the Federal Deposit Insurance Act. The act generally provides for the insurance and assessment of all domestic deposits with certain exceptions.

However, section 3(1) of the act exempts from assessment and insurance coverage foreign deposits payable at offices located outside the United States. The proposed bill would simply continue the exemption for these foreign activities, when carried on in an IBF. Additionally the bill gives the Federal Reserve Board the authority to define what constitutes an IBF deposit. It is important that the Federal Reserve Board be given this authority since the establishment of IBF's could have an effect on the Fed's monetary growth measurements.

Section 103 of H.R. 4879 contains a provision which was not previously considered by the Senate Banking Committee. It would amend the Federal Deposit Insurance Act to permit the FDIC to insure deposits in the branch offices of insured banks operating in the Trust Territory of the Pacific Islands. Currently FDIC's authority to insure deposits includes areas in the Pacific such as Guam and American Samoa—but does not include the Trust Territory. Although the FSLIC presently has the authority to insure thrift deposits in the Trust Territory, there is not Federal insurance currently available for deposits at commercial banks. The FDIC does not object to the geographic extension of coverage.

SECONDARY MORTGAGE MARKET PROVISIONS IN TITLE II

Mr. President, recently the Federal Home Loan Mortgage Corporation (FreddiMac) began a highly successful program to receive seasoned mortgage loans from lenders in exchange for mortgage securities representing undivided interests in the mortgages received. This program—aptly known as the SWAP program—has been enthusiastically welcomed and used by the thrift institutions, as well as other mortgage lenders. A similar program has also been initiated by the Federal National Mortgage Association (FannieMae).

Title II of this bill is intended to reopen and facilitate these SWAP operations. The Charter Acts of both FannieMae and FreddiMac limit the dollar value of older loans, which are no more than a year old when sold, to 20 percent of the total value of conventional mortgages held in the FNMA or FHLMC portfolio. Unfortunately, until this limitation is increased or removed, it will force a shutdown of the FreddiMac SWAP program. In a letter I recently received from Phillip Brinkerhoff, president of the Mort-

gage Corporation, he indicated that in the last two auctions for the SWAP program, the Mortgage Corporation could only accept $3.7 billion from a total of $5 billion in bids. Acceptance of this amount virtually exhausted all of their authority to purchase older loans. Mr. Brinkerhoff noted that:

Without removal of the 20-percent limitation, it is unlikely that we would acquire sufficient volume in loan purchases during the coming months to enable us to hold an auction for older loans before at least mid-year.

I would like to point out that the Mortgage Corporation has emphasized that elimination of this Charter Act requirement in no way diminishes its commitment to the new loan origination market, which it believes is an essential part of its present and future business.

Mr. President, section 202(b) of this bill further amends the Federal Home Loan Mortgage Corporation Charter Act to provide that SWAP program operations, involving purchase of loans more than 1 year old, shall be available to all eligible lenders on an equal fee basis. Under present rules, the Mortgage Corporation charges banks, mortgage bankers and credit unions a one-half percent sales fee because they are not members of a Federal Home Loan Bank, while institutions which are members are not charged this fee.

Section 202(a) of this bill insures the continued operation of the FreddieMac SWAP program—a program which is designed to provide an opportunity for residential mortgage lenders to exchange older, low-yielding mortgages for highly liquid securities.

Since the lower yielding mortgages have created earnings problems for banks, as well as for thrifts, the SWAP program involving older mortgages should be available on an equal fee basis to banks and thrift institutions. This section, therefore, prohibits the Mortgage Corporation from charging different fees for SWAP program participation based on status as a member, or nonmember, of the Federal Home Loan Bank System.

Section 203 of this bill authorizes the Mortgage Corporation to purchase loans from the Federal Deposit Insurance Corporation and the National Credit Union Association. This authority was requested by the FDIC and the NCUA to assist them in the orderly management of their portfolios of loans.

Mr. President, I would like to point out that these changes to the Charter Acts of FannieMae and FreddiMac are limited in scope. The committee will be more closely examining secondary mortgage market activities in the coming year, paying particular attention to S. 1805, a bill to restructure and recapitalize the Federal Home Loan Mortgage Corporation. At this time, I would urge the passage of these provisions to insure that SWAP auctions can be held in the coming months.

TITLE III

Section 301 would postpone the effective date of the Truth in Lending Simplification Act (title VI of the Depository Institutions Deregulation and Monetary Control Act of 1980) for 6 months. This extension is essential in order to provide for an orderly and cost-effective transition to the new requirements.

While the original intent of the act was to give creditors a complete year to conform their procedures and disclosure forms to the new law once the implementing regulations were promulgated, a 6-month delay in the release of the Federal Reserve Board's "Official Staff Commentary," which interprets the regulation, has effectively reduced that period to 6 months.

Since virtually all closed-end credit disclosure forms in the country will need to be changed in order to conform to the new requirements, a 6-month extension is absolutely essential. In addition, such an extension will carry out the congressional intent of providing creditors with a 1-year conversion period following finalization of the implementing provisions for the act.

Mr. President, as you and my colleagues are well aware, I have been the leading advocate of simplification and reform of the Truth in Lending Act for nearly 6 years. While we took a major step in the direction of simplification through the provisions that were enacted in 1980, a number of amendments are still necessary in order to truly achieve that objective.

I included three amendments in the Financial Institutions Restructuring and Services Act of 1981 (S. 1720) that I believed would accomplish that long sought-after goal. Now, I have been asked by the House to agree not to take up those amendments for a 6-month period after the enactment of this bill (H.R. 4879), as a condition precedent to their acceptance of this effective date extension. While I believe that these other three amendments are extremely important, I have agreed to that condition in recognition of the time-critical nature of, and the need for, the extension of the effective date.

In section 302 the Banking Committee has also added amendments to H.R. 4879 which would:

First. Provide an automatic 10-year grandfather treatment under title II of the Financial Institutions Regulatory Act of 1978 (FIRA) for individuals serving as management officials of more than one financial institution prior to November 10, 1978.

FIRA prohibits interlocking relationships by management officials at depository institutions within standard market areas and among larger institutions regardless of location. While FIRA provides a 10-year grandfather provision, it also provides that, if changes in circumstances between the interlocking institutions or officials occur, the grandfathered interlocks must be terminated within 15 months after such change.

Under the committee's bill, the term "change in circumstances" would exclude mergers, acquisitions, increases in total assets, establishment of an office or changes in management responsibilities. The amendment is intended to apply to management officials who have already left or have been directed to relinquish a board or management position because of a "change in circumstances"; and

Second. Authorize a 10-year exemption from the restrictions of title II of FIRA for an individual who is a management official of a banking organization and of a nonbanking organization which becomes a savings and loan holding company. This is intended to facilitate the orderly merger of financially troubled thrifts into healthy corporations and to prevent unnecessary disruptions of legitimate business activities.

ALASKA USA AMENDMENT

Section 303 is an amendment presented by Senator STEVENS to grant Alaskan Natives permanent membership in the Federal Credit Union, Alaska USA, has also been approved by the Banking Committee. Originally Alaskan Natives were given temporary membership status until they were sufficiently trained to establish their own credit unions.

However, technical and financial factors have inhibited the establishment of native credit unions, and most of the credit unions which have been spun off have proved unsuccessful and have been merged with Alaska USA. Without this amendment, Native membership in Alaska USA must be terminated on March 31, 1982. However, Alaska USA would be required to service outstanding loan accounts in the millions of dollars. The National Credit Union Administration supports this amendment.

Section 304 amends the provisions of the Omnibus Budget Reconciliation Act of 1981 which phase out assistance under section 235 of the National Housing Act. Generally, that act amended section 235 to provide that no new assistance payments contracts may be entered into after March 31, 1982, except pursuant to firm commitments issued on or before that date.

A special exception was provided for section 235 funds to be used in conjunction with an urban development action grant project, under circumstances where, while no firm commitment had been issued, funds had been reserved for section 235 assistance before June 30, 1981.

This amendment would provide a second exception to the basic requirement that a firm commitment be issued by HUD on or before March 31 of next year.

I recognize that phasing out an assistance program like section 235 can cause serious problems for participants who may have committed themselves to an elaborate course of action in reliance on the expectation of subsidy help. I am convinced that this amendment is intended to respond to just such a circumstance, and for that reason I will support the amendment.

It should be clearly understood, however, that this amendment is intended to have—and will have—very limited application.

First, to come within the proposed exception, there must have been a reservation of section 235 housing assistance funds issued on or before September 30, 1981.

Second, the exception will only have application where the houses will be built

on land owned by the local government on September 30, 1981.

Third, the exception will only have application where a local government has contributed at least $1,000 per unit from community development block grant funds, and at least an additional $2,000 per unit of other funds, to assist the housing for which housing assistance payments contracts will be sought.

Finally, this new exception will be subject—as are all other reservations and commitments for section 235 assistance—to the final statutory cutoff date for entering into 235 payments contracts. That date is September 30, 1983.

It is my understanding that the sole effect of this amendment will be to fulfill the reasonable expectations of an ongoing local program which has committed itself financially by contributing at least $1,000 per unit from community development block grant funds, and at least an additional $2,000 per unit of other funds, to assist the housing for which housing assistance payments contracts will be sought.

This local project cannot meet existing statutory deadlines for reaching firm commitments. My support for the amendment is based upon assurances I have received that these local financial commitments will be met and that the amendment will not have the effect of opening up the section 235 program beyond the point necessary to accomplish this limited goal.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter from the National Credit Union Administration supporting this bill.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL CREDIT UNION ADMINISTRATION,
Washington, D.C., December 15, 1981.

HON. JAKE GARN,
Chairman, Committee on Banking, Housing, and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I have been informed by your staff that you intend to offer an amendment to H.R. 4879, which would permit the Alaska USA Federal Credit Union to serve on a permanent basis those Alaska Native Corporations which are contained in section 5 of the charter of this credit union.

While I would not normally want to see proposed legislation dealing with individual credit unions due to potential difficulties concerning the provisions of the Federal Credit Union Act, I do offer my support for this amendment as the solution to a particularly difficult situation.

Very truly yours,

E. F. CALLAHAN,
Chairman.

Mr. GARN. Mr. President, I yield to the Senator from Wisconsin at this point.

Mr. PROXMIRE. Mr. President, this legislation will provide jobs for major money centers throughout the country to buttress the secondary market for home mortgage lending.

A key provision in this bill will provide for the effective establishment of international banking facilities. By relieving IBF deposits from regulation Q, reserve requirements and FDIC insurance, the legislation will enable the Eurodollar deposit and foreign loan business now exempted from these requirements overseas to be conducted at home. I think we should do all we can to enhance our country with its great capital markets as centers of international finance.

In other words, we are losing business now to London and to Hong Kong and to various other parts of the world. And we should not lose it because we have by far the best capital markets in the world right here in this country.

Another important provision of this legislation is a provision to allow the FHLMC to engage in swap transactions with institutions respecting mortgages over 1 year old. This provision will allow thrift institutions now under fire with older low yielding mortgage loans to increase the liquidity in their portfolios.

The House has already passed these two provisions. Mr. President, there is every indication that the House will pass this legislation along with a package of amendments added to the House provisions in time for these provisions to become law this year.

The amendments: First, provide effective grandfather treatment to the prohibition on interlocking directors among thrifts and banks; second, provide parity between banks and thrifts under the FHLMC swap program for older mortgages; third, gives grandfather rights to Alaskan Natives under military credit unions; fourth, extends for 6 months the initial date of application of the Truth-in-Lending Simplification Amendments; and fifth, provides an 18-month extension for New York City to complete certain housing construction under the HUD 235 program.

Mr. D'AMATO. Mr. President, will the Senator yield for a question?

Mr. GARN. I yield.

Mr. D'AMATO. Chairman Isaac of the FDIC has expressed a desire to me that the exemption of IBF deposits from insured assessments contain a 2-year sunset provision. As the chairman knows, the bill that is before us does not contain such a provision.

Would you consider it appropriate to include a sunset provision at this time?

Mr. GARN. I respond to my distinguished colleague from New York to say that the IBF legislation, in its current form, does not provide for a 2-year sunset provision as recommended by the FDIC. One reason is that the Banking Committee feels the need for quick passage of the bill necessitates avoiding considering any potentially controversial changes at this time. As I have indicated, 139 foreign banks have already established IBF's in the United States and, for the most part, they are free of FDIC insurance assessments under the provisions of the International Banking Act of 1978.

Moreover, the Banking Committee agrees with the FDIC that the current statutory framework for assessing deposits of insured commercial banks deserves a comprehensive review by the Congress at an early date. The need for a sunset of the IBF exemption is obviated by a commitment that I am making today to a comprehensive review of the entire Federal system of deposit insurance.

The FDIC has already begun analysis of other issues which should be included in such a review and will soon be prepared to begin working with the Banking Committee. One of those issues will be the proposal in S. 1721 to merge the three Federal deposit insurance funds.

Another issue which has been suggested for consideration is relating deposit insurance assessments to the risk posed by an individual bank. Yet another is the desirability and feasibility of coinsurance of large depositors whereby they would not be fully covered if a bank were closed and the FDIC used its authority to perform a purchase and assumption transaction.

These and other issues involving the assessing of deposits for insurance purposes, including a reexamination of the assessment base itself, deserve a thorough review by the Congress. I am committed to this review.

So at this time I would not be in favor of trying to amend this bill. But my commitment is trying to review the entire measure.

Mr. D'AMATO. Mr. President, on June 9, 1981, the Board of Governors of the Federal Reserve System authorized the establishment in the United States of international banking facilities (IBF's). The Federal Reserve's objective was to bring back the foreign deposit and loan activities currently conducted at financial centers abroad. Addition, in 18 States, and the District of Columbia, legislation had been adopted to allow these facilities to be established.

For the first time in decades, American banks will be able to compete in the United States and in the Euro-dollar market which at the present time contains a pool of approximately $1 trillion. Economists at the Federal Reserve estimate that as much as $125 billion in deposits could flow back to the United States in just a few months. I believe the establishment of IBF's will foster an increase in jobs and economic activity.

However, one significant impediment must be removed before American banks can competitively operate IBF's in the United States. Under current law deposits at American IBF's are subject to assessment by the FDIC for insurance costs. This is a significant regulatory cost not imposed on foreign banks offering competitive services.

On July 22, 1981, I introduced S. 1508, a bill which would allow U.S. banks which establish IBF's to compete on equal terms with foreign banks establishing similar facilities. S. 1508 would have amended section 13(e) of the Federal Deposit Insurance Act to exempt IBF's of American banks from FDIC assessment. My staff and I had many discussions with members of the banking community during the development of S. 1508.

On October 7, 1981, the distinguished chairman of the Banking Committee, my colleague from Utah, Senator GARN, in-

troduced S. 1720, "the Financial Institutions Restructuring and Services Act of 1981," which included S. 1508 as part of his comprehensive package. Since IBF's were authorized to begin operating in the United States on December 3, 1981. It has now become necessary to pass this necessary exemption from FDIC insurance.

H.R. 4879, the bill presently being considered, was introduced in the House by Congressman SCHUMER on November 2, 1981, and was passed by the House on November 17, 1981. Congressman SCHUMER's bill contains the same provision as S. 1508, the bill I introduced on July 22, 1981.

The exemption of IBF deposits from FDIC assessment is essential if IBF's are to be effective and fulfill the important public policy objectives for which they are designed. In the absence of such an exemption, American banks will be placed at a serious competitive disadvantage.

Mr. President, I urge adoption of H.R. 4879.

In addition to the very important exemption of IBF's from FDIC assessment, another problem is being addressed by this bill.

Mr. President, this bill will permit the same exemption for those homes with section 235 funding on municipally owned land as the Congress granted to those homes that were built with section 235 funding and urban development action grants. When Congress passed the Housing and Community Development Amendments of 1981, it extended the time period for construction and sale of such homes until September 31, 1981.

New York City has never been able to use the 235 program previously because of the low mortgage limitations. In fact, it only began its involvement in the last stages of the program's existence. In order to fully participate, the city is extending a 20-year tax exemption and is writing down the cost of the land. Additionally, New York City has contributed over $7 million of its capital and expense budget money and over $2 million of community development money to develop one- and two-family homes in areas that are presently deteriorating.

This program will be the first time that New York City has used a Federal program to develop lower density housing for households with incomes insufficient to purchase homes without a subsidy. The program will utilize over 100 acres of vacant land in four boroughs, returning it to the tax rolls, and rebuilding areas that are presently deteriorating. It is my hope, and the hope of all New Yorkers, that these first developments will be the catalyst for future conventionally financed homes.

Mr. President, I wish to thank Chairman GARN and his able committee staff for their patience, both with my concerns for the international banking facilities bill and for helping to correct the inequity in the section 235 housing problem in New York City. Additionally, I wish to personally make mention of Congressman SCHUMER and Congressman STANTON, who have helped in developing and passing this excellent legislation. Finally, I must also thank Chairman ST GERMAIN for his willingness to address the problems that H.R. 4879 attempts to solve.

Mr. President, I ask that the Senate adopt H.R. 4879.

Mr. WILLIAMS. Mr. President, I wish to ask the junior Senator from New York some questions concerning the extension of 235 funding. Are there any other cities that have funding reserved under section 235 that could move to final commitment?

Mr. D'AMATO. As I understand it, New York City is the only locality eligible for this funding. The New York situation is unique and the units have already been allocated to New York City in the following locations:

The borough of the Bronx, 46 units; Brooklyn, 1,144 units; Queens, 210 units; and Manhattan, 178 units.

Mr. WILLIAMS. Can these units be used by other localities if New York City fails to use them by March 31, 1981?

Mr. D'AMATO. No, these units have already been allocated to New York City and cannot be reallocated to any other locality. If New York City fails to use them, the units would be recaptured by HUD and the funds would not be used. Additionally, New York City would lose its contribution of over $9 million.

Mr. STEVENS. Mr. President, I am pleased to rise in support of this legislation, and in particular an amendment my good friend from Utah was willing to accommodate concerning the Alaska USA Federal Credit Union.

Mr. President, after passage of the 1971 Native Claims Settlement Act the National Credit Union Administration (NCUA) asked the Alaska USA Federal Credit Union to provide technical assistance to the new Native corporations organized under the Alaska Native Claims Settlement Act (ANCSA) so that they might eventually initiate their own credit unions.

During this process, the field of membership of Alaska USA was expanded to include Native members of 10 regional Native corporations. The idea was to allow Native membership in Alaska USA long enough for each Native corporation to spinoff their own credit unions.

Advertisements to potential Native members included language to the effect that "once a member, always a member" in the credit union. Native membership was limited, however, since specific dates were provided for termination of Native membership in Alaska USA, anticipating that Native corporation spinoff credit unions would be available to serve the financial needs of Alaska's Natives.

The anticipated Native credit union spinoffs, despite Alaska USA's excellent efforts to provide assistance, were few in number, and extensions of the termination dates were given by the NCUA and Congress to set up a more complete infrastucture for Federal credit unions. The current termination date for Native membership is March 31, 1982.

Even though extensions have been granted, only one or two spinoffs have been successful, and the ones that have not been successful have merged with Alaska USA.

Alaska's Natives have made it clear, Mr. President, that they do not want simply an extension of membership rights in Alaska USA. The Native corporations have not achieved the spinoff credit unions that were envisioned. This has not been due to a lack of desire on the corporations' part, but the sheer magnitude, complexity, and economics of scale involved in setting up a credit union. Alaska's Natives want and need the continued services of Alaska USA.

Unfortunately, Mr. President, if this amendment is not adopted, Native membership in Alaska USA must be terminated on March 31, 1982. In that event Alaska USA would be required to continue to service millions of dollars in loans with persons who were no longer members of the credit union. The amendment solves this problem by providing for permanent membership for Alaska Natives in Alaska USA by elimination of the termination dates in Alaska USA's field of membership provision contained in its charter.

This amendment is supported by the National Credit Union Administration and has been cleared with both House's Banking Committees. I would like to thank my good friend from Utah for his help in resolving this matter.

In summary, continued Native membership in Alaska USA would be in the best interest of Alaska's Natives and forwarding Federal policy under the Alaska Native Claims Settlement Act.

Mr. GARN. Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, I know of no other comments on this particular bill, and I ask for the third reading.

The PRESIDING OFFICER. The question is on agreeing to the committee amendments en bloc.

The committee amendments were agreed to en bloc.

The PRESIDING OFFICER. If there are no further amendments, the question is on the engrossment of the amendments and the third reading of the bill.

The bill was ordered to be read a third time and was read the third time, and passed, as follows:

H.R. 4879

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—INTERNATIONAL BANKING FACILITY DEPOSIT INSURANCE ACT

SHORT TITLE

SEC. 101. This title may be cited as the "International Banking Facility Deposit Insurance Act".

INTERNATIONAL BANKING FACILITY DEPOSITS

SEC. 102. Section 3(l)(5) of the Federal Deposit Insurance Act (12 U.S.C. 1813(l)(5)) is amended to read as follows:

"(5) such other obligations of a bank as the Board of Directors, after consultation with the Comptroller of the Currency and the Board of Governors of the Federal Reserve System, shall find and prescribe by regulation to be deposit liabilities by general usage, except that the following shall not be a deposit for any of the purposes of this Act or be included as part of the total deposits or of an insured deposit:

"(A) any obligation of a bank which is payable only at an office of such bank lo-

cated outside of the States of the United States, the District of Columbia, Puerto Rico, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Virgin Islands; and

"(B) any international banking facility deposit, including an international banking facility time deposit, as such term is from time to time defined by the Board of Governors of the Federal Reserve System in regulation D or any successor regulation issued by the Board of Governors of the Federal Reserve System.".

BRANCHES OF INSURED BANKS IN THE TRUST TERRITORY OF THE PACIFIC ISLANDS

SEC. 103. (a) Section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813) is amended—

(1) in subsection (a), by inserting "the Trust Territory of the Pacific Islands," after "American Samoa," each place it appears therein;

(2) in subsection (m)(1), by inserting "of the Trust Territory of the Pacific Islands," after "American Samoa,"; and

(3) in subsection (o), by inserting "the Trust Territory of the Pacific Islands," after "American Samoa," each place it appears therein.

(b) Section 7 of such Act (12 U.S.C. 1817) is amended—

(1) in subsection (a)(4), by inserting "the Trust Territory of the Pacific Islands," and "American Samoa,"; and

(2) in subsection (b)(5)(B), by inserting "the Trust Territory of the Pacific Islands," after "American Samoa,".

(c) Section 11(a)(2)(A)(iv) of such Act (12 U.S.C. 1821(a)(2)(A)(iv)) is amended—

(1) by inserting "of the Trust Territory of the Pacific Islands," after "of American Samoa,"; and

(2) by inserting "the Trust Territory of the Pacific Islands," after "Virgin Islands, American Samoa,".

TITLE II—MORTGAGE PURCHASE AMENDMENTS OF 1981

SHORT TITLE

SEC. 201. This title may be cited as the "Mortgage Purchase Amendments of 1981".

PURCHASES OF MORTGAGES MORE THAN ONE YEAR OLD

SEC. 202. (a) The third sentence of section 305(a)(2) of the Federal Home Loan Mortgage Corporation Act (12 U.S.C. 1454(a)(2)) is amended to read as follows: "The Corporation may purchase a conventional mortgage which was originated more than one year prior to the purchase date only if the seller is the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, the National Credit Union Administration, or any other seller currently engaged in mortgage lending or investing activities.".

(b)(1) Section 305(a)(2) of the Federal Home Loan Mortgage Corporation Act (12 U.S.C. 1454(a)(2)) is amended by inserting after the third sentence thereof the following: "With respect to any transaction in which a seller contemporaneously sells mortgages originated more than one year old prior to the date of sale to the Corporation and receives in payment for such mortgages securities representing undivided interests only in those mortgages, the corporation shall not impose any fee or charge upon an eligible seller which is not a member of a Federal Home Loan Bank which differs from that imposed upon an eligible seller which is such a member.".

(2) The amendment made by paragraph (1) shall take effect on January 1, 1982, and shall apply to commitments entered into on or after such date.

(c) The fourth sentence of section 302(b)(2) of the Federal National Mortgage Association Charter Act (12 U.S.C. 1717(b)(2)) is amended to read as follows: "The Corporation may purchase a conventional mortgage which was originated more than one year prior to the purchase date only if the seller is the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, the National Credit Union Administration, or any other seller currently engaged in mortgage lending or investing activities.".

MORTGAGE LOAN PURCHASES FROM THE FEDERAL DEPOSIT INSURANCE CORPORATION AND THE NATIONAL CREDIT UNION ADMINISTRATION

SEC. 203. Subsections (a)(1) and (b) of section 305 of the Federal Home Loan Mortgage Corporation Act (12 U.S.C. 1454) are amended by inserting "the Federal Deposit Insurance Corporation, the National Credit Union Administration," after "Federal Savings and Loan Insurance Corporation," each place it appears.

TITLE III—MISCELLANEOUS

SEC. 301. Section 625(a) of the Depository Institutions Deregulation and Monetary Control Act of 1980 is amended to read as follows:

"SEC. 625. (a) Except as provided in section 608(b), the amendments made by this title shall take effect upon the expiration of two years and six months after the date of enactment of this title.".

SEC. 302. Section 206 of the Depository Institution Management Interlocks Act is amended to read as follows:

"SEC. 206. (a) A person whose service in a position as a management official began prior to the date of enactment of this title and who was not immediately prior to the date of enactment of this title in violation of section 8 of the Clayton Act is not prohibited by section 203 or section 204 of this title from continuing to serve in that position for a period of ten years after the date of enactment of this title. The appropriate Federal banking agency (as set forth in section 209) may provide a reasonable period of time for compliance with this title, not exceeding fifteen months, after any change in circumstances which makes service described in the preceding sentence prohibited by this title, except that a merger, acquisition, increase in total assets, establishment of one or more offices, or change in management responsibilities shall not constitute changes in circumstances which would make such service prohibited by section 203 or section 204 of this title.

"(b) Effective on the date of enactment of this title, a person who serves as a management official of a company which is not a depository institution or a depository holding company and as a management official of a depository institution or a depository holding company is not prohibited from continuing to serve as a management official of that depository institution or depository holding company as a result of that company which is not a depository institution or depository holding company becoming a diversified savings and loan holding company as that term is defined in section 408(a) of the National Housing Act. This subsection shall expire ten years after the date of enactment of this title.".

SEC. 303. Section 313 of the Depository Institutions Deregulation and Monetary Control Act of 1980 is amended to read as follows:

"ALASKA USA FEDERAL CREDIT UNION

"SEC. 313. The provisions of section 5 of the charter of the Alaska USA Federal Credit Union which would terminate the eligibility for membership in the Credit Union of the enrollees and employees of certain corporations shall not be effective.".

SEC. 304. The fourth sentence of section 235(h)(1) of the National Housing Act is amended—

(1) by inserting "(i)" after "except";

(2) by striking out "or" after "March 31, 1982," the second place it appears and inserting in lieu thereof "(ii)"; and

(3) by inserting before the period after "1974" the following: ", or (iii) pursuant to other commitments issued on or before September 30, 1981, where housing under this section is to be developed on land which was municipally owned on September 30, 1981, and where a local government contributes at least $1,000 per unit of funds obtained under title I of the Housing and Community Development Act of 1974 and at least $2,000 per unit of additional funds to assist housing under this section".

Mr. GARN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. D'AMATO. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONFERENCE REPORTS

Mr. ROBERT C. BYRD. Mr. President, I want to take this opportunity to express my appreciation, and that of my colleagues, for the sterling performance of the floor managers on the four conference reports which we have passed this evening.

Senator TED STEVENS for the majority and Senator JOHN STENNIS for the minority, both deserve a vote of appreciation from us for the outstanding work they did in managing H.R. 4995, the Department of Defense appropriations for fiscal year 1982. H.R. 4995 represents the first installment of the largest peacetime defense budget in the history of our country. This is a vital commitment on the part of the United States in responding to the Soviet buildup throughout the decade of the 1970's. As such, it is an extremely complex piece of legislation and the floor managers deserve credit for the work they have done in guiding this legislation through the committee, floor, and conference process.

Senator PAUL LAXALT for the majority and Senator JIM SASSER for the minority were the managers for H.R. 4241, the military construction appropriations for fiscal year 1982. Once again, this piece of legislation is vital to the national security of the United States. Both Senator LAXALT and Senator SASSER are to be commended for the work they have done in managing this legislation through the very tortuous appropriations process.

A special vote of thanks should go to Senator THAD COCHRAN of the majority and Senator TOM EAGLETON for the minority for the work they did on H.R. 4119, the Agriculture Appropriations Act for fiscal year 1982. This legislation is vital to the maintenance of the position of the United States as the world's leading producer of food. In these times of budget stringency, the managers of this legislation are to be commended for fashioning an appropriations act which will maintain this high level of agricultural productivity in this country.

And finally, Mr. President, I want to pay tribute to Senator CHARLES PERCY for the majority and Senator CLAIBORNE PELL for the minority, who floor managed the always controversial foreign assistance authorization through the congressional process.

In sum, Mr. President, we all owe a deep debt of gratitude to our colleagues who have devoted considerable time and effort to seeing enactment of these measures. There were difficult decisions facing all of us as they related to each individual bill we have acted upon this evening. Yet, the floor managers, on both sides of the aisle, demonstrated exemplary patience and knowledge in managing these bills through the legislative process.

A NEW STRATEGY FOR NATO

Mr. COHEN. Mr. President, the New York Times magazine this past Sunday had an excellent article by former Central Intelligence Agency Director Stansfield Turner, "A New Strategy for NATO."

Admiral Turner argues in his piece that the United States should reduce its military forces in Europe and strengthen its defenses against the Soviet threat to Third-World countries. He suggests that the bickerings and differences between the United States and its allies in Western Europe are symptomatic of a deeper problem.

"The military threat to Western Europe has changed—the result of new conditions inside the Soviet bloc that have changed Soviet perspectives," Turner says: "The Western alliance is organized around a strategy for yesterday's dangers."

We cannot ignore the threat to the Western alliance posed by the Soviet threat to Third World areas like the Persian Gulf. If we do, we and the nations of Western Europe all lose.

It is Turner's proposal that the United States reduce its contribution to the military defense of Western Europe so that we can divert forces to the Third World. "The Europeans will be shocked, but the alliance will survive and emerge all the stronger for recognizing the realities of the 1980's," he concludes. "In fact, fear of facing up to reality will vitiate the partnership more surely than anything else."

Turner's article is a thought-provoking one. I commend it to the attention of my colleagues and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times Magazine, Dec. 13, 1981]

A NEW STRATEGY FOR NATO

(By Stansfield Turner)

There are times in the history of military alliances when some long-latent problem reaches a point where a decision, no matter how painful, must be made. Such a time has arrived for the North Atlantic Treaty Organization, the compact of free nations that for 32 years have been the framework of security for Western Europe and the United States.

The Soviet Union and its Eastern European satellites, banded together under the Warsaw Pact, have been growing stronger in military terms. Yet the Atlantic alliance cannot seem to agree on how best to respond. The Europeans have lost much of their old confidence in American leadership; they tend more and more to be preoccupied with narrow national concerns and to take independent positions on issues that demand a common allied strategy. This restiveness has even seeped down to the level of public opinion. In recent weeks, the political atmosphere in Western Europe has been roiled by mass demonstrations against allied plans for deploying new American missiles on European soil.

These bickerings and differences are symptomatic of a deeper problem. The military threat to Western Europe has changed—the result of new conditions inside the Soviet bloc that have changed Soviet perspectives. The Western alliance is organized around a strategy for yesterday's dangers. All these trans-Atlantic disagreements over force levels and weapons missions stem largely from inner doubts and plain confusion about their relevance to present needs.

The most likely threat to the Western alliance today is pointed not directly at Western Europe but, obliquely, across third-world areas like the Persian Gulf. What we need is a new strategy providing those regions with a defensive shield. This would best be done by the United States and Western Europe acting in concert. But if, as seems probable, the Europeans are unwilling or unable to increase their military potential for this purpose, the United States must act alone.

This will mean a smaller American contribution to the military defense of Western Europe, as we divert forces to the third world. The Europeans will be shocked, but the alliance will survive and emerge all the stronger for recognizing the realities of the 1980's. In fact, fear of facing up to reality will vitiate the partnership more surely than anything else.

It must be admitted, to start with, that, by and large, Western Europe and the United States bring differing viewpoints to the question of whether the times call for more détente or more defense.

Détente for Europe has meant new markets for trade with Eastern Europe and the Soviet Union, increased dialogue with the East and a chance to influence East-West relations independently of the United States. The Europeans have put emphasis on perpetuating détente despite the Soviet invasion of Afghanistan and Moscow's blatant pressures on Poland. The very fact that the Polish workers dared to rebel and the Kremlin has been holding back from military intervention is seen by Europeans as deriving partly from the attitudes of détente acquired in the 1970's.

Most Americans, on the other hand, see détente more as a desirable principle than a working basis of foreign policy. We have supported détente publicly but we question it privately, tending to see it as having led to Soviet gains in Angola, Ethiopia, Southern Yemen, Nicaragua and Cambodia. We look on East-West trade with much less enthusiasm than the Europeans, reasoning that, from the Western standpoint, the impetus for such trade is political rather than economic. (Western Europe's trade with Communist countries accounted for only 4.9 percent of its total foreign trade in 1980; alternative markets could easily have been found elsewhere.) The European view that the Soviet leaders are sincerely committed to détente, if only because of their concern with the Soviet bloc's internal political and economic difficulties, gets a skeptical hearing in the United States.

There is, nonetheless, something to be said for the European analysis. The Kremlin's current difficulties could well be having some inhibiting effect. The Soviet leaders must be increasingly worried about the satellites' political reliability. Poland is only the most dramatic expression of this endemic problem; there are long-term forces undermining the foundations of socialism across a much wider spectrum within the Warsaw Pact. Each Eastern European leader must feel that his fate hinges to some degree on the outcome of the Polish drama. Tension within the Communist alliance is bound to increase. And whatever makes the satellites even less reliable will tend to limit Moscow's freedom of action toward the West.

The economic malaise spreading across the Soviet empire is just as serious in its implications. The problems of the Soviet-style planned economy, with its lack of individual incentive, have assumed formidable proportions. Growth rates are declining both in output and productivity. The Soviet leaders are caught between three competing needs—continued spending on the military, investment in plant and equipment, and a better break for the consumer—and there are no easy choices to be made.

But a different analysis of Moscow's difficulties could lead to a conclusion far different from the one espoused by most Europeans. As economic requirements push up against military spending, and as political tensions within the Warsaw Pact grow more serious, the Soviet leaders could be tempted to establish footholds around the world before their military advantages ebb and before our renewed defense program takes effect. The objective, according to this "lash-out" theory, would be not only to win all they can while they can but to divert domestic attention from increased austerity at home.

The Russians could take military action in remote regions alone, but this would hardly achieve their objective. They could, as a second alternative, lash out on the central front in Europe, but that would be risky indeed. A third option, an attack on Europe's flanks, or on Iran or Pakistan, would also involve serious hazards. Thus, while the possibility of some desperate move of this nature cannot be ruled out entirely, it seems unlikely—at least during the next few years, when the Russians will almost certainly be faced with the unsettling difficulties of a succession to the aging leadership of Leonid I. Brezhnev and his men.

A fourth alternative seems more probable—a Soviet foreign policy not unlike the one we have seen for some years, combining aggressive opportunism in the third world with military intimidation and political-economic inducements in Europe.

There is now a question, however, about the European aspects of this policy. Except for the realm of strategic forces, the Russians' potential for intimidating Western Europe will lessen as their military buildup reaches the limits of their capacity and as the reliability of their East European allies becomes increasingly suspect. At the same time, Soviet inducements to Western Europe will look less appealing as the harshness of the Communist societies comes more to the surface in response to the buildup of internal pressures.

In the third world, on the other hand, the outlook for Moscow is more promising. In the wake of the Vietnam War, the United States offered no real opposition as the Soviet Union extended its influence over one third-world country after another. Our stiffer reaction to the invasion of Afghanistan took the Russians by surprise but is not likely to deter them in the future. They have seen little consistency in our foreign policy over recent years, and one grain embargo is hardly likely to persuade them that we will be as firm next time, especially since the embargo was lifted by President Reagan in response to pressure from the domestic farm bloc.

The Russians are likely to continue to seize opportunities to support and manipulate leftist factions in the third world. In some cases, these will be revolutionary ele-

ments seeking to take control, as in Angola in 1975. In others, they will be socialists in power who come under challenge from domestic opponents, as in Ethiopia in 1978. There will be blatant moves to install power from outside the country, as the Vietnamese and Russians did in Cambodia in 1978.

There are, it is true, some inherent limitations to this Soviet technique. Moscow's aid to its political protégés is almost entirely military in character. Lacking sufficient reserves of materials, money and know-how for the kind of economic programs that could meet the recipient countries' needs for economic growth, the Russians have rarely been able to establish close, long-term relations with their new-found friends. In the past 20 years, they have been ejected from China, Indonesia, Egypt, Sudan and Somalia, losing out in most cases to strong forces of nationalism.

Yet the Russians have always been willing to make a stab at controlling selected parts of the third world and cutting their losses, if necessary. And today there are two new factors at work. In Angola, Ethiopia and Cambodia, the Russians have left behind sizable surrogate forces, Cuban or Vietnamese. It would be much more difficult for these nations to escape from the Soviet camp than it was for the Egyptians and others. And in Nicaragua, we may have recently witnessed a new Soviet technique—meddling based on Libyan financing. If the Russians can induce Libya to fill the economic void in selected underdeveloped countries, their capability for intervention could be significantly enlarged.

Look, for instance, at what they might attempt from their position in Southern Yemen. By destabilizing Oman, on one side of Saudi Arabia, and Yemen, on the other side, they could outflank the Saudi regime and generate considerable pressure on that Government to amend its pro-Western posture. Soviet prospects in Iran after the death or exit of the Ayatollah Ruhollah Khomeini are even brighter. If the Communist Tudeh Party emerged even temporarily as the dominant Iranian political force, and if the Tudeh "invited" a Soviet military detachment into the country, Iran could be brought under Soviet hegemony. A subsequent march to the northern shores of the Persian Gulf would intimidate Saudi Arabia and place the flow of oil to the West in jeopardy.

Look, also, at the exposed position of several other nations to which we have formal or implied commitments. Pakistan has Soviet troops just across its border with Afghanistan and is frequently accused by the Russians of aiding the Afghan resistance. Thailand's territory has been violated by spillovers from the fighting in Cambodia. South Korea must worry constantly about Moscow encouraging the North Korean leader, Kim Il Sung, into another act of aggression.

If the Russians continue to discern few risks in such third-world adventurism, they surely will continue to make use of their opportunities. It is for these areas, therefore, that a new policy must be forged by the Western alliance, and primarily by the United States.

It must be our common purpose to create unacceptable risks for the Russians—to make the costs of aggression unacceptably high wherever our vital interests are involved. This is not to advocate universal intervention in troubled areas or a return to total containment of the Soviet Union. It suggests selective and determined resistance in areas of overriding concern.

Clearly, we have vital interests in the major oil-producing countries. There are many other suppliers of raw materials on whom we and our allies depend, and many of these countries are key markets for our exports. The Russians seek to drive a wedge between these countries and the West, to cut off our mineral supplies and to create strains within the Atlantic alliance by forcing each member to scramble to protect its own interests.

The Russians need not take direct military action to cut our supplies. They may influence a leftist-leaning government to do that; they may foment internal disorders or regional wars that will interrupt production and shipment. In anticipation of this kind of Soviet meddling, we must make sure they know that we are ready and capable of resisting their overtures and interventions.

Our resistance can take a number of forms—diplomatic, economic or military. In most instances in the third world, the tools of diplomacy and economic aid will be more applicable than military presence or combat. But diplomatic and economic leverage will be insufficient unless the Western alliance can present a united front and display a readiness to protect its interests with adequate military power.

In the Persian Gulf, clearly a nexus of the vital interests of the United States and its allies, it has become highly probable that we will need the capacity to at least threaten the use of force—and enough power in the region to make the threat credible. The Russians must be left with no doubts about our readiness to resist any attempt to alter the balance of power in this critical area. Only when they become convinced of our resolution and capacity will they see the costs and risks of overseas adventurism as being higher than in the past.

Our chances of drawing a line and holding it are good. In measuring risks against opportunities, the Russians will have to take their own lessening economic and political strength into account. The Russians are bogged down in Afghanistan; they are subsidizing Cuba, underwriting Vietnam's occupation of Cambodia and standing poised with 30 to 40 divisions on Poland's perimeter; surely they must think carefully before extending themselves further. A full range of responses to Soviet meddling in the third world has a better chance of success today than ever before.

We should encourage our European allies to participate in the development of new Western defenses in the third world. It will always be helpful politically to have a multinational force rather than one that is strictly American. French and British naval forces, and the 4,000-man French Army contingent posted in Djibouti, are the best candidates. But the Europeans have only limited potential for projecting sizable military power over long distances. The transport and support of any allied forces carried into action would have to come from the United States.

The rub is that this is bound to affect our military posture in Western Europe. The United States cannot maintain two armies and two air forces, one for the plains of Europe and one for deployment around the world; neither the American public nor the Congress would support that expense. Difficult as the decision would be, a reduction of our forces in Western Europe is an unavoidable component of a new strategy that in the end would enhance the security of both Europe and the United States.

The change would, of course, pose a variety of problems. Some of them are technical. The military equipment we need for remote regions is quite different from what we now have in Europe. If we are to transport tanks, artillery, armored personnel carriers and other such hardware to remote areas, they must be light and compact. Since we can't have two armies and two air forces, our troops in Europe must adapt their tactics to lighter and more mobile equipment. This means less dependence on massive firepower and stoutly defended positions and more reliance on mobility and maneuver. Instead of holding fixed front-line positions by firepower and armored defense, American ground units in Europe would be trained to move rapidly to where Warsaw Pact forces have been positioned for a breakthrough.

There are those who believe that such tactics of maneuver are more suited, in any case, to tomorrow's technology and battlefield environment. In any event, the alliance's military tactics would have to change appreciably if the United States retooled its ground forces to acquire a dual capability for Europe and for the third world. The forces of our European allies would have to be similarly reshaped—or they would have to think through a new role for themselves, complementing a lighter, more flexible American force.

Similarly, land-based American air power must be easily transportable around the world. The problem is not with the aircraft themselves but with the cumbersome support elements of spare parts, computerized testing equipment, technicians, and so on, that must follow along to keep the sophisticated aircraft flying. Switching to less sophisticated aircraft with more sophisticated weapons could make a big difference.

It would take years to develop and deploy these lighter forces and apply these new tactics. In the meantime, we could improve on our ability to move quickly to unexpected trouble spots by drawing upon equipment and personnel in Europe whenever they are closer to the scene.

In the best of all worlds, our European allies would accept the argument that the United States must take these steps even at the cost of doing less in Europe, and that they should compensate by taking on a larger role themselves. If they did not, in view of their disinclination to increase their defense spending, our best course would be to proceed independently, though after full explanation and consultation. To ignore the problem of continued Soviet interventionism in the third world would be shortsighted. To take on this new responsibility without making the necessary adjustments in Europe would be unrealistic.

Some feel that our military capabilities can be extended to the third world without having any great impact on our commitments in Europe; perhaps a small Rapid Deployment Force, as initiated by President Carter, would do the trick. It could—where the Soviet Union is not directly involved. But it would be patently inadequate in cases of Soviet or Soviet-sponsored military adventurism. The Cuban presence in Ethiopia and Angola is sizable and well equipped; a Soviet thrust into Iran would be massive. A commando force big enough only for putting out "brush fires" in the third world does not constitute a serious enough commitment to have a deterrent effect on Moscow.

There are others who argue that if Washington reduced its military effort in the defense of Europe, the Europeans could drift into neutralism and accommodation with the Soviet Union. Indeed, as we have noted, there are increasingly vocal leftist factions in Europe that may be willing to sell out their heritage of freedom in just this way, but it would be surprising if this minority view prevailed. There is also the argument that this is no time to raise such a difficult new issue—we have enough problems within the alliance as it is. That is a reasonable principle, but the problem is that the threat of Soviet subversion in vital areas like the Persian Gulf will not go away. The alliance cannot remain strong if it chooses to ignore a critical threat to its survival.

The basic fault with our present alliance strategy is that it confuses preparedness for the most serious possible threat with preparedness for the most likely threat. Our focus for all of these past 32 years has been on the danger of Soviet conquest of Western Europe. Naturally, adequate defense against this possibility must remain among our top priorities. But the most likely danger today

is the indirect one of Soviet attempts to extend control over the West's supplies of oil and other minerals and over its political and economic relationships with the third world. The old saying that the road to Berlin is through Baghdad is worth renewed consideration.

The Soviet Union, as we have seen, is facing a set of conditions, internally and externally, that will make it tempting for the Soviet leaders to improve their world position while they still can. The perilous uncertainties of an attack on Western Europe would make that a very difficult choice, to put it mildly, for any Soviet leadership. Yet the impulse to do something may be very strong. An effort to undermine the alliance by way of the third world will be a compelling alternative.

Facing up to this new challenge will test the Atlantic alliance, but the process of testing can also be one of reinvigoration. It can establish new criteria for the sharing of effort, new ability to adjust to change and a renewed sense of commitment to our basic objectives. Yes, there are risks that the alliance will not measure up, but avoidance of necessary risk has never been a sensible policy in the defense of freedom.

AN ADDED COMMENDATION FOR A YOUNG WOMAN WHO DOES HER JOB EXTRAORDINARILY WELL

Mr. ROBERT C. BYRD. Mr. President, thousands of men and women are engaged in the work of Congress. Whether those thousands are involved in meeting the physical necessities of Congress—as are the maintenance and food-service people—or in providing their Senators and Congressmen with highly specialized and technical assistance—as are our personal and committee staff members—those men and women are serving vital roles on Capitol Hill.

From time to time, however, one of those vital people achieves a special standing among us. Such a person is Susan Alvarado, Legislative Assistant to Vice President GEORGE BUSH. So prominent and valued has Ms. Alvarado become that today's Washington Post featured her in its "Style" section.

As interesting as that article is, however, it catches only certain facets of Ms. Alvarado's personality, career, and significance on Capitol Hill. Though I do not want to detract from the luster of the Post article, or to "gild the lily," I do want to add some words of personal appreciation in Susan Alvarado's behalf—words with which I believe many of our colleagues will concur.

Though Susan Alvarado has been in her current position for a relatively brief time, she is a Capitol Hill veteran. Many Senators were impressed favorably with her efficiency, spirit, and helpfulness when she served on Senator STEVENS' assistant minority leader's staff. The understanding, skill, and expertise that Ms. Alvarado learned under Senator STEVENS' tutelage has served her, the Senate, and the Vice President well in her most recent capacity, and we are all indebted to Senator STEVENS for first introducing Ms. Alvarado to her Capitol Hill duties, and to Vice President BUSH for providing her with a wider field of responsibility in which to serve the Senate.

Susan Alvarado is a mature, alert, and perceptive staff member who possesses great promise. Throughout her successful professional rise, she has, however, never lost the deeply sensitive and humane instincts that have always characterized her, and that make her well-suited for her Senate duties. Susan is a master of issues, but she is also a master of personality. Working side-by-side with famous and notable people has neither jaded her inherent courtesy nor blinded her to their essential humanity. She is, in short, a born diplomat of substance and intelligence.

We are fortunate to have Susan Alvarado working among us, and I know that I speak for our colleagues when I express my own personal appreciation for the uncomplaining, helpful, efficient, and effective manner in which she conducts herself and carries out her duties.

THE ARAB–ISRAELI CONFLICT

Mr. PERCY. Mr. President, it was with great disappointment that I heard of the action of the Israeli Knesset in extending Israeli law to the occupied Syrian territory on the Golan Heights. This is a unilateral action which constitutes an unnecessary impediment to the negotiation of a comprehensive settlement of the Arab-Israeli conflict based on U.N. Security Council Resolutions 242 and 338.

The United States has taken the position that the final status of territory occupied by Israel in June 1967 must be determined through negotiations under these U.N. resolutions to which Israel agreed.

We have had a long partnership with Israel, a partnership I wish us to sustain and nurture, but such a partnership requires close consultation on matters which are of mutual concern. It is very difficult to work to bring peace to the region if our efforts are undercut by unilateral actions of this nature. The Knesset vote is harmful to the peace process and creates a new complication for U.S. efforts to advance the Camp David process to which we are firmly committed.

All the parties to the Arab-Israeli dispute should engage their energies in the effort to achieve a just, lasting and comprehensive settlement of the conflict without taking unilateral actions which undermine the prospects for peace.

HOW AMERICA LOOKS AT EUROPE

Mr. PERCY. Mr. President, on December 1 the very able distinguished Arthur Burns, U.S. Ambassador to the Federal Republic of Germany, gave a speech in Bonn on "How America Looks at Europe." Ambassador Burns made several points that I would particularly like to call to the attention of my colleagues in the Senate.

First, he points out that part of Europeans' uncertainty about U.S. leadership in recent years derives directly from foreign perceptions of U.S. loss of economic vigor, creativity and productivity.

Second, the Ambassador says he has no difficulty understanding people in Europe who disagree with U.S. policies, and even demonstrate peacefully against them. But he has great difficulties understanding Europeans who equate U.S. motives internationally with Soviet motives.

Third, he reminds Europeans that American commitment to the North Atlantic Alliance remains strong and steadfast, but that Americans are also watching the nuclear debate in Europe with increasing concern. If Europeans' reaffirmation of alliance determination to seek collective security through both adequate defense preparedness, and arms control negotiations, is long postponed or uncertain, "there may well be a growing sentiment in America to turn back upon itself and let Europe depend, for its security and freedom, upon its own resources or upon Soviet good will."

Finally and most important, Ambassador Burns stresses that the foundation of the alliance is those common values that bind together our shared heritage and culture: respect for human rights, faith in democracy, and devotion to the rule of law. He goes on to express his feeling that confidence in the objectives of the alliance and the United States will not be fully restored until all our citizens learn or rediscover that these values are worth protecting. He further suggests that appreciation of the values and achievements of our western civilization must begin, on both sides of the Atlantic, in our homes, schools and parliaments.

Mr. President I ask unanimous consent that the full text of Ambassador Burns' remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

HOW AMERICA LOOKS AT EUROPE
(By Hon. Arthur F. Burns)

As an economist who has studied and lived history, I am both humble and proud to represent my country in the Federal Republic of Germany—our close and respected partner in the preservation of peace, freedom and security. And as one whose roots are in Europe but whose life has been spent in America, I have long been convinced that Europe and America are woven into a mantle that covers our common history, our culture, our civilization.

We are bound by more than the accidents of history and mass migration. The ways in which Europe and the United States have generally viewed one another are based on numerous factors, but what fundamentally underlies these perceptions in the sense of shared ethos that we call "Western Civilization."

That civilization evolved through the centuries from its origin in ancient Greece. It was shaped by the pragmatism of the Romans, by the ethics of the Judaeo-Christian tradition, by the concern of Humanism for the worth of the individual, and by the faith in progress nurtured by the Enlightenment. The political and socioeconomic institutions built on this Western ethos were transplanted in North America, where—while modified—they have been able to flourish. The family metaphor, commonly used to describe the American-European relationship, suggests its enduring nature and complexity. Viewed historically as the offspring in Europe, the United States mirrored "Old World" conflicts and values even in rebellion and

during subsequent attempts to create a separate identity. The European sense of paternalism remained even when the United States emerged from the 19th Century as a large and powerful nation that had manifestly come of age. The symbiotic relationship was bound more tightly by the huge and successive waves of immigration to America from every corner of Europe.

During the first half of the 20th Century, as two major wars and political upheaval tore apart the social and economic fabric of Europe, a dramatic transformation took place in this relationship. A new, powerful Byzantium arose and extended its sway into the very heart of the continent. The "Old World" found itself weakened, dependent, and endangered. In these circumstances, the rich and powerful "New World" quickly came to the aid of its European family and supplied both the military power and the economic sustenance to protect and resuscitate the continent.

The bricks in the Atlantic edifice were money, technology, and guns but the mortar holding it together was the common heritage and values of Western civilization.

In this new and troubled environment, the interests and policies of the United States dominated for many years. However, by the late 1960's and early 1970's several factors brought on significant changes in the situation. Foremost among them was the renewed industrial and financial strength of Western Europe. Other influences also played a role—among them, the preoccupation of the United States with Asia, lack of sympathy toward American policy in Vietnam, diminishing fear of Soviet expansionist intentions in Europe, and also the reduced economic power of the United States in the world. By the mid-1970's the United States and Europe had moved toward a more traditional and more equal relationship.

But the situation remains uneasy. The generation that grew up when American power was dominant and Europe was in temporary decline, tends to look upon the United States as an old and conservative country. As the foremost capitalist nation in the world, it is frequently seen as being backward, as less advanced in social policy than most European nations, as the defender of the status quo. Cooperation with the United States is deemed essential because of its continuing vast power, rather than because of its creative capacity in dealing with problems of mutual concern.

European domestic and foreign policy interests are today less automatically identified with those of the United States. To be sure, our mutual interests are still considered to be broadly compatible, but the fact that they are not identical is now articulated with some frequency and emphasis. Many Europeans, particularly the younger men and women, want to deal with their own economic and social problems in ways cast in traditional terms of self-interest. To the extent that these European attitudes reflect a return of self-assurance, they are entirely wholesome. But there is always a danger that they may be carried to excess and in the process threaten the Western unity that is essential to preserving our common cultural heritage.

As the official representative of the United States in the Federal Republic, I am concerned about this drifting apart, especially of the younger people in our respective societies. I find that my American colleagues here and many of our German friends have been occupied with this problem for several years. It has to do, I believe, with the gradual passing from positions of power and influence of a generation of Germans and Americans, many of whom formed a network of human relationships linking the two countries after the Second World War. The network included many of the German emigres of the 1930's, German prisoners of war who spent years in the United States, many thousands of German and American officials who cooperated in the rebuilding of Germany, and numerous German participants in the educational exchange programs of the early post-war years—when a trip to America often meant the discovery of freedom. The generation taking their places has not had similar formative experiences and it has no comparable commitment to the German-American relationship. The younger they are, the less do German people seem to know about the Marshall Plan, about the origins of the Cold War and of the North Atlantic Alliance, about Berlin in 1953, or Hungary in 1956, or even Czechoslovakia in 1968, to say nothing about American disarmament after 1945. Their information about American society is often superficial and even confused—an unfortunate result of the lack of interest in our times in the teaching or study of history, especially the history of the post-war era.

This phenomenon is not limited to Germany or Europe. On the other side of the Atlantic, an entire American generation has matured without any direct experience with the camaraderie and shared purpose that characterized the European-American relationship in World War II and the reconstruction period. The fading memory of two world wars has warped the understanding that young Americans have of the links between the security of their country and the security of Europe. Despite increasing American travel to Europe, it appears that there has been a weakening of the ties that bound the older generation of Americans and Europeans. The decline of foreign language studies in the United States and the infrequent exposure to serious European culture have blurred the perceptions that young Americans have of Europe and the Europeans.

In this situation, ladies and gentlemen, the sense of a shared ethos that underlies the relationship between Europe and the United States assumes special importance. It has been relegated to the background in recent years, possibly because it is less obvious than the power relationship and less tangible than national self-interest. But a shared ethos is the philosophic and ethical essence of our relationship; it is the basic element that in times of crisis and challenge makes natural allies of the Western democracies.

This shared ethos is based on values that are fundamental to both of our societies and that bind them together—namely, respect for human rights, faith in democracy, and devotion to the rule of law. And these common binding values make our societies different from those that do not share them—those that profess an ideology which scorns human rights, which relies on dictatorial power, which flouts the rule of law, and which is incapable of tolerating dissent.

I have no difficulty understanding people who disagree with the policies of my government, and who exercise their right to demonstrate peacefully against its policies. But understanding fails me when supposedly educated young people equate the motives or objectives of the United States vis-a-viz Europe, with those of the Soviet Union, as many young men and women—and some not so young—are now doing. That, ladies and gentlemen, reflects sheer ignorance, or intellectual blindness, or perhaps even intentional distortion. A cursory knowledge of postwar history should suffice to put this kind of thinking to rest. Individuals who earnestly seek truth need merely to inquire about the condition of life in Poland, Czechoslovakia, East Germany, Cuba or Afghanistan to discover the fallacy of equating American and Soviet motives or actions.

There are people in my country who are concerned and perplexed by recent political stirrings in Germany and elsewhere in Western Europe. They are asking serious questions about the demonstrations of young people against policies that have been the basis of the Atlantic Alliance. They are puzzled by press reports of urgent demands for the removal of American weapons from Europe or the demilitarization of Germany. The people of the United States have been sacrificing materially and personally by maintaining some 350,000 American troops in Europe.

They are stationed here to assure the maintenance of peace, so that the democratic way of life in our Western societies can be preserved. They will not stay here if they are not welcome. It is important that responsible German leaders tell the American people that, despite the headlines in the papers, the excesses of young people represent the feelings of only a small minority of the German electorate, not a consensus among thinking people in this country.

It is important that the American public understand that much of what is described by the press as anti-Americanism is simply a search on the part of sensitive young people for their identity in a troubled world, and that even where anti-Americanism actually exists it can rarely be equated with pro-Sovietism.

My government is convinced that the Atlantic Alliance has been and continues to be the basis of our own security and that of Europe. Our commitments to the Alliance remain strong and steadfast. I would, however, be remiss in my responsibility as my country's representative if I were not also to report to you that the nuclear debate in Europe is being watched in the United States with increasing concern. The debate is becoming a battle for the soul of Europe with clear alternatives.

On the one hand, the West can reaffirm unequivocally its determination to achieve sufficient collective security to deter Soviet aggression even as the United States seeks through negotiations with the Soviet Union to achieve major reductions of nuclear weapons. On the other hand, if such reaffirmation is long postponed or becomes uncertain, there may well be a growing sentiment in America to turn back upon itself and let Europe depend, for its security and freedom upon its own resources or upon Soviet good will. Isolationism is by no means the alternative that my country seeks, but many Americans are now wondering whether Europeans are sufficiently mindful of the fact that the Atlantic Alliance has made a free, prosperous and peaceful Western Europe possible during the past thirty years.

The liberty that Americans and Europeans cherish, the opportunity to shape our own destinies, the democratic institutions that have flourished among us, the laws that have protected us as individuals—these are our precious inheritance. They need to be guarded with utmost care. We must be prepared to defend them against those who may seek to impose their ideology upon us. History clearly suggests that being prepared to protect our ethical, cultural, and political values—being prepared to fight for them if necessary—is the only practical way of being assured that we shall not have to fight for them.

Is this not the principle on which the Atlantic Alliance is founded? Being prepared to defend our democratic way of life requires both vigilance and sacrifice. This principle is supported by the NATO strategy of deterrence; namely, that if the adversary knows that one is able, willing, and well equipped to fight for one's values, then there is a strong likelihood that the adversary will restrain his belligerent impulses.

This concept of mutual deterrence has been seriously weakened by the unremitting efforts of the Soviet Union during the past decade to increase its armaments far beyond the limits that might be needed for its defense. The massive Soviet effort to gain a unilateral nuclear advantage occurred at the

very time when the United States practiced notable restraint in its defense outlays. This Soviet effort is the critical destabilizing element in the current international situation, and it has forced the Atlantic Alliance to undertake modernization of its nuclear arsenal in the event that negotiations with the Soviets on arms reduction prove unsuccessful. Fortunately, the NATO decision to reestablish the deterrent capability of the Alliance has finally persuaded the Soviets to come to the negotiating table.

It is in this context that two weeks ago President Reagan presented to the entire world his vision of genuine peace and international security and proposed a concrete program for realizing his vision. Determined that the tragedies of the two terrible wars in this century not be repeated, he proposed the creation of an environment that will minimize military threats and political intimidation; so that all nations can pursue the goals of human advancement and economic growth without carrying a heavy burden of armaments.

More specifically, President Reagan has indicated that the United States is committed to the goal of virtual elimination of intermediate-range missiles in Europe; and that it will therefore not deploy the modernized nuclear weapons scheduled for 1983 if the Soviet Union will agree to dismantle its own intermediate-range nuclear weapons. Negotiations with the Soviet Union about the future of these weapons started in Geneva yesterday, and as President Reagan has explained, the United States will before long also seek to persuade the Soviet Union to agree to meaningful reductions of conventional forces in Europe as well as to meaningful reductions of intercontinental nuclear weapons. The President concluded his dramatic proposals for reducing armaments by observing that "there is no reason why people in any part of the world should have to live in permanent fear of war or its spectre;" that "the time is right to move forward on arms control;" that "nothing will have a higher priority" for him "and for the American people;" moreover, that "the American concept of peace goes well beyond the absence of war;" and that it also includes help to the poorest nations in achieving "self-sustaining growth."

I like to think that President Reagan's moving call for sanity about military matters will help German and other critics of the United States to see current international tensions in a clearer perspective. But I also feel that confidence in the objectives of the United States and of the Atlantic Alliance will not be fully restored until the citizens in our countries who scorn the values of our democratic way of life learn or rediscover that these values are worth protecting. That must be a task for us all.

The fact that these values are troublesome to the Soviet Union should encourage us, for it shows that our opponents are afraid of the inherent appeal and strength of our values. Witness the anxiety that is currently expressed in the Soviet capital over the open and vigorous reaffirmation of Western values in Poland. Witness Soviet jamming of Western radio broadcasts. Witness Soviet censorship of practically all channels of information. Witness their suppression of creative efforts that do not conform to their ideology. They are afraid of the contagiousness of the concept of human rights, of the free flow of ideas, of the rule of law—because these are values inherent in Western civilization. And that, of course, is our strength.

It is up to all of us, ladies and gentlemen, to make sure that our young citizens are helped to understand our common ethical and intellectual traditions, and that they be prepared to defend them. Most young people form their philosophy of life—their Weltanschauung—from the manner in which the world is presented to them at home and in school.

Their education does not always emphasize the economic, the political, the religious, or the cultural blessings of freedom. Need I say that an education that fails to convey respect for established values, that extolls class warfare, that inculcates cynicism about the virtues of our civilization will often lead to nihilism, to a turning away from community responsibility or from life itself. The advantages of individual freedom, the protection that the rule of law provides for minorities as well as for the majority, the benefits of democracy—all this must be explained to young people as the precious inheritance of Western civilization that they in turn will need to enlarge and transmit to their children.

That is not an easy educational task, yet I firmly believe that a revival of ethical teaching and historical study can greatly help young people to reach rational conclusions, that it will do so by enabling them to benefit from the lessons of human experience accumulated across the centuries. It is up to us on both sides of the Atlantic to give young people the opportunity to appreciate the values and achievements of our Western civilization. That must be accomplished in the homes, in the schools, in the universities, and in the parliaments of our countries. I pledge you my personal energy and that of my colleagues who work here with me in this common task. It is a worthy task, since as Americans and Europeans, bound by a common ethos, we can indeed strive to remain, in Schiller's immortal words, "ein einzig Volk von Bruedern."

REIMBURSEMENT OF LOSS OF FEDERAL DOLLARS DUE TO TAX CUT AND FEDERAL PROGRAM BUDGET CUTS

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution which was adopted by the 16th Guam Legislature and which has been received by the office of the President pro tempore.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION No. 191

Be resolved by the legislature of the Territory of Guam:

Whereas, Senate Bill No. 1674 introduced by Senator Lowell Weicker, Jr. seeks reimbursement of the loss of federal dollars due to the tax cut and federal program budget cuts; and

Whereas, some thirty million dollars are considered the net loss of revenues to the government of Guam due to these cuts; and

Whereas, this shortfall of revenues severely impacts on the overall economy of Guam; and

Whereas, the government of Guam cannot operate at present levels due to lack of funds; and

Whereas, this fiscal year, the government of Guam plans a 35-hour workweek in order to meet its payroll or suffer massive layoffs; and

Whereas, the reduction of working hours will cause severe hardship to the employees of government of Guam; and

Whereas, this loss of earnings is tragic since Guam's cost of living is ten percent (10%) higher than Washington, D.C.; and

Whereas, inflation, being the number one culprit of our economy, continues to be a more burdensome problem on Guam since we have to deal with importation of ninety percent (90%) of our foodstuff, articles and goods, etc.; and

Whereas, the construction industry is virtually at a stand still due to absence of federal capital expenditures and private housing construction is limited due to high interest rates, cost of construction and the low levels of the average wage earner on Guam; and

Whereas, the planned withdrawal of the U.S.S. Proteus and Polaris Submarines will severely impact Guam's economy; now, therefore, be it

Resolved, That the people of Guam humbly request President Reagan and the U.S. Congress to lend their support to Senate Bill No. 1674 now being considered in committee; and be it further

Resolved, That the people of Guam appreciate and support the effort and concern of Senator Weicker for the problems facing this territory; and be it further

Resolved, That the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the Honorable Ronald Reagan, President of the United States of America; to the Honorable Strom Thurmond, President Pro-tem of the United States Senate; to the Honorable Thomas P. O'Neill, Speaker of the House of Representatives, United States Congress; to Senator Lowell Weicker, Jr.; to the Honorable James A. McClure, Chairman of the Senate Committee on Energy and Natural Resources; to the members of the Senate Committee on Energy and Natural Resources; to the Honorable Robert Dole, Chairman, Senate Finance Committee; to the Honorable Howard H. Baker, Senate Majority Leader; to the Honorable James G. Watt, Secretary of the Interior; to Mr. Pedro San Juan, Director Designate, Office of Territories; to Congressman Antonio B. Won Pat; and to the Governor of Guam.

DEPARTURE OF WALTER "JOE" STEWART FROM U.S. SENATE SERVICE

Mr. CANNON. Mr. President, it is a pleasure to commend Walter "Joe" Stewart for his service to the U.S. Senate and to wish him every success as he enters the private sector. Unfortunately, along with the pleasure of seeing Joe move into a new challenge and opportunity comes a sense of loss for the Senate.

For 30 years, Joe has tirelessly discharged important duties and responsibilities in service to the Senate. Prior to his term as secretary for the minority and as secretary for the majority, he served as head of the staff of the Democratic Cloak Room, was an assistant to the secretary of the majority, and was a professional staff member of the Senate Committee on Appropriations. Joe started his illustrious career as a Senate page and graduated from the Capitol Page School as president of his class.

During my chairmanship of the Committee on Commerce, Science, and Transportation, Joe was immensely helpful in expediting and coordinating the movement of nominations within the jurisdiction of the committee. He advised me on floor scheduling and briefed me on the floor on pending bills and amendments. Joe was always courteous, considerate, and well informed as to the institutional workings of the Senate.

I like Joe Stewart, and I will miss him. His departure is a real loss for the Senate, and I join his many admirers in wishing him good luck in the future.

TRIBUTE TO WALTER J. STEWART

Mr. STENNIS. Mr. President, when Walter J. (Joe) Stewart began his career

in the Senate as a page in 1951, I had been a Member of the Senate for almost 4 years. Since that time I have worked with Joe very closely and have always admired and respected his dependability, efficiency, and dedication. Through most of his career, Joe Stewart has been at the heart of the Democratic side of the Senate. He culminated his career by serving as secretary for the majority and secretary for the minority in 1981. In June 1981, Joe completed 30 years in the Senate and he decided to leave and accept a position in private business. All of us wish him well in his new endeavors, and I join my colleagues in expressing my very best wishes for his future success.

Joe Stewart has been my friend, and it is hard for me to realize that the U.S. Senate will no longer have the benefit of his services. I would be remiss if I did not take this occasion to pay tribute to his dedication, the high quality of his work, and the skill and good nature with which he discharged his responsibilities.

WALTER J. STEWART

Mr. RANDOLPH. Mr. President, life is a constant adjustment to change, and it is a challenge to take proper notice to such events when they occur. As most of my colleagues are aware, our former secretary to the minority, Walter Joseph Stewart, has left the Senate to accept a position in private industry.

He served as secretary to the majority from 1979 until January of this past year, when he was elected to the minority post.

Joe Stewart was a creature of Congress, having come to Washington in 1951 as a page under the sponsorship of Senator Spessard Holland of Florida. He was graduated from the Capitol Page School in 1953 as president of his class. During his Senate career, he attended undergraduate and law school, as a night student. He attained his law degree from American University in 1963. Significantly, he received his law degree in the graduating class which included his longtime friend and employer, Senator ROBERT C. BYRD. President John F. Kennedy was the honored speaker at the commencement exercises.

Beginning his service on the staff of the Democratic Cloak Room, Joe shortly became supervisor of the staff. Several years later, he was named as assistant to the secretary's staff. His duties included supervising the secretary's staff, as well as being on the Senate floor during session to inform Members on pending legislation.

Following his graduation from law school, Joe became a member of the professional staff of the Senate Committee on Appropriations. He remained in that position until 1971, when he became legislative assistant to Senator BYRD, then majority whip, where he remained for 6 years.

When Senator BYRD was elected majority leader in 1977, Joe was named assistant for floor operations and served in that position for 2 years. In 1979, he was elected secretary for the majority.

Mr. President, Joe Stewart's departure left a real void in the administrative structure of the Senate, for he always performed his assigned duties with dedication and efficiency. He worked in and loved the Senate for 30 years, and his departure was taken with great reluctance. Each of us, in some way, has reason to be grateful for Joe Stewart's loyalty to this institution, and wish him good fortune in his future career.

RETIREMENT OF ALEXANDER E. BARKAN

Mr. MOYNIHAN. Mr. President, on December 3, 1981, the American labor movement bid farewell to the indefatigable Al Barkan, who on that day was celebrating his retirement after 43 years as a distinguished labor leader, the last 18 of which placed him in command of the Committee on Political Education of the AFL–CIO.

His career reflects the deep passion and commitment that has made the labor movement more than a self-interested institution of our society. Indeed, Al's persuasive skills and talents as an organizer, flow from his experiences and his life story—a story filled with struggle, with hardship, and with devotion to economic justice for American working people.

A native of Bayonne, N.J., Al Barkan went to work when young as a newsboy—learning at an early age the value of work, the hardship of urban life during difficult times, and the need for workers to stand together in the face of recalcitrant employers. He also learned in Hudson County something of the rough and tumble nature of modern politics. Al was graduated from the University of Chicago, where he took a degree in economics and political science. He launched his career as an educator in the Bayonne school system's night program while writing, at the same time, an eloquent column entitled "Through Workers' Eyes" for a weekly paper. Thus was merged in his own work the fusion between education and labor which became so vital to his later efforts.

After arranging a meeting between striking oil workers and John L. Lewis, to the displeasure of his school board, Al Barkan began a lifetime of work on behalf of organized labor serving first as a volunteer for the Textile Workers Organizing Committee, and later as a staff member for the reconstituted Textile Workers Union of America.

He served his time in Franklin Roosevelt's Navy as a radio operator on the U.S.S. *Alabama* where, one should note, he organized Roosevelt's reelection campaign on shipboard. Then he returned to New Jersey as executive director of the State CIO Council.

After the merger of the A.F. of L. and the CIO, Al Barkan became a mainstay of the federation's political education committee and in 1963, he succeeded then COPE director, James McDewitt.

Mr. President, Al Barkan's career responded magnificiently to the changes in our political life over the last two decades and he will forever be considered the one responsible for modernizing the techniques of political awareness and organization that have been vital to the labor movement in the last decades of the 20th century. His skills have sharpened the AFL–CIO's role as a voice for progressivism and for all those who cherish a good political fight, Al Barkan's departure leaves us absent a valuable friend and an able ally.

DEMOTING SYNFUELS—AGAIN

Mr. RANDOLPH. Mr. President, establishing a synthetic fuels industry by the turn of the century is becoming less and less of a possibility.

It is obvious, regardless of statements to the contrary, that private industry will not use available capital for development of this necessary effort without Federal participation. Several energy concerns in fact are using funds which should be directed toward assuring domestic security of energy supply by establishment of a viable synfuels program, for monopolistic energy aquisitions instead.

This year West Virginia witnessed the abandonment of two projects which would have served as critical building blocks for a synthetic fuels industry. In June, the solvent refined coal direct liquefaction plant to be developed and located in Morgantown by the United States, West Germany, and Japan in cooperation with Gulf Oil Co., was abandoned. Last month Consolidated Gas Co., and Sohio Oil Co., cancelled plans for high Btu gas/methanol plant at Point Pleasant.

President Reagan's decision to reduce Government participation in pilot plant projects now operating and stopping all Department of Energy funding for alternative fuels is wrong. The Synthetic Fuel Corporation should carry out its mandate. If it does not progress toward viable synthetic fuels production is in doubt.

The role of synthetic fuels might grow as the price of other energy fuels make them economically competitive. Because synthetics, however, are more expensive than petroleum products, the synthetic fuels industry will not emerge or grow on its own. This dictates that we must support the strategy developed last year in the Energy Production Act of 1980 to guarantee synthetic fuels production is stimulated.

One element of a total synthetic fuels strategy is the contribution that methanol fuels can make in meeting energy needs by using methanol blends in gasoline for automobiles and as a utility fuel. I was encouraged recently when I read a quote from Jerry McCleskey, president of Conoco Coal Development Co. He emphasized that the way to get a total coal conversion industry going is to use methanol production as its base. It is refreshing to see at least one chemical/oil conglomerate incorporating the Nation's welfare into its long-term capital investment strategies.

If we do nothing to encourage alternative fuel production and disruption of oil imports again becomes a reality, this administration will be held responsible for

slowing development of all alternative forms of energy.

We abandoned our first commercial effort on direct liquefaction technology in June of this year. The West Germans were to participate in that project. Now, in addition to an expected $10 billion West European gas pipeline agreement with the Soviet Union, the Russians have signaled they may be ready to buy an advanced version of a West German direct liquefaction synthetic technology. Pilot plants using hydrogenation are producing in Germany. It is probably the only country other than the United States that could build a commercial scale direct liquefaction plant. The size of the effort being discussed by the Soviet Union and West Germany would convert 20 metric tons of coal annually which is 22 million barrels of diesel fuel and gasoline during the next 10 years.

Reserves of conventionally produced oil and natural gas will not last forever, regardless of modifications made to domestic Federal reserve lands or our offshore leases. If we had continued Government support of synthetic fuel initiated in the 1940's, we would have domestic commercial production of synthetic fuels today. If we continue to ignore necessary applications of coal use and again snuff out the fledgling synthetic fuels industry we have fostered over the last 2 years, we sentence ourselves to the inability to control our own energy and economic future.

NATIONAL HARBORS IMPROVEMENT AND MAINTENANCE ACT

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that a "Dear Colleague" letter on S. 1692, the National Harbors Improvement and Maintenance Act, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON ENVIRONMENT
AND PUBLIC WORKS,
Washington, D.C., December 14, 1981.

DEAR COLLEAGUE: We understand that you may have been asked to sign a letter regarding the referral of the National Harbors Improvement and Maintenance Act, S. 1692, which the Committee on Environment and Public Works has ordered reported to the Senate.

This bill was introduced in a very similar form on October 1, 1981, and the Parliamentarian referred it to the Committee on Environment and Public Works. This legislation was properly referred. It does not impose any "tax".

The bill requires cost-sharing between the Federal government and the ports, similar to other public works legislation. In an effort to assist the ports, the bill authorizes non-Federal interests, if they so desire, to recover their share of costs through charges on the direct beneficiaries, charges that relate directly to the cost of the work and the benefits received.

We intend to report S. 1692 to the floor within two days. We would hope that you would review this bill carefully. We are convinced that opponents of the bill are using the "referral" issue as a tactic to delay this important legislation rather than allowing the full Senate to work its will in debate on the merits of the legislation.

Upon your review of the bill and the report, we are confident that you will find it reasonable, workable, and fully within the jurisdiction of the Committee on Environment and Public Works.

Sincerely,

ROBERT T. STAFFORD.
JAMES ABDNOR.
JENNINGS RANDOLPH.
PATRICK MOYNIHAN.

WATER FOR COLORADO'S FUTURE

Mr. ARMSTRONG. Mr. President, there is an old story from Colorado dustbowl days about a farmer who is asked if he thinks it is going to rain and replies, "Hope so. Not so much for my sake as the children's. I've seen rain."

Old-timers tell a lot of such stories about Colorado's perpetual shortage of water. And with good reason. Our State has been blessed with extraordinarily talented people, matchless climate and scenery, mineral wealth and other resources. But our way of life and economic vitality depend on water, and it is scarce. Really scarce.

Colorado receives only about 16.5 inches of precipitation in an average year.[1] Will this be enough to sustain the rapidly growing needs of Colorado households, agriculture, mining and industry and, at the same time, preserve our yards, parks, and other amenities that require so much precious water? Colorado leaders have been concerned about this issue for a long time.

Former Gov. John Love repeatedly emphasized wise management of our limited water resources. He said the only limit to Colorado's future is the availability of water. He was absolutely right.

In terms of water, Colorado is like Hawaii and unlike any other State: no major rivers flow into the State; they all flow out. Perched astride the Rocky Mountains, our State is part of the semi-arid region that constitutes 50 percent of the Nation's land mass but receives only 19 percent of its usable water.

Colorado's 16.5 inches of annual precipitation translates into more than 15 million acre-feet of water a year. An acre-foot is the volume of water necessary to cover an acre to a depth of 1 foot; it equals 325,853 gallons and will meet the needs of a family of four for more than a year. So 15 million acre-feet sounds like a lot of water. But it is not as much as you might think.

Much of that precipitation simply evaporates and is never used in our State. Of the remainder, much is snow that falls in the mountains and melts rapidly in the late spring. It flows out of the State just as rapidly, by way of the six major American river systems that have their headwaters in Colorado: the North and South Platte, Rio Grande, Arkansas, Republican, and, of course, the Colorado itself. It is this enormous volume of water, which rushes so quickly out of the State, that makes the storage of water in lakes and reservoirs so important if Colorado is to have a well-regulated, year-round supply.

Unfortunately, Colorado is not entitled to use all of the water that falls in its extensive watersheds. Over the years, we have made compacts with other States and Mexico, agreeing to let them have a specific share of water from these interstate streams. The waters of the Colorado River, for example, are divided between Mexico and the seven States in the river basin.

A 1944 treaty with Mexico guarantees that country 1.5 million acre-feet each year, while the Colorado River compact of 1922 gives the Lower Basin States of California, Nevada, and Arizona one half of the total average flow. The other half, between 5 and 7 million acre-feet in an average year is to be divided between the Upper Basin States in shares agreed upon in the Upper Basin compact of 1948: Colorado, 51.75 percent; Utah, 23 percent; Wyoming, 14 percent; and New Mexico, 11.25 percent. Similar compacts, also given the force of law by congressional ratification, exist for all of the significant rivers that flow out of our State, leaving Colorado with an approximate total allocation of 7.4 million acre-feet in an average—or less than half the water that originates in the States.

Of that amount, we presently consume 5.5 million acre-feet, which means nearly 2 million acre-feet of Colorado's entitlement water is flowing past our borders. A recent authoritative study by the Colorado Energy Research Institute projects that, by the year 2000, we will need to store and use every gallon of water Colorado is entitled to if we are to accommodate the rapid population increase that is projected to follow in the wake of energy resource development.

Still, many people have the idea that progress in the area of water storage can only be achieved at the expense of the environment, but that is not necessarily the case. It is true that altering the unregulated flow of waters can cause a degree of environmental change, but it is also true that planners take extraordinary steps to minimize and mitigate any disruption. Water development planning occurs under the strict control and protection of the National Environmental Policy Act of 1969 and actually provides an opportunity for enormous environmental improvement.

The sophisticated design of modern-day water projects features comprehensive planning aimed at multiple benefits and typically provides for fish hatcheries, wetland acreage, and dramatically improved fish and wildlife habitats. Man is no longer the sole beneficiary of water development; now, all members of a water ecosystem stand to benefit from the wise use of water resources.

Moreover, increased water conservation and storage is an environmental imperative if we are to limit the disruption that could be caused by the massive growth Colorado will experience between now and the end of this century. Water is the natural resource that will define the quality of this growth. We need new

[1] By comparison, the following ten cities receive these amounts, in inches: Atlanta, 48.3; Boston, 42.5; Chicago, 34.4; Houston, 48.2; Los Angeles, 14.0; Minneapolis, 26.0; New York, 40.2; St. Louis, 35.9; Seattle, 38.8; and Washington, D.C., 38.9.

water to extract the oil shale and coal, reclaim the mined lands, generate electricity, provide for continued strength in the agricultural sector, accomodate municipal growth and provide recreational opportunities. With prudent water development, we can meet all these needs and preserve our traditional way of life in Colorado; without it, we face the very real prospect of an environmental disaster on an unprecedented scale.

INVESTMENT OR PORK BARREL

Many people, especially from outside the West, have a vague idea that money spent on water conservation and storage projects is somehow wastful. In fact, however, when the Federal Government puts money into carefully planned reclamation projects, it is investing in the country's continued prosperity. Water is a critical component in agriculture, recreation, municipal and industrial growth, transportation, and energy resource development. The theory that water projects are pork barrel politics as usual is nothing but a tired political saw that we hear all too often from people who really have not studied the benefits that derive from this kind of Federal investment.

Western reclamation projects have already returned more money to the Federal Treasury than they have taken out, and most of these will go on paying for decades. Since passage of the Reclamation Act of 1902, less than $10 billion has been appropriated for all existing reclamation projects. In only 38 years of that period, from 1940 to 1978, they generated $25.6 billion in tax revenues. In 1978 alone, Western reclamation projects generated $8.5 billion in private income and $1.7 billion in corporate profits, which in turn generated $1.1 billion in State and local taxes and $2.2 billion in Federal taxes—for a total economic production of $13.5 billion. All this in addition to the long-term repayment schedule for much of the initial investment in construction funding.

Just in Colorado, there are roughly 871,000 acres of farmland irrigated by water from reclamation projects. Nationally, the figure is 10 million acres on 148,000 farms and in 1980 they produced 54.5-million tons of food, fiber and forage. This is enough to meet the annual food requirements and provide a richly diversified diet for 39 million people and has a gross crop value of $7.4 billion, about $1 billion of which was exported and helped pay for what we imported from other countries. Dr. J. Gordon Milliken, senior research economist for the Denver Research Institute, has proved that reclamation projects pay their own way. Using a highly sophisticated model for economic analysis, he came up with the following data:

TABLE 1.—NET INCREASE IN BUSINESS ACTIVITY, WAGES, AND JOBS CAUSED BY RECLAMATION PROJECTS IN 1979

[Dollar amounts in millions]

Type of output	Net value of output	Total tax base		Nontax base items	Total wages and net farm income	Person-years of employment (thousands)
		Personal income	Corporate profits			
Agriculture	$8,627.3	$5,702.8	$893.0	$2,031.5	$4,841.6	436.8
Net crop production	4,264.7	3,041.5	297.8	925.4	2,523.9	232.5
Livestock	567.4	394.7	34.3	138.4	317.4	29.4
Food processors	3,795.2	2,266.6	560.9	967.7	2,000.3	174.9
Municipal and industrial water	3,566.9	2,277.7	622.8	666.4	2,030.4	176.5
Retail water sales	204.7	104.9	12.4	87.4	34.5	2.0
Output of water dependent industries	3,362.2	2,172.8	610.4	579.0	1,995.9	174.5
Hydroelectric power	1,765.8	745.1	321.3	699.4	543.5	40.4
Retail sales	1,395.5	524.3	276.4	594.8	189.4	11.2
Output of hydro-dependent industries	370.3	220.8	44.9	104.6	354.1	29.2
Recreation spending	318.3	208.0	34.4	75.9	178.7	16.1
Capital investment	2,284.2	1,490.3	224.9	569.0	1,286.3	108.0
Bureau of Reclamation direct spending	860.6	562.8	53.7	244.1	519.0	37.6
Total	17,423.1	10,986.7	2,150.1	4,286.3	9,399.5	815.4

Wayne Aspinall, former chairman of of the House Interior and Insular Affairs Committee, calls Western water the "magic ingredient" that has transformed a once-barren wasteland into some of the richest, most productive farmland in the world, producing a major proportion of some of America's most important cash crops. The return on the agricultural portion alone makes reclamation projects an attractive investment.

From 1906 to 1980, the total gross crop value from lands irrigated by water from these projects was in excess of $78 billion. Add to that the incalculable benefits which have accrued and will continue to accrue from other aspects of water development—municipal and industrial uses, flood control, energy development, clean and renewable hydroelectric power, and recreation—and you begin to get an idea of what this kind of investment is worth.

The $10 billion that has been invested in Western reclamation projects over a period of 80 years has created a productive giant that not only pays back the initial investment with interest, but also generates untold billions of dollars in profits and tax revenues. In 1980 alone, this $10 billion was repaid in the form of direct benefits. Since 1902, a total of $100 billion has been repaid 10 times the original investment.

Most Federal spending projects cannot claim such an enviable record. The Washington metro subway system, for example, is costing the Nation's taxpayers about $10 billion, approximately the same amount as the total invested in all Western water projects since the turn of the century. But the subway will not ever pay back the taxpayers a dime. In fact, the subway cannot even meet its own operating expenses out of passenger revenues, let alone pay the cost of construction or return a profit to the Government.

But despite the proven need and cost effectiveness of water conservation and storage projects, the last 4 years have been dry ones for the West. President Carter was not willing to provide adequate funding for these critical needs.

I believe President Reagan, himself a westerner, will be more willing. He understands the crucial role of water in our way of life.

Unfortunately, however, the budget situation could hardly be worse. The Nation is facing staggering deficits, perhaps as much as $300 billion in the next 3 years, unless Congress moves decisively to curtail projected increases in Federal spending. Such deficits, if permitted, would trigger renewed inflation and even higher interest rates with disastrous economic results and hardships for every family in America. Obviously, we must find ways to cut the budget. Under the circumstances, it will be very, very difficult—perhaps impossible—for the President to recommend additional spending for any purpose, even one as well justified as Western water projects.

Nonetheless, I am working with the President and his advisors to achieve sufficient savings in lower priority spending functions in order to permit the President to recommend some new water project funding. If we are successful, the budget which the President will submit to Congress in January will include funds for at least one new water project—the first such funding in over 4 years.

In view of this need for fiscal restraint, it may be that innovative financing techniques will need to be developed for some new water projects. Senator DOMENICI of New Mexico, for example, has proposed that States invest 25 percent of construction costs. An investment partnership of this kind might not be a bad idea, because States would gain a greater voice in determining how their water resources would be developed. However, I do not think such a requirement should apply to projects that have already been authorized by Congress, unless the circumstances in a particular case are so changed as to justify a reevaluation.

COLORADO PROJECTS

There are many projects that have completed the planning phase and are ready to go to construction. In Colorado, there are two projects that are particularly timely—the Narrows Unit near Fort Morgan and the Animas-La Plata project south of Durango.

The possibility of a dam on the lower South Platte has been seriously discussed for over 75 years. The Narrows, according to Bureau of Reclamation plans, would provide for a total volume of 1,609,000 acre-feet, of which about a third would be left empty to capture flood flows. It would serve the agricultural and municipal water needs of 37,000 people in the immediate vicinity and provide a recreational resource available for 2 million people in the Front Range population centers with an estimated 1.3 million visitor/days annually.

The project was first authorized by Congress in 1944 and reauthorized in 1970. More than $6 million has been spent on the project since 1970 to ready it for construction, which is expected to take approximately 5 years. Features to be constructed include Narrows Dam and Reservoir, a fish hatchery and rearing unit, and several public-use recreation areas. The dam will be an earth embankment 147 feet high and 4.2 miles in length—the longest in Colorado. It is designed to impound some of the 350,000 acre-feet of the South Platte River water Colorado is entitled to under an interstate compact, but which flows out of the State in an average year. It had actually begun construction at one point but progress was suspended in 1977 after President Carter's controversial hit list of Western water projects.

The most recent Bureau of Reclamation cost estimate for this project is $329 million, which gives it a favorable cost/benefit ratio even by the strict Federal formulas that only consider direct and demonstrable benefits.

These benefits include irrigation, flood control, recreation, fish and wildlife enhancement, along with potential municipal and industrial water supplies. While providing a first-class warm water fishery, the Bureau expects it to enrich nearly 300,000 acres of prime farmland in northeastern Colorado. As a result, crop and livestock production in the area is expected to increase an average of $17.2 million annually. The nearby communities of Brush, Fort Morgan, and Sterling have expressed an interest in obtaining supplemental water supplies from the Narrows for municipal and industrial use.

A watershed of 13,450 square miles drains into the South Platte above Narrows damsite and, on the average of once every 8 years, damaging floodcrests roll through the river's floodplain—the last time in 1973. Flood flows upstream of the Narrows would be controlled in the future, which would reduce downstream flood damage by an average of $836,000 annually, according to a study by the Army Corps of Engineers.

Opponents of the Narrows claim the threat of flooding on the South Platte has been eliminated by a series of off-stream projects upstream from the reservoir site. They also point out that the Narrows may disrupt a critical habitat for whooping cranes downstream in Nebraska. The technical design of the Narrows has been challenged by opponents, who allege that the planned reservoir site consists of extremely porous soil that will allow the reservoir to leak and will either destabilize the dam or require a very expensive relining of the site. They claim the upstream Hardin site has less porous soil and would deliver water to a larger area. The Colorado Legislature recently funded a study of the site question, and this review is now underway.

The Animas-La Plata project, authorized by Congress in 1968, would be located in southwestern Colorado and northwestern New Mexico. The Bureau of Reclamation plan calls for two off-stream reservoirs—natural depressions that are ideal for water storage when they are dammed up. Water will be diverted out of the Animas River and pumped into the Ridges Basin Reservoir southwest of Durango, and out of the La Plata River into the Southern Ute Reservoir on the New Mexico border. The Ridges Basin Dam will be an earthfill structure 313 feet high and 1,600 feet long; the reservoir will have a capacity of 280,000 acre-feet, leaving room to contain flood flows. The somewhat smaller Southern Ute Dam, also an earthfill structure, will be 170 feet high and 2,900 feet long; it will have a capacity of 70,000 acre-feet, along with room for flood flows. Construction of the entire project is expected to take about 10 years at a currently estimated cost of $520 million, which yields a favorable cost/benefit ratio under the strict Federal formulas. In fact, the Bureau of Reclamation estimates that average annual benefits deriving from the Animas-La Plata project will be in the vicinity of $30 million in constant dollars.

Through an elaborate system of 11 buried pipe laterals, the project will distribute 118,000 acre-feet of water annually to 70,000 acres of farmland in both Colorado and New Mexico. In addition, it will supply 80,000 acre-feet of water annually to several communities, including Durango and Farmington, for municipal and industrial use. An especially interesting feature of this project is that it was specifically designed to serve the growing water needs of three important Indian tribes in the Four Corners Area: The Southern and Ute Mountain Utes and the Navajos. Their representatives have been involved in the planning and design of the Animas-La Plata project, and the two Ute tribes have secured 32,500 acre-feet per year to develop the significant coal reserves on their reservations. Moreover, the three tribes would receive additional water for irrigation and domestic purposes. And finally, the Ute tribes are considering abandoning their claims—currently pending in State water court—on other streams in the San Juan Basin if this project can meet their long-term needs.

The project will provide 3,600 surface acres of prime water recreation in a rapidly developing area of our State. The enhancement of fish and wildlife habitats is another important aspect of the Animas-La Plata design, including provision of a major big game habitat just west of Durango.

Critics of the project agree that additional water should be provided to dryland farmers in the western part of La Plata County, but allege that the Animas-La Plata was designed to include many landowners who have perfectly adequate supplies of water, just to improve its cost/benefit ratio. They say it is unnecessary, too expensive and too big.

As a example, opponents point out that the city of Durango does not need to draw water out of the project because it has sufficient water rights on the Florida and Animas Rivers. The project also raises health and environmental concerns, because the diversion point for one of the reservoirs is very near to a uranium mill tailings pile and diversion to the reservoirs would significantly reduce downstream flows in the Animas River. Opponents also point out that the Animas-La Plata will produce no hydroelectricity, but will instead consume large amounts of energy in pumping water water uphill to the off-stream reservoirs.

There are dozens of other water projects in Colorado that are either already operating or are in the planning or construction phase.[2] The Bureau of Reclamation is operating the Bostwick Park project, which consists of the Silver Jack Dam and Reservoir on Cimarron Creek in Gunnison County; the Vega Dam and Reservoir comprise the Collbran project in Mesa County; the Vega Dam and Reservoir comprise the Collbran project in Mesa County; the Colorado-Big Thompson project in north-central Colorado, one of the Bureau's largest, consists of over 100 structures and diverts water from the Colorado River to the Front Range in addition to regulating the waters of the Big Thompson River.

The Wayne N. Aspinall storage unit governs 40 miles of the Gunnison River in Gunnison County and includes Blue Mesa, Morrow Point and Crystal Dams; the San Luis Valley project in Colorado and New Mexico includes the Platoro Dam and Reservoir on the Conejos River in Conejos County; Rifle Gap Dam and Reservoir on Rifle Creek in Garfield County comprise the Silt project; the San Juan-Chama project diverts water from the San Juan River in Archuleta County for use in the Rio Grande Basin; Crawford Dam and Reservoir are the main components of the Smith Fork project in Delta and Montrose Counties; the Lemon Dam and Reservoir comprise the Florida project north of Durango in La Plata County.

The Uncompahgre project consists of the Taylor Park Dam and Reservoir and a series of diversion dams and canals in Montrose and Delta Counties; the Fruitgrowers project is located on Alfalfa Run in Delta County; the Fryingpan- Arkansas project is a large trasmountain di-

[2] Space does not permit more than a mention of these projects to show their diversity, but anyone interested in further information about them should contact my office.

version network, providing supplementary water to Colorado Spring, Pueblo and the Arkansas Valley; the Pick-Sloan Missouri Basin program is an ambitious 10-State project, which includes Bonny Reservoir in Yuma County near the Kansas border; the Grand Valley Diversion Dam in Mesa County diverts water from the Colorado River into the irrigation network that serves the Grand Junction area; Vallecito Dam and Reservoir in La Plata County comprise the Pine River project; Jackson Gulch Dam and an offstream reservoir near the Mancos River are the main structures in the Mancos project in Montezuma County; and the Paonia Dam and Reservoir are located on a tributary of the Gunnison River in Gunnison County.

The Army Corps of Engineers operates several flood control reservoirs in Colorado; the John Martin Reservoir on the Arkansas River in Bent County; Trinidad Lake on the Purgatoire River near the city of Trinidad; and three important reservoirs in the Platte River Watershed near Denver—Chatfield, Cherry Creek, and Bear Creek.

Several Colorado water projects are currently under construction by the Bureau of Reclamation: the Paradox Valley unit on the Dolores River in western Montrose County and the Grand Valley unit on the Colorado River near Grand Junction are part of a larger effort to control the level of salinity in the Colorado River watershed; the Dallas Creek project, consisting of Ridgway Dam and Reservoir, is being built in Ouray County; the Dolores project, consisting of the McPhee Dam and Reservoir, is now under construction in western Dolores and Montezuma Counties; and the Closed Basin Division, which comprises wells, pumps, and canals to salvage San Luis Valley groundwater for delivery to the Rio Grande system.

In addition, the northern Colorado Conservancy District is building Windy Gap Reservoir on the Colorado River downstream from Granby in Grand County as a part of a transmountain diversion project.

On the drawing board of the Bureau of Reclamation are several new Colorado projects: four additional salinity projects are being planned, including McElmo Creek in western Montezuma County, Glenwood-Dotsero in Garfield County, Lower Gunnison Basin in Delta, Montrose and Ouray Counties, and Meeker Dome in western Rio Blanco County; and the Dominguez Reservoir project on the Gunnison River in Mesa and Delta Counties. The Corps of Engineers is conducting general studies of the Arkansas, Rio Grande, and Colorado Rivers to determine what additional flood control measures might be taken.

Finally, there are a great many non-Federal projects that are being planned or built by private developers and will not require any Federal money or participation. Among these are Azure Reservoir, on the Colorado downstream from Kremmling in Grand County, which is to built by the northern Colorado Water Conservancy District to compensate for water taken out of the Colorado River system by their Windy Gap transmountain project; the Colorado River District is planning the Juniper-Cross Mountain project, consisting of two reservoirs on the Yampa River west of Craig in Moffat County and the Rangely Reservoir, to be built on the White River at Taylor Draw near the town of Rangely in Rio Blanco County; and the Yellow Jacket Reservoir is also being designed for the White River east of Meeker in Rio Blanco County. Denver, along with other Colorado cities, is building substantial water harvesting facilities. Large business enterprises are also making important contributions to conserving Colorado's water resources.

WATER OWNERSHIP AND USE: STATES VERSUS FEDERAL GOVERNMENT

President Carter's opposition to new water projects was frustrating. But the former administration's attitude toward water policy and ownership of water was positively alarming. Fortunately, the present administration is reasserting a policy, which had been in place for more than a century, that favors letting the States set their own goals and objectives in water policy. It respects State water law as well as State water policy and realizes it is foolish to think that a group of water bureaucrats on the banks of the Potomac can fashion a monolithic Federal water policy that could meet all the country's diverse water needs, problems and priorities.

In another important area, this administration has already dramatically reversed the water policy of its predecessor. Under President Carter, the Federal Government claimed to have special rights to untold quantities of the public water supply. These rights, they argued, were somehow attached to Federal lands—whether managed by the Forest Service, the Bureau of Land Management or the Park Service—merely because rivers and streams flowed through them. This very doubtful doctrine caused an uproar, because it disrupted the principle of arid States that whoever first puts water to beneficial use obtains a right to continue to do so. If the Federal Government could acquire massive wholesale water rights just by being trustee of public lands, then it would displace literally thousands of people who had obtained their water rights in the time-honored Western tradition. And State water law would be trampled on in the process.

In September, however, the Reagan administration quieted this furor when Interior Secretary James Watt declared that when the Federal Government wants to acquire a water right in connection with the land it manages, it would have to do so strictly in accordance with State water law and legal precedent. With this decisive action the Federal Government admitted the supremacy of State water law and demonstrated that it wants to be a good neighbor with the States and with individual landowners.

WATER FROM THE EARTH

Apart from the State's river systems, which are partially regulated by water management projects, Colorado's only other source of water is the network of deep and shallow aquifers, or groundwater reserves. Many of these aquifers, not directly recharged by river flows, have been built up over hundreds or thousands of years, but can be drained in just decades. A quarter of America's water use depends on aquifers. In all, national groundwater reserves total 59 quadrillion gallons, or 181 billion acre-feet. Looked at another way, that is 45 Lake Michigan's or 12,000 years of Colorado river flows.

That is a mind-boggling amount of water, but much of it is located in parts of the country where it is not needed and much of it is too far underground to be commercially usable. Consider also that, between 1950 and 1980, annual consumption of groundwater more than doubled to about 25 trillion gallons. Every day, America uses 21 billion gallons more groundwater than seeps back into deposits. Many aquifers are replenished or recharged so slowly, in fact, that they are looked at as a nonrenewable resource and water experts talk of mining groundwater.

Also, aquifers are a very delicate resource. As fresh water is drained out of them, it is possible that salt water from oceans or underground salt deposits can seep in. Whole aquifers can be polluted and rendered unusable for millennia by small amounts of contamination from many sources: erosion from farm land, bacteria from sewage, salt from the treatment of icy highways, and waste from feedlots, fertilizers and pesticides.

One of the most important underground reservoirs in the country is the Ogallala Aquifer. It has a volume roughly equivalent to Lake Huron and underlies much of eastern Colorado in addition to Nebraska, Kansas, New Mexico, Oklahoma and Texas. The Ogallala irrigates hundreds of millions of farm acres in this region and helps to make the American bread basket the envy of a hungry world. And yet, it is being consumed so rapidly that it could be effectively exhausted within the next generation.

Congress has ordered an intensive study of the Ogallala to understand this resource and in cooperation with the affected States, including Colorado, to develop a management plan that will enhance it and slow down the rate of depletion, in an effort to guarantee a supply of water to the farms and communities that depend on it.

WETLANDS

Section 404 of the clean Water Act of 1977 gives responsibility to the Corps of Engineers for regulating dredge and fill operations in America's navigable waterways and their adjacent wetlands. The crucial question is, What is a navigable waterway? In a series of landmark court cases, that definition was so broadened that eventually the courts declared any stream with an average annual flow of 5 cubic feet per second was navigable—that is, as small as 5 feet wide and 1 inch deep. The result is that the Corps of Engineers regulates very ordinary activities as "dredge and fill" in very small streams that no reasonable onlooker would think of as "navigable."

All adjacent wetlands come under the corps authority, too. So, while Congress

intended for the corps to keep America's major water highways free from pollution, the Army's engineers instead find themselves controlling land use in and around the streams and brooks of Colorado's high country, hundreds of miles from any navigable waterway. It is an absurd result—a classic case of bureaucracy, assisted by the courts, perverting the intention of Congress.

This provision has become an acute problem in Colorado, where much of our high country is frozen one half the year and wet the other half. Large proportions of these mountain counties—in some cases over 80 percent—are already administered by the Federal Government, through the Forest Service and the Fish and Wildlife Service, and now Washington is trying to control the remaining private ground through section 404 of the Clean Water Act. If you have ever been to Summit, Grand, or Gunnison County, you know that its creeks are not navigable in any ordinary sense of the word. As a result, cynics say "navigable" now means any stream that will float a Supreme Court decision.

The problem came to a head last winter when the Army Corps of Engineers published a map of Gunnison County, labeling almost all the private property in the county as wetland and forcing every landowner to go through the time-consuming process of applying for a Federal Government permit before they would be allowed to do such common things as excavate a foundation for a home or take gravel out of a stream on their own property.

Along with Senator TOWER, I have introduced legislation (S. 777) to redefine "navigable waterway" to mean a body of water that was or is being used for interstate or international commerce. This bill will restore some commonsense and manageability to the Clean Water Act and will restore important rights to private landowners. It will also return issues of land use planning to State and local officials, where they properly belong, and give them more authority for establishing and maintaining policies to deal with the diversity of wetland ecosystems.

The Clean Water Act expires next year, and its extension, along with an amendment like S. 777, will be high on Congress priority list when it returns in January to begin its second session. I have urged holding regional hearings on this bill in Denver so that landowners, along with State and local officials, will have a chance to be heard on how section 404 affects them and how it could be improved. I hope many people in Colorado and throughout the Rocky Mountain region will be able to participate.

RECLAMATION LAW REFORM

In 1902, the Reclamation Act was passed so that Federal, State, and local officials could work together to reclaim the arid West through the system of reservoirs and canals that have made the Western deserts bloom. Originally, that act allowed a farmer to receive Federal water on no more than 160 acres of land, with an additional 160-acre allowance for a spouse, and it required farmers to live on or near their land.

Over the years, as farming technology greatly expanded the acreage that a single family would have to farm to be economically competitive, that limit rapidly became obsolete and holdings in excess of it were routinely ignored or officially exempted. The Carter administration, however, decided to enforce the law to the letter—a decision that threatened to disrupt literally millions of acres of Western family farms. That decision touched off a drive last year to amend the act. The Senate passed a package of reforms that I strongly supported, but the House failed to act before the end of the session a year ago.

In this new Congress, with a new President, similar reform efforts are already underway, and prospects are good that the Reclamation Act will soon be brought into line with the farming conditions of the 1980's.

The Reagan administration is very supportive of this reform effort, which will need to approach the problem from several angles. The limitation to 160 acres will need to be revised upward; for example, a limit of 960 acres would accommodate 97.5 percent of reclamation farmers, but would exclude the large corporate farms that comprise 30 percent of reclamation project land. Provision will also need to be made for leased farmland, an arrangement that has become very common since passage of the 1902 act. The residency provisions will probably need to be repealed. Today's farmer often lives many miles from substantial parcels of the land being farmed, or has moved away and leased the property to someone else.

Finally, it should be made clear that the limitations of the 1902 act do not apply to Corps of Engineers' project water; these projects evolved for very different purposes than reclamation—mainly flood control—and, although they may produce irrigation water, do not belong under rules designed to govern reclamation projects.

The Reclamation Act of 1902 is designed to apply only to the reclamation projects that have reclaimed the arid West. Under the act, the Bureau of Reclamation has confined its operations to the 17 Western States, while the Corps of Engineers has a nationwide jurisdiction. Bureau of Reclamation projects are multipurpose and often have irrigation, hydroelectric, industrial, municipal and recreation features. Corps projects, on the other hand, are usually intended for flood control, though the corps also has a responsibility for dikes, levees, harbors, dredge and fill activities, coastal waters, canals, navigation and shipping—and its annual budget is therefore nearly three times as large.

THE COLORADO RIVER SALINITY ACT

The Colorado River, with its source high in the Colorado Rockies, begins its long journey to the sea as pure, melted snow. By the time it ends up in the Gulf of California, however, it is so adulterated by silt and dissolved minerals that it is of very poor quality. It is extremely saline and hard—that is, it has a very high concentration of dissolved salts and other minerals—and cannot readily be used for irrigation, municipal or industrial purposes until it first undergoes extensive, and very expensive treatment. The river has this problem mainly because it traverses some of the most saline soil formations in the world and is so heavily utilized. In fact, it rarely makes it into the Gulf of California, but instead ends up as a dry creekbed in the Mexican desert.

There are many good reasons to reduce the salinity levels and clean up the Colorado River. We have a negotiated obligation with Mexico, for example, on the salt content of the Colorado River water that flows into that country. Clean-up of the Colorado River will maintain our good relations with our increasingly important neighbor to the South.

A multimillion-dollar agricultural industry depends on fresh, usable Colorado River water. This is especially true in the rich irrigated farmland of southern California, which has to use the dirtiest part of the river. A reduction in salinity will also dramatically improve the incredibly diverse and valuable fish and wildlife habitats in and around the Colorado River for all of its 1,400-mile length. For these reasons, unless something is done about salinity levels, increased consumptive use of Colorado River water will be impossible or prohibitively expensive—because the more water we take out of the river the greater the concentration of the salt and minerals.

That is why Congress passed the Colorado River Basin Salinity Control Act of 1974. Although the seven Basin States love to argue from seven different perspectives about the Colorado River, salinity control is something they all agree is important. Last year, I was privileged to lead a solid coalition of Basin State Senators to improve salinity control.

The bill we introduced was designed to improve the 1974 act's purposes of lining irrigation canals to reduce contact with saline soils and enclosing ditches to prevent evaporation. After holding hearings on this bill, the Senate authorized the Bureau of Reclamation to go ahead with these activities while Congress continues to study ways to improve the Nation's salinity control effort. Other approaches, too, are being tried, including on-farm programs to help farmers use more efficient, and less expensive, irrigating techniques.

This year, I will be introducing a bill to move even further toward cleaning up the Colorado River and enhancing the multiple benefits it brings to the Western United States and Mexico. I am optimistic that it will win congressional approval in the coming year, so we can get down to the business of improving the water that irrigates 1 million acres of prime Western farmland and on which 17 million people, from Denver to San Diego, depend.

NEW WATER, NEW ENERGY: THE FUTURE

By its very nature, water resource planning is complicated, uncertain and long range. We need to be developing plans today for solving water problems that are many years down the road. For us in Colorado, that task is all the more difficult due to the complicating factor of energy development and its many secondary impacts. What will our water

problems be at the turn of the century? Where will additional water come from? Will technological advances keep pace with these problems? For Coloradans especially, the future of water is a question mark.

The answer to this question lies in vision and planning. We stand today on a new frontier; we should seize the opportunity now to chart a course for Colorado with the same courage and conviction that typified our State's planners a century ago. We need to look boldly into our future, recognizing that the potential benefit is greater than any problem we will face, and go forth with confidence. We must begin today to plan for all time.

First, we need to consider how best to conserve the 2 million acre-feet of Colorado's entitlement water that is flowing past our boundaries each year. It has become a cliche to say that water is the West's lifeblood—but that is what it is, and enough of it for 2 million families drains away every 12 months. The experts tell us we will need every gallon of it and then some by the year 2000.

The 20th century is the century of technology, and its history is the repetition of the far-fetched becoming the farsighted. Even now, futuristic plans are being developed and considered for augmenting rivers flows by weather modification—harvesting the clouds. Speculation is cropping up again about diverting water from more prosperous river basins—the Missouri and the Columbia—into the heavily used Colorado River system. There is even a study of a mammoth engineering project, to be undertaken jointly with Canada, to sell and export practically untold amounts of water from Alaska and north Canadian watersheds into the American heartland. While the engineers sit at their drawing boards, planning for tomorrow's needs, we must be out in the field solving today's problems. Colorado holds vast reserves of energy, and the time has obviously come for their development.

Water will be an important determinant of both the extent and the quality of that development. Increased water conservation and storage will be necessary on Colorado's west slope, where most of the primary impact of coal, oil and gas, and especially oil shale development will be felt. Without new water resources, we will see oil companies buying up more and more agricultural water rights and the rural way of life will become a thing of the past in Colorado west. I believe an agricultural tradition and energy development can and must co-exist and sufficient water is the key.

It is on the east slope where secondary impacts of an enormous magnitude will occur. Even in a scenario that calls for more moderate energy development, Colorado's population is expected to increase 2 million by the year 2000, and most of this growth will occur along Colorado's Front Range. Enormous amounts of new water will be necessary to meet their needs—whether for municipal and industrial purposes, increased agricultural output, hydroelectricity, recreation or any of the many ways water touches our lives.

Our State is sure to play a leading role in reducing America's dangerous dependence on foreign oil. We will answer that call and meet the challenge, but we must insure that our particular needs are met and that the special quality of life we enjoy is preserved for present as well as future generations of Coloradans. Our State has been blessed with productive soil and a bold, hard-working people; water is the only limit to what we may do and what we may become.

ADDRESS BY SENATOR GORTON AT THE NATIONAL COUNCIL FOR RESOURCE DEVELOPMENT

Mr. MATTINGLY. Mr. President, I wish to call to the attention of my colleagues a speech delivered by the distinguished Senator from Washington (Mr. GORTON) at the National Council for Resource Development Conference on the subject of the economy and the Federal budget. I believe this subject should have the attention of every Senator and, indeed, of every American.

I ask that the address made at the 15th Annual National Council for Resource Development Conference in Washington, D.C., on December 3, 1981, be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

SPEECH OF SENATOR SLADE GORTON

Today I intend to devote my time to discussing the course of the 97th Congress thus far, and some of the things we hope to accomplish in the future. It will come as no surprise to anyone in this room that the main concern of the Congress and the Administration has been to devise and to implement a solution to our current economic crisis.

In January, when I took my seat in the Senate, our national economy was characterized by double digit inflation, sky-high interest rates, high unemployment and stagnating economic growth. The urgency of the crisis was obvious to everyone. In the first eight months of this year, the Administration and the Congress drafted and passed into law an economic recovery program which took effect October 1st. This program, which I strongly supported, represents an important first step toward the revival of prosperity, but only a first step.

I shall first outline these measures which have already been taken toward economic recovery, then consider the problem of what remains to be done, and finally I will attempt to assess the impact of these actions on higher education, especially those programs which are of particular interest to two-year institutions.

When President Reagan signed both the "Tax Cut Bill" and the "Budget Reduction Act" on the same day, he and the Congress reversed the economic course followed by our national government for two decades and put into place the cornerstone of a program for economic recovery. The tax bill provides for the largest reduction in taxes during this century and the budget bill authorizes the biggest reduction in the growth of government spending in five decades.

In my opinion, excessive government spending has been a major cause of our current economic crisis. The federal government has, over the last few years, consistently spent significantly more than it has received in taxes. Huge deficits have been the inevitable consequence. These deficits can be covered either by borrowing money or by creating money. If the federal government borrows to cover the deficits, it uses money that would have otherwise been available to lend to businesses and to individuals. As a direct result, the economy has less new investment capital and the overall rate of productivity and economic growth is lowered. If the money to cover the deficits is created, or printed, then prices rise and inflation worsens. During inflationary periods, like those which we have experienced for the past 15 years, nothing good comes from large budget deficits.

For these reasons I believe the solution to our economic crisis had to begin with a reduction in government spending. The Congress and the President have taken this vital first step with the Omnibus Reconciliation Act of 1981. This law reduced government spending by $35.2 billion for this fiscal year—or by more than $150 for every man, woman, and child in this country. The budgets of over 200 domestic programs were cut and some programs were eliminated altogether. In addition, almost all major entitlement programs have had their growth rates limited. Reconciliation represents an historic step toward economic recovery.

But budget cutting alone will not solve our economic crisis. The ravages of inflation have gone too far for that. The economic stagnation which characterized the last half of the 1970's testifies to this fact. Something had to be done to stimulate savings and investment and to revive and restore incentives to produce. The Economic Recovery Tax Act of 1981 (by cutting individual and business taxes) is designed to provide these necessary incentives.

Inflation reduces the individuals' incentive to save. If goods are going to cost more in the future, and that increase in price is greater than what an individual can earn after taxes on savings, the incentive is to buy now. As a result, the Nation's savings rate has fallen until it is the lowest among all developed countries. It is now at the lowest level in our Nation's history, with the exception of the years of the great depression. Capital can only be financed out of savings, so a low rate of savings means a low rate of investment and capital formation and reduced rates of productivity growth.

Furthermore, inflation works with the progressive tax structure to increase marginal tax rates, often to punishing, incentive-reducing levels. The marginal tax rate paid by the median income recipient in 1965 was 17 percent, but in 1980, it was 24 percent, which is equivalent to a 41 percent tax rate increase. A person who received twice the median income in 1965 paid a marginal rate of 22 percent. In 1980, he or she paid 43 percent, a doubling of marginal tax rates. This phenomenon, known as "bracket creep," effectively discourages effort and investment.

Under the provisions of the Economic Recovery Tax Act of 1981, federal income tax rates will be reduced 25 percent over 33 months, beginning October 7th of this year, when the amount withheld for taxes from most employees' paychecks dropped by 5 percent. Additional 10 percent reductions in the withholding rate are scheduled to occur next July and again in July of 1983. After these cuts have occurred, tax rates will be indexed to the rate of inflation, ending once and for all the problem of "bracket creep."

In addition to the reduction in personal income taxes, business will benefit from much more rapid depreciation schedules, from the reduction of the capital gains tax, and from the virtual elimination of estate taxes, except for the very wealthy. These tax reductions will go a long way toward restoring the incentives required to stimulate savings, investment and the added work effort necessary for economic recovery. Already,

however, many are calling for the cancellation of some or all of these tax reductions. Since reducing future deficits is absolutely essential to the control of inflation, it may be that additional revenues will be needed. But additional revenues can be obtained without damaging the incentives created by the 1981 Tax Reduction Act as I shall explain in a few minutes.

As an integral part of the economic recovery program, the Federal Reserve Board has maintained a tight monetary policy, a necessary step if inflation is to be successfully curtailed. The money supply has been growing this year at less than half the rate averaged over the past 3 years. The rate of inflation, as a consequence, has been falling.

The heart of the program for economic recovery is to provide the incentives needed for the private sector to sole our current economic crisis. Incentives are provided for individuals to work harder and save more and for business to invest and grow. The President's original goal was a balanced federal budget in 1984. This is still the goal of many of us in the Senate. A balanced budget would eliminate the government as the foremost borrower in our capital markets and allow the Federal Reserve Board to continue a tight money policy to insure that the problem of inflation is permanently solved.

I would be less than candid if I were to tell you that the end of our economic troubles is at hand.

While much of the President's program is now in place, more needs to be done. Inflation has been an ever-growing curse for 15 years. At many times in the past, attacks on inflation have been mounted and later abandoned. As a consequence, each time this occurred, the solution to the inflation problem became more difficult.

While inflation has recently begun to subside, unemployment rates have begun to rise. I am afraid that this should have been expected. Each time in the recent past that our government has taken effective steps to control inflation, the unemployment rate has increased. Whenever this has occurred, the prime focus of the Administration's and the Congress' concern has shifted from inflation to unemployment, and immediate steps have been taken to reinflate the economy to bring down the unemployment rate.

Everyone remembers these false starts that characterized past attempts to stop inflation. Had we but stayed the course, as soon as the economy had adjusted to the lower inflation rates, the unemployment rate would have fallen back to a normal range. Each time in the past we in government quit too soon, the economy paid the price in terms of temporarily higher unemployment, but was cheated out of the benefits of a permanently lower inflation rate. We must convince people that, this time, we in government are serious. In order to do this, we must demonstrate our resolve.

I firmly believe that such a resolute commitment to the strategy of monetary and fiscal austerity is the best way to solve our economic problems. If we waiver now, as we so often have in the past, we shall lose the best chance we have to end inflation permanently and to restore prosperity to the economy.

The present economic situation seems almost to have been designed to test our determination. The combination of slower than initially anticipated economic activity, higher unemployment, and higher than expected inflation and interest rates have raised the projected budget deficit. The deficit in 1982 is now envisioned by most economists to be over $70 billion. This is $27½ billion more than the Administration originally predicted. Deficits of $90 billion and $100 billion are now projected for 1983 and 1984 respectively.

Clearly, projected deficits of this size are intolerably large. As President Reagan said last September, "We can run, but we can't hide" from the fiscal problems that will become increasingly apparent to the Nation. Additional fiscal action will have to occur, but it will not be easy. In fact, imposing additional fiscal restraint on top of what has already been done will be a herculean political task. It will require the utmost cooperation between the Administration and the Congress to achieve.

It is obvious that the President will, as he must, take the lead in dealing with the Nation's fiscal problems. The fate of the President's September request suggests that, if the Administration's proposals are to be accepted, there must be widespread support for them in the Congress. In September, the President requested a further 12 percent reduction in non-defense discretionary programs; these are the programs for which Congress must appropriate funds each year, and most education programs are included in this group. These discretionary programs make up approximately 20 percent of the expenditures of the federal government. Furthermore, most of these programs had already been substantially reduced by Reconciliation earlier in the year. I, and a majority of my colleagues, believed that this was an unacceptable way to solve our fiscal crisis. The spending reductions that are required to solve our budget problems are simply too great to be met by further cutting the discretionary programs. The economic situation requires that any further reductions be shared among defense and entitlement programs.

A further look at the budget clearly will illustrate that this broader approach is necessary. Defense and entitlement programs, along with interest payments on the national debt, account for roughly 80 percent of government spending. Entitlement programs, which make up 42 percent of federal expenditures, are those programs that oblige the government to make payments on the basis of eligibility requirements. The federal government is obligated to appropriate sufficient monies to satisfy the rights of all those who are eligible. A partial list of entitlement programs includes farm subsidies, unemployment compensation, Medicare and Medicaid, and all federal retirement programs, such as Social Security. Defense spending accounts for 23 percent of expenditures, and interest payments over 15 percent. It is simply not feasible to significantly reduce the budget deficit by repeatedly cutting the discretionary programs which make up only a fifth of total expenditures. Nor is it fair to put so much of the burden of economic recovery on one area.

In the near future, the President will send to the Congress his 1983 budget proposals. If these proposals are to escape the fate of his September requests, they must be more in tune with Congressional thinking. Recently, ten Republican Members of the Senate Budget Committee, including myself, gave the Administration the benefit of current Congressional thinking, when we supported a budget plan proposed by Senator Pete V. Domenici, the Committee's Chairman.

The Domenici plan would result in a balanced budget in 1984. This proposal incorporates a judicious blend of revenue increases and reductions in the rate of growth of expenditures. Both national defense and entitlements would share in the expenditure reductions. Under this plan, total federal outlays, which have been growing at a rate of 13.6 percent a year, would increase by 9.3 percent in fiscal year 1982, 5.2 percent in fiscal 1983, and 4.5 percent in fiscal 1984.

While entitlements would continue to grow under this plan, they would do so at a considerably slower rate. Defense spending would still grow dramatically, but more slowly than requested by the Administration. Discretionary programs would grow very little, but neither would they be required to suffer additional reductions. Finally, this plan envisions substantial tax reforms, which would increase the fairness and equity of our tax system and not destroy the economic incentives created by the 1981 Tax Reduction Act.

The Domenici Plan would reduce outlays over the next three years by $112 billion and increase revenues by $48 billion through the narrowing of tax loopholes. The result of adopting this plan would be to balance the budget in 1984, and equally as important, to do so in a fair and equitable manner.

Ten Republican Members of the Senate Budget Committee supported this proposal. Two Republicans did not, and when they voted with Committee Democrats, the plan was rejected. The two Republicans who voted against the plan did so not because they disliked it, but because the President did not approve of it.

The President did not approve the Domenici Plan because it contained a tax increase, and even more importantly, because he wanted us to wait until after his January 15th budget message. He told me this personally, when I and two other Senators visited him at the White House two weeks ago. This visit did, however, allow us the opportunity to inform the President of our thinking.

The President did not relent, and so the Budget Committee did not adopt the Domenici Plan. I believe, however, that the President's January Budget message will make proposals which are similar to those outlined in this plan; at least I hope so.

What does all of this mean concerning the federal programs of special interest to you? We do not have the time to discuss all of these in detail, but let me give you a few examples. The Strengthening Developing Institutions program, under Title III of the Higher Education Act, had a Fiscal Year 1981 appropriation of $120 million. The Budget Reconciliation Act authorized nearly $130 million for this program. The House Appropriations Bill also provides for nearly $130 million, as does the Senate Appropriations Committee recommendation.

Under Title IV, the 1981 figure for the Student Financial Assistance programs (other than Guaranteed Student Loans) was roughly $3.8 billion. Budget Reconciliation authorized just over $4 billion; however, the House bill allows $3.83 billion, while the Senate Committee recommendation was $3.41 billion. Under this Senate version, the Word Study program and National Direct Student Loans would be funded at 1981 levels, Pell grants and SEOG would be funded at reduced levels and SSIG would not be funded. Also under Title IV, both the House bill and Senate Committee recommendation call for funding the TRIO program at the 1981 level of $156.6 million.

These examples illustrate an important point. Overall at this stage of the process, we are talking about a reduction in the growth of federal expenditures, not a reduction in the amount of expenditures from current levels. But, in the education area as in all areas, in the case of individual programs, some will be funded at higher levels than 1981, some at the same levels (before inflation) and some will actually be funded at lower levels.

Student Financial Assistance programs, which have expanded substantially over the past several years, appear at this point to be scheduled for relatively large reductions. The Reagan Administration proposals are based on an increased emphasis on the traditional role of students and their families in financing postsecondary education, as well as the need to reduce overall federal spending. I share your concern about the potential effect on students with financial need and on colleges and universities.

Furthermore, the process is not yet complete. The Congress has not yet completed

final action on the appropriations bills for Fiscal Year 1982. The first continuing resolution, which provided the necessary temporary funding at restrictive rates, expired on November 20, 1981. In passing a second continuing resolution, the Senate adopted a proposal to apply a four percent across-the-board cut to most discretionary programs. I voted against this additional cut on the basis of my previously described belief that such an approach is too narrowly focused, and is neither balanced nor fair. The House and Senate ultimately compromised by agreeing to a two percent across-the board cut, which was theoretically to include entitlement programs (although the eligibility requirements were not changed) and defense expenditures, as well as the discretionary programs. The President vetoed this compromise bill. Now, therefore, the federal government is being funded until December 15, 1981, by an extension of the provisions of the first continuing resolution.

Obviously, difficult decisions still face us. When the next continuing resolution and the Labor, HHS and Education Appropriations bill reach the floor, I am certain amendments will be proposed to restore funding for many of the education programs, as well as for numerous other programs. Frankly, I believe that few, if any, of these are likely to pass. Similar attempts largely failed in the case of the Second Continuing Resolution because most of us feared they would push the total figure for the bill to a level which would assure a Presidential veto. This proved to be more than true as the President did veto it despite the additional two percent across-the-board reduction. It would still be counterproductive to support such amendments, even where we believe the programs to be worthy, if the result is to assure another veto.

I deeply regret that I cannot paint a more optimistic picture for you. Junior and community colleges have played a vital role in expanding access to postsecondary education. Your institutions have provided important new opportunities for people to obtain the education necessary to participate fully in society. This, of course, benefits all of us, and is, itself, an important element of any program to restore prosperity.

It is important that two year colleges continue to play their unique role in higher education, while we strive towards the restoration of our country's economic health. I recognize this will not be easy when these painful fiscal reductions come simultaneously with additional problems which are associated with the threat of declining student enrollments, reductions of state and local financial support, and the like. I assure you that we in the Congress recognize the vital service you provide to our society.

What we must do, I am absolutely convinced, is continue on a course for economic recovery. A course which does require financial incentives through a fairer tax code; a course which does require us to meet and to beat a deficit of over $100 billion during the course of the next 3 years; but requires us to do this in a manner which is totally fair. It is going to take a great deal of political courage on the part of Members of Congress to be willing to take on these entitlement programs because each of them benefit literally tens of millions of people in the United States. It is going to take a great deal of courage to make the kinds of judicious decisions in the field of national defense which both provide for the security of the United States and assure that we are not overspending. It is going to take a good deal of political courage for Members of Congress to raise additional revenues, even if they are not raised by an across-the-board increase in income taxes. And yet, it is only if we show the willingness to do these things that we can at the same time, create a strong economy in the United States and see to it that the discretionary programs, those which we fund every year, those which build the infrastructure both fiscal and human, of our society, are properly funded.

So you have a very great and a very immediate stake in the success of this program. You have a very great and a very immediate stake in helping us broaden our field to include these other difficult areas. Because without them, we simply are not going to be able to provide the support for your institutions which I believe to be necessary. We are all in this together. I am convinced that the American people are willing to follow a course which will lead relatively quickly down the road to economic prosperity as long as they are persuaded that everyone is being asked to sacrifice; that everyone has an equal share, both in the programs which we fund, and in the success of our overall effort.

Thank you very much for inviting me here today.

EDUCATIONAL EXCHANGE PROGRAM DEDUCTIONS

Mr. GARN. Mr. President, I am pleased to join my colleague from Minnesota (Senator DURENBERGER) in sponsoring legislation that will increase the amount of income that may be deducted by families who maintain students participating in educational exchange programs as members of their households for part of the year.

My interest in this measure extends beyond the more familiar foreign exchange programs to a unique program that enhances the education opportunities of Indian students whose families reside on the Indian reservations. The program is the Indian placement program sponsored by the Church of Jesus Christ of Latter Day Saints. The program was begun in 1954 with only 68 students, and over 25,000 primary and secondary students have since participated. These young students leave their families and homes on the reservations in New Mexico, Arizona, South Dakota, and Montana, to live with sponsoring families in Utah, Idaho, and California during the school year.

The program offers these children a much broader education, both academically and socially, than is often available on the reservation. As they reach adulthood, the education they have acquired enables them to qualify for entrance into colleges and universities or other productive occupations that would otherwise not have been open to them. They are able to take home knowledge and experience that can help them to improve themselves, their homes, and their families, and to make important cultural, economic, and social contributions to our whole society.

The opportunity has been almost as rewarding to the families who have sponsored these children. Many of them are able to sponsor the same child year after year from elementary through high school. The opportunity to make such a contribution and to gain firsthand an understanding and appreciation of a different culture and lifestyle is all too rare, and one that because of the increased costs of living fewer and fewer families are able to enjoy. The law currently allows a deduction for these families of $50 a month, a level set in 1954. According to the Bureau of Labor Statistics, the equivalent of 50 1960 dollars in 1981 is $157.26. This legislation, S. 1840, would only increase the deduction to $100, an investment with immeasurable returns. I urge its speedy and favorable consideration.

REMARKS BY AMBASSADOR J. WILLIAM MIDDENDORF AT THE UNIVERSITY OF MIAMI

Mr. THURMOND. Mr. President, much progress has been made in recent months in the Organization of American States in efforts to bolster free enterprise in the Western Hemisphere. The prime mover in those activities is our Ambassador to the Organization of American States, J. William Middendorf, who is well known and respected by many Senators.

I recently studied in some detail a speech Ambassador Middendorf made at the University of Miami this past summer. I was greatly impressed with his ideas. So that other Senators may be aware of the approach he is adopting, I ask unanimous consent that his remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

THE REAGAN ADMINISTRATION AND ECONOMIC DEVELOPMENT IN THE THIRD WORLD

(Address by the Honorable J. William Middendorf)

I am extremely pleased to have the opportunity to share a few thoughts with you on the Reagan administration's views on economic development in the third world and ways in which such development can be advanced more effectively and efficiently.

The performance among the developing countries over the past twenty years has been quite uneven—some have made impressive gains and are fast approaching economic maturity; others are still struggling to keep pace with their growing populations.

The key, as we see it, is to encourage the kinds of policies in developing countries that will maximize productivity and efficiency. This we believe, can be best done within a free market-oriented context.

The new administration has embarked on a new economic course that will have significant implications on the prospects for development and prosperity abroad. Here at home, the President's program will release the energy and creativity of our free economy to restore the productive vitality of American society.

The essential ingredients for economic recovery in this country are: A reduction of the Government's role in the economy and its intervention in the market place, allowing the individual the freedom to maximize both efficiency and profit, and adoption of policies designed to induce greater investment, capital formation, and productivity.

At the same time, while we are attempting to put our economic house in order, the developing nations of the hemisphere are seeking to expand their markets and their access to capital in order to finance growing economies. The new administration will be exploring ways to secure greater private sector involvement in developing countries. We would like to see the private sector more active in a greater number of developing countries, providing capital and technological expertise to supplement domestic resources. Quite often the private sector can accomplish what the public sector cannot.

Although it is the government to government aspects of international relations that garner the attention, it is the day to day business aspects of these relations that are the most important economically. For exam-

ple, in 1979, the flow of U.S. private investment to LDC's was roughly twice the net level of bilateral development assistance. Imports from LDC's, excluding OPEC, were 14 times our total development assistance.

As Mr. Stockman is fond of saying, it is the 99.8 percent of the U.S. economy that is in fact the most important to the LDC's despite their disproportionate attention to the 0.2 percent that goes to official development assistance.

Many developing countries have increasingly come to discover the advantages of encouraging the private sector and promoting free market policies in spurring economic growth. Large and small nations alike are turning away from the state intervention models of development that were the fashion hardly a decade ago.

Following World War II, when the developing countries were in the early stages of economic development, government intervention was used to mobilize scarce capital into specific directions. Basic economic infrastructure was lacking and the modern private sector was often weak or non-existent. Over time, that infrastructure has been put into place, and what was initially a government effort to construct a modern economy, has become heavy-handed obstructionism and inefficiency. Today government intervention has become a negative factor in development efforts.

The post-World War II policies of government intervention in the economy arose from the view that the allocation of resources induced by the market were not serving the public welfare and that in countries where capital was scarce, government direction and control were needed to foster economic growth, which usually meant industrialization. This led to the encouragement of import substitution—the replacement of imported by locally produced goods.

In retrospect, this strategy of industrializing through import substitution has been disappointing. It has fostered dual economies, crippled development in the agricultural sector, resulted in frequenet balance of payments crises, and contributed to rapid urban growth and political instability. Studies by the OECD and the World Bank both recognize that a substantial relaxation of import restrictions coupled with moves toward appropriate exchange rates are necessary to expand exports and overcome the shortage of foreign exchange that most developing countries (except for the oil exporters) seem to face.

For these reasons, the U.S. is urging developing countries to use great caution in applying import substitution measures and encouraging those countries to focus more actively on the possibilities which exports offer their economies while striving to keep our markets open to those exports.

In the seventies many of the more successful developing countries have been pursuing precisely such a strategy. The economic success stories, such as Taiwan, Korea, and Singapore, have all adopted policies which emphasize exports as a means of promoting rapid industrialization.

In recent years, these and other countries have shifted toward more liberal trade and payment regimens. Often these moves have not been as rapid or as encompassing as we might want. But overall, particularly in Latin America, and East and Southeast Asia, there has been a clear tendency of the more economically progressive and successful countries to move in the direction of liberalizing trade barriers and adopting policies aimed at stimulating exports.

The U.S. assists such countries by generally maintaining our own markets open to their exports. We do this in several ways. First, we have pursued a global policy of seeking to lower trade barriers, particularly in the various rounds of multilateral tariff negotiations. The Tokyo round of trade negotiations continued this process. When its reductions are complete, average U.S. MFN tariffs will drop from 10.6% to 6.5%. In addition, the Tokyo round also increased discipline on non-tariff barriers to trade through a series of new codes. We are urging developing countries, particularly those which most actively participate in the world trading system, to join these codes.

The United States, along with all other industrialized nations, has also provided special access to its markets for certain products from developing countries. The U.S. generalized system of preferences program, or GSP, was authorized in the Trade Act of 1974. Currently, roughly 2,800 eligible items from 140 beneficiary countries enter the U.S. duty free, subject to cutoff criteria designed to remove benefits for specific products from those developing country suppliers which no longer need the special competitive edge provided for by the GSP.

There is another, complementary way to mobilize capital required for economic development. Vigorous domestic capital markets are essential for balanced growth and can be an efficient engine of economic development. Economic arguments for restricting foreign trade presume that the domestic capital market isn't working, and new industries cannot get capital. Such arguments are irrelevant once domestic capital markets and financial growth gets underway. Producers who use imports would no longer need to be taxed by tariffs in order to subsidize new domestic producers. Instead new firms, with good prospects will be able to borrow more easily. Although industrial growth will be probably slower initially, the emergence of manufacturing enterprises able to compete in foreign markets will be faster and national productivity as a whole will grow more rapidly.

Private investment flows are another extremely important factor in promoting economic development in LDC's. The financial benefits to the U.S. direct investment, in balance of payment terms, are obvious. Less obvious, but equally important is direct investment's non-monetary contribution to economic growth. Direct private investment provides an efficient mechanism for the transfer of needed technology and management skills. In some cases, such investment also furnishes needed linkages between the new industry in the developing country and international supply and marketing channels.

Evidence of the success of direct private investment in promoting growth is the fact that it is becoming increasingly self-generating. Between 1969 and 1979, the ratio of earnings reinvested to total earnings of incorporated affiliates in developing countries reached 60 percent in 1979.

The U.S. has programs to offset non-economic risks in developing countries and to assist those countries in creating an economic climate conducive to attracting investment.

Working with the developing country, we can reduce the investor's perception of risk through bilateral treaties; e.g., tax and investment and insurance agreements to allow coverage of political and other risks (OPIC). U.S. embassies and domestic U.S. agencies provide assistance to facilitate investor entry into foreign markets.

Although the USG does what it can to facilitate investment in LDC's, the primary responsibility for attracting foreign investment must, of course, be with the host government, itself. The host government should establish clear guidelines and an environment in which foreign investment can operate and prosper. The objective of LDC's that want to attract foreign investment should be to accord the foreign investor equitable treatment, so far as possible. Domestic and foreign investors should play by the same rules—preferably simple ones. An investment climate distorted by executive regulations and restrictions will not only deter foreign capital flows, but can cripple domestic as well.

Government policy in developing countries, therefore, should encourage economic development through incentives to save, invest, and export, not through restrictions, overvalued currencies, high import barriers, and repressed financial markets. In other words, governments must permit a market oriented system in which the private sector is able to do what it can do best.

Many developing countries have come to recognize this fact and take concrete steps to lighten the hand of government intervention.

Recently at the organization of American states during a discussion concerning the creation of a new hemispheric framework for cooperation, the Chilean Ambassador stated that, "until now, the private sector . . . has not been part of cooperation programs. However, we are seeing this sector more actively involved in the development of (the countries of Latin America). Circumstances advise that the regions private sector be given a role in any system of cooperation.

I think it is particularly appropriate that the representative from Chile should express these views. Thanks, in large measure to its liberalized trade policies, open market conditions, and encouragement of free enterprise, the Chilean economy has experienced, since the mid-seventies, solid growth with reduced inflation together with significant increases in real income. The Inter-American Development Bank has attributed this impressive performance to the new economic policies pursued by the Chilean Government—that is, the deregulation of the domestic market, the elimination of subsidies and other non-price incentives, and an end to the policy of import substitution industrialization.

Recently, the Chilean economy has been stimulated by renewed growth in private consumption while public expenditures remain in check. Despite the government's tight fiscal policy, fixed investment has increased dramatically. During the first year of economic recovery in 1977, fixed capital investment increased over 18 percent and continued to grow at rates of 10.7 and 18 percent during 1978 and 1979 respectively. Similarly favorable results were recorded in Chile's foreign trade sector as well.

I cite Chile merely as an example of how market-oriented policies can turn a country's economy around. However, Chile is not the only country in Latin America to see the value of the free market system. Other countries, such as Peru and Jamaica are reducing government intervention in order to free the productive forces of their societies to most effectively allocate their scarce resources.

Even in some of the poorer parts of the world, free market policies can make a difference. As Jude Wanniski points out in his epic work The Way the World Works, a good laboratory case compares neighboring Ghana and the Ivory Coast since 1960. Ghana imposed heavy taxes (especially on the margin—progressive disincentives on the higher brackets) while the Ivory Coast did not.

The Ivory Coast adopted a freely convertible currency, encouraged private foreign investment, and supported the private sector. Although both countries started with similar natural resources, ethnic structures, and per capita incomes, by the late seventies nearly every economic indicator showed the Ivory Coast ahead. Today it has twice the per capita income of Ghana.

Although the success stories among the LDC's are those whose strategies most closely

parallel the kinds of policies we are advocating, many others still resist a strong role for the private sector, either in the form of foreign investment or a large domestic private sector. We will have a major task in demonstrating the merits of this approach to many of the LDC's. We will need to pursue this effort patiently in our bilateral relations and in our dealings with them in multilateral fora. I would hope that, instead of continuing to respond to LDC demands for systemic changes, we will be able to offer our own strategy aimed at having them participate fully in our system with its proven track record and benefits. This will be neither costless or easy. It will require the U.S. to be competitive and dynamic, and to deal with the process of industrial change creatively.

For this approach to succeed, I suspect that the bulk of the educational task will fall to the private sector itself. The daily conduct of business around the world gives the private sector a depth and breadth of contact with LDC governments and enterprises that vastly exceeds the extent of government to government relations. These contacts, and the practical results that the business community can deliver, are what will bring home to the LDC's the private sector's importance to the development process.

That process, of course, will only be hastened if the individual entrepreneur can be free to pursue productive goals, unencumbered by discriminatory and burdensome regulations, oppressive tax rates, and disincentives to save and invest.

The point, simply put, is that government, at all levels, must avoid erecting barriers that destroy incentives to innovate, and to improve productivity. This fundamental principle applies equally to the developing world as it does to industrialized economies. As such, it provides the framework in which the economic pie can grow, benefitting all sectors of society in developing countries.

SECRETARY HAIG ON ECONOMIC REVIVAL

Mr. PERCY. Mr. President, the November 1981 issue of "Enterprise" magazine, published by the National Association of Manufacturers, carries an excellent speech on foreign policy by the Secretary of State.

We expect the Secretary of State, whoever he is, to have a deep grasp of the international political and economic forces that continually modify and affect our foreign policy. It is not as often, however, that we find a Secretary of State that also has a keen appreciation of the role domestic economic matters play in the shaping of foreign policy. Secretary Haig has that appreciation, I am pleased to say, and it is a requirement for a lasting foreign policy.

Secretary Haig's speech to the NAM Board of Directors centers on this theme and he notes that economic recovery is the chief pillar of U.S. foreign policy. The Secretary notes at the outset of his remarks that "the United States cannot be an effective leader abroad and structure the environment in accordance with our goals if we continue to preside over an economic shambles here at home."

Mr. President, I commend the Secretary's remarks to my colleagues and ask unanimous consent that they be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

ECONOMIC REVIVAL: A PILLAR OF U.S. FOREIGN POLICY

(By Alexander M. Haig, Jr.)

No foreign policy can have substance without a fundamental bedrock of national purpose. It is President Reagan's national purpose that we work during his encumbency to create an international structure that will be hospitable to American values and ideals: the freedom and dignity of the individual, and an environment in which his ingenuity, work and skill can contribute to progress worldwide.

A further aspect of this goal is to shape our policies in such a way that necessary and desirable historic change occur within the accepted rules of international law and the standards developed by 2,000 years of Western civilization. Hence, there must be policies that favor peaceful change and that reject the concept of rule-by-force, bloodshed, terrorism and so-called "wars of liberation," which have become increasingly the style for historic change.

Our foreign policy is structured on four fundamental pillars. The first is of keen interest to business: recognition that the United States cannot be an effective leader abroad and structure the environment in accordance with our goals if we continue to preside over an economic shambles here at home.

The president's economic recovery program is well known to NAM members. It involves a greater degree of fiscal responsibility (designed to get a handle on runaway double-digit inflation), regulatory and monetary reform, and perhaps the more controversial tax incentive package (designed to ensure individual saving and corporate investment in the period ahead).

There are international aspects to this economic recovery program that are very important from my perspective. I sat abroad for five years and watched American prestige and effectiveness decline precipitously and, while there were many foreign policy contributors to that process in the post-Vietnam, post-Watergate America, one of the most important was in the economic sphere. The American dollar plummeted in value and our European friends were convinced that, as a society, we were unable to discipline ourselves to meet the challenges of a modern economic system that had been jolted, for example, by two petroleum shocks.

In the international sphere, one of the great challenges facing all nations today is the trading system itself, because all of us, for various reasons, are experiencing a great economic crisis. And, in such periods, protectionism always rears its ugly and potentially fatal head.

So, this administration will remain consistently an advocate for free trade. We will continue to seek a favorable climate for both free trade and free investment abroad.

We are profoundly and fundamentally interdependent. And those who flirt with short-term, seemingly self-serving policies that fail to recognize this are on a very self-defeating course.

That is the first pillar: economic recovery here at home and greater economic effectiveness abroad. We feel we're in partnership with American business in that regard. I've recently sent instructions to all our embassies abroad that their job, day-in and day-out, is to be a catalyst and facilitator for American business.

The second pillar we have tried to structure is one involving the American-Soviet, East-West relationship. The president has insisted that there will be a new era of East-West relationship, characterized by restraint and reciprocity.

The third element of President Reagan's foreign policy is, of course, a refurbishing and strengthening of traditional friendships, alliances and relationships with those who share common values with us worldwide. There has been a fundamental shift in European, Asian and Latin American assessments of American leadership. Americans may once more walk into an international gathering, no matter what its character, with a sense of pride. There's a new view that America has reversed course and is once again on the road to recovery and strength and international leadership.

Lastly, there is the developing world and our objective of developing a just and responsible relationship with it. That's the fourth pillar of President Reagan's foreign policy. It means that the United States recognizes that these developing people are going to have an increasing impact on the health and vitality of our own society.

We are seeking growth in the international sphere with fundamental emphasis on things Americans do best—to emanate from the private sector, from the market economy system, technology and education. No more grand handouts. The days of those are over.

MARKING A WEEK OF HIGH-LEVEL INTERNATIONAL TRADE TALKS

Mr. PERCY. Mr. President, Secretary Haig was in Brussels last week speaking with Gaston Thorn, President of the European Commission, on mutual international trade concerns. He was accompanied on this mission by Secretary of Agriculture Block, Secretary of Commerce Baldrige and our Trade Representative, William Brock. This was an almost-unprecedented event, that four Cabinet-rank officers should travel together abroad to discuss our top trade concerns. I strongly supported their trip to Brussels which shows that this administration is united in its effort to turn back protectionism. Their meeting in Brussels was a firm statement of the trade expansion precepts that have been the hallmark of U.S. international economic policy for decades.

At the same time our Cabinet officers were in Europe on this trade mission, the Deputy Trade Representative, David Macdonald, was in Japan on a similar mission. With an anticipated 1982 trade deficit with Japan of $20 billion, there have been strong calls for Japan to open its markets wider to U.S.-origin products. There is still a great deal more the Japanese can do in this respect and I believe Ambassador Macdonald's mission was as important as that of our Cabinet officers' in Europe.

Prior to the departure of these officials for that highly unusual week of international trade deliberations, I wrote each of them about the trade interests of Illinois. As the premier agricultural exporting State and the No. 2 manufactured goods exporting State, Illinois has a great stake in expanded international trade.

Mr. President, I ask unanimous consent that my letters to Secretary Haig and Ambassador Macdonald be printed in the RECORD following my remarks. I would like to add that although I am only inserting the letter to Secretary Haig, I sent similar letters to Secretaries Block and Baldrige and Ambassador Brock.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., December 4, 1981.

Hon. ALEXANDER MEIGS HAIG, JR.,
Secretary of State,
Washington, D.C.

DEAR AL: I am very pleased to learn of your meeting in Brussels on December 10 with Gaston Thorn, President of the European Commission. Your visit, in conjunction with three other Cabinet officers, will send a strong signal that the United States is still committed to trade negotiation over trade protectionism.

I have become greatly concerned in the past months, as I know you have, with what appears to be a rising sentiment for trade protectionism on both sides of the Atlantic. We embarked on a similar course forty years ago when Congress enacted the highest tariff walls in our history. We also know in hindsight that that route led straight to economic disaster for the Western economies. We should resist calls to move in that direction now lest we repeat the past.

When you talk with Gaston Thorn, I urge you to remain firm with regard to our agricultural exports to the European Community. As you know, our trade bindings were negotiated with the Europeans under the auspices of the General Agreement on Tariffs and Trade (GATT). We made trade concessions to the Europeans in exchange for the lower duties on our agricultural exports. I hope you will reiterate that any unilateral action by the Europeans against our corn and soybean exports would be viewed most seriously in Congress and throughout the farm states.

I have recently conducted agricultural export hearings in Illinois on both corn and soybean export issues. My Illinois constituents, who produce more soybeans than farmers in any other state, were alarmed by the decision of a GATT dispute settlement panel that upheld the right of the Spanish government to limit the consumption of soybean oil in Spain. In addition, the Illinois corn producers voiced their concern that our European markets for corn and corn gluten feed could slip away if the European Community expanded their Common Agricultural Policy (CAP) to encompass these items.

Although U.S. efforts to combat the GATT dispute settlement report were successful in Geneva last month, dangers to our soybean trade remain. Regrettably, Spain is still permitted to continue its practice of limiting soybean oil consumption. When Spain and Portugal, both major olive oil producers, join the European Community in a few years, I am concerned that the Spanish practice could be "grandfathered" into the Community, thereby substantially impairing our oilseeds trade with Europe. Also down the road is the possibility of a European consumer tax on vegetable fats and oils.

Regarding corn gluten feed, I understand the Europeans have backed off on an earlier proposal to impose a levy to discourage imports from the U.S. Recent conversations my staff held with European Commission representatives in Brussels, however, indicated that the Community may yet seek to restrict our access to their markets as early as next March.

In addition to these priority issues pertaining to corn and soybeans, I urge you to let the Europeans know of our concern in two other agricultural trade areas.

Illinois farmers have complained to me about the level of export subsidies that undercut our products in third country markets like Latin America and China. Like our difficulties with other types of export financing, it is a no-win situation for us to engage in a bidding game to see which country can offer the most subsidized financing. It is in our mutual interests to join together to reduce these subsidies that may very well violate Section 301 of our own trade laws.

I believe it would also be useful to raise with the Europeans the possibility of developing a pilot program that would allow more U.S. value-added products to enter Europe. We have developed tremendous markets for our raw commodities, but have not taken advantage of markets that could be created for processed agricultural products.

Without question the Europeans will raise with you their concerns on steel. It is to be expected because trade is a two-way street. We have no quarrel with their legitimate concerns, but we should continue to resolve our disagreements in talks together: Your mission to Brussels will show our trading partners that this Administration wants to foster a positive dialogue on trade. I believe the majority of us in Congress support you in that endeavor as long as our own legitimate concerns on agricultural exports are not neglected in the process.

Best wishes to you on your talks in Brussels.

Warm personal regards,

CHARLES H. PERCY,
U.S. Senator.

COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., December 3, 1981.

HON. DAVID R. MACDONALD,
Deputy U.S. Trade Representative, Office of the U.S. Trade Representative, Washington, D.C.

DEAR MR. AMBASSADOR: As you prepare for your trip to Japan to initiate discussions over our trade policy, I want to bring to your attention several areas that you will want to raise with the Japanese. With a pending trade deficit with Japan next year of close to $20 billion, there is more Japan can do to open its markets to U.S.-origin goods and produce.

Since my first days as President of Bell & Howell, I have strongly advocated expanding trade between the United States and Japan. The trade negotiations we have held over the last two decades have helped reduce trade barriers across-the-board. I hope your talks in Tokyo next week will lead to progress in narrowing our trade gap with the Japanese. Negotiations are unquestionably the preferable method of reducing trade differences. I know you share this goal, too.

Our state of Illinois is one of the foremost exporting states in the United States. We rank number one in agricultural exports and second in terms of manufactured goods. International trade is truly a way of life in Illinois.

Nowhere in Illinois is there more interest in foreign trade than in the farm community. One of every two farm jobs depends on exports. Our state leads in the exports of corn and soybeans. Japan is one of our principal markets for these grains and buys the majority of its imports from the U.S. in these areas. In fact, about one-third of Japan's $6.7 billion in agricultural imports from this country are comprised of corn and soybeans. It is a healthy trade, but one we can build on.

Japan maintains a significant tariff on imported soybean oil. Although there was an agreement during the Multilateral Trade Negotiations (MTN) to lower this tariff gradually between 1980 and 1987, it will still remain high, thereby discouraging imports of processed U.S. soybean oil. For example, the tariff of 19.25 yen per kilo that is now charged on less processed soybean oil will only drop to 17 yen per kilo by 1987. With refined soybean oil, the tariff falls only from 26.18 yen per kilo to 20.7 yen per kilo. This is an excellent area for further reductions.

In corn there are areas for negotiation, too. Japan maintains a tariff quota on corn which allows duty-free entry of corn up to a limit. This year, as much as two million tons can enter duty-free. Amounts imported above that level, however, are subject to a 15 percent duty. Moreover, farmers who wish to mix their own grains outside of the officially-licensed milling system have their imported grains subject to a $65 a ton duty. Both of these restrictions have the effect of reducing our sales of corn to Japan.

In one other agricultural commodity, Japan could make improvements in its tariff structure that would help reduce the trade deficit. Japan is now our top customer for pork products, yet a variable levy is applied to pork imports. I understand the MTN reduced this somewhat, but perhaps we could urge total elimination of this restriction.

In urging Japan to increase imports, you might want to pursue a suggestion I have been making for years to the Japanese. I have long felt that Japan could make a contribution toward improving the trade balance with the United States and assisting needy nations by purchasing U.S. grains for distribution abroad in a Japanese program similar to our Food for Peace program. Japan is reluctant to increase its defense spending dramatically, but has readily accepted the view that Japan can contribute to Western security interests by assisting in the economic development of nations important to the West. Japan has already made some minimal purchases of U.S. grains for distribution as food aid and our job should be to convince them that the program should be continued and expanded.

The Illinois Basin contains one of the largest deposits of coal in the world. Japan has already stated that it would like the United States to be its "preferred" steam coal source in the 1990s and 21st century. Our vast supplies and Japan's acute need for imported fuel supplies seem to mesh. Coal use for power generation and cement manufacturing is rising swiftly in Japan. I urge you to raise this matter with your counterparts as this may be a significant area for increased trade.

In manufactured goods, there is also room for increased trade. Japan maintains duties on trucks and vehicle bearings. It is true that the MTN agreement will phase out some of these limits by 1987, but even then duties will remain. Perhaps your talks next week could focus on this phase-out schedule, with an eye toward speeding it up. In addition, I have heard from the President of the Bearing Headquarters Company in Illinois who points out that Japan applies a commodity tax for most U.S. autos and requires extensive testing of American-made autos. Changes in these areas would be a major benefit for our auto parts manufacturers and could be a shot in the arm at this time of high unemployment in the auto and auto parts industries.

Another Illinois company, Monitor Manufacturing Inc., has brought to my attention a non-tariff barrier to its exports. Many of our trading partners accept the Underwriters Laboratories (UL) approval on electrical appliances and instruments. The Japanese government does not and requires prospective U.S. exporters to submit their blueprints if they want to sell in Japan. My constituent will not comply with this requirement, as he feels his trade secrets contained in his blueprints would subsequently be lost to his Japanese competition. I hope you can discuss this NTB with Japanese officials.

This is by no means a complete list of areas of concern, but I highlight them to give you a window on Japan trade concerns in Illinois. I wish you well in your talks and would be grateful if you could let me know the disposition of these points upon your return to Washington.

Sincerely,

CHARLES H. PERCY,
U.S. Senator.

STOCKMAN PROPOSAL FOR HEAD START

Mr. CRANSTON. Mr. President, I want to express in the strongest possible terms my opposition to the new proposal of David Stockman to destroy the Head Start program.

It has been revealed that Mr. Stockman, over the protests of the Secretary of Health and Human Services, Richard Schweiker, is proposing to fold the Head Start program into the community services block grant program and to slash its funding by over $130 million.

Mr. President, I think we need to be very clear about one thing: Mr. Stockman's proposal is one which would destroy the Head Start program—nothing less. Block granting Head Start would eliminate the unique characteristics that have made this program such a resounding success. It would dismantle the network of Head Start programs operated by local community entities throughout the Nation. The proposed reduction in funding would force thousands of children out of the program.

This Stockman attack upon Head Start is virtually incomprehensible. Less than 10 months ago, President Reagan acknowledged the importance and proven success of Head Start when he placed it in the so-called "safety net." Head Start was one of the very few programs affecting low-income children to escape the budget slashing. Mr. Stockman's plans for Head Start would totally tear to shreds President Reagan's already thread-bare safety net.

EFFECTIVENESS OF HEAD START

Mr. President, what makes this new assault upon the Head Start program so difficult to understand is that Head Start is America's most effective program helping people who need a helping hand. And the fact that those "people" are children makes Mr. Stockman's proposed action even more heartless.

Empirical, longitudinal studies of Head Start graduates have shown that the impact of participation in a Head Start program continues long after the pre-school experience. Head Start graduates are less likely to need expensive special education classes or to fail grades. They score significantly higher on mathematics achievement tests and tend to score higher on reading tests as well. They show stronger achievement orientation than non-Head Start children.

A report of the President's commission on Head Start in the 1980's released last year during the 15th anniversary of Head Start noted that "when the costs of Head Start are weighed against both its benefits (increased projected lifetime earnings for children) and the high costs of special educational services later for non-Head Start children, Head Start's benefits outweigh its costs by 236 percent." On a cost-benefit ratio, the U.S. economy would lose more than $306 million annually in future benefits if Head Start is reduced by Stockman's figure. Some of Head Start's benefits cannot be measured in dollars and cents. A GAO report issued 2 years ago noted that Head Start not only reduces educational and health deficiencies in young children that, if left unattended, can become expensive and difficult to overcome in later years, but reduces long-term dependency upon public assistance and promotes self-sufficiency.

CONCLUSION

Mr. President, this proposal to undermine the Head Start program is cruel and short-sighted. The Head Start program provides an opportunity for children from impoverished families to break the cycle of poverty and despair which limits their growth and achievement. A society which turns its back upon these innocent children and denies them the opportunities to reach their full potential is a society which also denies itself the contributions these children could make. I do not believe that the Congress will accept Mr. Stockman's proposal. I cannot believe that the American people will accept this cruel abandonment of thousands of innocent children.

Mr. President, in Monday morning's Washington Post, Dorothy Gilliam quite aptly described Mr. Stockman as a "real-life, modern-day Scrooge" in his behavior toward the Head Start program. I could not agree more. I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SCROOGE 1981

(By Dorothy Gilliam)

Just in time for Christmas, it seems we have a real-life, modern-day Scrooge. But he's not like the mean-spirited, quivering old codger in Charles Dickens' "A Christmas Carol," sputtering and ugly and wondering how in blazes his silly nephew could be merry because he was "poor enough." Nor does the visage of today's Scrooge resemble that ornery old fictional curmudgeon that, every year about this time, flickers across our TV screens.

No, quite the contrary. This Scrooge is handsome, youthful looking beyond his years. On top of that, he is smooth and honey-tongued. In fact, many of the cliches apply: while butter probably does not melt in his mouth, his smile is warm enough to melt the heart of his fellow citizens, even when his actions and decisions threaten to rob them of their future.

This is a Scrooge in lamb's clothing, a man who is so affable, so homey, so goodnatured that it is darn near impossible to dislike him. Indeed, it seems he is so loved by his charges that they keep on liking him even as he goes about trimming back on the amount of food and education they get. They believe him when he says that fattening the defense budget is for their own good because it protects them from the nasty Communists—his version of a Grinch, no doubt.

It is only when this sweet-talking Scrooge starts slinging his budget-cutting ax like some Paul Bunyan that the ugliness of the situation starts to show. And what shows is not just the ugliness of Scrooge 1981. Because when budgets get trimmed, it is only the poor who end up screaming. Nobody else seems to hear them or, if they do, much care. Most are too busy worrying about their own financial future. They can't see beyond their own shrinking dollar. They just keep hoping things will get better. After all, that's what lovable old Scrooge promises will happen if they just let him do what he thinks is best.

Besides, he had assured Americans that certain things would be spared the ax. Programs such as Head Start for preschool children from low-income homes, he pledged, would be forever safe from budget trims. Head Start was one of seven essential programs, we were told not too long ago. It had done a good job. And it was still desperately needed.

For those of us who had been worrying about the future of our nation's poor children and who had been driven to near distraction by all of the other health and welfare program cuts, that was good news. Here was a program that had proven successes. Underprivileged kids who had participated in the preschool Head Start Program have been shown to do better in school than those who had not had the advantage of Head Start. In fact, what was really needed was more Head Start because only 20 percent of the American children who need it can participate.

At least Head Start was safe, we sighed with relief. At least some lucky kids would have a chance at an equal start in life.

But lo and behold, just in time for Christmas, Scrooge has reminded us he is still a skinflint at heart. Merry Chistmas, poor preschoolers: the 374,000 of you in Head Start programs across the country may be among the last because Scrooge's helpers have proposed phasing out Head Start by merging it into community service block grants over the next four years.

Now, everybody knows that that is just a way of saying the program's days are numbered. Consider this: in the meantime, Scrooge's helpers are recommending that, starting in 1983, Head Start's budget be cut to $780 million from the $912 million Congress has okayed for 1982.

Typical is the reaction of Marian Wright Edelman, president of the Children's Defense Fund. "This is outrageous," she said. "This is the most successful program . . . They are out to gut the very nature of the program."

Of course, we all know that Dickens' tale has a happy ending. Scrooge eventually has a dramatic change of heart, thanks to an evening's encounter with Christmases Past, Present and Future, and showers everyone in sight with gifts and joy. But I have serious doubt that our real-life Scrooge will ever undergo such a dramatic metamorphosis.

Not as long as he believes eradicating budget deficits is more important than educating the poor.

GOLDEN FLEECE TO DEFENSE DEPARTMENT

Mr. PROXMIRE. Mr. President, I am giving my Golden Fleece of the Month Award for December to the U.S. Department of Defense for running a $13,000, 6-year program in which a bull was tested for possible biological effects resulting from a submarine communications device—a study later found useless by Navy officials. Long subject to local rumors, the story of Sylvester the Bull was recently confirmed in official Navy correspondence to me.

While the award given this month is not as large as the $100 billion Interstate Highway System cost overrun which won the award in November, the wasted $13,000 represents about the average annual income of a typical Wisconsin family. The ELF system is composed of 28 miles of above-ground cables which transmit waves into the atmosphere and down into the water to waiting submarines. Wisconsin was selected along with Michigan for ELF because of the underlying rock formation used to help transmit the waves.

The bull program began because William Clements, Deputy Secretary of De-

fense, and now Governor of Texas, mistakenly told a congressional committee chairman in 1974 that a bull was being used to determine if the extremely low frequency (ELF) system, then called Sanguine, produced environmental conditions that could harm people or animals.

The Department spent $13,000 to purchase and keep a Hereford bull, nicknamed Sylvester, in order to make good the statement by Secretary Clements that the ELF facility at Clam Lake, Wis., had been tested on cattle. The Navy kept the charade going for 6 years until Sylvester was needlessly killed in 1980. Here is the full story as confirmed by Navy documents.

Deputy Secretary of Defense William Clements, Jr., was a strong supporter of the ELF project. He briefed many congressional committees and Members of Congress giving his view about the importance of ELF. During a briefing in 1974, to Congressman George Mahon, chairman of the House Defense Appropriations Subcommittee, Mr. Clements was asked about the effects of Sanguine (ELF) radio waves on cattle.

He told Chairman Mahon that the Navy had a bull at Clam Lake to study this very issue. Shortly afterward, the Navy informed Mr. Clements that there was no such bull and there were no plans to put one in Wisconsin. A Navy memo sums up by saying that "it has been determined that no one has ever heard of the bull idea."

Now, obviously, this was not a satisfactory situation. A most important chairman of the most important committee had been told there was a bull. According to a November 19, 1974, Navy document, Mr. Clements "was most upset and told Mr. Reed, Director of Telecommunications, Command, and Control, that he wanted a bull at the Wisconsin test facility by Monday, November 25."

And so it came to be. An 18-month-old bull, named Sylvester, was purchased for $300 plus $700 for 6 months' feed and delivered as promised on Monday, November 25, to the Wisconsin test facility. He was duly examined by a vet and placed in the only available place, a 10 by 10 foot enclosure.

I have always been bullish on Wisconsin but this is not what I had in mind.

The Navy did not think much of the bull plan. Internal messages flowed back and forth in the Navy pointing out that no scientific research could be conducted with just one animal of questionable quality.

Further, they argued that if the bull died, the local population might think that the Sanguine facility had caused it. And a young bull within the Wisconsin test facility compound presented a certain amount of danger to employees there, Navy officials thought.

In other words, they were definitely not "sanguine" about having the bull on board. But no one wanted to buck Secretary Clements. So Sylvester stayed put.

In official Navy correspondence, Sylvester became the bovine test subject. Veterinarians were called in periodically for fertility tests. Soon, more objections came from Navy scientists. The fertility study was declared useless. Plans were made for transferring the fertility study over to mice or monkeys. When questioned by local visitors, the Chief Engineer at Clam Lake was told to say nonetheless that "there is no intention to sacrifice the animal."

Even a letter from a vice admiral of the Navy, Director of Command and Control, G. R. Nagler, acknowledged the uselessness of the study from a scientific point of view. Here is what he said in a letter to me dated October 27, 1981:

> It was ascertained, however, that the bull's presence at the Wisconsin Test Facility would not constitute an experiment having any scientific value because of lack of precise documentation of the bull prior to his purchase and also due to the limited size (one bull) of the sample data base.

But the story has a grim ending for Sylvester.

The Navy knew the test was phony, But no one wanted to challenge Secretary Clements and succeeding Secretaries either knew nothing about Sylvester or chose to ignore the situation. So Sylvester was kept in his pen year after year. He grew fat and sluggish from lack of exercise. His disposition soured.

Finally, on October 18, 1980, someone in the Navy gave the order to shoot Sylvester. In order to carry out the fiction of a scientific test, he was subjected to a necropsy, an autopsy. The Navy, in its thoroughness, concluded that Sylvester appears to be essentially a normal bull although somewhat obese. The last line in the necropsy report reads:

> Since Sylvester had been kept by himself during his adult life probably his main interest was only food.

What an insult to our Wisconsin cows.

So Sylvester came to a cruel and unnecessary death at the hands of an embarrassed bureaucracy.

While exact cost records are not available, the Navy admits that they spent at least $13,000 on Sylvester over 6 years. This may be one of the few cases in history where bureaucrats literally killed one of their own programs, and no bull.

COST-EFFECTIVE SHIPBUILDING: THE BATH PERSPECTIVE

Mr. COHEN. Mr. President, if the administration is to achieve its goal of true naval superiority, we must have a strong shipbuilding industry.

Recently, Eddy Nicholson, president and chief operating officer of Congoleum Corp., addressed a group of congressional staff members on the U.S. shipbuilding industry's capability to build up to a 600-ship Navy.

Bath Iron Works, which consistently delivers ships to the Navy under cost and ahead of schedule, is a Congoleum subsidiary. Thus, Nicholson's words bear special importance for those of us who are concerned about the ability of our Nation to rebuild its military strength in a time of economic uncertainty.

Nicholson raises a number of essential points in his speech. He outlines the elements of a cost-effective shipbuilding process, and he points to three basic goals of which the Navy and Congress must not lose sight:

The cost of ships must be reduced by increasing productivity and capacity in the efficient yards and by reducing the contract award to delivery times, thereby reducing exposure to inflation;

The quality of ships being built must be improved; and

The size and effectiveness of the fleet must be built up more rapidly.

This is not a pipedream, Nicholson notes. Bath is already setting the example. He told the staff group:

> We are doing nothing that others could not emulate. And we are proving that even in the world of Naval ship construction, the marketplace can work. Indeed, in the world of budget cuts, it must work.

Eddy Nicholson's message is important for all of us who care about defense contracting procedures and about the strength of our shipbuilding industry. It will, I hope, be of interest to all who read the RECORD. I ask unanimous consent that the speech be inserted in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SPEECH BY EDDY NICHOLSON

It is a real pleasure to be with you tonight. I am grateful to CSIS for inviting me, but even more so for bringing all of us together for a serious discussion of our Navy's needs and the most cost-effective way of meeting them. It is increasingly clear that that dual goal—meeting the need and doing so with a keen eye to the bottom line—is the responsibility of all of us—the Navy, the Congress and the shipbuilding industry.

There can be little doubt that a significant U.S. naval build-up is essential to our national security. Our Navy is now about half the size it was in the late 1960's. Yet we face an ever more adventurous Soviet Navy whose fleet is four times the size of ours. Although less sophisticated, its global reach is greater and requires a meaningful response. We simply have not been keeping pace. Our Navy is spread too thin. We need only look at the difficulties encountered in responding to recent needs in the Indian Ocean and Persian Gulf to understand the problem.

Along with recognition that a build-up is needed, questions have been raised about the shipbuilding industry's ability to respond. Can we build the 600-ship Navy? There is no question in my mind that we can. The capacity and management skills are in place and available to build ships at the rate planned by the Navy. If funds are appropriated in line with the Navy's plans, the job will get done.

But the physical ability to build is not enough. Enhancing naval capability is an important national priority. However, holding down Federal expenditures has equal priority. To achieve both, all of us in this room and our business and government colleagues must develop a process that allows expansion of the fleet in the most cost effective manner possible.

It is this process that I want to discuss tonight. I think we, at Bath, are uniquely suited to talk about cost effective shipbuilding. Bath Iron Works has a widely recognized and, I think, well deserved reputation for delivering new ships and major overhauls under target cost, ahead of schedule and at a profit. But more important, from your perspective, we have done nothing that our industry colleagues could not duplicate. With a teamwork approach by industry, the navy and Congress, I think there is much more we can do.

Let me briefly outline the elements of a cost effective shipbuilding process and then

discuss, in somewhat more detail, each of those elements:

Naval procurement schedules for new ships and overhauls must effectively utilize the industry's best capacity.

Increased standardization of components and whole ships is essential for developing economies of scale and mass production.

Improved long-range planning and management controls by Congress, the navy and industry will improve quality and reduce construction time and cost.

Finally, the marketplace must be permitted to work through genuine competition that rewards efficiency and innovation: Shipbuilders should assume a larger percentage of the risk/reward of follow-on contracts, and shipbuilders must invest more in the latest technology and allocate a greater percentage of profits to R. & D. to assure their long-range competitive position.

The shipbuilding industry has sufficient and probably excess capacity for projected construction and overhaul plans. But efficiently utilizing that capacity is problematic. In general, two yards should be qualified on each program whenever possible. Competition is good for the navy and the industry. Only two programs—nuclear carriers and trident submarines—would seem to warrant sole sourcing. On the other hand, using more than two yards spreads work too thin, eliminates economies of scale and results in excess capacity. These are luxuries we cannot afford and don't need.

The FFG program is a good example. Bath was awarded the lead FFG contract in 1973. In 1975 it was decided—appropriately, I think—to add a second yard for follow-on ships. Unfortunately, it was also decided to add a third yard. To be blunt, the third yard was not needed. Orders could have been spread more evenly over subsequent years and handled with maximum efficiency at two yards. The result would have been far less expensive FFG's.

Recently there has been a lot of talk about surge capability in defense industry: the need to maintain excess capacity to rapidly increase production in emergencies. Frankly, the concept as it is generally conceived simply isn't applicable to shipbuilding. Leadtimes for today's complex navy ships are simply too long. Maintaining unused capacity to handle emergencies is a waste of taxpayers' money. It is possible to maintain some marginal capability in otherwise active yards to speed up work already underway, but that's all.

What we really need to do is develop an ongoing shipbuilding program to assure that our fleet is always becoming the most effective in the world. Our entire defense posture is based on deterrence. In some areas, deterrent capability includes the industrial base, but not in navy ships. Here, there is no substitute for ships on station or near completion.

Standardization is another facet of that cost effective shipbuilding process. Ships are not automobiles that pour off an assembly line, but the Navy and we shipbuilders must both move away from our one-of-a-kind mentality. First, the navy should continue awarding specific ship programs to yards most capable of building them in a cost effective manner. Then they should tailor designs to meet Navy needs but also to best utilize the facilities selected.

Second, the Navy and industry should continue developing common weapons and electronics systems that are compatible with a variety of ships. Not only does this allow for longer runs by suppliers but it also makes it much easier to upgrade of completely change key systems.

Third, shipyards can go much further toward standardizing basic mechanical and structural components and then quickly assembling them into a largely finished ship. Employee productivity is significantly improved and costs are reduced.

Finally, the Navy and industry should continue moving toward the multi-purpose concept. There is no way a U.S. Navy—even with 600 vessels—can mtach the Soviet fleet ship-for-ship. Therefore, each of our ships must be a multi-purpose platform with great flexibility. The DDGX program, currently in the early design stage, is the perfect example. Its size, speed and range, combined with a variety of sophisticated weapons systems will make this new destroyer an effective anti-submarine, antiair, convoy and shore bombardment platform. Since it will be multi-functional, it can be built in sufficient numbers to be cost effective.

Closely tied to standardization is the need for improved Government and industry planning and controls. Here we need your help and we need it soon. Planning equals savings. The relationship is that simple. But to plan, we need predictable and consistent ship procurement. That translates into multi-purpose funding.

We recently had an experience that shows the cost impact of long-term funding. In April of this year, Bath and Todd were each awarded contracts for three more FFG's. At about the same time, the Spanish Government also ordered three FFG's. As lead yard, Bath went to suppliers of 42 basic components to order nine ship sets. As usual, they gave us a quantity price break, but they said, if we ordered 12 sets we would save another $2.9 million. Knowing the Navy planned to order three more FFG's for the year 1982, we asked for authority to buy all 12 sets. The answer was "no." Funding had not been approved. The Government not only lost the $2.9 million but exposed itself needlessly to another year of inflation. This example is a small one but could be multiplied thousands of times throughout the Navy's programs.

I am not suggesting that in 1973 Congress should have funded 50 FFG's. But clearly it is not cost effective to buy ships in small annual lots. In fact, it's wasteful. It creates tremendous uncertainty among prime and subcontractors. And it discourages the kind of capital investment by the yards that could result in even greater cost savings.

Planning applies equally to overhauls. Bath has worked closely with the Navy in improving lead times for overhauling the FF 1052's. Contracts have been signed further in advance of the ship's arrival in our yard and, as a result, we have been able to purchase equipment and supplies sooner. This means the ships are completed faster and at less cost than before.

You have all heard a great deal about change orders. Our view of them may be different than that of others in our industry. Given the limited fleet size change orders are inevitable—and probably essential to assure that each new ship is as modern and capable as possible. If a new radar system is developed while a ship is under construction, it is probably folly not to build it in. But the change order process does need to be contained to assure that changes are really meaningful and that as much lead time as possible is given. Again, it is a matter of planning.

Risk sharing is another component of cost effective shipbuilding. In any program, building the lead ship is a complex, unpredictable process. Major changes are frequent, as they should be, to assure the most flexible and effective design. Industry, therefore, cannot be expected to bear the risks of the lead ship. Follow-on ships are a very different story, however. Incentives should be built into contracts to assure that builders make every effort to hold down costs. As programs mature, the risk should shift dramatically to the builder.

The Navy has just signed a contract with Newport News for additional attack submarines that provides for a 50/50 sharing of cost overruns—or underruns. We strongly support this approach. In fact, Bath recently discussed a fixed price contract on FFG's that would have shifted all risks except inflation to the private sector. Unfortunately, we were turned down—even though it would have reduced the government's risk.

I make no apology for the fact that assuming greater risk would be more profitable for Bath. Sometimes we lose sight of the fact that profit is the major incentive to increased investment and improved productivity. Both lead to greater cost savings for the shipbuilder and the Navy.

Our experience at Bath proves the point conclusively. We have made major investments and, as a result, we are probably the most nearly state-of-the art producer in the country.

Increasingly, we are building ships in modules and assembling them on the ways. Modules are built indoors, eliminating weather delays, as well as vastly improving labor productivity. As an example, the productivity of the electrical departments has been improved 35 percent due to such small changes as being able to turn the module in order that the electrician may work down rather than overhead.

Also, we are pre-outfitting these components so our ships spend only about six months on the ways and are 70 percent complete at launch. By contrast, FFG's built at other yards are substantially less complete at launch.

Bath is turning more and more to the use of computer assisted design and manufacturing to more quickly and accurately design and form numerous components. Frankly, we think we can do much more. We plan to develop a more sophisticated automated design capability for complex piping and electrical systems. This will lead us directly into automated welding and dramatically improved dimensional control of parts and components.

Working closely with suppliers during the design process, we do more with prepacking major systems, increasing standardization and interchangeability.

Why have we made these investments in capital equipment and methods changes? Very simply, it improves our profitability and reduces our risks. We are able to manage better. It lets us function very well in the marketplace, a marketplace by the way that we believe should be encouraged to work as freely as possible.

Some would say the free market won't work in naval shipbuilding. I would have to disagree. If structured as I have suggested, the Navy's program can reward efficiency and innovation while penalizing overruns and delays. In the end, some yards will prosper. Other will drop by the wayside. That's as it should be.

I fully subscribe to the Boston consulting group's theory that says only the top two companies in any industry niche will survive long term. Government efforts to subsidize the weak builders only keep the weak barely above the water while the efficient producers do not have sufficient market shares in order for them to make the necessary investments in capital equipment and R. & D. to assure a quantum leap in productivity and technology.

The weak remain weak and the efficient producers make minimal gains. Under a free market system, the strong would get stronger and therefore be capable of producing ships in sufficient quantities at the lowest possible cost.

A strategy for subsidizing the weak pro-

ducer under the guise of maintaining an industrial base is clearly counter-productive in light of our critical build-up needs and limited resources.

The real point is that all of us in industry, in Congress and in the Navy cannot lose sight of our three basic goals:

First, reduce the cost of ships by increasing the productivity and the capacity of the efficient yards and reducing the contract-award-to delivery times, thereby reducing exposure to inflation; and also by

Second, improve the quality of the ships built.

Third, build up the size and effectiveness of the fleet more rapidly.

This is not a pipedream. We've been doing it at Bath!

Our construction time is down and we are advancing along the learning curve of ship programs more rapidly than even we thought possible.

We are routinely delivering new FFG's ahead of schedule, under target cost, and above nominal specifications.

The FF 1052 overhauls are on or ahead of schedule despite the inherent uncertainties of the overhaul process where we are never sure what's needed until we begin work.

We have made major investments and technological innovations and we consistently operate under the tightest possible management and financial controls.

As a result, we have effectively increased capacity by moving production faster and more efficiently. We are producing quality ships that make us proud and serve the Navy well.

As I said before, we are doing nothing that others could not emulate. And we are proving that even in the world of naval ship construction, the marketplace can work. Indeed, in the world of budget cuts, it must work.

A LIVING LIBRARY

Mr. PROXMIRE. Mr. President, I am pleased to note that my alma mater, Yale University, will soon receive a collection of more than 200 video-taped interviews with survivors of the Holocaust. The interviews, which focus on the psychological and human reactions of the survivors, will undoubtedly become an integral part of Yale's Judaica Library and its newly established Jewish studies program.

According to an article that appeared in the New York Times on Sunday, the interview was chiefly the work of Laurel Vlock, who won an Emmy Award for a television documentary on the survivors. "They had a great need to tell and we had a great need to ask," and that, she explained, was the motivating force behind the project.

In view of Yale's commitment to Jewish studies, she felt it was fitting that the school receive the collection. She also expressed her hope that the collection would help the university establish a center "to document for all time the most tragic event in human history."

Mr. President, I commend Laurel Vlock and Yale University for their commitment to preserving the memory of the Holocaust, as a tribute to the victims, and as a stark warning to future generations.

Mr. President, the living library that Yale University is establishing is important. Very important. But it is not enough. It never could be.

The memory of the Holocaust, and the preservation of that memory, has only been worthwhile if it spurs us to action. If it serves to prod us to take every step possible to preclude such atrocities in the future.

We have an opportunity here to take that next step.

We have an opportunity to take one small step forward by giving our advice and consent to the ratification of the Genocide Convention, and I urge my colleagues to join with me in seeking ratification of this Congress.

I ask unanimous consent that a recent article from the New York Times concerning this matter be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

YALE TO GET VIDEOTAPED INTERVIEWS WITH HOLOCAUST SURVIVORS

NEW HAVEN.—Yale will become the first American university to house a collection of videotaped interviews with survivors of the Holocaust. A local group is to donate more than 200 such interviews to Yale's Sterling Memorial Library next week, university officials said.

The collection, which includes interviews with survivors who live in Connecticut, New York, Virignia, Florida and Israel, will become "an integral part of Yale's Judaica library and will be used for educational, curricular and research purposes," according to Geoffrey H. Hartman. He is a professor of English and comparative literature and co-chairman of Yale's national committee for Judaic studies development.

The interview project was begun in 1979 by Laurel F. Vlock, a local film maker. The videotaped interviews are being given to Yale with the hope of establishing a center there "to document for all time the most tragic event in human history," Mrs. Vlock said.

JEWISH STUDIES PROGRAM

"Yale is absolutely right for this collection," she added, saying that the university has a Judaica library and a newly established Jewish studies program.

Mrs. Vlock, who won an Emmy Award last spring for a television documentary on the survivors that she filmed for WNEW-TV in New York, founded the Holocaust Survivors Film Project in New Haven, with Dr. Dori Laub, an associate clinical professor of psychiatry at Yale.

After personally financing interviews with four local survivors, Mrs. Vlock and Dr. Laub decided to solicit funds from the community to expand their project and seek out other survivors. "They had a great need to tell and we had a great need to ask," Mrs. Vlock said.

Last June, Mrs. Vlock also broadcast for the Public Broadcasting Service the world gathering of Holocaust survivors in Jerusalem. Several interviews in the collection were made at the conference, she said.

Mrs. Vlock and Dr. Laub, himself a survivor of a little-known camp in the Rumanian-occupied portion of the Ukraine, involved other New Haven residents in the project and raised at least $100,000, Dr. Laub said.

The interviews focus on the psychological and human reactions of survivors, rather than on the historical aspects, which, he said, have become standardized over the years. "You listen to human stories and they are varied," he said. He added that many of the survivors expressed "hopefulness, not at all pessimism and despair."

CONCLUSIONS AND RECOMMENDATIONS OF THE ENERGY RESEARCH ADVISORY BOARD ON FEDERAL ENERGY R.D. & D. PRIORITIES

Mr. GLENN. Mr. President, on December 11, 1981, the Energy Research Advisory Board on Federal Energy R.D. & D. priorities delivered a report in response to a request received last August from the Deputy Secretary of Energy, the Honorable W. Kenneth Davis. I believe this report is an excellent document that reflects the carefully considered views of a most distinguished panel of experts in the energy field. The report is rather lengthy, but I recommend that every person in this body, indeed, everyone interested in U.S. energy policy, should read the entire document. What is of particular interest is that the Board's recommendations, which are considerably different from those in its 1980 report, stem from the Board's adherence to the Reagan administration's redefinition of the appropriate role of federally sponsored energy R. & D. Whereas the previous administration defined an expansive role for federally sponsored R. & D. including demonstration and commercialization, the present philosophy is to drastically shift the emphasis from Federal sponsorship to reliance on the private sector. Federally sponsored R. & D. under this philosophy is limited to basic energy science and technology; research on health safety and environmental aspects of energy supply and use; and energy R. & D. of a long-term, high-risk character.

It is obvious, Mr. President, that the Energy Research Advisory Board (ERAB) struggled mightily to produce recommendations that could fit within such a narrowly prescribed Federal role for this most important activity of research and development that helped make the United States the great country that it is today. That the Board has some concern about following an overly strict interpretation of the administration's philosophy is revealed by the following quotation from the report:

ERAB's deliberations have reflected an expectation that Federal funds for R&D will be stringently limited for the foreseeable future. In evaluating R&D programs, ERAB has conformed generally but not slavishly to this policy. We applaud greater reliance on the private sector whenever possible. We applaud the restoration of a free market in petroleum. ERAB believes that much, perhaps most, of new energy supplies and greater efficiency in energy use will, in fact, be achieved by higher energy prices, but ERAB is concerned that some energy R&D of great potential significance for the achievement of the nation's energy goals will fall between Federal and industry responsibilities.

The new policy recognizes that private industry cannot be expected to do basic energy research or projects of a long-term, higher risk character, but there are other circumstances in which it would be unrealistic to expect timely and effective assumption by industry of R. & D. responsibilities abdicated by the government, however worthy the projects involved, and despite the provision of new generous tax incentives.

Mr. President, as I indicated in my floor statement on December 11, I am concerned about the health of our R. & D. enterprise as a result of the misplaced priorities of the administration. In the energy area in particular, it is obvious that the administration's priorities are severely skewed. In examining the fiscal year 1982 budget submitted by the President, the ERAB panel concluded that R. & D. for electric supply technology, which is mostly nuclear, is receiving a larger proportion of funding than the

present and projected share of electricity in our national energy supplies. While supporting continued funding for conventional reactor systems and safety, waste disposal and uranium enrichment, as well as breeder R. & D. The Board states that "construction of a (breeder) demonstration plant in the early 1980's is not an urgent national priority." This is a polite way of saying that spending the additional $1.2 billion to $2 billion that will be needed to complete the Clinch River project is a waste of the taxpayers' money.

At the same time, the Board strongly recommends increased funding in conservation and utilization R. & D. programs, suggesting that the overall level of Federal support for such programs is too low in view of their potential for energy improvements and the inability of many important energy consuming sectors to conduct R. & D. Indeed, the Board suggests that funding for the industrial conservation program in particular, should be restored to approximately the level of fiscal year 1981. This program, which is perceived by many people, including ERAB, as having significant merit, has been zeroed out by the administration for fiscal year 1983, a result that is little short of scandalous considering the need for industrial conservation and the achievements of the program to date.

I was also gratified, Mr. President, by the Board's strong recommendation for continued support of two programs that I have had a particular interest in over the past few years, namely, the program in energy storage R. & D., and the program on waste heat utilization at our uranium enrichment plants. Once again, however, the present projection for fiscal year 1983 for these programs is poor.

The waste heat utilization program is scheduled for extinction, and the energy storage program, which includes electrical energy storage—an area of tremendous importance—is scheduled to be reduced to a total of about $9.3 million. Mr. President, the shortsightedness of the administration in the energy R. & D. area is going to come back to haunt us. The full dimension of the impact of these shortsighted budget cuts will not become apparent until some years after this administration has left office. The claim is that the administration is cutting the fat out of Federal programs, but in the R. & D. area, I believe they are cutting our future.

Mr. President, I hope all my colleagues will join me in commending the Energy Research and Advisory Board of DOE for having completed, in such fine fashion, a difficult task under difficult constraints. I believe we should pay close attention to their recommendations and I hope that the appropriate committees will examine their report carefully when examing the President's fiscal year 1983 budget request in the area of energy R. & D.

I ask unanimous consent to place in the RECORD the following excerpts from the ERAB report:

The list of panel members; the Executive Summary; and the list of conclusions and recommendations concerning energy R. & D. priorities.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

R. & D. PANEL

Chairman, John S. Foster, Vice President for Science and Technology, TRW, Inc., Cleveland, OH 44177.

Vice Chairman, William McCormick, Executive Vice President, Michigan-Wisconsin Pipeline Co., American Natural Resources System, Detroit, MI 48226.

MEMBERSHIP

Ivan L. Bennett, Dean and Provost, New York University Medical Center, New York, NY 10016.

Herman R. Branson, President, Lincoln University, Pennsylvania 19352.

EXCERPTS—EXECUTIVE SUMMARY

In the electric supply sector, priority should be given to supporting:

Nuclear waste isolation research and demonstration, conventional reactor systems and safety, the LMFBR base program, uranium enrichment R&D.

Programs in which reductions can be made include:

Small reductions in magnetic fusion;

Significant reductions in the Clinch River breeder, the light water breeder, electricity transmission, and high temperature geothermal; and

Phase-out of funding for hydropower and magnetohydrodynamics.

The Board noted that the electric supply technology is receiving a fraction of DOE's funding that is substantially in excess of its contribution to present and future energy supplies.

In fuels supply technologies, the Board believes that technologies such as enhanced oil and gas recovery, while urgent because of near term benefits, will be adequately supported by the private sector. DOE's support of these programs can thus be reduced. The Board also recommends that:

The major Federal effort in synthetic fuels research and development be directed at innovative concepts at the laboratory and small pilot-plant scale. In view of the financial guarantees available from DOE and the Synfuels Corporation, DOE's budget for cost-shared projects at the large pilot plant and demonstration-plant scale and for in situ shale recovery should be reduced.

The funding level for R&D directed at producing liquids and gases from biomass and the production of alcohol is at an appropriate level.

ERAB urges that the parts of Advanced Research and Environmental Control Technology R&D (FE) concerned with technologies to control SO_x, NO_x and particulates emissions be increased and strengthened at the expense of other activities in this program.

On an overall basis within the Department of Energy, R&D funding for energy conservation and end-use technology is underfunded, particularly when compared with funding levels for supply technologies. A balance that better reflects the opportunities, importance, and nature of the Federal role in supporting private sector response needs to be achieved. This should be achieved by increases in funds allocated to buildings and community systems and industrial conservation.

The Board believes that if its recommendations are implemented, a net reduction in DOE's budget will result.

VIII. CONCLUSIONS AND RECOMMENDATIONS CONCERNING ENERGY R. & D. PRIORITIES

A. OVERALL R. & D. PROGRAM PRIORITIES

Table VIII-A summarizes the results of the Board's evaluations of the four major energy R&D sectors: Electric supply, liquid and gas supply, conservation and utilization, and technology base. There are a number of electric-supply-related R&D programs that, for a variety of reasons, are of low priority and whose funding should either be substantially reduced or terminated. This reflects, in part, the Board's view that although no "correct balance among energy forms and resources can be defined a priori," R&D for electric supply technology is receiving a larger proportion of funding than the present and projected share of electricity in our national energy supplies.

The Board concluded that the overall Federal funding level in the liquid and gas R&D supply was higher than needed. This view results from the belief that the oil and gas industries are in a good position to take advantage of energy R&D opportunities and that the Federal Government role should be primarily focused on longer-term, higher-risk, applied research and development. It should not directly support costly demonstrations or large pilot plant projects (except as funded by loan or price guarantees through DOE and later under the Synthetic Fuels Corporation). However, great care should be taken in phasing out existing Federal R&D programs to insure technology transfer to the private sector.

In the conservation and end-use utilization area, the Board concluded that funding should be increased. The Board recognizes that higher energy prices have resulted in substantial reductions in energy demand and that this process is likely to continue. How-

ever, private enterprise in the buildings sector and, to a large degree, in the industrial sector is unlikely to do all the R&D needed. The Board believes that funds allocated to R&D in these two sectors should be increased. Such increases, combined with other ERAB recommendations, would increase the total allocation to the utilization and conservation technologies.

With regard to technology base programs, it was the Board's view that the funding for such programs should not be decreased and in certain areas should be increased. This stems from the Board's belief that, of all the sectors for energy R&D funding, the technology base programs are less likely to attract industry support; therefore, the Federal Government's role is greatest. Continued and increased support in the technology base programs offers the best chance for substantial technological break-throughs and improvements.

TABLE VIII-A.—RELATIVE PROGRAM RANKING

Program	Funding
Electric supply:	
Higher priority:	
Commerical nuclear waste	Same.
Defense nuclear waste	Same.
Medium priority:	
Conventional reactors	More.
Breeder fuel cycle R. & D	Little less.
Centrifuge	Same.
LMFBR	Same.
Solar power technology	Less.
Advanced isotope separation	Same.
Lower priority:	
Magnetic fusion	Little less.
Light water breeder	Less.
Uranium resource	Same.
Electric energy/storage	Less.
Hydropower	Zero.
Clinch River breeder	Less.
Geothermal	Less.
Magnetohydrodynamics	Zero.
Fuel supply:	
Higher priority:	
Enhanced oil recovery	Less.
Medium priority:	
Advanced technology	Same.
Enhanced gas recovery	Less.
Coal liquefaction	Less.
Biomass energy	Same.
Surface coal gasification	Less.
Lower priority:	
Mining R. & D	Less.
In-situ oil shale	Less.
Alcohol fuels	Same.
In-situ coal gasification	Less.
Conservation and utilization:	
Higher priority:	
Coal combustion	Same.
Buildings/community systems	More.
Industrial conservation	More.
Medium priority:	
Transportation conservation	Same.
Solar applications/buildings	Same.
Heat engines/heat recovery	Same.
Multisectors conservation	Same.
Fuel cells	Same.
Lower priority:	
Solar applications/industry	Less.
Science and technology base:[1]	
Higher priority:	
Materials sciences	More.
Climate and CO_2 research	More.
Chemical sciences	More.
Biol/environmental research	More.
Biological energy sciences	More.
Nuclear medicine	Same.
High energy physics	Same.
University research	More.
Environment and safety	Same.
Engineering/math/geosciences	Same.
Nuclear physics	Same.
Medium priority:	
Nuclear sciences	Same.
Advanced energy projects	Same.
Lower priority:	
Technology assessments	Same.

[1] Science and technology base programs were evaluated by a different set of criteria from the R.D. & D. programs and are not directly comparable to them.

The remainder of this Chapter summarizes the conclusions and recommendations* of the Board in each of the Energy R&D program areas.

B. ELECTRIC SUPPLY R&D PROGRAMS

With regard to Electric Supply R&D Programs, the major conclusions of the Board are as follow:

1. Continued emphasis is needed to complete the development and commercialization of light water nuclear power reactors in the U.S. A commitment has been made by this Administration to nuclear power. It has a significant role in the nation's energy mix; continued Federal support at this time is necessary. Hence, the Board recommends that continued funding be given to conventional reactor systems and safety, waste disposal programs (particularly accelerated demonstration), and uranium enrichment.

2. With respect to the liquid metal breeder reactor, research and development should be continued in order to maintain the capability for demonstrating breeder technology in the future. However, construction of a demonstration plant in the early 1980s is not an urgent national priority. Sufficient coal and uranium supplies exist to satisfy projected levels of electrical demand for at least 40 years and possibly well beyond. For these reasons, the panel recommends continued research and development on the liquid metal breeder reactor, as well as other breeder concepts, but that demonstration of breeder technology be delayed until a future time.**

3. With respect to fusion, ERAB members agree on the long-term importance of this program and that the primary Federal role should be to continue to sponsor a joint program of the federal laboratories, industry and university scientific communities to determine if fusion can be practical. The potential payoff is very large, but is much too far in the future for significant private sector support. There was agreement that a stretch-out of the program is possible if budgetary pressures demanded it, but maintenance of a substantial level of Federal R&D funding is judged to be essential. It is also recommended that an enhanced effort to examine the use of fusion for the breeding of nuclear fuels deserves consideration.

4. Finally, there are several electric programs for which funding should be reduced or eliminated (such as solar power technology, light water breeder reactors, electric transmission systems, geothermal, magnetohydrodynamics, and hydropower) due to their relatively small contribution to electric supplies in comparison with other programs.

C. LIQUID GAS SUPPLY R&D PROGRAMS

With regard to Liquid and Gas Supply R&D Programs, the major conclusions of the Board are as follows:

1. With respect to enhanced oil and gas R&D recovery programs, the ERAB concluded that the U.S. oil and gas industry has sufficient resources and financial incentives to develop these technologies without substantial government assistance. The Board concluded that, even though these programs are important from the standpoint of urgency and energy security, the Federal R&D role should be minimal with less Federal funding needed.

2. With regard to coal liquefaction and coal gasification, it was concluded that large-scale demonstration projects involving substantial cost-shared Federal outlays are not necessary or appropriate considering the financial guarantees (e.g., loan guarantees, price guarantees) that are available from DOE and the Synthetic Fuels Corporation. The major Federal effort in synthetic fuels research and development should be directed at innovative concepts at the laboratory and small pilot-plant scale with particular emphasis toward exploring a wider range of technological options with potential for significant efficiency and cost improvements. The Board recommends a reduced budget for DOE's cost-shared projects at the large pilot plant and demonstration-plant scale.

3. With respect to in-situ oil shale recovery, the Board recommends a decrease in funding based on the fact that several major oil companies have in-situ shale projects that do not involve Federal assistance.

4. The funding level for R&D directed at producing liquids and gases from biomass and the production of alcohol is at an appropriate level.*

5. Continuing increases in the price of conventional oil and gas suggest that the time when coal and oil shale will be economic sources of oil may be near at hand. This situation is stimulating the private sector to consider some commercial operations by 1990.

* See ERAB reports on Biomass and Alcohol Fuels.

ERAB concludes that the private sector can be expected to carry out important actions that justify a lessening of DOE research in these technologies. However, it is recommended that DOE accelerate its research in environmental problems and infrastructure problems associated with the commercialization of these technologies.

6. The bulk of the coal produced for the next several decades will be used directly as boiler fuel, both in existing and new units, reducing dependence on oil and gas for this purpose. But improved emission control technologies to reduce SO_x, NO_x and particulate emission in flue gases will be essential to the success of this effort. ERAB therefore urges that this part of the Advanced Research and Environmental Control Technology (FE) programs be increased and given higher priority at the expense of the other activities in this program.

D. CONSERVATION AND UTILIZATION R&D PROGRAMS

With regard to Conservation and Utilization R&D Programs, the major conclusions of the Board are as follows:

1. The overall level of Federal R&D funding for conservation and improved utilization programs is too low in view of their potential for energy improvements and the inability of many important energy-consuming sectors to conduct R&D. Moreover, Departmentwide, the balance between supply oriented R&D and conservation R&D is too heavily weighted toward the supply side.

2. The Board concluded that R&D in Buildings and Community Systems needs increased funding in view of the large amount of energy consumed in this sector and the lack of private sector institutions able to undertake building systems R&D. This is particularly true in the case of the important retrofit technologies.

3. R&D in the transportation sector should be redirected away from its present heavy emphasis on automobile engines and toward the heavy freight truck sector. The phase out should include a sharp reduction in work on the electric and hybrid vehicle.* Transportation systems utilization activities deserve support. Overall, funding levels in this area should remain the same.

4. Funding for the Multi-Sector Conservation program should remain the same and should be concentrated on work in the Energy Conversion and Utilization Technology program (ECUT).

5. Funding for the Industrial Conservation programs should be restored to approximately the level in FY81. Many industries have no capacity for private sector R&D and that the

*All funding recommendations are relative to the President's FY82 budget request.

**See dissenting opinion and additional remarks in Appendix D.

*See dissenting opinion in Appendix D.

close cooperation with users that characterized this program deserves continuation.

6. Solar Applications for Buildings should be redirected slightly to emphasize passive heating and cooling. Solar pond and ice cooling technology should be continued since it is highly promising.

7. Funding for Solar Thermal Applications for Industry deserves slightly lower levels of support with redirection toward high temperature collector and dish technology development.

8. Funding for direct coal combustion systems (a high priority program), fuel cells, and heat engines and heat recovery should remain at the same levels.

E. SCIENCE AND TECHNOLOGY BASE PROGRAMS

The Board recommends increased Federal funding in a number of program areas. The Board would give particular emphasis to environmental and health-related research, clearly important from the standpoint of understanding and evaluating the long-term impact of the introduction of new energy technologies. Of particular importance are the CO_2 and acid rain issues. As previously indicated, the panel believes that the science and technology base programs should have a relatively higher Federal priority because of the lower likelihood that industry would provide adequate funds for such basic and applied research.

F. GENERAL CONCLUSIONS AND RECOMMENDATIONS

1. Serious attention must be paid to several related environmental issues. First, development of nuclear waste disposal technologies and control technologies in the Advanced Research and Environmental Control Technology Program are necessary for environmentally sound implementation of present and future technologies. Second, several of the programs in the science and technology base are essential if a proper energy mix is to be employed. These include the acid rain program, the climate CO_2 program, and Health and Environmental Research.

2. Our energy system is a web of machines and people; the current budget is focused on machines. Consideration should be given to research in social areas, to prepare for rapid energy development in certain portions of the country and to help transfer conservation technologies for the industrial and residential sectors.

ADVERTISING COUNCIL CELEBRATES 40TH ANNIVERSARY

Mr. PERCY. Mr. President, we have just marked the 40th anniversary of a day that "will live in infamy."

Yet if the unprovoked attack on Pearl Harbor brought one of the darkest hours in American history, it also evoked a triumph of the American spirit of volunteerism.

I am speaking of the founding of The Advertising Council, the nonprofit organization through which American business, advertising and the media contribute their professional skills and organizational resources to promote voluntary citizen actions in solving national problems.

On December 9, 1941, 2 days following Pearl Harbor, the late Donald M. Nelson of the Office of Production Management wrote to the late Paul B. West, then president of the Association of National Advertisers, as follows:

The gravity of the situation confronting this country is now apparent to all.

One of the pressing requirements the Government is to have the help of the established organizations representing the creative ability of advertising and the channels of communication reaching the public . . . in short, we must have the means of quickly and effectively disseminating facts to the American people that in all ways are necessary and proper to bring about a united effort of all the people of the country.

Then, referring to a new advertising industry plan to establish an organization to undertake advertising programs "in the public interest," he continued:

The (impending) establishment, by the representatives of the Association of National Advertisers and the American Association of Advertising Agencies together with the national media, of a Council representative of these various interests is most timely. It would seem to offer a focal point through which the government could most effectively obtain the counsel and help so greatly needed.

It is therefore our patriotic duty to explore the possibilities of establishing a working relationship between the Division of Information (of the Office of Production Management) and the Advertising Council, and I suggest that you arrange for a meeting of the representatives of the Council with the representatives of the Government at the earliest possible date.

And so, the Advertising Council was born to join in the fight for victory. The suggested meeting was held, and the rest is history. By the war's end, 4 years later, more than 85 million Americans had bought more than 800 million war bonds.

Fifty million victory gardens were planted in backyards and vacant lots, supplying 40 percent of the fresh vegetables consumed on the home front.

Americans voluntarily salvaged 23 million tons of paper, 538 million pounds of waste fats, and 800 million pounds of tin.

War workers were recruited for factories and students recruited for part-time farm work. Merchant seamen were recruited to keep supply ships sailing. In addition, millions of volunteers were recruited as blood donors, auxiliary police and firemen, ration board workers and for other volunteer civilian war jobs.

In all, over 100 different home-front campaigns were conducted. The estimated value of contributed advertising during the hectic war years: $1 billion, and all at no cost to the taxpayer.

With an historic job done, the War Advertising Council (its wartime name) began making plans to disband, when cries of protest were heard on all sides. The U.S. Treasury had a victory loan drive to run, with millions of victory bonds to be sold. The Veterans, War, and Navy Departments were plagued with information problems concerning returning veterans. The problems of reconversion to peace time crowded in. And so the President of the United States, leaders of Government, industry, and advertising requested that the council continue.

Thus it came about that the council reverted to its original name—the Advertising Council—tackled the problems of peace.

From the end of World War II to the present, the campaigns of the council reflect their times.

The initial famine emergency campaigns of 1946 and 1947, as well as campaigns for CARE, were unselfish (and successful) American attempts to stave off postwar want in Europe. Domestic postwar shortages were reflected in emergency campaigns for iron and steel scrap, for fuel conservation, for continued fat salvage and for student nurse recruitment. A campaign for better schools attempted to repair the damage of wartime neglect.

A burst of postwar patriotism and pride was reflected in the campaign for the historic Freedom Train. Sagging postwar recruiting for the military services was bolstered by a campaign for Armed Forces prestige. The need for Government reorganization was mirrored by an intensive campaign for the bipartisan Hoover report.

The decade of 1950–60 is called to memory by a mere listing of some of the council campaigns of the period. The council docket contained such campaigns as Crusade for Freedom (for Radio Free Europe), Ground Observer Corps, NATO, Civil Defense, Engineers Wanted, and Hungarian Relief.

Also in this period were projects reflecting domestic problems such as, "Prevent Polio" through Salk shots, "Prevent Asian Flu." "Confidence in America" (to counter a recession), "Help the College of Your Choice" and the Census of 1960. These were accompanied by continuing efforts to cut traffic accidents, to reduce forest fires, to improve our schools, to U.S. savings bonds, and many others.

Many of these campaigns are still with us. "Help the College of Your Choice" is now Aid to Higher Education. In 1981, the American Red Cross celebrated its 38th year with the Advertising Council and its own 100th anniversary. The 1980 census generated $37,990,000 in media support and resulted in virtually every (99 percent add) man, woman, teenager, and child in the United States being exposed to an average of 100 census advertising messages from one medium source or another between January and June 1980.

Since 1949 the Council's Religion in American Life campaign has encouraged people everywhere to worship regularly and to put their faith to work in their daily lives. Meanwhile, the U.S. savings bonds program remains the council's longest-running campaign. And, after 34 years, the United Way continues to assess needs in more than 2,000 communities nationwide, planning how to fill those needs, raising the necessary funds and then distributing them according to the needs.

New additions to the council's roster continue to reflect the changing socio-economic climate in the country. From 1975 to 1980 the council's campaign "American Economic System" improved economic literacy and increased people's knowledge and understanding of the workings of the American economic system.

This was followed in 1979–80 with a broad Anti-Inflation campaign de-

signed to inform the public of the history and dimensions of the inflation problem; to explain the role each of us plays in the economy and how we can help. From 1976 onward, the council's "Child Abuse Prevention" campaign has stimulated public awareness of child abuse and what the public can do about it. "Take A Bite Out Of Crime" is the rallying cry for the new crime prevention campaign.

The campaign's primary goal is to change the preception of the public toward crime—to convince people that crime is not inevitable, to reduce the fear of crime and to instill a sense of responsibility and action toward crime prevention. When the council's "direct deposit" campaign was launched in October 1978, 8.4 million individuals or 21 percent of those eligible, had enrolled in the program.

Today nearly 12 million or 27 percent of the eligible recipients are enjoying the benefits of direct deposits. And because energy shortage and conservation methods are affecting every community, and because our residents, schools, hospitals, businesses and Government have to find ways to save energy, the "Alliance to Save Energy" campaign offers specific, free information on how continued efforts by all Americans to save energy will reduce our dependence on foreign oil and will improve the balance of trade, the value of the dollar, and our economy in general.

ACTION/Peace Corps, ACTION/Vista, Employer Support of the Guard and Reserve, Forest Fire Prevention, Help Fight Pollution, High Blood Pressure, National Alliance of Business, Technician Education and Training, United Negro College Fund, and World Hunger are all campaigns that offer ample testimony that coping with socioeconomic problems confronting communities throughout America is the business of the Advertising Council.

Its communication programs for the public good remain in effect a mirror image of our society. Yet, if the Advertising Council is a mirror of America, it is also a mirror that reflects the conscience of American business by its support of the public service programs deemed most vital by the private sector and by the Government for the greatest good of the American people.

It is evident that no one will ever be able to fully quantify the good that has been accomplished through the campaigns of the Advertising Council. Nevertheless, if some small measure of that good were to be singled out, perhaps it would best be found in the value of the space and time contributed by the media to the council for its programs over the past 40 years. By the end of 1980 it had already stood at $11,691,715,673.

That is more than eleven and a half billion dollars. And by this year's end the total will have far exceeded $12 billion, a figure made all the more staggering in a time when the administration is striving valiantly to reduce the size of Government and return responsibility to the private sector. Thus, the accomplishments of the Advertising Council stand more clearly than ever as incontrovertible testimony to the fact that participation and support of its endeavors are a true reflection of the interest and involvement of American business in the social and physical well-being of the citizens of our country.

Mr. President, on the occasion of the 40th anniversary of its uninterrupted service to the people of the United States, I salute the Advertising Council.

TRIBUTE TO SCOTT AND PAUL SCHULZ

Mr. PERCY. Mr. President, on October 6 of this year, the Schulz family of Grayslake, Ill., suffered a double tragedy in the loss of Paul and Scott, father and son, who were killed in a plane crash. The family's loss is also keenly felt by all who knew these two fine men, and particularly by myself and my staff who knew Scott as a beloved friend and colleague. He served ably and well as a member of my Chicago staff from 1979 until the time of his death.

On Tuesday, October 13, a memorial service was held in the Capitol, conducted by our Senate Chaplain—the Reverend Richard C. Halverson—to give thanks for the lives of Scott and Paul Schulz. It was an especially moving hour of remembrance, not only because we were so fond of Scott and Paul, but also because it provided an opportunity for my Washington staff, several members of my Chicago and Springfield staffs, and members of the family—Scott's mother, Betty, three of his brothers, Craig, Christopher and Matt—and his sister, Gayle—to be all together to share our affection for Scott and Paul, and our memories of them. We were also honored by the presence of several members of the staff of my Senate colleague, ALAN DIXON, and representatives of Governor Thompson, all of whom had worked with Scott Schulz in the past.

As a further memorial to Scott and Paul Schulz, I ask unanimous consent that the eulogy I delivered at the memorial service be printed in the RECORD at this point.

There being no objection, the eulogy was ordered to be printed in the RECORD, as follows:

SCOTT P. SCHULZ

Just a few moments after I was notified of the assassination of Anwar Sadat whom I had characterized six years ago as one of the noblest and greatest men I have ever known in my life, I was advised of the crash of a plane that took the lives of Paul Schulz and his son, and our valued colleague, Scott. The feeling that came over me was a feeling, the impact of which I had not felt since the sense of grief I felt when learning of the death of my own father and our own daughter years ago.

Scott and his father had a close relationship and we know of the intimate and close ties that bound together the entire family. His mother, Betty, his four brothers; Bill, Craig, Christopher and Matt, and his sister Gayle had a relationship with one another which strengthened and reinforced each one of them and will sustain and reinforce them now.

Scott Schulz, born on February 10, 1954, graduated from Grayslake High School in 1972 and received a B.S. in Political Science from Northern Illinois University in 1976. From 1977 to early 1979, he served as a Community Management Representative for the Illinois Department of Commerce and Community Affairs. In March 1979, Scott became Projects Director for my Chicago office.

Scott believed very much in the work he did. He believed that the purpose of government was to help its citizens.

Above all else, Scott believed in helping constituents. No matter what the request, whether it properly fell under the purview of a U.S. Senator's office or not, whether it was a personal problem or request from a constituent who did not know where to go for help, or whether it was a matter which stood little chance of being rectified, Scott would do whatever he possibly could to help. He always gave that little bit extra—tried just one more approach—made just one more phone call.

Scott was at once proud and humble. He took tremendous pride in his work and refused to engage in any endeavor which did not come up to his own high standards. His humility was itself a part of that pride. Never would he seek credit or praise for his efforts—he had simply done his job as it should be done.

Scott was well-liked, respected, and knew how to be a good friend. His sense of humor sustained him and those around him. His occasional constructive criticism never hid the fact that he was a believer. His frequent quips and cracks to coworkers camouflaged the great care and consideration he always showed to them. In many ways, he was a private person who most enjoyed the solitude of camping, rafting down the rapids, or bicycling along the lake.

Few people knew the extent of the work Scott did for others. He never tooted his own horn. If his light was hidden from many under a bushel basket, it did shine on those whom he helped and on those who had the extreme pleasure of knowing him.

Scott's strength of character, sense of purpose and devotion to the United States Senate and our office serves as an inspiration to all of us. Every place he went he tackled problems as though they were his problems, sought solutions as if finding them was a personal challenge that would not only strengthen our office but the institution of government that he represented and provided to him a sense of satisfaction usually reserved for private entrepreneurs and owners and managers of their own business. He did so because the business of government was something he had mastered and he looked upon the partnership underlying the relationship between municipal, state and federal government as the underlying strength of our federal system of government.

He had the utmost respect for those with whom he worked in government and they held him in the respect usually reserved for someone far beyond his age.

If we believe in an afterlife, and I hereby reaffirm my faith in it, we shall some day be with him again, and he is now with so many of those we have loved and miss. He shall always prove an inspiration, a source of joy, and love for all of us. We grieve not for him because he is with his Father and Maker, but we do understandably grieve for ourselves until we are once again reunited with him. He shall be ever watchful of our work, which in every sense of the word is the Lord's work.

PAUL SCHULZ

We pay tribute also today to Paul G. Schulz, who was born in 1929 and married Betty Johnson Schulz in 1951. They had six children; Gayle, Scott, Bill, Craig, Christopher and Matt. Paul Schulz served as Executive Director of the Work Glove Manufacturers Association, a position that brought me into not only a professional but also a personal relationship with him. He was always very active in community affairs.

We loved these two children of God. And we love their family that is here with us today.

EXPORT TRADING COMPANIES: AN ILLINOIS INSTITUTION

Mr. PERCY. Mr. President, I was very pleased earlier this year to be appointed one of three Senators to sit on the President's Export Council. This distinguished panel has been extremely active in recent years and made thorough recommendations a year ago on ways this country can boost its exports and narrow its trade deficit.

One of the many recommendations made by the council last year was that Congress should pass comprehensive legislation to facilitate the formation of one-stop export trading companies. In fact, the Senate has now twice passed legislation of this nature and has been held up both times by inaction in the House of Representatives.

At the first meeting of the council this year, this legislation was discussed as the top priority item for the council. I am a cosponsor of S. 734, which establishes export trading companies, and fully support the council's initiative in this area.

From Illinois, we have had experience for many years with export trading companies. One of the most active and knowledgeable export trading companies in the country is headquartered in my State, with good reason. Illinois is the top agricultural exporting State in the Nation and ranks only second in terms of manufactured goods exports. We know the importance to the Nation's economy that derives from exporting and without question the Marshall International Trading Co. receives a large part of the credit for expanding trade opportunities in Illinois.

My good friend, Joel Honigberg, who is vice chairman of Marshall International Trading Co., recently spoke in Illinois about export trading companies. Anyone interested in exports should listen when Joel Honigberg speaks on this subject because of his expertise and foresight.

Mr. Honigberg spoke on October 5, 1981 before the International Business Council of Cambridge, Mass., which was holding its fall meeting in Itasca, Ill., just outside Chicago. His topic was "Will the Advent of Export Trading Companies Dominate U.S. Foreign Trade During the Remainder of the 20th Century?"

Mr. Honigberg raises a number of compelling questions about the future of export trading companies. Certainly, passage of the legislation I mentioned earlier will not in itself increase exports. For that we will have to depend on the private sector, using the new tools of the law. I strongly commend to my colleagues the speech of Mr. Honigberg, as it is an excellent analysis of export promotion from a man who knows exporting inside and out.

Mr. President, I ask unanimous consent that Mr. Honigberg's speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

WILL THE ADVENT OF EXPORT TRADING COMPANIES DOMINATE U.S. FOREIGN TRADE DURING THE REMAINDER OF THE 20TH CENTURY

(By Joel D. Honigberg)

For the opportunity of appearing before you, this morning, I should like to thank Will Pilcher of the Levi Strauss Company. Moreover, on your program notes, he has honored me with a title I have yet to earn. I am neither doctor, nor fireman, nor Indian chief. I prefer that you think of me as a trader; a businessman whose instincts and interest have led him to the four corners of the World. It should be clear, then, that I have not come here to lecture you. With this reassurance, I hope that you will relax and enjoy the presentation. I have chosen an ambitious subject, today. The considerable time span which the remainder of the 20th century encompasses makes it also a rather dangerous subject to organize.

To speak with any degree of certainty on what may occur in the area of World Trade, fraught as it is with unknowns and variables, especially in front of such a group of venerable planners and strategists is perhaps like walking the plank into a raging sea.

In my mind, the purpose of these remarks will have been fulfilled if they help to shape your perspective on how a specific organizational scheme of handling trade, backed by the full force and weight of the United States government, may effect the future conduct of the our country's international business, that is so vital to the nation's economic viability and to the living standards of its people.

Perhaps, there has never been a world without trade. In ancient time, we know there was flourishing international commerce and its numerous traces are being continuously uncovered by archaeologists. We can even understand the importance of trade in the life of primitive peoples.

The principle of reciprocal transfer of goods, of giving and taking, seems in fact, to be deep-rooted in human nature.

A country's very existence may pivot on procuring foreign sources of such basic commodities as petroleum, coal, iron, lumber, cotton and foodstuffs. Japan is a prime example.

When properly functioning, trade enables consumers across the globe to realize higher standards of living.

Trade policies have shaped the destinies of nations as surely as have wars. A highly organized and traditional mechanism for handling trade between countries is by means of a general trading company engaged in exports and imports.

To the average American, notions about trading companies often stem from some familiarity with the great British trading houses that helped build that country's Empire. It was often said that "trade followed the flag". But it was undoubtedly equally true that the flag perhaps more frequently followed trade, as in the cases of the East India Company and the Borneo Company. Such trading companies were formed by restless and adventurous men who pooled their often modest capital and spread the risks of pioneering new trading posts in strange lands. Jardines and Inchcape, large, modern, trading conglomerates trace their beginnings to those early times.

Of perhaps greater impact on the American business psyche, due to sheer size and complexity, are the Japanese trading companies. Dating back to 1868 when Japan emerged from behind the walls that isolated it from the rest of the world—it was infinitely far behind in industrial development and there was no foreign trade. Because the country lacked essential raw materials, and without export revenues to pay for them, major commercial groups of that period including Mitsui and Mitsubishi established separate divisions which dealt in exports and imports. While at first an auxiliary type operation handling small trade transactions for its affiliated companies, these trade units combed the country for personnel who would learn foreign languages and who would be willing to gain experience in foreign countries.

Gradually, thse trading divisions tended to become focal points for the entire Group, equal in importance to the Group-owned Bank. During the post-war years and until today the sogo shosha or "general trading company" has become the lead company of a complex corporate network. Not themselves manufacturers, they facilitate the trade of thousands of products—from ocean going vessels to noodles. Except for one soft spot in the early 1960's when Japanese automakers and electrical appliance manufacturers developed foreign marketing and service networks to handle their own products, Japan's trading companies have never faltered.

Today, there are approximately 8000 trading companies in Japan providing an amazing resilience to its economy. Among these, the top 9 account for between 50 and 60% of all Japanese exports and imports, with Mitsui and Mitsubishi each taking 10%. In 1978, the largest of the sogo shosha had 100 to 130 overseas offices with the smallest of the 9 maintaining only 86. Conceptuallly, Japanese Trading Companies are aggressively creative. They no longer merely export and import. They have become resource developers.

Nissho-Iwai, which ranks 6th in the trading company size put together a group of investors to explore for, and develop Nickel deposits in the Philippines. They arranged financing through the Overseas Economic Cooperation Fund, the Export-Import Bank of Japan and a group of Japanese commercial banks. Besides organizer, coordinator and shareholder in this venture, Nissho-Iwai exported shovel loaders, excavating machinery and ore drying equipment to this project; for the most part produced in Japan; and to complete the circle, the company became Japan's leading Nickel Ore importer accounting for over 25% of the country's purchases of that essential metal.

Japanese trading companies also see themselves as creators of "trade flows"; on the one hand, actively stimulating sources of production in Japan and often in other countries, while on the other hand, scouring world markets to develop a level of demand which will absorb the supply.

Seemingly undaunted by the size of an undertaking, these same trading groups have built enormous receiving, fabricating, distributing complexes which are called "Combinats."

Marubeni has a six-acre lumber center near Tokyo encompassing 20 wholesalers and a sawmill.

At Kobe harbor, Mitsui organized a 57-acre food combinat with berthing facilities for 60,000 ton cargoes including conveyors, silos refrigeration, wholesale and retail distribution on the site. We look at Japan today, as an innovator of new trading concepts in the same way that we view her as a consumer electronics product innovator.

The world watches and learns.

Trading Company management of Japan's trade functions have enabled Japanese manufacturers to use capital to improve factories and products. Their administrative and credit services have helped small and medium sized firms to participate effectively in international trade, to the great benefit of Japan. As a method of organizing commercial enterprise the general trading company—large, diversified, flexible, mastering a great flow of information and expert at arranging international transactions, backed by the resources of major banks, and able to

stand as the consumate intermediary, has a number of virtues not lost on other countries eager to emulate Japan's extraordinary export success.

The general trading companies of South Korea have been fashioned in the image of Japanese Sogo Shoja. Their charter is quite specific:

(1) To penetrate domestic and foreign markets.

(2) To establish a global distribution network.

(3) To finance smaller Korean companies that act as suppliers.

Each year, the Korean Government accords "General Trading Company" (GTC) status to firms which have fulfilled certain requirements: exports equal to at least 2 percent of total Korean exports in the previous year; exports totalling a least one million dollars in each of a least 5 out of the 30 export product categories of importance to Korea; and a total of at least 20 overseas branch offices. In 1980, 10 Korean firms have been designated as GTC's.

Designation as a GTC confers certain benefits above and beyond those available to exporting firms generally.

GTC's are given priority when the Korean Government controls competition among Korean firms in international bidding;

They are not limited to the use of special foreign exchange banks when importing raw materials for export purposes;

Unlike other Korean firms, GTC's are authorized to send more than 10 staff members to overseas branches;

Unlike other Korean firms, GTC's are allowed to use standby letters of credit as a revolving credit line.

Apart from such pragmatic benefits, exporters also receive a degree of high-level moral support that is probably unexcelled anywhere else in the world. The President of Korea, for example, holds a monthly "trade promotion meeting" where he is given a detailed briefing on trade performance in the previous month; and where he exhorts the laggards to pull up their socks. Korean Ambassadors overseas are given export targets and are expected to stick to them. Cabinet Ministers routinely make trips abroad to support Korean contract bids. Prestigious awards and publicity are bestowed each year on the most successful exporters.

This has undoubtedly been a factor in the outstanding record of the $1.3 billion Samsung Group, for example, who maintains a competitive presence in 29 countries—building hotels, refining sugar, and overseeing many other businesses. Since 1970 it has averaged slightly less than 50 percent growth in annual revenues; and today Samsung accounts for approximately 4 percent of South Korea's gross national product.

So influential has been the Japanese Trading Company model, and so expedient the need perceived by many nations to efficiently organize their exports as a means to improve trade competitiveness, that there has been a throng of countries shaping favorable conditions within their borders to attract the establishment of trading companies.

Taiwan has a strong National Export Trading Company program. Mexico and Brazil made similar moves in the middle 1970's.

Our neighbor to the North has recently released the report of its Special Committee on a National Trading Corporation in which it recommended:

(1) That the federal government sponsor the development of a major Canadian trading corporation.

(2) That the Canadian Trading Corporation be established by a new act of Parliament.

(3) That the Canadian Trading Corporation be given a mandate to engage in exports, imports and third-party trade between foreign countries.

(4) That it ultimately be capable of selling any commercially viable product.

(5) That it provide a complete set of trade-related services covering both general trade and capital projects.

(6) That it give the highest priority to establishing selected foreign-based operations in growth market regions.

(7) That it be established with an initial equity commitment by the shareholders of at least $300 million.

This final recommendation was formulated on a 5 year plan, by the end of which time, it was expected that the corporation would be doing $2 billion worth of business, a figure that places the $300 million equity base, it was claimed, well within the range of normal working capital to equity ratios.

What is truly behind this energetic and somewhat radical crusade for a national trading house?

Canada is already an active trading nation. It ranks eighth, internationally, in terms of value of its exports. Merchandise exports equal 25% of its GNP, putting it in a position similar to that of West Germany, the United Kingdom, Austria and the Scandanavian countries, and well ahead of the United States and Japan, who export in the area of 10% of their GNP.

Canada foresees a Global Battle for Export Growth, the title of Chapter One of this comprehensive official report. It views trade as crucial to economic survival. It is concerned about a loss in its share of world trade and one of the major goals of the National Trading Company, apparently, would be a reversal of this downward trend. Only by competing directly with the industrialized world can Canada hope to gain a trade advantage. The report concedes that world competition for exports has indeed become a battleground for economic survival in the next decade or two.

Finally, it emphasizes, beyond any question of doubt, the essential role of government in making Trade a National Priority.

Curious that Canada has chosen the general trading company vehicle to travel the road to economic survival, and one may suppose, to national prosperity.

To be sure there are alternative routes. The theme of my today's remarks, in fact, focuses on the degree of probability that new export trading companies will dominate America's trade picture during the remaining years of this century, in the face of such alternatives.

Since Canada is such a near reflection of our country's economy it is, perhaps, not too early to list these alternatives as:

(1) Trade subsidiaries of Multinational Corporations (MNC's).

(2) A coalition of MNC interests.

(3) A Government owned Trading Company.

(4) A trade organization cooperatively capitalized by government and private shareholders.

(5) Strengthening existing export trading companies.

Later, I will be addressing some of these alternatives in greater detail, with the United States as our frame of reference, but for now, let me point out that the Canadian report rejected the multinational alternative.

With MNC's the size of Alcan Aluminum and Canada Wire and Cable the committee, nevertheless, concluded that the corporate sector did not have a compelling interest in promoting general trade because its primary focus was on in-house products.

In any event, the committee recommended the establishment of a Trading Corporation which could ultimately benefit the home economy by offering it strengths which include:

Comprehensive market intelligence.
Expertise in developing new markets.
Expertise in foreign sales.
A well-established distribution network.
A portfolio of competitive trade services.
A knowledge of new methods of trade.
Expertise in procurement.
Financial strength.

Control of the international marketing function, allowing more of the value of the products sold to accrue to the supplier country.

Diversification of export risk due to the volume of business and number of products.

This formidable set of strengths, it was thought, when exercised through the capabilities of a trading house could fulfill the role proposed by the committee of:

(1) A broad and significant Export-Import capability.

(2) Competence to trade in all products, including the export of capital projects.

(3) A complete set of general trade-related services including transportation, storage, financial support packages and after-sales service facilities.

(4) A focus on growth markets, and not to be underestimated.

(5) Means of assisting small and medium sized Canadian Business to expand their Export Markets.

Two other propositions offered in this report are worth mentioning and remembering:

To attain the proper degree of commitment to international markets, and continuity of supplies to these market exporters, will inevitably need recourse to an outside financial base capable of supporting overseas capital projects.

This statement may be examined as partial justification that banks, under U.S. Law, ought to be permitted to own equity positions, or possibly controlling interest in a trading company in order to provide a broad enough financial base.

And, finally, the report contained the notion that "trade is no longer governed by a static set of rules" and that, in this case, Canada may well decide to take the lead in setting new rules for international competition.

On this subject, many of you in the audience today may decide to turn your creative talents and planning skills. If anyone is going to develop a new set of rules for international competition, I should think that this group is capable of contributing pivotal ideas.

Let me summarize this rather lengthy introduction to the current position and future potential of trading companies. Today Japan, Korea and Taiwan. Tomorrow Canada, Brazil and Mexico. How may other governments will perceive that general trading companies many hold the key to changing world business patterns?

I can sincerely express my view that the United States, for one, appears to believe that trading companies are the vanguard of U.S. export growth. In their generally unswerving support of the Export Trading Act of 1981, the 97th Congress and the Reagan Administration, as did previously the 96th Congress and the Carter Administration have apparently discovered the same beneficial elements in the export trading company mechanism as have the Canadians.

It may well be that the rest of the free world's trading powers will decide unanimously that the ago-old trading company is the wave of the future; the type of operation to propagate and perfect; so that no nation will have a trading advantage and all countries will be on an equal footing again.

Before we cross that bridge, I want to remind you that the banking and anti-trust provisions of this legislation have bogged

down the progress of the bill, which is presently being examined by three different House sub-committees, after having passed the Senate last March by a vote of 93 to zero.

I have just returned from Washington, D.C., last week and I can tell you that no one, either the Congress or in the Administration believes that the Export Trading Company Act will fail to become law. The exuberant advocates suspect its passage by Thanksgiving, the most conservative predict February, 1982.

Because of its imminent appearance on the U.S. business scene, let us take some moments to understand the nature of an American-style Export Trading Company as defined in the legislation, and the principal provisions of the proposed Act.

The bill defines an export trading company as:

A company which does business under the laws of the United States and which is organized and operated principally,

(1) To export goods or services produced in the United States, or

(2) To facilitate the exportation of goods and services produced in the U.S. by unaffiliated entities.

The definition excludes subsidiaries of American corporations created to export the products of the corporate group and concentrates on export management companies or trading companies best suited to provide a full range of services to small and medium-sized firms seeking the opportunity to enter foreign markets or to expand their exports.

Such companies could be highly competitive abroad but because of size or inexperience are ill-equipped to absorb risks involved in developing overseas markets. The Department of Commerce estimates that 20,000 such manufacturers could be induced to export given a one-stop export service.

The main elements of the act are:

1. The Secretary of Commerce is directed to establish a two-way referral system between producers of exportable goods and firms offering export trade services.

2. American banks are authorized to invest up to 5 percent of their consolidated capital and surplus in one or more export trading companies. Investments up to $10 million could be made without prior approval of the appropriate regulatory agency.

If United States export trading companies are to be successful in promoting United States exports and in competing with foreign trading companies, they must be able to draw on the resources, expertise, and knowledge of the United States banking system, both in the United States and abroad.

The provision for direct equity investment by banking organizations has been one of the more controversial aspects of the bill. Opponents argue that ownership of ETCs by banks violates the traditional separation of banking and commerce. Proponents believe that adequate safeguards are contained in the bill, and that exceptions have been made to numerous statutes before, to facilitate export trade.

3. The Economic Development Administration and the Small Business Administration are authorized an additional $20 million per year through 1985 to support loans or guarantees to ETCs.

4. The Export-Import Bank may establish loan guarantees secured by accounts receivables or inventories of ETC's if the private sector credit market is not providing adequate financing.

5. The Webb-Pomerene Act of 1918 which grants a limited exemption from Sherman and Clayton Antitrust Acts is amended to include exports of services as well as goods. The new act allows combinations of exporters provided that their cooperation does not reduce competition or restrain trade within the U.S. Trading companies will apply to the Secretary of Commerce for antitrust clearance. Once clearance is granted, the company is immune from the danger of private treble damage suits. Certificates can, however, be revoked by actions of the Attorney General or the Federal Trade Commission.

Jack Valenti, President of the Motion Picture Association of America, the largest and most successful Webb-Pomerene Association recently said "Webb-Pomerene is an essential and indispensable ally to promote and increase American export trade; it should be maintained and expanded." He added,

"That without Webb-Pomerene, the American film industry would be an invalid, and we would not be able, as we are now to return to the United States each year some $800 million as a surplus in our balance of trade which incidentally is approximately equivalent to 50 percent of the film industry's total annual profits.

"Do expanded Webb-Pomerene associations of producers in closely allied fields point the way to a new generation of Export Trading Companies?

"Senator John Heinz, Republican from Pennsylvania in his introduction, early this year, to the Senate version of the bill made the following remarks:

" 'Every successful program of trade promotion is a step in the right direction'.

" 'This bill will help by encouraging the development of intermediaries to provide the marketing and financial tools necessary to help small business to export while helping them to benefit from economies of scale and diffusion of risk'.

In my view, this was the Senator's way of saying that America's small and medium-sized manufacturing firms represent an untapped source of business energy.

For most of the nation's history, domestic demand has engaged average-sized firms to the exclusion of investigating foreign markets. Today a tiny fraction of American manufacturers have any regular export practice—only 8.3 perecnt of 300,000 firms, according to 1980 data from the Commerce Department's Office of International Trade Administration.

The average firm has neither tremendous financial strength nor intimate knowledge of foreign business, and it fears the risks of credit and collection. International trade involves serious costs and inconveniences in producing and handling documents. Locating and analyzing foreign markets and arranging effective foreign sales representation present two further discouraging problems. In the face of these obstacles, is it surprising that the mass of small and medium sized firms appear to export by chance, if at all.

With the U.S. experiencing a 23 percent loss of world market share since 1970—equivalent to a $125 billion loss in total production and an estimated 2 million fewer industrial jobs available; with growing trade deficits in every year, since 1975, and a record gap of $5.6 billion in August of this year, we can sympathize with the comments to his colleagues of Senator John Danforth, Chairman of the Senate International Trade Subcommittee that, "economic stability of our Nation is being swiftly eroded." To quiet the outcry of the international business community for a consistent, long-term policy commitment by the government to export growth, the urgency to legislate the Export Trading Act of 1981 into Law becomes clear. In a rush to lose no more time in beginning to correct our trade imbalances, is it any wonder that our leaders, inside and outside government, while casting an envious eye at Japan's adept trading conglomerates, are also taking a careful tally of our country's professional export industry, made up of more than 1000 export management companies.

I am convinced that established Export Management Companies have a leadership role to fulfill in the new export business environment which passage of this legislation will create.

At J. D. Marshall International we have the intention of meeting the challenge and providing as much leadership as we can.

It would also be my idea to act affirmatively to form or join one or more ETC's outside the framework of our current export operations.

I should think that the bill would give free rein to existing export organizations to:

(1) Form or join an Export Trading Company in one or more activities apart from its normal business.

(2) Own all or part of the ETC (just as the banks may under the banking provision).

(3) Inject capital into a new ETC using either private or banking resources.

For it does follow logically that if the stated purpose of our national policy is to increase exports, and because the Congress and Administration see thousands of new exporters banded together in new export entities as the best means to accomplish that goal, then in the same way that banks and larger industrial concerns will form or join ETC's, Export companies should not be inhibited from doing the same if it serves the purpose of profitable business growth.

I suspect that the sponsors of the Export Trading Act of 1981 in both the Senate and the House understand the importance of the professional exporter's knowledge and experience in making this national venture a success.

At Marshall International, we currently have two plans of action under study which assure our participation in future developments resulting from passage of this legislation.

The first scheme uses a satellite concept with Marshall group know-how and export facilities forming a core or hub, sections of which can be linked by joint venture agreements to manufacturing and financial groups.

The second concept may be said to resemble a device commonly used in department stores: that of a leased department requiring special skills or merchandising. In this plan, the experienced export organization contracts its services to an ETC which possesses all prerequisite elements except the personnel and expertise to make it work correctly.

One cannot easily forecast the time it will take to start-up any specific number of new export associations or trading companies.

When I was invited last year by the Assistant Secretary of Commerce to act in an advisory capacity on how best to promote the Export Trading Company concept to the business community, I did not hesitate to point out that a corporate audience would be most responsive to three forms of incentives.

(1) Availability of low-cost funds to finance export inventories and receivables.

(2) Tax savings to encourage reinvestment of profits in a growing ETC enterprise.

(3) Direct government monetary support in the form of grants or loans to help defray start-up costs of new export selling operations.

A reading of the Senate bill, and the several versions now circulating in the House reveal no direct grants, no tax savings, and no subsidized interest rates. There are no freebies in this legislation. That is to say, there are no incentives! May one assume that the Congress and Administration realistically expect to ignite the business community to great export activity on the strength of:

(1) The removal of impediments to the formation of export trading associations, and

(2) The entry of banking institutions as part owners, or owner-operators of export trading companies?

The new ETC's, on which the Government

is pinning its hopes, will not materialize by the mere wave of a wand. Structuring ownership may be complex and lengthy. The job will require expert organizers with a real sense of purpose. The bill itself will not do it. Who shall provide the leadership: government, banks, industrial concerns, or professional exporters?

In contemplating start-up of an export trading company, a bank must consider the demand for such services. How many companies will be receptive to exporting through the ETC? Large firms will already have international departments. Medium and small firms may have concerns about preserving competitive secrets and proprietary information about their products and operations. Or they may question whether the ETC will have the technical specialists necessary to properly sell their products. A bank must consider what advantage it expects from its capital investment. Is the motive return-on-investment through profits of the ETC, or is it expansion of banking business through providing ancillary services?

Many banks already have extensive overseas and domestic networks and already provide many of the export financing services and market intelligence services that would complement an export trading company.

The basic issue remains: will passage of the ETC bill create the kind of environment which favors the formation of hundreds and perhaps thousands of new export trading companies and over what period of time may we expect this development to occur?

If the bill does nothing more than create new structures that merely reshuffle the same old number of producers who either export directly or through professional export intermediaries, then the entire legislative exercise will be of questionable value. However, if the new trading companies which will surely be initiated as a result of this bill are truly able to harness the productive forces of U.S. industry, if they are able to attract to their fold significant numbers of "new-to-export" firms as well as firms who today do geographically spotty exporting, then, true progress will have been made with a resultant significant impact on overall U.S. export sales and on our annual trade deficit.

We are told that the issue of the 1980's and beyond is growth, and that the globalization of markets will erase any distinction between foreign and domestic business. This scenario may favor larger U.S. trading entities that cluster and acquire smaller specialized trading companies who may bring into the group diverse supplier expertise which will further enhance the merged export trading company's international markets.

I believe, however, that in the early years, we are going to see bank controlled ETC groups specialized in capital goods and project sales which require substantial long-term financing; that we will have trade association sponsored ETC's engaged in short-term intensive export selling efforts to penetrate target markets within a single product family; and that export management participation in a number of new ETC's will tend to be highly specialized in partnership with one or more producers in promoting a single product worldwide or in taking a somewhat larger portfolio of products to a single country market or even to a segment of that market.

By 1983 or 1984, I wouldn't be surprised to see joint venture mechanisms for the sale of coal and other raw materials working as export selling associations; Engineers, Architects, and construction companies working as foreign bidding and contractor associations; and then, diverse service industries combining their resources as international service groups.

Companies will band together under an Export Trading Company umbrella if, by combining forces, the group achieves the critical mass required to make a measurable impact on its target markets and if reasonable export revenues and profits results. Risk spread is yet an additional important factor.

I see pools of potential Export Trading Company investors providing attorneys and auditing firms with unparalleled opportunities for creative corporate structuring and share ownership.

I also discern many unanswerable questions:

(1) Will ETC management have the ability to mobilize U.S. production sufficiently quickly to fill overseas market needs as they emerge from time to time and to do this on a sustained basis?

(2) Who will move this increased level of product to foreign market? Are existing channels of export transportation sufficient? Will forwarders, freight carriers and insurance companies have a piece of the ETC action?

(3) Should an ETC have some form of control over distribution outlets within major foreign markets if such distribution and its market support systems be essential to market penetration and buyer acceptance?

(4) Can ETC owned or controlled distribution centers justified by the investment involved in their implementation?

(5) Will U.S. product distribution centers be superimposable on the highly developed distribution systems already existing within the desirable, stable national markets which have been targeted?

(6) Will local producers in national markets "X" and major exporting nation competitors for market "X" give up without battle their market share to the increased efforts and investment on the part of numerous (I dare say aggressive) U.S. ETC's?

In closing, I wish to address the theme of my today's paper as described in its title—"Will the advent of the export trading company dominate U.S. foreign trade during the remainder of the 20th Century?"

The probability is that it will not!

To dominate, it would have to replace or surpass the combined trading strength of:

(1) Current exporting and importing entities.

(2) Third country trading companies who operate in the U.S.

(3) U.S. multinationals who relate world sourcing to production, and production to market demand.

(4) Third country MNC's.

(5) Coalitions of U.S. and third country multinationals.

However, the Export Trading Company structure is, undoubtedly a significant, viable alternative for manufacturers and service oganizations who seek a safe and profitable entry into potentially lucrative overseas markets.

The inherent flexibility of a trading company tied to no particular product, tied to no particular geography, able to move rapidly when a new source of a given product is available or when it senses demand in a new market, provides the ETC with an incomparable ability to adapt to changing economic conditions in the home market, while at the same time making an unflagging and important contribution to international commerce.

Its advent would certainly fulfill the U.S. governments' promise to give this country's international business community a new, consistent policy commitment to export growth which we have been looking for.

I do sincerely believe that either the Export Trading Company Act of 1981 will shake this country's foreign trade system to its very foundations or it will have hardly a ripple effect on the country's traditional export-import patterns.

In either case, there has never been a more exciting time to be a world trader. There has never been a greater reason for the U.S. to become a first-class trading nation.

Thank you.

GENERAL ASSEMBLY SPEECH BY ALAN A. REICH

Mr. PERCY. Mr. President, the International Year of Disabled Persons has had impact throughout the world. It has stimulated action in most countries to improve the lives of the half billion disabled persons in the world. The programs of the U.S. Council for IYDP, a privately funded and organized group, have, for example, reached 1,850 communities throughout America. They have engaged disabled and nondisabled individuals in partnerships to identify needs and set goals. As our Nation struggles with limitations of financial resources, these voluntary grassroots efforts are most encouraging. They offer a model for other areas of human concern. Most heartening are the commitments for the future stimulated by the IYDP—both in the United States and throughout the world.

But there is another contribution of the IYDP which is also important to us all. This observance has opened up a new area of international communication on the very human problems of disability. People-to-people communication, as generated through the IYDP in the area of disability, has become an important force in international relations throughout the world.

Mr. President, the existence of informal nongovernmental communications on common problems tend to reduce the level of tension when conflicts of interest occur and contributes to a climate in which they may be negotiated more effectively. International people-to-people relations help develop enduring networks of communications which cut across boundaries and reduce the likelihood of polarization along political or nationalist lines.

In the U.S. speech on the International Year of Disabled Persons before the General Assembly of the United Nations on December 7, Mr. Alan A. Reich, president of the U.S. Council for IYDP, elaborated on these two important contributions of the International Year of Disabled Persons—improving the human condition and opening new transnational communication. To continue and enhance these efforts, he has urged continuation of the momentum of the IYDP in the United States, the United Nations and throughout the world.

Mr. President, I commend to my colleagues Mr. Reich's U.N. speech on behalf of the United States. We all can benefit from this important statement on improving both the human condition and prospects for public diplomacy.

I ask unanimous consent to have the speech printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

STATEMENT BY ALAN A. REICH

Mr. President, the United Nations, by proclaiming 1981 the International Year of Disabled Persons, has aroused the hopes and aspirations of fully a billion people comprising the world's "disability family." This family is made up of one-half billion persons who are disabled themselves plus at least an equal number of family members who also live with the limitations and challenges of

our disabilities. Thanks to the vision and leadership of the member nations, the Secretary General and the Secretariat, and the agencies of the United Nations system, the disability family now can look more optimistically to the future. The response to the challenge of the IYDP has been gratifying. But having accepted the challenge, and the responsibility, we now must intensify our efforts, for the serious problems of disability do not end with the IYDP.

By promoting its five-point IYDP program, the United Nations has stimulated commitment and purposeful action by governments, U.N. agencies, nongovernmental organizations and concerned individuals throughout the world. While their responses have varied, reflecting differing social structures, stages of development, and levels of resources, several significant common themes have emerged. They include an outpouring of compassion, a recognition that disabled persons are an important resource, and the active involvement of disabled persons themselves.

Mr. President, I am pleased to have the opportunity to comment on the United States and worldwide responses to the IYDP challenge and on the implications for the future. In the United States the IYDP initiative has led to significant programs and results. As President Reagan stated in his IYDP proclamation on February 6, 1981, "All of us stand to gain when those who are disabled share in America's opportunities." At the government level, forty-two agencies have undertaken IYDP activities aimed at bringing Americans with disabilities more fully into the mainstream. Their efforts have included reviewing hiring practices, streamlining legislation as it relates to disability, and carrying out special information programs. Of equal importance, the government has encouraged the private sector in the United States to take advantage of the IYDP opportunity.

The private sector—comprised of disability, business, religious, labor, youth, women's, professional, and other organizations—has responded with vigor and enthusiasm. The concept of partnership—between the disabled and non-disabled; between government and the private sector; and between organizations at the national state and local levels—has been a dominant theme. The IYDP mission in the United States, adopted jointly by the government and the private sector, has been to increase public understanding of the needs and potential contribution of disabled persons and to accelerate progress toward long-term goals.

The corporate and disability communities together formed the U.S. council, funded by non-governmental sources. Its purpose has been to carry the IYDP challenge of the United Nations to the towns and cities of America, where our 35 million citizens with physical or mental disabilities go about their lives. In more than 1,850 communities, partnership committees of disabled and non-disabled persons have been formed. They have identified needs, set goals, and undertaken programs to meet their own goals. The Governors of all fifty states, more than 330 national organizations, and 270 leading corporations have joined in this partnership program. Demonstrating tremendous corporate social responsibility, America's corporations have provided resources and enlightened leadership. They have realized that bringing disabled persons into the economic mainstream is in their own best interest. To cite one example of this corporate commitment, Xerox Corporation last month donated $3,000,000 worth of sophisticated reading machines for the blind to 100 university libraries.

In American communities, people from all walks of life have advanced the United Nations IYDP theme of "full participation of disabled persons." They have made public buildings and facilities more accessible, developed special transportation systems, modified churches and parks to accommodate disabled persons, facilitated voting by disabled individuals, passed new ordinances on housing for disabled persons, held job fairs to bring together employers and disabled job seekers, and they have carried out locally devised awareness programs. A common theme throughout America has been encouraging self-reliance and self-help initiatives.

In the United States, the observance has been marked by strong and enthusiastic involvement of disabled persons themselves. They have been stimulated by the IYDP to assume greater leadership in shaping their own destinies. Through a nationwide advertising and media campaign aimed at changing attitudes, the public has gained a greater appreciation of the contribution of disabled persons. The result is that future efforts will be based less on charity and more on recognition that disabled persons are important contributors to society. The significance of the year in the United States was expressed by one seriously disabled person, "never again do I need to take a back seat or to stay at home; I now feel I can participate like anyone else. I am grateful that the IYDP helped to open opportunity for me. The IYDP has given me dignity."

None of us anticipated, Mr. President, that the IYDP would be an end. The serious problems of the disability family go on. The IYDP has given impetus to new beginning. It has accelerated progress. Attitudinal barriers are coming down. At a recent conference in Washington of IYDP representatives appointed by the governors of all fifty States and of community representatives from throughout the country, the participants urged unanimously that the IYDP momentum be continued. This initiative is of the healthiest kind. It is based on the feelings of people, most of them disabled, at the grassroots level—in the town and cities of America. It is based on the voluntary spirit of citizens. The response to date to the unanimous resolution at this conference has been two-fold:

First, it is my great privilege to announce today, Mr. President, an important initiative to follow through on the IYDP. In January, a new non-governmental organization—the National Office on Disability—will be opened in Washington, D.C. Its purpose will be to encourage and support the continuation of the momentum of the international year of disabled persons in the United States. Launching of this organization is made possible by a generous contribution of a leading American corporation.

Second, a resolution has been introduced in the United States Congress to designate 1982 the National Year of Disabled Persons. The United States is following the leadership of other nations, in Africa and in South America, which first developed plans for designating 1932 their national years of disabled persons. This designation will help further full participation of disabled persons at the national, State, and local levels.

From these efforts, we, and you, can take heart.

Americans are not unmindful of the fact, Mr. President, that the problems of disability are compounded in the developing nations. The greater seriousness of disability among those in poverty and in less fortunate circumstances is apparent to us in our own country. We are, therefore, greatly pleased by the initiatives of the United Nations and its agencies which have taken advantage of the IYDP to launch long-term programs. The world health organization, for example, is now including the problems of disability within its long-term program of "health for all by the year 2000." This initiative offers promise for concerted efforts, among others, to prevent and eventually eliminate certain disabling conditions affecting more than five million newborn children in the world annually.

We are inspired by the new efforts of UNICEF to ensure that disabled children have a better chance at life. There is hope for many in UNESCO's new programs to reduce the burden of dependency through greater educational opportunity for disabled children. The International Labor Office's expanded efforts to provide technical rehabilitation assistance will have a radiating impact in years to come; there now is greater recognition that organized labor has a real stake in reducing disability. The United Nations development program has brought about realization in many countries of the importance of including disabled persons in the development process. These few examples of the United Nations agencies' actions are encouraging to us all.

The efforts of the IYDP secretariat in Vienna, under the direction of Assistant Secretary-General Mrs. Leticia Shahani, to promote the ongoing work of the national committees formed in 127 nations, will continue to pay dividends. Despite limited resources, the secretariat has played a key role in expanding world-wide concern for disabled persons.

Among the 800 international non-governmental organizations affiliated with the United Nations there has been enthusiastic response to the IYDP challenge. To cite an example again, Rotary International, which has 10,000 clubs in 150 countries has undertaken many IYDP activities. They include a project of the Rotary Club of Randolph, Massachusetts, USA, which provided a specially-equipped bus for disabled youth to attend camp, and they include a project of the Rotary Club of Raniginj, India, which sponsored a polio immunization campaign for 2,400 children. Most importantly, Rotary and many other non-governmental organizations have made long-term plans to continue their commitment after 1981.

Mr. President, by proclaiming this year, the United Nations has done much to improve the human condition. This is a central role of the United Nations. But, we would not do justice to this U.N. initiative if we did not also recognize another important contribution of the IYDP. By focusing world-wide attention on this human concern, the United Nations has opened an important area of transnational communication across political boundaries on a common problem affecting all people.

This communication will continue. It will further international cooperation and improve the climate for resolving other differences peaceably. The interactions among the 127 national committees, the worldwide consideration of the world draft plan of action growing out of the IYDP, and the ongoing communication in the area of disability among non-governmental organizations will contribute to the climate of peace and cooperation among nations. I am reminded of the words inscribed here in the General Assembly building, "Since wars begin in the minds of men, it is in the minds of men that the defenses of peace must be constructed." The IYDP is an idea born in the minds of men which is helping to build the human foundations of the structure of peace.

These two results of the IYDP—new commitment to improve the human condition and opening a new area of transnational communication—are marvelous testimony to the moral force of the United Nations. The voluntary response throughout the world to the IYDP challenge and opportunity demonstrate the U.N.'s tremendous capacity to stimulate purposeful action and commitment. With limited funds, the U.N. has fostered programs with far-reaching implications in all countries. The success of the IYDP is not in what was done but in what was started. By focusing attention, the U.N.

has created opportunity—the continuing opportunity—for us all to attack the serious problems of disability on an ongoing basis.

And, Mr. President, let us no longer question the value of international year observances. The IYDP has demonstrated it can, through them, unleash tremendous human and organizational potential. As we look ahead to another signal year—the bimillennium—the continuing response to the IYDP can be a beacon of hope.

Speaking on behalf of the world's disability family, Mr. President, I applaud the IYDP initiative. We commend and thank the distinguished member nation representatives. As my predecessor this morning, the distinguished delegate from the Philippines, Mrs. Marcos, stated, "human problems demand human solutions." I urge you and the other leaders of our United Nations to continue and intensify the quest for human solutions to the staggering human problems of disability. By challenging thee world and by taking on this responsibility, you have become champions of the disabled. We need you as partners. We need your vision and your leadership. We need your continuing concern, compassion and commitment.

You are giving us opportunity. You are inspiring hope. Please keep up the momentum! Together we can make our planet more livable!

Thank you, Mr. President.

EMPLOYEE OWNERSHIP AND PRODUCTIVITY

Mr. LONG. Mr. President, over the past several years the Congress has enacted a number of bills designed to encourage employee ownership, including several provisions promoting the use of employee stock ownership plans (ESOP's). It has been my pleasure to offer many of these provisions and I intend to offer many more in the future.

Where employee ownership has been tried, it has generally been successful. Often, it has been very successful. A number of studies of companies with some degree of employee ownership help to confirm what commonsense would suggest; namely, that companies with the good sense to try employee ownership tend to be more productive and more profitable than those without.

The national center for employee ownership recently compiled a summary of 13 studies of companies with the foresight to include employee ownership as part of their operating philosophy. The results are impressive. It is my hope that studies such as these will help us to realize the close connection between ownership and productivity. Just as the company with employee ownership will have a productive advantage over a conventionally owned competitor, so too should the U.S. economy enjoy a competitive edge with a national policy supportive of employee ownership.

The following studies are indicative of the productive potential that we have only just begun to tap:

GENERAL STUDIES

(1) University of Michigan, Survey Research Center, Arnold Tannenbaum and Michael Conte, "Employee Ownership: Report to the Economic Development Administration." Compared 30 employee ownership companies' pre-tax net profits divided by sales with the same figure for comparable firms in their industries. The employee ownership firms were 1.5 times as profitable. The ratio increased with the amount of equity employees owned.

(2) Katrina Berman, Worker Owned Plywood Companies. Pullman, Washington: Washington State Univ. Press, 1967. The plywood companies studied are run as worker owned cooperatives—each worker has one share and one vote, and workers make up the board of directors. Every shareholder receives the same rate of pay. Output per worker in the cooperatives was about 30% higher than in comparable conventional plywood firms. In a court case with the IRS, the cooperatives were able to satisfy the government that they were entitled to pay their workers 25% more than workers in conventional firms because their workers' productivity was high enough to justify it (the IRS will contest a company's deducting salaries to owners that are in excess of what is determined to be a "reasonable" wage—this is to assure that companies do not underreport profits by inflating owner salaries).

(3) 1979 ESOP Association Survey: 72 companies responded to the Association survey. All were members of the Association. The average company had been in operation for 24 years and had had its ESOP in place for three years. In that three year period, the ESOP acquired an average of 20.6% of company stock, and the percentage continues to grow. Average profits increased 15%, employment grew 25%, sales per employee 37%, and total annual sales 72%.

(4) William F. Whyte, Cornell University, testimony before Senate Small Business Committee, 1979. Whyte and colleagues have followed employee buyouts of failing firms that have occurred since 1971. There have been approximately 60 such buyouts. Whyte reports that only two small firms are known to have failed, and most are reported to have returned to strong profitability.

(5) Thomas R. Marsh and Dale E. McAllister, "ESOPs Tables: A Survey of Companies with Employee Stock Ownership Plans." Journal of Corporation Law, v. 6, No. 3, Spring, 1981. This survey of 229 companies with ESOPs at least three years old was drawn from a Labor Department list of ESOP companies, and thus is the best sample of all the studies so far. 128 of the 229 companies were able to provide productivity data. For the period 1975–1979, the ESOP companies showed an annual average increase in productivity of .78 percent, while a weighted national average (weighted so that the companies being compared were in comparable industries) showed a decline in productivity of −.74 percent. The significance of this finding can be best understood in the context of Edward Dennison's massive study on productivity for the Bureau of Economic Research, in which he found only one factor—advance in knowledge—to have an impact as large on productivity as the impact found here for ESOPs. Factors such as changes in the labor force and decline in investment lagged well behind. The Marsh and McAllister article also found that ESOPs reduced employee turnover and improved the quality of work in one-third of the companies, while negatively affecting these factors in only 5 percent and 1 percent of the cases, respectively.

CASE STUDIES

(1) Saratoga Knitting Mills was bought by employees in the mid-1970's after a period of continuing losses. In the period after the buyout, share value at SKM went up 25 percent, turnover dropped by over 50 percent, and scrap loss was cut from 1.5 percent to .28 percent. Over 140 jobs were saved.

(2) A Canadian trucking firm studied by Professor Richard Long was also bought by employees in the mid-1970's. In the period following the buyout, share value increased 300 percent, damage reported by customers declined 60 percent and tons loaded were up 5 percent.

(3) Rath Packing Company: In 1979, Rath was purchased by employees, who also gained control of the board. In the following year, Rath returned to profitability—the first profitable year in the last six. The number of hogs slaughtered per day increased from 2300 to 5000. Although in 1981 changes in the hog market have caused industry-wide losses, including at Rath, workers are still optimistic that their efforts will pay off—and that their 2500 jobs will be saved.

(4) Lowe's Company: Lowe's is a large chain of home improvement stores, with 6,000 employees. These employees now own 24% of the company (and the share is increasing). Lowe's sales per employee are three times the sales per employee of the big three retailers. Shrinkage is one half of one percent—less than 20% of the shrinkage comparable firms typically faced. Income tax per employee is twice that paid before the employee ownership plan. Net earnings per employee were three times that of the big three U.S. retailers in 1980. Most impressively, several employees with long tenure at Lowe's (15 years or more) have left the company with several hundred thousand dollars in stock, even though most of these employees never earned more than $125–250 per week.

(5) E-Systems: E-Systems is a large, Dallas-based, high technology company, now 25% employee owned. Among the several improvements the ESOP has produced is a 50% reduction in employee turnover.

(6) Allied Plywood: Allied Plywood is a 20 employee plywood distributor in Alexandria, Virginia 51% owned by employees. Allied has lost one employee in nine years, has been consistently profitable, even in the current housing depression, and pays its employees an average of $30,000–$50,000 a year in wages, bonuses, and stock.

(7) Chicago and Northwestern Transportation Company: C&NW was bought by employees in 1971. The company was on the verge of bankruptcy, threatening 13,000 jobs. Since the buyout. C&NW has become one of the few money making railroads in the country and has seen its stock value increase over 50 times.

(8) Denver Yellow Cab: Denver Yellow Cab was recently purchased by its 1,000 employees and organized as a worker cooperative. Since that time. it has established a strong record of profitability and the best safety record of any cab company in the country.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session. the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

1980 AERONAUTICS AND SPACE REPORT—MESSAGE FROM THE PRESIDENT—PM 99

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Commerce, Science, and Transportation:

To the Congress of the United States:

In accordance with the requirements of Section 206 of the National Aeronau-

tics and Space Act of 1958, as amended (42 U.S.C. 2476), I hereby transmit the 1980 Aeronautics and Space Report. The period covered by this report precedes my term of office.

RONALD REAGAN.

THE WHITE HOUSE, *December 15, 1981.*

ANNUAL REPORT ON PIPELINE SAFETY—MESSAGE FROM THE PRESIDENT—PM 100

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Commerce, Science, and Transportation:

To the Congress of the United States:

In accordance with the requirements of Section 16 of the Natural Gas Pipeline Safety Act of 1968, as amended, and Section 213 of the Hazardous Liquid Pipeline Safety Act of 1979, I hereby transmit the Annual Report on Pipeline Safety for calendar year 1980. The period covered by this report precedes my term of office.

RONALD REAGAN.

THE WHITE HOUSE, *December 15, 1981.*

ANNUAL REPORT ON HAZARDOUS MATERIAL TRANSPORTATION—MESSAGE FROM THE PRESIDENT—PM 101

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Commerce, Science, and Transportation:

To the Congress of the United States:

In accordance with the requirements of Section 109(e) of the Hazardous Materials Transportation Act (P.L. 93–633), I hereby transmit the Eleventh Annual Report on Hazardous Materials Transportation for calendar year 1980. The period covered by this report precedes my term of office.

RONALD REAGAN.

THE WHITE HOUSE, *December 15, 1981.*

OPERATION OF AUTOMOTIVE PRODUCTS TRADE ACT—MESSAGE FROM THE PRESIDENT—PM 102

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Finance:

To the Congress of the United States:

In accordance with the Automotive Products Trade Act of 1965 (Public Law 89–283), I transmit herewith the fifteenth annual report relating to developments during 1980. The period covered by the report precedes my term of office.

RONALD REAGAN.

THE WHITE HOUSE, *December 15, 1981.*

MESSAGES FROM THE HOUSE

At 12 noon, a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the bill (S. 1503) to authorize the President to allocate supplies of crude oil, residual fuel oil, and refined petroleum products during a severe petroleum supply shortage, and for other purposes, with amendments; it insists upon its amendments to the bill, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. DINGELL, Mr. SHARP, Mr. MOFFETT, Mr. BROYHILL, and Mr. CORCORAN as managers of the conference on the part of the House.

The message further announced that the House passed the following bill, without amendment:

S. 831. An act to authorize appropriations for the Coast Guard for fiscal year 1982, and for other purposes.

The message further announced that the House passed the following bill, without amendment:

S. 1948. An act to permit to become effective certain Farm Credit Administration regulations which expand the authority of financing institutions, other than Farm Credit System Institutions, to borrow from and discount with Federal intermediate credit banks.

ENROLLED BILLS SIGNED

At 2:20 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the Speaker has signed the following enrolled bills:

S. 1003. An act to amend title III of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, to authorize appropriations for such title for fiscal years 1982 and 1983, and for other purposes; and

H.R. 4845. An act to designate the building known as the Lincoln Federal Building and Courthouse in Lincoln, Nebraska, as the "Robert V. Denney Federal Building and Courthouse".

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

At 3:35 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House agrees to the amendment of the Senate to the bill (H.R. 3210) to amend the Surface Transportation Assistance Act of 1978, to establish obligation limitations for fiscal year 1982, and for related purposes, with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House has passed the following bill, with an amendment:

S. 478. An act to provide for the partitioning of certain restricted Indian land in the State of Kansas.

The message further announced that the House has agreed to the following concurrent resolution, with amendments:

S. Con. Res. 43. Concurrent resolution granting the status of permanent residence to certain aliens.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4241) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes; it recedes from its disagreement to the amendment of the Senate numbered 13 to the bill, and has agreed thereto; and it recedes from its disagreement to the amendments of the Senate numbered 11, 15, and 24 to the bill, and has agreed thereto, each with an amendment, in which it requests the concurrence of the Senate.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 34, 41, 57, 64, 71, 78, 84, and 85 of the bill, and has agreed thereto; and it recedes from is disagreement to the amendments of the Senate numbered 24, 31, 36, 39, 40, 54, 55, 62, 67, 68, 72, 87, 89, 93, 96, 101, 107, 109, 110, 115, 116, 117, 118, and 120 to the bill, and agrees thereto, each with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 825. An act for the relief of Yick Bong Au Yeung;

H.R. 1281. An act to provide for the conveyance of certain lands in Alaska comprising trade and trade manufacturing site A–056802 without regard to the eighty-rod limitation provided by existing law;

H.R. 1783. An act for the relief of Felipe B. Manalo and Maria A. Manalo;

H.R. 1841. An act for the relief of Isabella Clima Portilla;

H.R. 2342. An act for the relief of Maria Cecilia Gabella-Ossa;

H.R. 2475. An act to modify a withdrawal of certain lands in Mono County, California, to facilitate an exchange for certain other lands in Mono County, California, and for other purposes;

H.R. 2863. An act to authorize the Secretary of Agriculture to sell the portion of the Tahoe National Forest known as Blyth Arena;

H.R. 3126. An act to direct the Secretary of the department in which the United States Coast Guard is operating to cause the vessel Sky Lark to be documented as a vessel of the United States so as to be entitled to engage in the coastwise trade;

H.R. 3433. An act to modify the boundaries of the San Juan and San Isabel National Forests in the State of Colorado, and for other purposes;

H.R. 3731. An act to amend the Act of October 19, 1973 (87 Stat. 466), relating to the use or distribution of certain judgment funds awarded by the Indian Claims Commission or the Court of Claims;

H.R. 4001. An act to authorize the exchange of certain land held in trust by the United States for the Navajo Tribe, and for other purposes;

H.R. 4364. An act to declare that the United States holds in trust for the Pascua Yaqui Tribe of Arizona certain land in Pima County, Arizona; and

H.R. 4894. An act to authorize the Secretary of the Interior to disburse certain trust funds of the Lac Courte Oreilles Band of Lake Superior or Chippewa Indians of Wisconsin, and for other purposes.

At 4:11 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House agrees to the report of the committee

of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4119) making appropriations for Agriculture, Rural Development, and Reated Agencies programs for the fiscal year ending September 30, 1982, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 37, 38, 71, 82, 98, and 111 to the bill, and agrees thereto; and it recedes from its disagreement to the amendments of the Senate numbered 15, 23, 30, 35, 94, and 112 to the bill, and agrees thereto, each with an amendment in which it requests the concurrence of the Senate.

At 6:18 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House has passed the following bill, with an amendment:

S. 1119. A bill to correct the boundary of Crater Lake National Park in the State of Oregon, and for other purposes.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 9. An act to designate components of the National Wilderness Preservation System in the State of Florida;

H.R. 4717. An act to delay for 1 year the effective date of certain provisions recognizing gain on certain dispositions of LIFO inventories, to make adjustments in the net operating loss carryback and carryforward rules for the Federal National Mortgage Association, and to require information returns with respect to safe harbor leases;

H.R. 4926. An act to authorize the Secretary of the Army to acquire, by purchase or condemnation, such interests in oil, gas, coal, and other minerals owned or controlled by the Osage Tribe of Indians as are needed for Skiatook Lake, Oklahoma, and for other purposes; and

H.R. 4961. An act to make miscellaneous changes in the tax laws, and for other purposes.

ENROLLED BILLS SIGNED

The message further announced that the Speaker has signed the following enrolled bills:

S. 1948. An act to permit to become effective certain Farm Credit Administration regulations which expand the authority of financial institutions, other than farm credit system institutions, to borrow from and discount with Federal intermediate credit banks; and

H.R. 4209. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

At 7:10 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the House had passed the following bill, with an amendment:

S. 1946. An act to provide for the final settlement of certain claims against Czechoslovakia, and for other purposes.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1486. An act to establish the Protection Island National Wildlife Refugee, Jefferson County, State of Washington;

H.R. 2241. An act to provide for the establishment of the Bandon Marsh National Wildlife Refuge, Coos County, State of Oregon, and for other purposes;

H.R. 3799. An act to extend the Federal tort claims provisions of title 28, United States Code, to acts of omissions of members of the National Guard, and to provide that the remedy under those provisions shall be exclusive in medical malpractice actions involving members of the National Guard;

H.R. 3816. An act to improve the operation of the Fishermen's Contingency Fund established to compensate commercial fishermen for damages resulting from oil and gas exploration, development, and production in areas of the Outer Continental Shelf;

H.R. 5021. An act to extend the date for the submission to Congress of the reports of the Commission on Wartime Relocation and Internment of Civilians;

H.R. 5159. An act to amend the Internal Revenue Code of 1954 to provide a temporary increase in the tax imposed on producers of coal, and for other purposes; and

H.J. Res. 377. Joint resolution providing for the convening of the second session of the Ninety-seventh Congress.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 240. Concurrent resolution reaffirming the support of the Congress of the United States for the people of Poland.

HOUSE BILLS REFERRED

The following bills were read twice by unanimous consent, and referred as indicated:

H.R. 9. An act to designate components of the National Wilderness Preservation System in the State of Florida; to the Committee on Energy and Natural Resources.

H.R. 825. An act for the relief of Yick Bong Au Yeung; to the Committee on the Judiciary.

H.R. 1281. An act to provide for the conveyance of certain lands in Alaska comprising trade and trade manufacturing site A–056802 without regard to the 80-rod limitation provided by existing law; to the Committee on Energy and Natural Resources.

H.R. 1486. An act to establish the Protection Island National Wildlife Refuge, Jefferson County, State of Washington; to the Committee on Energy and Natural Resources.

H.R. 1783. An act for the relief of Felipe M. Manalo and Maria Monita A. Manalo; to the Committee on the Judiciary.

H.R. 1841. An act for the relief of Isabelita Clima Portilla; to the Committee on the Judiciary.

H.R. 2241. An act to provide for the establishment of the Bandon Marsh National Wildlife Refuge, Coos County, State of Oregon, and for other purposes; to the Committee on Energy and Natural Resources.

H.R. 2342. An act for the relief of Maria Cecilia Gabella-Ossa; to the Committee on the Judiciary.

H.R. 2475. An act to modify a withdrawal of certain lands in Mono County, California, to facilitate an exchange for certain other lands in Mono County, California, and for other purposes; to the Committee on Energy and Natural Resources.

H.R. 2863. An act to authorize the Secretary of Agriculture to sell the portion of the Tahoe National Forest known as Blyth Arena; to the Committee on Energy and Natural Resources.

H.R. 3126. An act to direct the Secretary of the department in which the United States Coast Guard is operating to cause the vessel *Sky Lark* to be documented as a vessel of the United States so as to be entitled to engage in the coastwise trade; to the Committee on Commerce, Science, and Transportation.

H.R. 3433. An act to modify the boundaries of the San Juan and San Isabel National Forests in the State of Colorado, and for other purposes; to the Committee on Energy and Natural Resources.

H.R. 3731. An act to amend the act of October 19, 1973 (87 Stat. 466), relating to the use or distribution of certain judgment funds awarded by the Indian Claims Commission or the Court of Claims; to the Select Committee on Indian Affairs.

H.R. 3799. An act to extend the Federal tort claims provisions of title 28, United States Code, to acts of omissions of members of the National Guard, and to provide that the remedy under those provisions shall be exclusive in medical malpractice actions involving members of the National Guard; to the Committee on the Judiciary.

H.R. 3816. An act to improve the operation of the Fishermen's Contingency Fund established to compensate commercial fishermen for damage resulting from oil and gas exploration, development, and production in areas of the Outer Continental Shelf; to the Committee on Commerce, Science, and Transportation.

H.R. 4001. An act to authorize the exchange of certain land held in trust by the United States for the Navajo Tribe, and for other purposes; to the Select Committee on Indian Affairs.

H.R. 4364. An act to declare that the United States holds in trust for the Pascua Yaqui Tribe of Arizona certain land in Pima County, Arizona; to the Select Committee on Indian Affairs.

HOUSE BILL PLACED ON THE CALENDAR

The following bill was read twice by unanimous consent, and placed on the calendar:

H.R. 5159. An act to amend the Internal Revenue Code of 1954 to provide a temporary increase in the tax imposed on producers of coal, and for other purposes.

HOUSE CONCURRENT RESOLUTION REFERRED

The following concurrent resolution was read, and referred to the Committee on Foreign Relations:

H. Con. Res. 240. Concurrent resolution reaffirming the support of the Congress of the United States for the people of Poland.

ENROLLED BILL PRESENTED

The Secretary reported that on today, December 15, 1981, he had presented to the President of the United States the following enrolled bill:

S. 1003. An act to amend title III of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, to authorize appropriations for such title for fiscal years 1982 and 1983, and for other purposes.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment in the nature of a substitute:

S. 326. A bill to require the divorcement of motor fuel service stations from operation by certain producers and refiners of motor fuels, to control sales by producers and refiners of motor fuels, and for other purposes (Rept. No. 97–303).

By Mr. ABDNOR, from the Committee on Environment and Public Works, with an amendment in the nature of a substitute:

S. 1692. A bill to provide for the operation, maintenance, and construction of deep-draft channels and harbors (Rept. No. 97–301).

THE NEED FOR A NEW THRUST IN NATIONAL HARBOR DEVELOPMENT

● Mr. ABDNOR. Mr. President, in his September 24 speech to the Nation, President Reagan discussed the need to utilize more user charges as a tool in moving toward a balanced budget. The President stated:

Finally, I am renewing my plea to Congress to approve my proposals for user fees—proposals first suggested last spring, but which have been neglected since.

When the Federal Government provides a service directly to a particular industry or to a group of citizens, I believe that those who receive benefits should bear the cost. For example, this next year the Federal Government will spend $525 million to maintain river harbors, channels, lock and dams for the barge and maritime industries. Yacht owners, commercial vessels and the airlines will receive services worth $2.8 billion from Uncle Sam.

My spring budget proposals included legislation that would authorize the Federal Government to recover a total of $980 million from the users of these services through fees. That is only a third of the $3.3 billion it will cost the Government to provide these same services.

Mr. President, the Committee on Environment and Public Works is reporting S. 1692 to the Senate. This is legislation that will create greater balance in the ways that Federal and non-Federal interests share the costs of port construction and maintenance. I urge that my colleagues examine this bill, which represents a sound synthesis of alternatives, and is written in a manner to protect all ports.●

By Mr. DOLE, from the Committee on Finance, without amendment:

S. 1957. An original bill to amend the Internal Revenue Code of 1954 to provide a temporary increase in the tax imposed on producers of coal, and for other purposes.

By Mr. DANFORTH, from the Committee on Governmental Affairs:

Report to accompany the bill (S. 1131) to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes (together with additional views) (Rept. No. 97–302).

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S.J. Res. 117. Joint resolution to authorize and request the President to designate the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week"; and

S.J. Res. 134. Joint resolution to designate 1982 as the "National Year of Disabled Persons".

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment and an amendment to the title:

H.R. 4755. An Act to recognize the organization known as Former Members of Congress.

By Mr. GARN, from the Committee on Banking, Housing and Urban Affairs, with amendments:

H.R. 4879. An act to clarify the treatment of international banking facility deposits for purposes of deposit insurance assessments and to remove certain limitations on the mortgage loan purchase authority of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations, with 2 reservations and an understanding:

Treaty Doc. No. 97–10. Tax Treaty (and Proposed Protocol) with the Argentine Republic for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on income and the encouragement of international trade and investment (Exec. Rept. No. 97–44).

By Mr. THURMOND, from the Committee on the Judiciary:

David L. Russell, of Oklahoma, to be U.S. District Judge for the northern, eastern, and western districts of Oklahoma;

Harold L. Ryan, of Idaho, to be U.S. District Judge for the district of Idaho;

Benjamin F. Baer, of California, to be a Commissioner of the U.S. Parole Commission for the term of 6 years;

Glenn L. Archer, Jr., of Virginia, to be an Assistant Attorney General;

Stanley S. Harris, of the District of Columbia, to be U.S. attorney for the District of Columbia for the term of four years;

Richard C. Turner, of Iowa, to be U.S. attorney for the southern district of Iowa for the term of 4 years;

Donald W. Wyatt, of Rhode Island, to be U.S. marshal for the district of Rhode Island for the term of 4 years;

Bruce R. Montgomery, of Tennessee, to be U.S. marshal for the eastern district of Tennessee for the term of 4 years; and

Robert T. Keating, of Wisconsin, to be U.S. marshal for the eastern district of Wisconsin for the term of 4 years.

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry:

Kalo A. Hineman, of Kansas, to be a Commissioner of the Commodity Futures Trading Commission for the term expiring June 19, 1986.

(The above nomination from the Committee on Agriculture, Nutrition, and Forestry was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

Peter McCoy, of California, to be Under Secretary of Commerce for Travel and Tourism.

(The above nomination from the Committee on Commerce, Science, and Transportation was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. SPECTER:

S. 1953. A bill to amend title 38, United States Code, to provide a presumption of service connection for the occurrence of certain diseases in veterans who were exposed to phenoxy herbicides while serving in Southeast Asia during the Vietnam era; to the Committee on Veterans' Affairs.

By Mr. MATSUNAGA:

S. 1954. A bill for the relief of Da Ying Huang and Shao Lan Huang, husband and wife, and their child, Si Jing Huang; to the Committee on the Judiciary.

By Mr. MOYNIHAN:

S. 1955. A bill to extend the delay in making any adjustment in the price support level for milk, to extend the time for conducting referenda with respect to marketing quotas for wheat, upland cotton, and rice, and to extend the authority to enter into agreements and programs of assistance under the Agricultural Trade Development and Assistance Act of 1954; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. THURMOND:

S. 1956. A bill to amend title 38, United States Code, to authorize reimbursement for the reasonable charge for chiropractic services provided to certain veterans; to the Committee on Veterans' Affairs.

By Mr. DOLE; from the Committee on Finance:

S. 1957. An original bill to amend the Internal Revenue Code of 1954 to provide a temporary increase in the tax proposed on producers of coal, and for other purposes; placed on the calendar.

By Mr. DOLE (for himself, Mr. PACKWOOD, Mr. LONG, Mr. BAUCUS, Mr. BRADLEY, Mr. CHILES, Mr. COHEN, Mr. HATCH, Mr. HEINZ, Mr. INOUYE, Mr. KENNEDY, Mr. MATSUNAGA, Mr. MOYNIHAN, Mr. PRYOR, and Mr. MITCHELL):

S. 1958. A bill to amend title XVIII of the Social Security Act to provide for coverage of hospice care under the Medicare program; to the Committee on Finance.

By Mr. DENTON (for himself and Mr. THURMOND):

S. 1959. A bill to require all nationals of Communist countries to register with the Attorney General before engaging in certain activities involving Members of Congress and congressional employees, in order to protect the internal security of the United States and impede espionage; to the Committee on the Judiciary.

By Mr. SYMMS:

S. 1960. A bill to amend the Internal Revenue Code of 1954 to clarify the definition of geothermal energy, and for other purposes; to the Committee on Finance.

By Mr. MITCHELL:

S. 1961. A bill to amend the Internal Revenue Code of 1954 to provide energy tax credits for equipment used aboard or installed on fishing vessels; to the Committee on Finance.

By Mr. RIEGLE:

S. 1962. A bill to amend the Credit Control Act; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. DENTON (for himself, Mr. EAST and Mr. THURMOND):

S. 1963. A bill to improve the Internal Security of the United States by clarifying the notification requirements for foreign agents under Section 951 of Title 18, United States Code, and to increase the penalties for failure to notify; to the Committee on the Judiciary.

By Mr. EAGLETON (for himself and Mr. DANFORTH):

S. 1964. A bill to designate certain lands in the Mark Twain National Forest, Missouri, which comprise about seventeen thousand five hundred and sixty-two acres, and known as the Irish Wilderness, as a component of the National Wilderness Preservation System; to the Committee on Energy and Natural Resources.

S. 1965. A bill to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately six thousand eight hundred and eigthty-eight acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area", as a component of the National Wilderness Preservation System; to the Committee on Environment and Public Works.

By Mr. DANFORTH:

S. 1966. A bill to eliminate the unnecessary paperwork and reporting requirements contained in the Public Utility Regulatory Policies Act of 1978; to the Committee on Energy and Natural Resources.

S. 1967. A bill to eliminate unnecessary paperwork and reporting requirements contained in section 15(1)(D) of the Outer Continental Shelf Lands Act, and section 601 of the Outer Continental Shelf Lands Act Amendments of 1978; to the Committee on Energy and Natural Resources.

By Mr. HATCH (for himself, Mr. KASTEN and Mr. BAUCUS):

S. 1968. A bill to clarify the application of the Clayton Act and the Federal Trade Commission Act with respect to certain joint ventures which promote the international competitiveness of U.S. businesses; to the Committee on the Judiciary.

By Mr. PRYOR:

S. 1969. A bill to prohibit the use of appropriations for the payment of certain lobbying costs; to the Committee on Governmental Affairs.

By Mr. JACKSON:

S. 1970. A bill for the relief of James P. Purvis; to the Committee on the Judiciary.

By Mr. BRADLEY:

S. 1971. A bill to designate the New York Bulk and Foreign Mail Center located at 80 County Road, Jersey City, New Jersey, as the "Michael McDermott Bulk and Foreign Mail Center"; to the Committee on Governmental Affairs.

By Mr. RIEGLE:

S. 1972. A bill to amend the Internal Revenue Code of 1954 to exempt from the manufacturers' excise tax parts or accessories for light-duty trucks, and to allow manufacture of a taxable truck body or chassis to combine it with certain taxable parts or accessories without incurring additional tax by reason of the combination; to the Committee on Finance.

By Mr. RIEGLE:

S. 1973. A bill to amend the National Ocean Pollution Planning Act of 1978 to provide greater coordination of research efforts concerning the Great Lakes, and for other purposes; to the Committee on Environment and Public Works.

By Mr. DURENBERGER:

S. 1974. A bill to amend section 7(j) of the Federal Deposit Insurance Act; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. GRASSLEY:

S. 1975. A bill to amend the Voting Rights Act of 1965 to extend the effect of certain provisions, and for other purposes; to the Committee on the Judiciary.

By Mr. DECONCINI:

S.J. Res. 136. A joint resolution to validate the effectiveness of a plan for the use or distribution of funds appropriated to pay a judgement awarded to the San Carlos Tribe of Arizona; considered and passed.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. LEAHY (for himself, Mr. HATFIELD, Mr. PERCY, Mr. COHEN, Mr. STAFFORD, Mr. HUDDLESTON, Mr. JACKSON, Mr. DURENBERGER, Mr. BUMPERS, Mr. RUDMAN, Mr. TSONGAS, Mr. CHAFEE, Mr. BRADLEY, Mr. D'AMATO, Mr. LEVIN, Mr. GORTON, Mr. DODD, Mr. HEINZ, Mr. KENNEDY, Mr. MITCHELL, Mr. PELL, Mr. BAUCUS, Mr. FORD, Mr. MELCHER, Mr. STENNIS, Mr. INOUYE, Mr. CRANSTON, Mr. SARBANES, Mr. BIDEN, Mr. PRYOR, Mr. WEICKER, Mr. WALLOP, Mr. HART, Mr. RIEGLE, Mr. MOYNIHAN and Mr. MATSUNAGA):

S. Res. 262. Resolution to express the sense of the U.S. Senate support for energy conservation programs; to the Committee on Energy and Natural Resources.

By Mr. BAKER:

S. Res. 263. Resolution to pay a gratuity to Mary E. Carter, Deborah M. Anderson, and Gregory Anderson; considered and agreed to.

S. Res. 264. Resolution to pay a gratuity to Betty J. Schulz; considered and agreed to.

S. Res. 265. Resolution authorizing testimony by Roy C. Myers, and representation by the Senate Legal Counsel in the cases of *William P. Tavoularеas, et al.* v. *The Washington Post Co., et al., and William P. Tavoularеas, et al.* v. *Philip Piro*, Civil Action Nos. 80-3032, 80-2387; considered and agreed to.

By Mr. WEICKER (for himself, Mr. MOYNIHAN, Mr. LEVIN, Mr. DURENBERGER, Mr. TSONGAS and Mr. CRANSTON):

S. Res. 266. Resolution to declare March 1, 1982, as "National Day of the Seal"; to the Committee on the Judiciary.

By Mr. JACKSON:

S. Res. 267. Resolution to refer S. 1970 to the Chief Commissioner of the Court of Claims; to the Committee on the Judiciary.

By Mr. PERCY (for himself, Mr. MOYNIHAN, Mr. ABDNOR, Mr. BRADLEY, Mr. COHEN, Mr. D'AMATO, Mr. DECONCINI, Mr. DOMENICI, Mr. DURENBERGER, Mr. EAGLETON, Mr. HEINZ, Mr. LEAHY, Mr. LEVIN, Mr. MITCHELL, Mr. METZENBAUM, Mr. MURKOWSKI, Mr. THURMOND, Mr. WALLOP, Mr. WEICKER, Mr. ZORINSKY, Mr. KENNEDY, Mr. BENTSEN, Mr. DODD, Mr. HUMPHREY, Mr. DENTON, Mr. SPECTER, Mr. BUMPERS, Mr. HARRY F. BYRD, JR., Mr. ROBERT C. BYRD, Mr. CHAFEE, Mr. CHILES, Mr. CRANSTON, Mr. DIXON, Mr. DOLE, Mr. EXON, Mr. FORD, Mr. NUNN, Mr. BURDICK, Mr. GLENN, Mr. GORTON, Mr. JEPSEN, Mr. JOHNSTON, Mr. KASTEN, Mr. MATSUNAGA, Mr. MELCHER, Mr. PACKWOOD, Mr. PELL, Mr. PRESSLER, Mr. RANDOLPH, Mr. RIEGLE, Mr. SARBANES, Mr. SASSER, Mr. SCHMITT and Mr. WILLIAMS):

S. Res. 268. Resolution on the imposition of martial law in Poland; considered and agreed to.

By Mr. DURENBERGER (for himself, Mr. METZENBAUM, Mr. SPECTER, Mr. BAUCUS and Mr. ROTH):

S. Res. 269. Resolution expressing the sense of the Senate with respect to railroad retirement full funding; to the Committee on Labor and Human Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. SPECTER:

S. 1953. A bill to amend title 38, United States Code, to provide a presumption of service connection for the occurrence of certain diseases in veterans who were exposed to phenoxy herbicides while serving in the Armed Forces in Southeast Asia during the Vietnam era; to the Committee on Veterans' Affairs.

(The remarks of Mr. SPECTER on this legislation appear earlier in today's RECORD.)

By Mr. MOYNIHAN:

S. 1955. A bill to extend the delay in making any adjustment in the price support level for milk, to extend the time for conducting referenda with respect to marketing quotas for wheat, upland cotton, and rice, and to extend the authority to enter into agreements and programs of assistance under the Agricultural Trade Development and Assistance Act of 1954; to the Committee on Agriculture, Nutrition, and Forestry.

EXTENSION OF CERTAIN FARM MARKETING REFERENDA

● Mr. MOYNIHAN. Mr. President, on December 10, the Senate agreed to the conference report on the farm bill, S. 884, by a vote of 68 to 31. I voted against the conference report because it includes provisions that are most wasteful and thus constitutes an unnecessary raid on the Treasury.

The House is scheduled to vote on the conference report soon. It now appears possible that the House will reject this measure. In anticipation of such action by the House, Congressman PEYSER has introduced legislation providing for an extension until March 31 of the current price support provisions applicable to milk and providing for a further extension of the time for conducting the referenda with respect to the national marketing quotas for wheat, upland cotton, and rice. The bill also extends the authority for the food for peace program to enter into agreements and programs of assistance. The bill I introduce today is identical to Congressman PEYSER's.

The purpose of my bill is simple and straightforward: To allow, if necessary, for a 3-month extension of the status quo, giving the conferees time to fashion a conference report that is acceptable to both the House and the Senate. Otherwise, the provisions of the 1938 and 1949 acts relating to the dairy program and the wheat, cotton, and rice referenda will require unnecessary and costly actions by the Secretary of Agriculture, and there could be no new contracts in the food for peace program. Therefore, it is crucial that Congress further extend the relevant dates through March 31, 1982. My bill does just that, Mr. President, and I urge that the Senate pass this bill.●

By Mr. THURMOND:

S. 1956. A bill to amend title 38, United States Code, to authorize reimbursement for the reasonable charge for chiropractic services provided to certain veterans; to the Committee on Veterans' Affairs.

CHIROPRACTIC SERVICES FOR CERTAIN VETERANS

Mr. THURMOND. Mr. President, today I am introducing a bill which will amend title 38 of the United States Code, to authorize eligible veterans to receive chiropractic care in certain circumstances under the Veterans' Administration medical care program.

Mr. President, let me begin my remarks by stating that the VA already has the authority to provide chiropractic services to veterans. Under current policy, any VA physician may on a case by case basis refer an eligible veteran to a chiropractor for treatment. Despite this authority only a few, if any veterans,

have ever been referred by a VA physician to a chiropractor at VA expense.

I believe it is time that the VA's policy and practice be brought more in line with the programs of other State and Federal health care programs which now provide chiropractic treatment to their beneficiaries. For instance, under the medicare program which is administered by HHS, it is typical for eligible persons in need of chiropractic care to seek and obtain the services of a doctor of chiropractic and to receive reimbursement for such services from HHS. Reimbursement for chiropractic services is also currently provided under the Federal Employees Compensation Act, and a number of States include chiropractic services under their medical assistance programs.

Mr. President, the total current chiropractic patient population of the United States is estimated to be between 10 to 20 million. This Nation has more than 30 million veterans, and I believe that there is an overwhelming likelihood that a substantial number of our veterans who receive medical care at VA facilities are either active or potential chiropractic patients. Our veterans deserve the same access to medical treatment, including chiropractic treatment, as do the recipients of medicare and other Government programs which provide health care services.

Mr. President, the legislation which I propose today will establish a pilot program to compel the use of chiropractors within the VA. It limits the veterans who are eligible for its benefits and also limits total expenditures for chiropractic services to $4 million in any fiscal year. Unless extended, the program, as proposed, will expire on September 30, 1985.

In conclusion, Mr. President, let me say that during the last Congress the Senate passed an identical bill to the one which I am introducing today. That bill was defeated in the House, but in the conference report of H.R. 3892, the Congress strongly urged the VA's Department of Medicine and Surgery to reevaluate its position and to use its existing authorities to provide, at least on a pilot basis, chiropractic services in appropriate cases as part of the hospital care or medical services furnished to veterans. This message was ignored by the VA.

I, therefore, urge Congress to send a stronger message to the VA on this matter by favorably considering this bill.

Mr. President, I ask unanimous consent that it be referred to the appropriate committee for prompt consideration and that it be printed in the RECORD at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1956

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 601 of title 38, United States Code, is amended by adding at the end thereof the following new paragraph:

"(9) The term 'chiropractic services' means the manual manipulation of the spine performed by a chiropractor (who is licensed as such by the State in which he or she performs such services and who meets the uniform minimum standards promulgated for chiropractors under section 1861(r)(5) of the Social Security Act (42 U.S.C. 1395x(r)(5))) to correct a subluxation of the spine. For the purposes of this paragraph, such term does not include physical examinations, laboratory tests, radiologic services, or other tests or services determined by the Administrator to be excluded.".

(b)(1) Subchapter III of chapter 17 of such title is amended by adding at the end thereof the following new section:

"§ 629. Chiropractic services

"(a) The Administrator shall under regulations which the Administrator shall prescribe, reimburse a veteran eligible for medical services under this chapter for the reasonable charge for chiropractic sevices, for which such veteran has made payment, if—

"(1) such chiropractic services were for the treatment of a service-connected neuromusculoskeletal condition of the spine,

"(2) the veteran is a veteran who has been furnished hospital care by the Veterans' Administration for a neuromusculoskeletal condition of the spine within a twelve-month period prior to the provision of such chiropractic services, or

"(3) the veteran is a veteran described in section 612(f)(2) of this title who has been furnished hospital care or medical services by the Veterans' Administration for a neuromusculoskeletal condition of the spine, to the extent that such veteran is not entitled to such chiropractic services or reimbursement for the expenses of such services under an insurance policy or contract, medical or hospital service agreement, membership or subscription contract, or similar arrangement for the purpose of providing, paying for, or reimbursing expenses for such services.

"(b) In any case in which reimbursement may be made under this section, the Administrator may, in lieu of reimbursing such veteran, make payment of the reasonable charge for such chiropractic services directly to the chiropractor who furnished such services.

"(c)(1) The Administrator shall, in consultation with appropriate public and nonprofit organizations and other Federal departments and agencies that provide reimbursement for chiropractic services, establish a schedule of reasonable charges for such services, which schedule shall be consistent with the reasonable charges allowed under title XVIII of the Social Security Act (42 U.S.C. ch. 7).

"(2) The amount payable by the Administrator for chiropractic services furnished under this section shall not exceed $200 in any twelve-month period in the case of any veteran.

"(d) Notwithstanding any other provision of this title, total expenditures for chiropractic services reimbursed under this section shall not exceed $4,000,000 in any fiscal year and no reimbursement or payment may be made under this section for chiropractic services furnished after September 30, 1985.".

(2) The table of sections at the beginning of chapter 17 of such title is amended by inserting after the item relating to section 628 the following new item:

"629. Chiropractic services.".

SEC. 2. Not later than December 31, 1982, and not later than December 31 of each of the next three years thereafter, the Administrator of Veterans' Affairs shall prepare and submit to the Committee on Veterans' Affairs of the Senate and the House of Representatives reports on the use made of the authority provided for in the amendments made by the first section. Each such report shall include—

(1) the number of requests by eligible veterans for reimbursement or payment for chiropractic services in the most recent fiscal year under section 629 of title 38, United States Code (as added by subsection (b)(1) of the first section), and the number of such veterans who made such requests;

(2) the number of reimbursements or payments made by the Administrator of Veterans' Affairs under such section in such fiscal year and the number of veterans to or for whom such reimbursements or payments were made; and

(3) the total amounts of expenditures by the Administrator of Veterans' Affairs for such reimbursements and payments under such section in such fiscal year.

By Mr. DOLE (for himself, Mr. PACKWOOD, Mr. LONG, Mr. BAUCUS, Mr. BRADLEY, Mr. CHILES, Mr. COHEN, Mr. HATCH, Mr. HEINZ, Mr. INOUYE, Mr. KENNEDY, Mr. MATSUNAGA, Mr. MOYNIHAN, Mr. PRYOR, and Mr. MITCHELL):

S. 1958. A bill to amend title XVIII of the Social Security Act to provide for coverage of hospice care under the medicare program; to the Committee on Finance.

HOSPICE CARE

● Mr. DOLE. Mr. President, I am introducing legislation today that would redirect benefits under medicare to include hospice care services for the terminally ill. I am pleased to say that Representative PANETTA introduced an identical bill last Friday in the House of Representatives.

The term hospice has come to mean physical and emotional support and dignity to thousands upon thousands of individuals around the world.

The concept of hospice care carries with it the thought of living, not of death and dying. This model of care and treatment is long overdue in the United States.

QUALITY OF HEALTH CARE

The quality of health care in the twentieth century is going to be judged not only by our efforts toward preventing illness but also our efforts toward maximizing the quality of life for all, including the terminally ill.

For many years, the thrust of health care in the United States has been toward the goal of extending life. Our efforts in these areas have been rewarding. However, we have lost sight of a consideration that is critical—how to care adequately and sensitively for those in our society who are dying. Health professionals and laymen have assumed in the past that the hospital is the most appropriate place for terminal care, as well as for death itself. Without question, the American preoccupation with life and living has made it difficult to perceive the needs of the dying.

NEEDS OF TERMINALLY ILL

We must begin to examine how we care for the terminally ill—we must begin to focus more attention on their needs and desires.

While death looms close at hand, we consistently remove their ability to control their own lives long before they are ready to give away this right. More often than not, they are not given a choice of where they want to die, a choice of treatment, and, in many instances, they are not even told the truth about their illness or prognosis.

Traditionally, we have not supported the basic human rights of these patients.

CURRENT ACTIVITIES

There is no question in my mind that we should begin in earnest discussions

on how our health care financing programs can appropriately help in the development of programs which provide options to the terminally ill. However, our experience has shown us that the often heavy-handed involvement of the Federal Government stifles creativity such as has been characteristic of the hospice movement. Accordingly, we must move forward with caution.

HOME CARE

As society has moved from the extended family of old to the smaller family of today, the support systems necessary to care for a terminally ill family member have become less available. This is further complicated by our present reimbursement system which pays for institutional care but not for home care in many instances.

There is a clear desire on the part of many to look to home care again as a viable resource.

We must also continue to seek out other models of care, for while there is general consensus that for the individual with appropriate support systems the best place to die may be at home, there are circumstances, such as the physical condition of the individual, where this is not appropriate.

What appears to be emerging is a sensitivity toward the dying individual and an appreciation for the role of the family and the home in caring for these people. We must seek out forms of treatment that support this movement, and afford the individual the optimum opportunity to make their own decisions.

HOSPICE

The hospice approach to care for the dying is a program of active medical attention whose chief characteristics are the sophisticated management of severe pain and optimum use of home care. Hospice care may be available through home care, outpatient services, or an inpatient program. Care is provided by a multidisciplinary team made up of nurses, physicians, and other providers. Psychological, spiritual, and sociological needs are regarded as important to care as physical complaints.

The most well-known hospice at this time is St. Christopher's in London.

The hospice concept dates back to the middle ages in England, Italy, France, and Germany. A hospice during that time was frequently run by a religious order and was a place where early medical care was provided.

"Hospice" as a place for the final days before death seems to have begun in Dublin, Ireland sometime during the 19th century. Homes then followed in England.

There are presently programs existing in this country which have many of the same components as the English system.

U.S. EXPERIENCE

We have learned a great deal through our close examination of the British system, but it is difficult to translate accurately from experiences occuring in societies differing from our own. For this reason, and in response to our desire to develop information on which we could base specific legislative changes, in 1978 the Department of Health and Human Services announced its intention to conduct demonstration projects with organizations providing hospice services. The demonstration project permits the waiver of certain statutory and regulatory requirements to allow coverage of hospice services provided to medicare beneficiaries and medicaid recipients.

The demonstration, which actually began on October 1, 1980, has a 24-month experimental phase during which hospice services will be reimbursed. Twenty-six sites were selected for participation in this HCFA demonstration program. The preliminary and the final results of these studies will certainly assist us in determining what we might do; however, these activities are not our only options as far as information is concerned.

The Warner-Lambert Foundation recently commissioned an independent cost analysis on the fiscal impact of caring for the terminally ill in the current medicare system as opposed to a medicare system which included the hospice alternative.

The National Cancer Institute also conducted a 3-year demonstration program on the costs of hospice care.

Blue Cross plans in several States have studied the comparative costs of caring for the terminally ill in the traditional system against the costs in hospice. Private insurance companies have conducted analysis prior to adding the hospice benefit to group health policies.

All of this information is being carefully evaluated, and we hope that the final results will indeed show hospice care to be not only more humane but also less costly.

SUMMARY OF PROPOSAL

The bill I am introducing today would permit medicare beneficiaries who are expected to die within 6 months to elect to receive a full range of hospice services. The kinds of services covered include those now covered as home health services plus physicians' services, short-term institutional care, respite services (to periodically relieve family members of the burden of caring for the patient), homemaker services, drugs, and various forms of counseling.

A beneficiary could elect to receive hospice benefits for no more than two periods, each lasting no more than 6 months. In electing hospice benefits, the beneficiary would waive entitlement to all the nonhospice benefits available under medicare except for benefits for his attending physician, who might, in some cases, wish to continue caring for the patient in conjunction with the hospice physician.

A hospice would be reimbursed under part A of medicare for 100 percent of its covered costs subject to a ceiling which attempts to insure that the hospice payments would not exceed the amount that would have been spent by medicare had the patient been treated in the traditional manner.

Mr. President, this bill is designed as the starting point for our discussions; it is not etched in stone. There are a number of issues which we know must be addressed prior to agreement on a final product. These issues include uncertainty about the requirements that hospice programs should meet, the specific services that should be paid for, and how they should be paid. The bill could discourage the continued use of volunteers by making services reimbursable which hospices now provide free of charge through the use of neighbors, family, and other volunteers. The cap on reimbursements offers some, but perhaps not enough, protection to the medicare program since a hospice that operates with grossly excessive costs could stay under it by taking patients whose life expectancy is significantly less than the 6 months assumed in setting the cap.

Again, the Senator from Kansas believes these problems can be adequately addressed, and introduces legislation at this time so we might have the opportunity to publicly discuss them.

I look forward to working with my distinguished colleague in the House, Mr. PANETTA, and with the cosponsors of the bill in arriving at agreement on a final legislative product so we might offer these services to all medicare recipients.

Mr. President, I ask unanimous consent to have the text of the bill printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1958

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1811 of the Social Security Act is amended by striking out "and home health services" and inserting in lieu thereof "home health services, and hospice care".

(b) Section 7(d)(1) of the Railroad Retirement Act of 1974 is amended by inserting "hospice care," after "home health services,".

SEC. 2. (a) Section 1812(a) of the Social Security Act is amended by striking out "and" at the end of paragraph (2), by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and", and by adding after paragraph (3) the following new paragraph:

"(4) in lieu of certain other benefits, hospice care with respect to the individual during up to two periods of 180 days each with respect to which the individual makes an election under subsection (d)(1).".

(c) Section 1812 of such Act is further amended by inserting after subsection (c) the following new subsection:

"(d)(1) Payment under this part may be made for hospice care provided with respect to an individual only during two periods of 180 days each during the individual's lifetime and only, with respect to each such period, if the individual makes an election under this paragraph to receive hospice care under this part by (or through) a particular hospice program instead of certain other benefits under this title.

"(2)(A) Except as provided in subparagraphs (B) and (C) and except in such exceptional and unusual circumstances as the Secretary may provide, if an individual makes such an election for a period with respect to a particular hospice program, the individual shall be deemed to have waived all rights to have payment made under this title with respect to—

"(i) hospice care provided by another hospice program (other than through arrangements with the particular hospice program) during the period, or

"(ii) services furnished during the period, other than physicians' service furnished by the individual's attending physician and other than services provided by (or under arrangements with) a hospice program, that are determined (in accordance with guidelines of the Secretary) either to be related to the treatment of the individual's condition with respect to which a diagnosis of ter-

minal illness has been made or to be equivalent to (or duplicative of) hospice care.

"(B) After an individual makes such an election with respect to a 180-day period, the individual may revoke the election during the period, in which case—

"(i) the revocation shall act as a waiver of the right to have payment made under this part for any hospice care benefits for the remaining time in such period and (for purposes of subsection (a)(4) and subparagraph (A)) the individual shall be deemed to have been provided such benefits during such entire period, and

"(ii) the individual may at any time after the revocation execute a new election for a subsequent 180-day-period, if the individual otherwise is entitled to hospice care benefits with respect to such a period.

"(C) An individual may, once in each such period, change the hospice program with respect to which the election is made and such change shall not be considered a revocation of an election under subparagraph (B).

"(D) For purposes of this title, an individual's election with respect to a hospice program shall no longer be considered to be in effect with respect to that hospice program after the date of the individual's death or, if earlier, the date the individual revocation or change of election with respect to that election takes effect.

"(3) Notwithstanding any other provision of this title, payment under this part may be made for hospice care provided, with respect to an individual, after the death of the individual, but only to the extent of three bereavement counseling visits (as defined by the Secretary) and only if such visits occur during the 1-year period immediately following the date of the individual's death. For purposes of paragraph (1)(A), subsection (a)(4), and section 1814(a)(8), such visits shall be deemed to have been provided on the date of the death of such individual.".

SEC. 3. (a) Section 1814(a) of the Social Security Act is amended by striking out "and" at the end of paragraph (6), by striking out the period at the end of paragraph (7) and inserting in lieu thereof "; and", and by inserting after paragraph (7) the following new paragraph:

"(8) in the case of hospice care provided an individual in—

"(A)(i) the first 180-day period—

"(I) the individual's attending physician (as defined in section 1861(dd)(3)(B)), and

"(II) the medical director (or physician member of the interdisciplinary group described in section 1861(dd)(2)(B)) of the hospice program providing (or arranging for) the care, each certify, not later than 2 days after hospice care is initiated, that the individual is terminally ill (as defined in section 1861(dd)(3)(A)), or

"(ii) the second 180-day period, the medical director or physician described in clause (i)(II) recertifies at the beginning of the period that the individual is terminally ill;

"(B) a written plan for providing hospice care with respect to such individual has been established (before such care is provided by, or under arrangements made by, that hospice program) and is periodically reviewed by the medical director (and the interdisciplinary group described in section 1861(dd)(2)(B)) of the hospice program; and

"(C) such care is being or was provided pursuant to such plan of care.".

(b)(1) Section 1814(b) of such Act is amended by inserting "(other than a hospice program providing hospice care)" after "The amount paid to any provider of services".

(2) Section 1814 of such Act is further amended by adding at the end the following new subsection:

"(i)(1) Subject to the limitation under paragraph (2), the amount paid to a hospice program with respect to hospice care for which payment may be made under this part shall be an amount equal to the costs which are reasonable and related to the cost necessary in the efficient delivery of needed hospice care, or which are based on such other tests of reasonableness as the Secretary may prescribe in regulations (including those authorized under section 1861(v)(1)(A)).

"(2) The amount of payment made under this part for hospice care provided by (or under arrangements made by) a hospice program located in a region (as defined by the Secretary) for an accounting year may not exceed the 'cap amount' for the region for the year (computed under subparagraph (B)) multiplied by the number of medicare beneficiaries in the hospice program in that year (determined under subparagraph (C)).

"(B) For purposes of subparagraph (A), the 'cap amount' for a region for a year is computed as follows:

"(i) The Secretary, using records of the program under this title, shall identify individuals (or a representative sample of such individuals) who died during the base period (as defined in clause (v)), with respect to whose death the primary cause of death was cancer, and who, during the six-month period preceding death, were provided benefits under this title.

"(ii) The Secretary shall determine a national average medicare per capita expenditure aemount by (I) determining (or estimating) the amount of payments made under this title with respect to services provided to individuals identified in clause (i) during the six months before death, and (II) dividing such amount of payments by the number of such individuals.

"(iii) The Secretary shall then compute a regional average medicare per capita expenditure amount for each region, by adjusting the national average medicare per capita expenditure amount (computed under clause (ii)) to reflect the relative difference between that region's average cost of delivering health care and the national average cost of delivering health care.

"(iv) The 'cap amount' for a region for an accounting year is 75 percent of the regional average determined under clause (iii) for that region, increased by the same percentage as the percentage increase in the medical care expenditure category of the consumer price index for all urban consumers (U.S. city average), published by the Bureau of Labor Statistics, from the fourth month of the base period to the fifth month of the accounting year.

"(v) For purposes of this subparagraph, the term 'base period' means the most recent period of 12 months (ending before the date of the enactment of this subsection) for which the Secretary determines he has sufficient data to make the determinations required under clauses (i) through (iii).

"(C) For purposes of subparagraph (A), the 'number of medicare beneficiaries' in a hospice program in an accounting year is equal to the number of individuals who have made an election under subsection (d) with respect to the hospice program and have been provided hospice care by (or under arrangements made by) the hospice program under this part in the accounting year, such number reduced to reflect the proportion of hospice care that each such individual was provided in a previous or subsequent accounting year or under a plan of care established by another hospice program.

"(3) The Comptroller General shall conduct a study and, not later than two years after the date of the enactment of this subsection, report to the Congress and the Secretary on whether or not the method of reimbursement for hospice care and the limitation on such reimbursement, described in paragraphs (1) and (2), are fair and equitable and promote the most efficient provision of hospice care, and the feasibility and advisability of developing and providing for a methodology for the reimbursement of hospice care on a prospective basis. If such report recommends that such methodolgy be developed, the Secretary, shall, not later than 18 months after the date such report is made, provide for development of such methodology and report to the Congress on the development of such methodology and changes in legislation which may be required to implement such methodology.".

SEC. 4. (a) Section 1861(u) of the Social Security Act is amended by inserting "hospice program," after "home health agency,".

(b) Section 1861(w)(1) of such Act is amended by striking out "or home health agency" and by inserting in lieu thereof "home health agency, or hospice program".

(c) Section 1861 of such Act is further amended by adding at the end the following new subsection:

"HOSPICE CARE; HOSPICE PROGRAM

"(dd)(1) The term 'hospice care' means the following items and services furnished to a terminally ill individual (and, with respect to counseling services described in subparagraph (H), to the individual's immediate family (as defined in paragraph (4)), by a hospice program under a written plan (for providing such care to such individual and immediate family) established and periodically reviewed by the medical director (and by the interdisciplinary group described in paragraph (2)(B)) of the program.

"(A) nursing care provided by or under the supervision of a registered professional nurse,

"(B) physical, occupational, or speech therapy,

"(C) medical social services under the direction of a physician,

"(D)(i) services of a home health aide who has successfully completed a training program approved by the Secretary and (ii) homemaker services,

"(E) medical supplies (including drugs and biologicals) and the use of medical appliances, while under such a plan,

"(F) physicians' services,

"(G) short-term inpatient care (including both respite care and procedures necessary for pain control and acute and chronic symptom management) in an inpatient facility meeting such conditions as the Secretary determines to be appropriate to provide such care, and

"(H) counseling (including bereavement and dietary counseling) with respect to care of the terminally ill individual and adjustment to his death.

The care and services described in subparagraphs (A) and (D) may be provided on a 24-hour, continuous basis only during periods of crisis (meeting criteria established by the Secretary) and only as necessary to maintain the terminally ill individual at home.

"(2) The term 'hospice program' means a public agency or private organization (or a subdivision thereof) which—

"(A)(i) is primarily engaged in providing the care and services described in paragraph (1) and makes such services available (as needed) on a 24-hour basis,

"(ii) provides for such care and services in individuals' homes, on an outpatient basis, and on a short-term inpatient basis, directly or through arrangements with other hospice programs, and

"(iii) provides assurances satisfactory to the Secretary that the aggregate number of days of inpatient care described in paragraph (1)(G) provided in any 12-month period to individuals who have an election in effect under section 1812(d) with respect to that agency or organization does not exceed 20 percent of the aggregate number of days during that period on which such elections for such individuals are in effect;

"(B) has an interdisciplinary group of personnel which—

"(i) includes at least (I) one physician as defined in subsection (r)(1)), (II) one registered professional nurse, (III) one social worker, and (IV) one pastoral or other

counselor, employed by the agency or organization,

"(ii) provides the care and services described in paragraph (1), and

"(iii) establishes the policies governing the provision of such care and services;

"(C) maintains central clinical records on all patients;

"(D) does not discontinue the care it provides with respect to a patient because of the inability of the patient to pay for such care;

"(E)(i) utilizes volunteers in its provision of care and services and (ii) maintains records on the use of these volunteers and the cost savings and expansion of care and services achieved through the use of these volunteers,

"(F) in the case of an agency or organization in any State in which State or applicable local law provides for the licensing of agencies or organizations of this nature, is licensed pursuant to such law; and

"(G) meets such other requirements as the Secretary may find necessary in the interest of the health and safety of the individuals who are provided care and services by such agency or organization.

"(3)(A) An individual is considered to be 'terminally ill' if the individual has a medical prognosis that the individual's life expectancy is six months or less.

"(B) The term 'attending physician' means, with respect to an individual, the physician (as defined in subsection (r)(1)) whom the individual identifies as having the most significant role in the determination and delivery of medical care to the individual at the time the individual is to be provided hospice care.

"(4) The term 'immediate family' means, with respect to an individual, the individual's spouse, parents, and children, and another person (not employed by a hospice program providing hospice care to the individual) who has assumed (as determined in accordance with guidelines of the Secretary) primary responsibility for assisting in the care of the individual.".

SEC. 5. Section 1862(a) of the Social Security Act is amended—

(1) by inserting ", or, in the case of hospice care, which are not reasonable and necessary for the palliation or management of terminal illness" before the semicolon at the end of paragraph (1);

(2) by inserting "(except, in the case of hospice care, as is otherwise permitted under paragraph (1))" in paragraph (6) after "comfort items"; and

(3) by inserting "(except, in the case of hospice care, as is otherwise permitted under paragraph (1))" in paragraph (9) after "custodial care".

SEC. 6. (a) Section 1863 of the Social Security Act is amended by striking out "and (cc)(2)(I)" and inserting in lieu thereof "(cc)(2)(I), and (dd)(2)".

(b) Section 1864(a) of such Act is amended—

(1) by inserting "or whether an agency is a hospice program" in the first sentence after "home health agency,"; and

(2) by striking out "or home health agency" in the second sentence and inserting in lieu thereof "home health agency, or hospice program".

(c) Section 1865(a) of such Act is amended by striking out "or (o)" in the last sentence and inserting in lieu thereof "(o), or (dd)".

(d) Section 1866(b)(4)(A) of such Act is amended by inserting "or hospice care" after "home health services".

SEC 7. (a) The amendments made by this Act apply to hospice care provided during and after the fourth month beginning after the date of the enactment of this Act.

(b) In order to provide for the timely implementation of the amendments made by this Act, the Secretary of Health and Human Services shall, not later than 90 days after the date of the enactment of this Act, promulgate such final regulations (whether on an interim or other basis) as may be necessary to set forth—

(1) a description of the care included in "hospice care" and the standards for qualification of a "hospice program", under section 1861(dd) of the Social Security Act, and

(2) the standards for payment for hospice care under part A of title XVIII of such Act, pursuant to section 1814(i) of such Act.●

● Mr. CHILES. Mr. President, I am very pleased to join today with Senator DOLE to introduce a bill to recognize and establish hospice care as a medicare alternative for care of the terminally ill.

Providing medicare reimbursement for hospice care is a sound example of achieving good medicine and good public policy at the same time. This bill would make it possible to recognize the human and caring health services which are so often the choice of terminally ill patients and their families, and save money for the medicare program at the same time.

Hospice care has become more and more popular throughout the country as an effective substitute, both medically and emotionally, for the more costly acute hospital care which is often the only choice for terminal patients now. Since hospice is not recognized as a comprehensive form of care under medicare, however, its development has been hindered.

The concepts in this bill closely parallel the successful hospice experience in the Nation, and particularly in my own State of Florida. With its bipartisan introduction in both the Senate and the House of Representatives, we can now move ahead and make hospice care a realistic alternative for thousands of medicare beneficiaries.

What this bill would do, first, is permit medicare beneficiaries who are certified by their physicians as having 6 months or less to live to elect to receive a full range of hospice services instead of utilizing their medicare hospital insurance benefit. The hospice benefit, if chosen by the patient and his or her family, would be available for up to two lifetime benefit periods of 180 days each.

The services provided as part of the hospice benefit would include physician's services; a full range of nursing and home health aide services; palliative care, such as painkilling drugs; and counseling support for the patient and bereaved family members.

Under the terms of the bill, hospice services would primarily be delivered in the home of the patient. A terminally ill patient could be institutionalized only when necessary during crisis periods and to provide a respite period for family members.

Second, the bill would set standards which must be met by any hospice program in order to qualify for medicare reimbursement. A hospice program would be required to furnish care directly or through arrangements with other hospice services, as needed, on a 24-hour basis. The hospice would be required to have one or more physicians, registered professional nurses, social workers, pastoral or other counselors, and volunteers. The hospice would also have to be licensed under any existing State licensing program for hospice care.

Third, the cost to the medicare program would be limited by ceilings on the amounts payable for hospice services and the number of days which could be spent in an in-patient setting would be limited to no more than 20 percent of the total hospice benefit period.

It gives me a great deal of pleasure to be a sponsor of this bill because so much of its development is based on the hospice experience in Florida. In 1979, the Florida Legislature passed the first State law in the Nation to license and supervise hospice care. Since then, the Florida hospice program has become a model for the Nation. There are now hospice programs throughout the State. Dr. Daniel C. Hadlock, the president of the National Hospice Organization and a leader in the development of hospice throughout the country, is a Florida oncologist.

The Florida program is, like this bill, based on a full range of hospice services primarily provided in the home with backup inpatient care available for acute episodes. The Florida program also provides counseling services to allow bereaved family members of terminal patients to obtain help adjusting to their loss.

Another aspect of the Florida experience, also included in this bill, is a recognition of the heavy involvement of volunteers in the hospice program. In Florida over 2,000 volunteers have been giving freely of their time in a number of ways. Volunteers provide physician care, nursing, counseling, advocacy services to obtain special services for patients and their families, and even on occasion actually provide food and shelter to the families of hospice patients. The unstinting contributions of caring hospice volunteers have been an indispensable part of bringing the hospice movement as far as it is in this country today. Every one of Florida's 11 hospice programs was started, in large part, by volunteers. I consider it extremely important that this element of voluntary caregiving in hospice programs be preserved. The bill we are introducing today recognizes this by requiring that any hospice program have an active volunteer component as a condition for medicare reimbursement.

It is rare when we can come up with a way to improve medicare benefits without any additional cost to the program. But this is the case with hospice.

One way to look at the potential cost-savings aspect of this bill is to consider that, under current law, medicare will pay about $7,000 for hospital care during the last 6 months of life for each of 200,000 medicare-eligible persons who will die of cancer this year. In a recent National Cancer Institute hospice demonstration program, the highest cost of the hospice services available to this same patient and his family during the same period of time was $4,500.

A similar study of patients in northeast Florida conducted by the Methodist hospice program in Jacksonville showed that costs for the in-patient portion of care for terminally ill cancer patients were one-fifth per day less than the costs of a typical hospital day. The average per day cost for acute hospital care was

over $250. The average per-day cost for in-patient hospice care was $170. In addition to this per-day savings for hospital stays, the Methodist hospice study showed that the total number of days spent in an in-patient setting was cut in half for patients in the hospice program. Most of the hospice care was provided through the less costly home care component of the hospice program.

I would also like to point out that covering hospice services under medicare, as they are defined in this bill, is not an add-on to the medicare program. Anyone who would be eligible for the hospice benefit would already be entitled to medicare reimbursement for hospital, skilled nursing home, or home health services. If a patient elects to participate in a hospice program, he or she would give up entitlement to these other medicare benefits. A patient would be free, however, to give up the hospice benefit and reelect a full hospital benefit if desired.

Nor does this bill mandate the creation of new health providers. Hospice programs provide care for patients in their own homes and, when necessary for short periods of time, in existing hospitals and nursing homes. A hospice program would also have to meet any existing State licensing standards, including certificate of need requirements, before it could be eligible for medicare reimbursement.

The time to recognize hospice services as an alternative to costly, often painful, and frequently unwanted hospital care for the terminally ill patient has come. We have learned a lot from the Florida experience and from the growing hospice movement all across the country, and I look forward to hearings on this bill as early as possible next year.●

● Mr. BAUCUS. Mr. President, I am pleased to join Senator DOLE, chairman of the Finance Committee, in presenting a bill to provide for medicare coverage of hospice care. The hospice movement has been active in my own State since 1979, and currently there are six hospices operating in Montana, with a number in the planning stage. Hospice care has become an increasingly popular alternative to traditional methods of treating the terminally ill. This bill should provide the members of the Finance Committee with a starting point to take action in this area, and I expect the committee to pay special attention to the cost implications of the bill, its assurance for quality hospice services, and the method of medicare reimbursement.

While I am excited by the possibilities presented by this bill in the area of hospice care, I feel that the Finance Committee should move carefully in this area, conduct the necessary hearings, and investigate all possible means to improve this measure.●

● Mr. HATCH. Mr. President, I rise to commend and congratulate my colleague, Senator DOLE, with whom I join as a cosponsor of his legislation to extend hospice services under medicare. The bill being introduced today would allow those terminally ill patients who are expected to die within 6 months to be medicare-eligible for hospice services. That is, it would make it possible for them to have the medical and homemaker care and comfort especially designed to help people during the last few months of their lives.

The central provision in this legislation provides terminally ill patients, these being cancer patients in most cases, with the option of remaining and being cared for at home should they choose to do so. Institutional care for these patients is often very painful and expensive, yet tragically ineffective.

While clinical and pathological experts continue to debate which form of cancer treatment is best and under what circumstances, nearly everyone at least agrees that a patient ought to have the choice of remaining in his or her own home. For those who are physician-certified to have a terminal illness and who are eligible to receive medicare, this legislation for the first time would allow them to spend these last days at home.

Today the Committee on Labor and Human Resources marked up S. 234, giving final committee consideration to the Community Home Health Services Act which I introduced last January. The provisions in this bill which extend medical and homemaker home health care services for the elderly infirm and the disabled are in many ways natural complements to comparable sections of Senator DOLE's bill being offered today which provides for home health care for the terminally ill.

Hospices and the other forms of bereavement care outlined in Senator DOLE's legislation, as with many home health care services as outlined in my own bill, S. 234, are not now included under medicare. To the extent that they are not, citizens needing such health and nonmedical forms of assistance are not permitted to get them. Allowing these citizens options other than the lonely road to institutionalization is what our separate but I believe parallel legislative efforts are all about.

Senator DOLE's legislation is enlisted for a cause as urgent as it is worthy. Several of its provisions eliminate the federally created hurdles blocking reimbursement, without compromising needed statutory and regulatory mechanisms needed to stem possible fraud and abuse.

We have an opportunity here to minimize the pain and suffering for thousands of Americans who will die between now and the end of 1982. We have a chance to employ cost-effectiveness and commonsense in pursuit of a very humane purpose. Every Member of this Chamber ought to cosponsor Senator DOLE's very worthy bill, and expedite its legislative consideration.●

● Mr. HEINZ. Mr. President, I am pleased to join my distinguished colleague, the chairman of the Finance Committee, Mr. DOLE, in introducing today legislation which will provide for hospice care under the medicare program.

Mr. President, when medicare was established in 1965, hospice programs in this country did not exist. Indeed, fewer than 8 years have passed since the opening of the first hospice program of care in the United States.

Today, there are hospice programs in every State of the Union. The total number of hospice programs will soon surpass 400.

The bill we are introducing today will bring the medicare program up to date with the progress in our health care delivery system across the country. This legislation will give medicare beneficiaries the choice to participate in qualified hospice programs.

Mr. President, hospice care is designed to help the terminally ill continue life with minimal disruption in their family activities, including working and remaining in the family environment.

For many people, an hospice alternative is a much more humane and dignified way of coping with their illness. Instead of relying on institutional care, either inpatient hospital or nursing home care, hospice programs emphasize home care. Inpatient facilities are available as back-up support. I stress that we are not talking about building new facilities where people will go to die. Rather, we are primarily talking about supportive services necessary to enable dying people to live at home.

A key facet of the hospice concept is involvement of the family in caring for the dying person. Hospice programs also help the family cope with the stresses of the patient's illness and death.

Mr. President, despite the nationwide popularity of hospice care as an effective substitute, both medically and emotionally, for institutional care, the Government's largest health care reimbursement system—medicare—does not recognize these important services. As a consequence, older and disabled Americans who choose hospice care instead of institutional care are, in effect, penalized for that choice.

The irony, Mr. President, is that hospice services undoubtedly cost no more than the institutional services medicare currently provides for the terminally ill. Indeed, hospice care may even save money for the medicare program. The services that hospice programs can provide include social services, chore services, nursing, therapy, pastoral counseling, family counseling and bereavement care, physician services, and pain control, as well as hospital services.

Mr. President, this bill provides Congress with a rare opportunity to improve health care for older and disabled Americans at no additional cost. The adoption of this legislation promises to increase the responsiveness, as well as the efficiency, of our Nation's health care system.●

By Mr. SYMMS:

S. 1960. A bill to amend the Internal Revenue Code of 1954 to clarify the definition of geothermal energy, and for other purposes; to the Committee on Finance.

DEFINITION OF GEOTHERMAL ENERGY

● Mr. SYMMS. Mr. President, I am today introducing legislation to amend the Energy Tax Act of 1978 (Public Law 95-618) to clarify the definition of "geothermal energy" within that act and to assure the application of the residential and business tax credits to energy systems that are supplied primarily from geothermal sources. The bill is estimated to have only a minimal effect on revenues.

Although this Senator has been an opponent of energy tax credits since they

were first implemented several years ago, I certainly feel that in this instance, a bureaucratic inequity has been created by a regulatory misinterpretation of the intent of Congress.

Specifically, this legislation is necessary because the Internal Revenue Service has taken an unreasonably restrictive approach to implementing the geothermal provisions of the Energy Tax Act. For instance, regulations which the IRS has issued to implement the residential energy tax credit provisions of the 1978 law state that only water of a temperature of 122°F (50°C) or greater qualifies as a "geothermal deposit." This means that homeowners who have water cooler than 122°F cannot qualify for the residential energy credit even if the water is still hot enough for space heating purposes. This arbitrary temperature requirement was not mandated by the Energy Tax Act, and there is absolutely no evidence that Congress intended to so limit the application of the residential energy credit. In fact, just the opposite is true.

When the Senate Finance Committee approved the Energy Tax Act, its stated purposes were to encourage "consumers of oil and gas to conserve energy and convert to alternative energy sources." The restrictive IRS position effectively excludes many homeowners and businessmen from exercising a conversion to geothermal energy resources.

Another example of how the IRS regulations limit the application of the tax incentives enacted in 1978 is the case of a company building an electrical generating plant using geothermal energy and waste wood. According to the regulations promulgated by the IRS in response to the business energy investment credits established in the Energy Tax Act, the owners of the plant can take the geothermal investment credit on the equipment which is run solely on geothermal energy and the biomass credit on the equipment which is exclusively fueled by wood residues.

However, those components of the plant which use energy from both geothermal and biomass sources cannot qualify for either credit. Thus, under the IRS regulations, major portions of a "hybrid" powerplant—including such components as the turbine generator set—would not qualify for the business energy credit. Not only is such an interpretation of congressional intent in approving the Energy Tax Act unsubstantiated, it is contrary to the legislative history surrounding this law. Clearly, Congress was trying to encourage energy entrepreneurs to develop innovative energy systems.

My work as a member of the Energy and Agricultural Taxation Subcommittee of the Senate Finance Committee confirms my belief that our energy tax laws should not discriminate against one energy production form over another, and that they should not be subject to the whims of regulatory interpretation.

As usual, the Washington bureaucrats disregarded the intent of Congress in enforcing our laws, and as is often the case, their interpretation hurts the little guys. My sponsorship of this legislation is intended to correct that inequity, and allow the energy tax laws to do what they were meant to do—hasten geothermal development in Western States like Idaho, wherever there are hydrothermal or geothermal resources.

Mr. President, I ask unanimous consent that a fact sheet which explains the need for this legislation and details its four main provisions, and the text of the bill be printed at this point in the RECORD.

There being no objection, the bill and fact sheet were ordered to be printed in the RECORD, as follows:

S. 1960

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That—

(a) CLARIFICATION OF DEFINITION OF GEOTHERMAL ENERGY.

(1) Paragraph (3) of section 613(e) of the Internal Revenue Code of 1954 (defining geothermal deposit) is amended to read as follows:

"(3) GEOTHERMAL ENERGY DEFINED.—For purposes of paragraph (1), the term 'geothermal energy' means the natural heat of the earth (at any temperature) which is stored in rocks, an aqueous liquid or vapor (whether or not under pressure), or any other medium. A geothermal well shall in no case be treated as a gas well for purposes of this section or section 613A, and this section shall not apply to any geothermal property which is located outside the United States or its possessions."

(b) CLARIFICATION OF APPLICATION OF BUSINESS CREDIT AND RESIDENTIAL CREDIT TO GEOTHERMAL PROPERTY.—

(1) Subparagraph (D) of section 44C(c)(7) of such Code is amended by adding at the end thereof the following: "In the case of a system which uses both geothermal energy and an energy source not eligible for the credit under this section, all of the equipment comprising the system shall be eligible for the credit if, on a British thermal unit (BTU) basis, geothermal energy provides more than 80 percent of the energy in a typical year for which the system is designed. If less than 80 percent of the energy is supplied by geothermal energy, the credit shall apply to those portions of the system which produce, distribute, transfer, extract, or use energy which is more than 50 percent supplied by geothermal energy (on an annual BTU basis)."

(2) Paragraph (3) of section 48(1) of such Code is amended by adding at the end thereof the following new subparagraph:

"(D) APPLICATION OF CREDIT UNDER SECTION 46 TO EQUIPMENT WHICH USES BOTH GEOTHERMAL ENERGY AND ANOTHER ENERGY SOURCE.—

(i) In the case of a system which uses both geothermal energy and an energy source not eligible for the credit under Section 46, all of the equipment comprising the system shall be eligible for the credit for Solar, Wind, or Geothermal Property under section 46(a)(2)(C) if, on a British Thermal Unit (BTU) basis, geothermal energy provides more than 80 percent of the energy in a typical year for which the system is designed. If less than 80 percent of the energy is supplied by geothermal energy, the credit shall apply to those portions of the system which produce, distribute, transfer, extract, or use energy which is more than 50 percent supplied by geothermal energy (on an annual BTU basis).

(ii) In the case of a system which uses both geothermal energy and another energy source eligible for the credit under section 46 (such as biomass, solar, wind, ocean thermal, or hydroelectric), all of the equipment comprising the system (up to, but not including the electrical transmission stage in the case of an electrical generation facility) shall be eligible for the credit for Solar, Wind, or Geothermal Property under section 46(a)(2)(C) if, on a BTU basis, more than 80 percent of the energy in a typical year for which the system is designed, is supplied by geothermal energy, or any of the other forms of energy eligible for the credit under section 46, or any combination thereof (hereinafter referred to in this subparagraph as "qualified sources"). If less than 80 percent of the energy is supplied by qualified sources, the credit shall apply to those portions of the system which produce, distribute, transfer, extract, or use energy which is more than 50 percent supplied by such qualified sources (on an annual BTU basis)."

(c) CONFORMING AMENDMENTS.

(1) Clause (ii) of section 44C(c)(2)(B) of such Code is amended by striking "any geothermal deposit" and inserting in lieu thereof "geothermal energy".

(2) Clause (1) of 44C(c)(5)(A) of such Code is amended by striking out "energy derived from the geothermal deposits" and inserting in lieu thereof "geothermal energy'.

(3) Clause (viii) of section 48(1)(3)(A) of such Code is amended by striking out "energy derived from geothermal deposit" and inserting in lieu thereof "geothermal energy".

(4) Clause (ii) of section 57(a)(11)(D) of such Code is amended to read as follows:

"(ii) all geothermal properties."

(5) Subsection (c) of section 263 of such Code is amended by striking out "any geothermal deposit" and inserting in lieu thereof "geothermal energy".

(6) Subparagraph (E) of section 465(c)(1) of such Code is amended by striking out "geothermal deposits" and inserting in lieu thereof "geothermal energy".

(7) Paragraph (1) of section 613(c) of such Code is amended by striking out "geothermal deposit" and inserting in lieu thereof "geothermal well".

(8) Subsection (e) of section 613 of such Code is amended—

(A) by striking out "deposits" each place it appears in paragraph (1) and inserting in lieu thereof "properties", and

(B) by striking out "DEPOSITS" in the subsection heading and inserting in lieu thereof "PROPERTIES."

(9) Subsection (b) of section 614 of such Code is amended—

(A) by striking out "geothermal deposits" in the text and inserting in lieu thereof "geothermal wells", and

(B) by striking out "GEOTHERMAL DEPOSITS" in the subsection heading and inserting in lieu thereof "GEOTHERMAL WELLS".

(10) Paragraph (1) of section 614(c) of such Code is amended by striking out "oil and gas wells and geothermal deposits" each place it appears and inserting in lieu thereof "oil, gas, and geothermal wells".

GEOTHERMAL TAX LEGISLATION

BACKGROUND AND NEED

In its report on the Energy Tax Act of 1978 (P.L. 95-618), the Senate Finance Committee stated that the purposes of the legislation were to "induce consumers of oil and gas to conserve energy and convert to alternative energy sources." To meet this goal, the Energy Tax Act provided major tax incentives for the production of energy from such resources as geothermal, solar, wind, and biomass. These incentives—mostly in the form of tax credits, deductions, and allowances—have generated unprecedented interest in developing alternative energy projects.

However, regulations recently issued by the Internal Revenue Service (IRS) have drastically limited the application of the alternative energy incentives enacted in 1978 and reaffirmed and expanded by the Windfall Profit Tax Act (P.L. 96-223). With regard to geothermal energy, four specific limitations imposed by the IRS appear to run contrary to the intent of Congress:

Only water of a temperature of 50°C (122° F) or greater qualines as "geothermal energy", even though the Energy Tax Act itself contains no temperature threshold. As a result, homeowners or businesses with water that is cooler than 50°C cannot qualify for the residential or business investment tax credits.*

A homeowner who installs a geothermal system to heat his residence cannot qualify for the residential credit unless 100 percent of the energy in the system is supplied by geothermal sources. Geothermal energy systems often include peaking equipment fueled by oil, gas, or coal. This peaking energy typically provides less than 10 to 20 percent of the total annual energy load. The extra wells, pipe, and pump capacity required for a system to be 100 percent geothermal on the few coldest days of the year add too much to the cost to be attractive.

A business that installs geothermal equipment cannot qualify for the investment tax credit if the geothermal energy is "mixed" with energy from another source. Geothermal resources may not, in many instances, be hot enough to fully satisfy a particular industrial process requirement. However, by adding a few degrees to the heat supplied from the geothermal source, it will often be possible to replace a large fraction of the oil or gas used in a plant or facility. Furthermore, many industrial processes involve several steps at different temperatures. Some of these steps can use geothermal heat, but others may require superheating. Under the IRS limitation, if an industrial or commercial geothermal system requires even a minimal addition of nongeothermal heat, then the entire system becomes ineligible for the energy investment tax credit.

A company building (for instance) a large hybrid geothermal-waste wood electrical generating plant can take the geothermal investment credit on the equipment which is run solely on geothermal energy and the biomass credit on the equipment which is exclusively fueled by biomass. But, those components of the plant which use energy from both geothermal and biomass sources cannot qualify for either credit.

A LEGISLATIVE PROPOSAL

A bill to eliminate the limitations contained in the IRS regulations implementing the Energy Tax Act has been drafted for introduction in the Senate. That bill has four basic elements:

1. The definition of geothermal energy in the Internal Revenue Code is amended to make it explicit that there is no temperature requirement for the geothermal tax credit for residences or the business investment credit.

2. In conjunction with the redefinition of geothermal energy to eliminate the temperature threshold, certain conforming amendments are made to the Internal Revenue Code.

3. In the case of a residence or business which uses both geothermal energy and energy from a source not eligible for the credits (such as oil or gas), a new eligibility formula is proposed: all of the equipment of the system shall be eligible for the credit if more than 80 percent of the energy is supplied from geothermal resources. If less than 80 percent come from geothermal, the credit shall apply to only those portions of the system which produce, extract, transfer, or use energy which is more than 50 percent supplied by geothermal.

4. For a system which uses geothermal energy and another energy source which is eligible for the energy investment credit (such as biomass, wind, or solar), all of the equipment of the system shall be eligible for the 15 percent tax credit if more than 80 percent of the energy comes from geothermal or any of the other alternative energy sources eligible for the credit, or any combination thereof (referred to as "qualified sources"). If less than 80 percent of the energy is supplied by qualified sources, the credit shall apply to those portions of the system which produce, distribute, transfer, extract, or use energy which is more than 50 percent supplied by such qualified sources.

Prepared for GeoProducts Corporation by F. H. Hutchison, September 10, 1981.●

* The residential credit is 40 percent of the first $10,000 of qualifying expenditures. The business investment credit for qualifying equipment is set at 15 percent.

By Mr. MITCHELL:

S. 1961. A bill to amend the Internal Revenue Code of 1954 to provide energy tax credits for equipment used aboard or installed on fishing vessels; to the Committee on Finance.

FISHING TAX CREDITS

Mr. MITCHELL. Mr. President, I am today introducing legislation to extend the existing energy tax credit program and provide incentives to American fishermen when they reduce the amount of energy which their vessels consume.

When the energy tax credit program was established in 1978, and later modified in 1980, its provisions were so specific that fishing vessel operators are not eligible for tax credits when they invest in equipment to reduce fuel consumption.

I can think of no good reason why a land-based businessman ought to get tax write-off for a fuel-efficient furnace or some other device, while the sea-going businessman—a fisherman—cannot take a credit for fuel-saving equipment which meets his needs.

My bill corrects this situation.

When a fisherman installs expensive special equipment—for instance a "Kort" nozzle, a variable pitch or two-speed propeller, or a fuel flow meter—under my bill he will be eligible to receive a 10-percent investment tax credit. When added to the standard 15-percent investment tax credit, this means that one-quarter of the cost of the equipment may be written-off by the purchaser.

Our national energy policies place commercial fishermen in a difficult competitive situation with fishermen in nations which have controlled fuel prices, such as Canada and Mexico.

My legislation will help them cope in the marketplace and will insure that they receive the same kinds of tax treatment enjoyed by land-based businesses which take direct action to conserve fuel.

I ask unanimous consent that the full text of my bill appear in the RECORD at this point:

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1961

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 48(1) of the Internal Revenue Code of 1954 (relating to property for which businesses may take an energy investment credit) is amended—

(a) by inserting after paragraph (2)(ix) the following new paragraph:

"(x) qualified harvesting vessel equipment."

(b) by redesignating paragraph (17) as paragraph (18); and

(c) by inserting after paragraph (16) the following new paragraph:

"(17) QUALIFIED HARVESTING VESSEL EQUIPMENT.—The term "qualified harvesting vessel equipment" means equipment used aboard or installed on a vessel engaged in the harvesting of marine resources which reduces fuel (which can be oil, diesel fuel or gasoline) consumption, and is—

(A) a fuel flow meter or fuel management digital microprocessor,

(B) a hull speed meter,

(C) a propeller thrust nozzle,

(D) a variable pitch or two-speed propeller,

(E) a large-bladed propeller,

(F) a bow or side thruster,

(G) a hull treatment,

(H) a bulbous bow,

(I) an on-board heat exchanger,

(J) auxiliary sail equipment, or

(K) automatic Loran C navigational apparatus."

By Mr. RIEGLE:

S. 1962. A bill to amend the Credit Control Act; to the Committee on Banking, Housing, and Urban Affairs.

AMENDMENT OF CREDIT CONTROL ACT

● Mr. RIEGLE. Mr. President, I am introducing today a bill that both would retain the President's flexibility of action during periods when interest rates hit dangerously high levels and would provide greater public accountability under the Credit Control Act of 1969.

I am pleased that my colleagues, Senator TSONGAS, Senator MOYNIHAN, and Senator WILLIAMS are also original cosponsors of this legislation. I urge other Senators to consider the bill carefully and join us in support of it.

Mr. President, I am certain that the need for our bill will become increasingly urgent over the next several months. I want to take a few moments to describe the bill and my reasons for believing that the Congress should give it prompt consideration.

First, the bill explicitly recognizes that several key sectors of the American economy are extremely vulnerable to sharp rises in the cost of borrowing or to severe reductions in the supply of credit.

Tight monetary policies place very unequal burdens on different economic sectors. The Federal Government always gets the credit it needs. Powerful corporations can also get credit readily—even for nonproductive purposes. But many borrowers who depend on credit for their financial survival are very quickly shut out of the credit markets when the money supply is tightened.

We have seen stark evidence of this very recently as U.S. banks opened up over $20 billion in lines of credit to finance corporate takeovers at the same time that credit windows were being slammed in the faces of the thousands of small borrowers who needed to finance productive investment.

This bill therefore identifies several key groups of borrowers as "credit sensitive sectors of the economy."

Those sectors deserve special attentoin, Mr. President. When farmers cannot get sufficient credit at affordable rates, their incomes are deeply cut and they cannot finance their land, equipment, feed, and fertilizer.

When families are unable to finance the purchase of a new home, economic disaster hits the homebuilding, lumbering, building supply, and many other industries that contribute to home construction.

When interest rates soar, the competitive strength of the U.S. auto industry is severely damaged as car sales

plummet. Auto dealers are crushed by immense inventory costs, and manufacturers are forced to delay vital investments in more productive plant and equipment.

When credit is tightened, many of the best-managed small businesses may be forced into bankruptcy because they cannot finance the inventory, the minimum working capital and the other investments that are needed to remain competitive.

This bill would direct the Federal Reserve Board to take into account the credit needs of those sectors when administering the Credit Control Act.

Last July I asked Federal Reserve Board Chairman Volcker to prepare a report on how credit sensitive sectors of the economy are being affected by current tight money policies. The report recognized that these sectors are being forced to bear an unfair burden, but no specific steps are being taken to correct that unfairness either by the administration or the Fed. In fact, the dominant attitude within the Reagan administration until now has been to ignore the special needs of many key sectors of the economy. I believe the Congress should make sure that these sectors get the careful attention they deserve, and Congress should do so quickly.

Second, Mr. President, our bill would give fuller recognition of the constitutional responsibility of the Congress for monetary policy. In passing the Credit Control Act of 1969, the Congress recognized that the Federal Reserve Board may need special powers to act effectively in the national interest when the President finds there is an extraordinary economic emergency.

Our bill would make the Board and the President more accountable to Congress and the public when exercising those powers.

The bill would require the President to report regularly to Congress whenever he invokes the Credit Control Act, first, stating his reasons for giving the Board special authority under the act, second, describing the Board's actions under that authority, third, presenting his analysis of how effective the Board's actions are in achieving the purposes of the act, and fourth, identifying the impact of those actions on credit sensitive sectors of the economy and on productive investment in all sectors. These reports would be submitted every 3 months so long as the act is invoked.

Also, whenever the Federal Reserve Board prescribes a regulation under the act, the bill would require the Board to report to the Senate and House Banking Committees setting forth the provisions of the regulation, describing the methods chosen to implement the regulation and explaining the Board's reasons for issuing the regulation.

The bill, finally, requires each Banking Committee to hold hearings promptly on each regulation and report to its respective House on the appropriateness of the regulation and its effect on credit sensitive sectors of the economy.

I believe that these provisions of the bill would insure that the Board is fully accountable to the Congress and the public in administering the act. They would also allow the President and the Board to take the fast action that is necessary to avoid undesirable disruptions in the credit markets.

Third, our bill would retain the President's emergency standby authority under the Credit Control Act through December 31, 1985. A Senate floor amendment, which was added to the COWPS authorization bill last year on a close vote, set an expiration date for the Credit Control Act. Therefore, unless Congress acts, the President will lose the emergency authority on July 1, 1982, that is now available to him under the Credit Control Act.

The existence of that standby authority greatly increases the flexibility and effectiveness of Presidential action in a credit crisis. Even if the President does not invoke the act, his ability informally to ease a credit crisis is greatly enhanced by the standby authority. That is why I believe that this President could have been doing much more than he has over the last year to reduce the diversion of credit into nonproductive purposes and to provide some relief to farmers, homebuilders, auto dealers, other credit sensitive small businesses and consumers.

The usefulness of this standby authority is great today. The need for it may be even greater a year from now if leading economists are right in predicting an even more severe credit crisis when the current recession is over.

Mr. President, I have discussed this bill with people from a wide spectrum of opinion and from many different sectors. I found a broad consensus that our bill would be an important improvement to the Credit Control Act. Virtually no one felt that it would be better for the country to let the current act expire and then force Congress to reauthorize it in the midst of a severe credit crisis.

Several organizations have written me of their support. I ask that their letters be printed in the RECORD at the conclusion of my remarks together with the text of the bill.

I urge my colleagues to give this bill prompt and favorable consideration.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1962

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 202 of the Credit Control Act is amended by redesignating subsections (h) through (l) as subsections (i) through (m) respectively, and by inserting after subsection (g) the following:

"(h) The term 'credit sensitive sectors of the economy' includes but is not necessarily limited to—

"(1) farming and industries that produce or distribute agricultural equipment or supplies;

"(2) housing, including homebuilding, housing sales, and industries that produce or distribute residential construction materials;

"(3) the motor vehicle industry, including manufacturers, suppliers, and dealers;

"(4) consumers; and

"(5) small businesses.".

SEC. 2. Section 205 of the Credit Control Act is amended by adding at the end thereof the following:

"(c) In administering this Act, the Board shall take into account the effects of such regulation and control on the availability of credit to the credit sensitive sectors of the economy;

"(d)(1) The President shall, at the times prescribed in paragraph (2) of this subsection, submit to the Congress reports setting forth—

"(A) his reasons for authorizing the Board to regulate and control credit under subsection (a);

"(B) a description of the Board's action under that authority;

"(C) his analysis of the effectiveness of the Board's action in achieving the purposes of this Act; and

"(D) the effect of the Board's action on credit sensitive sectors of the economy and on productive investment in all sectors.

"(2) Reports required under this subsection shall be submitted—

"(A) not later than three months after the President authorizes the Board to regulate and control credit under subsection (a);

"(B) every three months thereafter so long as the Board is authorized by the President to regulate and control credit under subsection (a); and

"(C) not later than three months after the date on which the Board's authority under this Act is terminated.".

SEC. 3. Section 206 of the Credit Control Act is amended—

(1) by inserting "(a)" before the words "The Board" at the beginning of the section; and

(2) by adding at the end thereof the following:

"(b) Whenever the Board prescribes a regulation under subsection (a), it shall transmit promptly to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives a written report containing—

"(1) the provisions of such regulation;

"(2) the methods chosen to implement the regulation; and

"(3) the reasons why the Board considers the regulation necessary or appropriate to achieve the purposes of this Act.

Each such Committee shall promptly hold hearings with respect to the regulation and shall report to its respective house on—

"(A) the consistency of the regulation with the purposes of this Act;

"(B) the impact the regulation will have on the credit sensitive sectors of the economy; and

"(C) such other matters the Committee deems appropriate.".

SEC. 4. Section 211 of the Credit Control Act is amended by striking out "June 30, 1982" and inserting in lieu thereof "December 31, 1985".

PROVISIONS OF S. 1962 TO AMEND THE CREDIT CONTROL ACT OF 1969

RECOGNIZE THE NEEDS OF CREDIT SENSITIVE SECTORS OF THE ECONOMY

Under current law, the President may authorize the Federal Reserve Board "to regulate and control any or all extensions of credit whenever the President determines that such action is necessary or appropriate for the purpose of preventing or controlling inflation. . . ." The Board would have broad authority so long as the President permits. The Act does not explicitly recognize that some key economic sectors are extremely vulnerable to tightening credit.

S. 1962 directs the Board to take into account the credit needs of "the credit sensitive sectors of the economy", a term that includes (1) farming and agricultural suppliers, (2) housing and building suppliers, (3) the motor vehicle industry, (4) consumers, and (5) small businesses generally.

The purpose of this provision is to assure equitable treatment under the Act for all economic sectors.

PROVIDE FOR CONGRESSIONAL OVERSIGHT

Under current law, neither the President nor the Board is required to consult with Congress on action taken under the Act.

S. 1962 would require the President to report to Congress on the Board's actions under the Act every three months as long as the authority is extended. The reports would explain the President's reasons for invoking the Act, his assessment of the Board's action under that authority and the impact on credit sensitive sectors of the economy.

The Board would be required to report to the House and Senate Banking Committees on each regulation it issues under the Act, describing the implementation of the regulation and setting forth the Board's reasons for issuing the regulation.

Each Banking Committee would be required to hold prompt hearings on each regulation and to report to its House on the regulation's consistency with the purposes of the Act, its impact on credit sensitive sectors of the economy and other matters the Committees deem appropriate.

The purpose of these provisions is to keep the Federal Reserve Board's action under close Congressional review.

EXTEND EXPIRATION DATE OF THE ACT

Under current law, the Credit Control Act of 1969 expires on June 30, 1982. An expiration date for the Act was imposed by a floor amendment to the COWPS reauthorization. The amendment passed the Senate on June 2, 1980 with a vote of 43–40.

S. Would change the expiration date of the Act to December 31, 1985.

Purposes of the amendment are:

To avoid depriving the President of emergency authority in the midst of the current interest rate crisis;

To strengthen the President's ability to jawbone voluntary steps;

To avoid Congressional action on new legislation in a crisis atmosphere.

NATIONAL ASSOCIATION OF HOME BUILDERS,
Washington, D.C., December 9, 1981.

Hon. DONALD RIEGLE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR RIEGLE: On behalf of the more than 123,000 members of the National Association of Home Builders (NAHB), I am writing to express our support for your legislation which would extend the expiration date of the Credit Control Act from June 31, 1982 until December 31, 1985. We believe this legislation is necessary to continue to provide the President with the necessary standby authority to deal with a credit emergency. The severe state of our economy and the uncertainty that lies ahead may warrant emergency action by the President as authorized under the Credit Control Act. We believe the time to act is now before another credit emergency occurs.

This legislation would also direct the Federal Reserve Board, when administering the Act, to take into account the needs of credit sensitive sectors of the economy, which include farming, housing, the automobile industry, consumers, and other small businesses. Since the homebuilding industry has borne a severely disproportionate share in the Federal Reserve Board's high interest policy designed to fight inflation, such legislation will serve to make the Fed more sensitive to the credit needs of home buyers and builders.

The proposed legislation would also require Congressional oversight over regulations issued by the Fed under the authority of the Credit Control Act. In addition, the President would be required to report to the Congress regularly on the Board's actions invoked under the Act. This provision provides Congress the opportunity to ho'd hearings and review any credit control measures when, and if, they are invoked.

I thank you for the opportunity to express our views on this important matter.

Sincerely,

HERMAN SMITH,
President.

NATIONAL FARMERS UNION,
October 23, 1981.

Senator DONALD W. RIEGLE, Jr.,
Ranking Member, Subcommittee on Economic Policy, Committee on Banking, Housing and Urban Affairs, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR RIEGLE: It is imperative in our view for the Congress to extend the Credit Control Act of 1969 beyond its scheduled June 30, 1982 expiration date.

From all appearances, the monetary strategy of the Federal Reserve Board and the White House is not succeeding and likely will not succeed. Meanwhile, agriculture, housing, the automobile industry and small business continue to be punished by the desperately high level of interest rates. The recession, now officially confirmed, is expected to continue through the first quarter of 1982.

While the prime rate has slightly softened in the past two months, some noted economists expect another upturn with perhaps a new record prime of 23 percent at some point in 1982.

At that juncture, it will be vital for the President to have discretionary powers, flexible in scope as in Title II of P.L. 91–151, so that he can direct the Federal Reserve Board to take selective actions to limit credit extensions, interest rates and to channel credit into housing and other essential activities such as agriculture and small business.

The language of Title II and the accompanying conference reports, wisely provide a variety of options at the disposal of the President.

In our opinion, the federal presence in credit markets has little impact in the existing credit explosion. True, the federal debt has now pierced the trillion dollar plateau, as a result of the high interest rate policies now in force, but the federal debt is only 14 percent of the total public and private debt load of $7.0 trillion. Federal debt has doubled since 1975, but private debt has tripled in that same period. Federal debt as a percentage of GNP will likely be 23 or 24 percent by the end of 1984, compared with the 28 percent rate five years ago and the 40 percent level of the early 1960's.

The outstanding debt of U.S. farmers, which was $82 billion in 1975, was $180.5 billion on the first of this year and is currently estimated to be in excess of $200 billion.

If the policy of constricting the money supply continues, it will mean that agriculture, housing and other essential users of credit will have to compete for capital in the commercial money markets against all sorts of speculative ventures and commercial developments of doubtful merit.

Such projects as gambling casinos, luxury hotels and shopping malls gobble up vast amounts of venture capital, which far more desirable should be devoted to essential services such as housing, food and agriculture or to modernization of manufacturing plant and equipment.

Another utterly wasteful diversion of capital takes place when one conglomerate swallows another. It is difficult to discern any benefit to American society from the acquisition by Dupont of Conoco, yet it took $7 billion in financing to accomplish that feat.

One may not prefer the stern medicine of credit controls or credit allocation, but they are clearly more acceptable than the intolerable continuation of high unemployment, inflation, recession and hardship.

Therefore, the Credit Control Act of 1969 ought to continue to be available so that the President has some tools when he at last recognizes the desperate situation in the national economy.

Yours respectfully,

GEORGE W. STONE,
President.

INDUSTRIAL UNION DEPARTMENT,
Washington, D.C., November 4, 1981.

Hon. DONALD W. RIEGLE, Jr.,
U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR RIEGLE: Crushing interest rates are devastating almost every part of the American economy. Not only are high interest rates retarding economic growth and fueling inflation, but they are also having a disproportionate impact on key sectors of our economy, including automobile and auto-related industries, small business, farming and housing. In addition, state and local governments are reeling under the pressure of skyrocketing debt service costs, resulting in reductions in public employment and critical social services.

While the Fed's tight money, high interest rate policy has tumbled the nation into recession, it has dropped states such as Michigan into the depths of depression. The auto industry's efforts to restore its position in the marketplace are being stifled by continued high and volatile interest rates.

On behalf of our 60 affiliated unions, I would like to express our very deep concern about the Federal Reserve's disastrous monetary policy and urge you to support the extension of the Credit Control Act of 1969, which expires in June of 1982.

The productive sectors of the American economy must be assured adequate credit at affordable prices. Currently, however, huge non-productive demands for credit—for corporate takeovers, commodity speculation, and condominium conversions—soak up vast amounts of loanable capital without strengthening the nation's economy one iota. As a result of these unproductive demands for capital, interest rates for productive loans are driven through the roof. We strongly feel that available credit must be targeted to productive industries such as housing, auto, farming, and small business—industries whose health is a prerequisite for a healthy American economy. The provisions of the Credit Control Act may be the only means available to assure adequate credit for these vital productive sectors.

We look forward to working with you on this very important issue.

Sincerely,

HOWARD D. SAMUEL.

NATIONAL COUNCIL FOR
LOW INTEREST RATES,
Washington, D.C., November 4, 1981.

Hon. DONALD W. RIEGLE,
U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR RIEGLE: The Federal Reserve's tight money policy is wreaking havoc on the American economy, driving interest rates to record levels and choking off investment and economic growth. Despite monetarist theory, we are seeing a resurgence in both inflation and unemployment as high interest rates have idled productive capacity and fueled inflation. The automobile and auto-parts industry, among others, is particularly hard hit, with production at one of its lowest levels in more than a decade.

Reflecting a widespread concern throughout industry and the labor movement, a coalition of business, labor, farm and consumer organizations has formed to voice opposition and develop alternatives to the Federal Reserve's disastrous tight money policy. The National Council for Low Interest Rates believes that there is an urgent need to redirect our nation's monetary policy in a way that lowers interest rates and encourages economic growth.

The Council also feels strongly that adequate and affordable credit must be provided to the productive sectors of our economy, that is, those sectors that are vital for stimulating job creation, productivity gains, and economic growth. Currently, non-productive uses of credit—corporate acquisitions and condominium conversions—compete with productive uses, forcing up interest rates and stifling economic growth.

The National Council for Low Interest Rates urges you, as a first step, to support the extension and strengthening of the Credit Control Act of 1969, which provides the means by which credit might be targeted to the vital productive sectors of our economy.

I have enclosed our Council's policy statement along with some background materials.

We look forward to working with you to help bring interest rates down.

Sincerely,

J. C. TURNER,
Chairman.

AMERICAN PUBLIC POWER ASSOCIATION,
Washington, D.C., October 27, 1981.

Hon. DONALD RIEGLE,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR RIEGLE: As you are well aware, every sector of the American economy is experiencing serious financial difficulties because of high interest rates. In particular, the electric utility industry is being severely impacted by these rates, relative to other sectors of the economy, because it is so capital intensive. The American Public Power Association, as the national service organization representing over 1,750 local publicly owned electric utilities, is therefore urging that Congress act now to bring rates down.

Publicly owned electric utilities have a commitment to provide their consumers with electrical service at reasonable rates. A key to meeting this commitment is the availability of affordable capital financing. However, public power agencies are now paying interest rates as high as 15 percent on their tax exempt bonds. Unless rates are reduced appreciably, the costs of reconditioning plants or building new ones may well become prohibitive.

APPA therefore encourages you to take a leadership role on this issue. One means of reducing rates may be to extend the Credit Control Act beyond its June 1982 expiration date. Under the Act, the President has the authority to direct the Federal Reserve Board to regulate credit during periods of high inflation. Given the current economic condition of the utility, automotive, and housing industries, for example, President Reagan may want to consider exerting his authority under this law. I hope you will consider introducing legislation to extend the Credit Control Act and take any other appropriate action that will bring interest rates down now.

Thank you for your consideration of our views. Please feel free to call on us for any assistance you may need in your efforts to reduce interest rates.

Sincerely,

ALEX RADIN,
Executive Director.●

By Mr. DENTON (for himself, Mr. EAST, and Mr. THURMOND):

S. 1963. A bill to improve the Internal Security of the United States by clarifying the notification requirements for foreign agents under section 951 of title 18, United States Code, and to increase the penalties for failure to notify; to the Committee on the Judiciary.

NOTIFICATION UNDER TITLE 18, UNITED STATES CODE

● Mr. DENTON. Mr. President, today I have introduced a bill which will serve to clarify the notification procedures for nondiplomatic foreign agents and to transfer the responsibility for receiving such notifications from the Secretary of State to the Attorney General.

Mr. President, 18 United States Code section 951[1] is an act which in its present form requires nondiplomatic agents of foreign governments to notify the Secretary of State prior to their acting within the United States, on behalf of the foreign government which they represent.

The problem is this: In all the years the State Department has had responsibility for receiving these notifications, and this dates back to June 15, 1917, the agency has never promulgated regulations nor formalized the procedures for receiving notifications. The State Department's view seems to have been that this act often puts the agency at odds with representatives of "client" states and, therefore, is an impediment to foreign relations. Additionally, officials from the Department of State have testified before a committee of the Congress that this law is coextensive with the Foreign Agents Registration Act of 1938, as amended, found in title 22, United States Code, sections 611 et seq. This is not the case.

In my view, apart from ceremony, there is little difference in receiving a formal notification from an individual, not a diplomat who represents a foreign government, when compared with receiving a formal notification from a diplomat who represents the same government. Moreover, my staff has made a very detailed study of the Foreign Agents Registration Act, and I am satisfied that the two statutes are in no way coextensive.

The Notification Act which this bill seeks to amend in its present form covers all activity performed by nondiplomatic agents who represent only foreign governments. It does not cover those who represent multinational corporations, foreign individuals, or political factions. In its present form it requires no disclosure other than the mere fact of intention to act.

The Foreign Agents Registration Act requires the registration of those who act for or in the interests of a foreign principal, which term is broadly defined, and conversely, the nature of activities covered under the act are rather limited. For example, the legislative history of the act makes it abundantly clear that the activities triggering registration and disclosure must be political or border on the political. "Political activity" is a term of art, which is defined in the act itself.

Mr. President, I believe the importance of 18 U.S.C. 951 should be apparent when we consider that the Department of Justice frequently utilizes it in the prosecution of major espionage cases and has found it to be a useful adjunct, especially in cases where it is difficult to establish the national defense character of classified materials transmitted by a defendant.

In transferring responsibility for the administration of this statute from the Department of State to the Department of Justice, I believe we allow for the creation of a mechanism whereby the Department of Justice is afforded an opportunity to monitor the activities of those who file notifications. The Department would thereby become informed when the activities cross the threshold which would trigger the registration and disclosure requirements of the Foreign Agents Registration Act, which it now administers. I would add that this bill imposes upon the Attorney General the duty to keep the Department of State informed regarding notifications received.

Mr. President, it should also be noted that while the period of imprisonment for violation of this 10-year statute is substantial, in my view the financial sanctions have not kept up with inflation and my bill would increase the financial penalty from $5,000 to $50,000.●

[1] 18 U.S.C. 951 (June 25, 1981, c.645, 62 Stat. 743.) Whoever, other than a diplomatic or consular officer or attaché, acts in the United States as an agent of a foreign government without prior notification to the Secretary of State, shall be fined not more than $5,000 or imprisoned not more than 10 years, or both.

By Mr. EAGLETON (for himself and Mr. DANFORTH):

S. 1964. A bill to designate certain lands in the Mark Twain National Forest, Missouri, which comprise about 17,562 acres, and known as the Irish Wilderness, as a component of the National Wilderness Preservation System; to the Committee on Energy and Natural Resources.

S. 1965. A bill to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately 6,888 acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area," as a component of the National Wilderness Preservation System; to the Committee on Energy and Natural Resources.

DESIGNATION OF CERTAIN AREAS AS WILDERNESS

● Mr. EAGLETON. Mr. President, I am pleased today to introduce with my colleague, Senator DANFORTH, two bills to designate Paddy Creek and Irish Wilderness areas as part of the National Wilderness System.

In terms of wilderness areas that lie west of the Great Divide, Missouri's wilderness areas are not much larger than the backyard. But each is unique within its own boundaries, and provides a very special retreat for the many Missourians who hike or canoe into the undeveloped areas each year.

Senator DANFORTH and I took great pride in cosponsoring a bill last year that designated 27,821 acres as wilderness. Previously, Senator Symington and I were successful in having Hercules Glades and Mingo Wildlife added to the Eastern Wilderness System. Missouri is one of the few States in the Midwest with potential wilderness areas left. Unfortunately, these two legislative victories did not complete the wilderness picture in Missouri. Two key areas remain to be added to the Missouri wilderness system—Paddy Creek and Irish Wilderness. I hope these two bills introduced today will complete the efforts begun in 1973 by Senator Symington and myself.

In 1976, legislation was introduced to establish some of Missouri lands as wilderness study areas—which included Paddy Creek. The congressionally mandated studies were passed, and the Na-

tional Forest Service began work on the studies. The studies, however, were overtaken by the Forest Service's national RARE I and II studies, which resulted in recommendations to Congress for areas across the country to be designated as wilderness. Paddy Creek was placed in a further planning category, awaiting the conclusion of the congressional study. This year ends the 5-year study period, and the Forest Service has recommended that the area be placed in the wilderness system.

Paddy Creek is 6,888 acres in Texas County, located in the south central Ozarks of Missouri. Little Paddy Creek, which flows northwestward, meets Big Paddy Creek, from the south, to form Paddy Creek. Paddy Creek then flows in the Big Piney River out of the Clark National Forest.

Paddy Creek is noted for high quality botantical and geological features, including outcroppings of the Roubidoux Sandstone formation. It has obvious and outstanding wilderness values that led to its designation by Congress as a wilderness study area.

Paddy Creek is very popular with hikers and backpackers and has many hiking and riding trails. There is also a one mile nature trail from the Paddy Creek recreation area with easy access for those who prefer an easier walk. Hunting and fishing are popular in and around the area and several caves are suitable for spelunking.

In an economic analysis, Paddy Creek supplies only 1.69 percent of the commercial forest land suitable for timbering in Texas County. There are no current grading areas on the Paddy Creek area and no proven mineral reserves. The Forest Service estimates no loss of man-years for the Houston multicounty planning unit if Paddy Creek is designated wilderness. Congress should act now to add Paddy Creek to the National Wilderness Preservation System.

Irish Wilderness has been called the crown jewel of the Missouri wilderness area. Named for an ill-fated settlement of Irish immigrants prior to the Civil War, the area was the first to be proposed for wilderness. It contains more track of pristine hollows, ridges, and bluffs than anywhere in the State. It is the home to many wildlife, including wild turkeys, black bears, and even some eastern cougars. Irish's limestone topography and geological structure is outstanding, and is used by many students of geology for field examinations.

The Senate passed a bill in 1973 to designate Irish Wilderness, but the Irish Wilderness area was dropped by the House in its consideration. Since 1973, Irish Wilderness legislation has been reintroduced by Senator DANFORTH and myself.

With the change in administrations there is even more compelling reasons to give Irish its final designation. Secretary Watt has stated that one of the specific "goals" of the Department of the Interior will be to "open wilderness areas." Secretary Watt has publicly stated his support for the House-Santini bill, commonly known as the National Minerals Security Act. The act would give the Secretary of the Interior broad discretion to open "withdrawn, restricted, or closed" lands for mineral entry, and extends the current 1984 deadline under the Wilderness Act for 10 more years.

Irish has a long history of controversy over the question of lead development. It is anyone's guess whether the pristine lands really store a wealth of lead, or not. I firmly believe in a balanced approach to energy and mineral development, and believe that this bill gives any mineral company the opportunity to apply for exploratory mining permits until 1984. It will not affect the pending application before the National Forest Service for an exploratory permit. Wilderness areas, however, should not be opened in perpetuity to uncontrolled mineral development. Irish cannot forever be a pawn in this guessing game. This bill provides a logical timetable to end this decade-old battle.

Mr. President, I ask unanimous consent that the text of the two bills be printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 1964

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be known as the Irish Wilderness Act of 1981.

SEC. 2. In furtherance of the purposes of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), the following area as generally depicted on a map appropriately referenced, dated December, 1981, is hereby designated as wilderness and, therefore, as a component of the National Wilderness Preservation System—

(1) certain lands in the Mark Twain National Forest, Missouri, which comprise about seventeen thousand five hundred and sixty-two acres, are generally depicted on a map entitled "Irish Wilderness", dated December 1981, and shall be known as the Irish Wilderness.

SEC. 3. As soon as practicable after this Act takes effect, the Secretary of Agriculture shall file a map and a legal description of the Irish Wilderness area with the Energy Senate and the Interior and Insular Affairs Committee of the House of Representatives, and such description shall have the same force and effect as if included in this Act: *Provided however,* That correction of clerical and typographical errors in such legal description and map may be made.

SEC. 4. The area designated as wilderness by this Act shall be administered in accordance with the applicable provisions of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), except that any reference in such provisions to the effective date of such Acts shall be deemed to be a reference to the effective date of this Act.

S. 1965

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be known as the Paddy Creek Wilderness Act of 1981.

SEC. 2. In furtherance of the purposes of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), the following area as generally depicted on a map appropriately referenced, dated December, 1981, is hereby designated as wilderness and, therefore, as a component of the National Wilderness Preservation System—

(1) certain lands in the Mark Twain National Forest, Missouri which comprise about six thousand eight hundred and eighty-eight acres, are generally depicted on a map entitled "Paddy Creek Wilderness Area", dated December 1981, and shall be known as the Paddy Creek Wilderness Area.

SEC. 3. As soon as practicable after this Act takes effect, the Secretary of Agriculture shall file a map and legal description of the Paddy Creek Wilderness Area with the Energy and Natural Resources Committee of the Senate and the Interior and Insular Affairs Committee of the House of Representatives, and such description shall have the same force and effect as if included in this Act: *Provided however,* That correction of clerical and typographical errors in such legal description and map may be made.

SEC. 4. The area designated as wilderness by this Act shall be administered in accordance with the applicable provisions of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), except that any reference in such provisions to the effective date of such Acts shall be deemed to be a reference to the effective date of this Act.●

● Mr. DANFORTH. Mr. President, I am pleased today to join with my colleague from Missouri in introducing two bills that would establish further wilderness areas in my State. When I ran for the Senate 5 years ago, I pledged to the voters that I would press for wilderness legislation if elected. One of my first acts upon arrival in this body was to introduce wilderness legislation. And, in 1980, four such areas in Missouri were included by the Congress in the National Wilderness Preservation System.

The bills we are proposing today would add the two major candidates remaining for wilderness designation in Missouri. The first, known as the Irish Wilderness, is the most prized such area in the entire State. The second area, known as Paddy Creek, is a smaller area highlighted by unique geological formations. Designation of these areas has the wholehearted support of the Missouri Wilderness Coalition, a group of some 35 organizations that have banded together to work on wilderness issues.

The purpose of wilderness conservation is to protect certain unique areas of the public domain from changes wrought by man. Wilderness areas have both recreational and scientific value. Not only do they provide high quality outdoor recreational opportunities—places where we can meet nature on its own terms—but they also provide badly needed wildlife habitat and sites for wildlife, forestry, and water quality research. And, in a world which is increasingly abused by modern technology, these areas preserve a natural heritage of irreplaceable esthetic value.

IRISH WILDERNESS

The Irish Wilderness has been described as the crown jewel of Missouri's actual and potential wilderness areas. In the words of the Missouri Wilderness Coalition:

> It is, without question, the clearest, strongest expression of Ozark landscape, geology, ecology, and natural beauty.... The Irish is the best of its kind, and the last of its kind. If it is lost, it is lost forever.

Located along the free-flowing and unspoiled Eleven Point River—itself designated as a national scenic river area—the Irish Wilderness is a 17,562-acre segment of the Mark Twain National Forest in southernmost Missouri. It draws its name from a bit of pre-Civil War history.

As a young missionary priest in frontier Missouri, Father John Hogan was deeply affected by the suffering and poverty he saw among the Irish immigrants in the railroad camps around St. Louis. He resolved to help these people acquire land of their own and start a new life In 1858 he led the first group of about 40 Irish families to a wilderness area in southern Missouri, where they bought Government land for 12½ cents an acre. The settlers were wiped out by marauders during the Civil War years, but the name stayed with the area, and even today Father Hogan's words provide the most moving description of the beauty of the Irish Wilderness:

> The quiet solitariness of the place seemed to inspire devotion. Nowhere could the human soul so profoundly worship as in the depths of that leafy forest, beneath the swaying branches of the lofty oaks and pines, where solitude and the heart of man united in praise and wonder of the Great Creator.

Within the Irish Wilderness are numerous drainages known in the backland vernacular as "hollows." Starting as little more than shallow washes in the rolling upland woods, they wander toward the Eleven Point River, deepening their valleys along the way. Pocked with sinkholes in their upper reaches, some descend underground to help feed the subsurface water systems, emerging later as springs from rock ledges in mossy grottoes. On some hillsides, such outlets have been left high and dry by the downward-cutting streams, becoming caves.

Although the original stands of pine and oak were cut down at the end of the 19th century, the basic forest cover has returned, and with every passing year more closely resembles the virgin forest. Because of the large size of the wilderness area, the Irish has remained home to practically the full range of Ozark wildlife, with sightings reported of the American black bear and the eastern cougar.

The diversity of the various biological communities—terrestrial as well as aquatic—results from the combination of geology, topography, soils, plants, and animals. The fact that all of these elements exist in a context of genuine spaciousness and remoteness from disturbance is rare. The area is large enough to function essentially on its own, and this is its most important value in terms of natural history.

The Irish Wilderness was designated as a "further planning area" during the roadless area review and evaluation process. The chief impediment to its designation as wilderness has been the concern that minerals—primarily lead and zinc—might underlie the area. Causing this concern is the fact that the Viburnum Trend, a rich lead belt, exists some 40 miles to the north. This lead belt was formed during the Cambrian Period, along with a now-buried ocean reef. Neither the buried reef nor its associated rocks and ores are identifiable at ground surface.

Nearby drill-hole records indicate that these rock types, if they exist in the Irish, lie about 2,000 feet below the surface. No means have been found to discover such deep-lying lead and zinc in this area without drilling; and until the prospect arose that the Irish Wilderness might be set aside from development—that is, until the Irish became forbidden fruit—no mining company had considered the area promising enough to seek a drilling permit.

Indeed, D. L. Chrisinger, an economic geologist at Southwest Missouri State University, has concluded: "To project the reef southward, away from the pre-Cambrian knobs with which it is so closely associated, is geologically unsound." Similarly, a geology professor at St. Louis University, Charles Belts, has concluded, "To project the reef structure 39 miles (or to project the ore bodies) is geologically unacceptable."

I am sympathetic to the need to inventory our natural resources, and I would support some limited exploration in the Irish Wilderness. But I am not satisfied that mining companies permitted to stake a claim in the Irish can be adequately restrained and that irreparable damage to the Irish will not occur. For this reason, I have decided to push at this time for immediate wilderness designation of this precious area.

PADDY CREEK

The proposed Paddy Creek Wilderness area consists of 6,888 acres in the Salem plateau region of south-central Missouri. Streams that cut through the plateau have exposed sedimentary bedrock formations—primarily of Roubidoux sandstone and Gasconade dolomite in the Paddy Creek area. This action has resulted in large areas of rough terrain—a maze of winding valleys and deep hollows divided by sharp, rocky ridges.

Within this proposed wilderness area, Little Paddy Creek and Big Paddy Creek come together to form Paddy Creek, which then flows into the Big Piney River shortly after leaving the Mark Twain National Forest. The first settlers of the area, who arrived in 1816, are recorded as "Boones and Paddies," and the creeks apparently took their names from the latter family.

Perhaps the most unusual geological feature of the area is the prevalent exposure of the Roubidoux sandstone, which forms the top ledges of many of the stream-side bluffs. In addition, chunks of this stone have tumbled down together on some steep slopes to create "boulder falls." In one hollow, fallen sandstone has choked off the valley and created a miniature box canyon.

One of Missouri's most popular hiking trails, the 17-mile-long Big Piney Trail, wanders through the Paddy Creek area and passes several of the major points of interest. The streams themselves provide fishermen a primitive back-country environment that is rare for Missouri. No significant mineral deposits are known to exist in the area.

Paddy Creek was placed in the "further planning" category during the roadless area review and evaluation process, but the Forest Service now has recommended wilderness designation. I believe the Congress should act quickly to implement that recommendation.

Mr. President, the bills we are introducing today involve just 24,450 acres of national forest land, but they would remove two precious areas from man's influence and preserve them for future generations.

Speaking to a reporter for the St. Louis Globe-Democrat, a river patrolman from Alton, Mo., named Milburn Roberts, put this issue into proper perspective some years ago. "Why don't we leave something for our grandchildren?" he asked. "I've only got four, but I'd like to see them have something. We're doing too much with the bulldozer and the saw.

"God gave us this earth and possession of it for a few years, but we don't own it—we never did, and we never will."●

By Mr. DANFORTH:

S. 1966. A bill to eliminate unnecessary paperwork and reporting requirements contained in the Public Utility Regulatory Policies Act of 1978; to the Committee on Energy and Natural Resources.

S. 1967. A bill to eliminate unnecessary paperwork and reporting requirements contained in section 15(1)(D) of the Outer Continental Shelf Lands Act, and section 601 of the Outer Continental Shelf Land Act Amendments of 1978; to the Committee on Energy and Natural Resources.

ELIMINATION OF CERTAIN PAPERWORK AND REPORTING REQUIREMENTS

● Mr. DANFORTH. Mr. President, I believe that all of us would like to reduce Government paperwork and eliminate unnecessary regulatory requirements. Today I am introducing two bills that would take small but positive steps in that direction.

The five-part energy package enacted by the Congress in 1978 included the Public Utility Regulatory Policies Act (Public Law 95–617). Title I of this law seeks to encourage conservation, energy efficiency, and equitable electric rates for consumers. To accomplish this, it requires the States, through their appropriate regulatory authorities, and also nonregulated electric utilities to determine whether certain regulatory and ratemaking standards would further those policies.

The deadline for completion of this process was November 9, 1981. Nonetheless, the law requires the States and utilities to continue to report to the Department of Energy on their progress until 1990, and DOE in turn is required to report to the President and the Congress. Understandably, DOE is unclear about what these reports should contain after 1982; it does not believe that the reports should cover actual implementation of the standards.

On September 14, the General Accounting Office issued a report to the Congress entitled, "Burdensome and Unnecessary Reporting Requirements of the Public Utility Regulatory Policies Act Need To Be Changed."

GAO questioned the timeliness, accuracy, and reporting categories of the data in these DOE reports. In addition, it noted that the National Association of Regulatory Utility Commissions, through its electric utility rate design study, prepares reports containing almost identical information.

GAO concluded that while the act was intended to "provide worthwhile information to parties involved in utility rate proceedings, in a time of budget cuts and continuing utility rate increases it is necessary to carefully examine the costs and benefits associated with the regulatory requirements. This is particularly true if information serving the same purpose is available from other sources."

In 1980, according to DOE estimates, the States and nonregulated utilities expended 6,294 staff-hours on preparation of these reports. In addition, the Federal Government expended $259,160 on the data collection effort. The idea of continuing this kind of wasteful and unnecessary spending for the rest of this decade is truly offensive.

In light of these considerations, GAO called the need for continued reporting "questionable." It recommended that the pertinent section of the law be repealed following completion of DOE's 1982 report:

> This would reduce the paperwork burden on both the Federal Government and the private sector, and eliminate the cost ultimately borne by the individual taxpayer. If there is future interest in the ratemaking status of States and utilities that is not satisfied by available reports, Congress can request the preparation of such reports at future times.

GAO further reported that DOE agrees with its recommendation to repeal this section of the law.

The Outer Continental Shelf Lands Act Amendments of 1978 (Public Law 95–372) require the Secretary of the Interior to report annually to the Congress on the Outer Continental Shelf oil and gas leasing and production program. Specifically, the Secretary must list all shut-in oil and gas wells and wells flaring natural gas on leases issued under the Outer Continental Shelf Lands Act. This report also must indicate why each well is shut-in or flaring natural gas and whether the Secretary intends to require production on such a shut-in well or to order cessation flaring. The Comptroller General, in turn, is required annually to review and evaluate the methodology used by the Secretary in allowing the wells to be shut-in or to flare natural gas.

On November 19, the General Accounting Office issued its latest such report, entitled "Annual Report on Outer Continental Shelf Shut-in or Flaring Wells Is No Longer Needed."

A primary concern of the Congress in enacting these annual reporting requirements was to determine whether operators on the Outer Continental Shelf were deliberately withholding production in anticipation of higher prices.

But the GAO found that Interior's methodology and reporting "is not and never has been adequate to determine whether this is happening." It also noted that "recent legislation and administration actions decontrolling the price of oil and natural gas make the report of dubious value, since decontrol makes it unlikely that operators would deliberately withhold production."

Interior's most recent report on shut-in and flaring wells includes 14 pages of narrative and tabular information and 690 pages of appendices. Both the GAO and Interior say that the reports serve no useful purpose, and elimination would save a combined total of about $280,000 annually. Abolishing the report, of course, would not affect Interior's continuing responsibilities for inspecting and monitoring the Outer Continental Shelf Lands Act lease activities to insure efficient development of oil and gas resources.

GAO recommended that the Congress repeal section 15(1)(D) of the Outer Continental Shelf Lands Act, as amended, and sections 601 (a) and (b) of the Outer Continental Shelf Lands Act Amendments of 1978. Interior agrees with the recommendation.

Mr. President, the Subcommittee on Federal Expenditures, Research, and Rules, which I chair, is responsible for overseeing the Government's paperwork requirements. The GAO says that a section of the Public Utility Regulatory Policies Act soon will become utterly unnecessary, already is duplicative, and wastes hundreds of thousands of dollars annually. It says that sections of the Outer Continental Shelf Lands Act Amendments of 1978 similarly are costly and unneeded. I strongly urge prompt action to accomplish their repeal.●

By Mr. HATCH (for himself, Mr. KASTEN, and Mr. BAUCUS):

S. 1968. A bill to clarify the application of the Clayton Act and the Federal Trade Commission Act with respect to certain joint ventures which promote the international competitiveness of U.S. businesses; to the Committee on the Judiciary.

INTERNATIONAL JOINT VENTURE ACT OF 1981

Mr. HATCH. Mr. President, I am today introducing the International Joint Venture Act of 1981 on behalf of myself, Senator KASTEN, and Senator BAUCUS. This bill is identical to a bill introduced in the House, H.R. 4868, by the ranking minority member of the House Judiciary Committee, Mr. MCCLORY. The bill will strengthen the ability of American companies to compete in foreign markets, and thus benefit our economy domestically, by limiting the application of the actual potential entrant antitrust doctrine to allow U.S. companies to participate in certain joint ventures with foreign companies.

I know that my colleagues in the Senate appreciate, as I do, the importance of American companies being able to compete in world markets. U.S. companies, in order to gain new export markets, will often find it beneficial to enter into cooperative arrangements with foreign companies to obtain valuable technology, supplemental product lines, raw materials, et cetera. These associations strengthen the company domestically and benefit our economy through increased exports and the employment the company will provide to American citizens in its domestic operations.

However, the actual potential entrant antitrust doctrine prohibits an association between a company and a potential future competitor of that company on the grounds that it illegally restrains trade by preventing the potential competitor from entering U.S. markets on its own. The doctrine was to serve the laudable goal of preventing combinations designed to limit competition from companies which had decided, and were able, to enter a line of commerce on their own. Under the actual potential entrant doctrine, cooperative arrangements with foreign corporations which are not currently competing in the United States may be characterized as future potential competitors. While the courts have not applied this doctrine unless there was hard evidence and while the policy of the Department of Justice has not focused on the doctrine, the Federal Trade Commission is applying the actual potential entrant doctrine broadly.

Since companies which are able to compete effectively in the United States on their own do not enter joint ventures which prevent them from doing so, the effect of the FTC's broad application of the actual potential entrant doctrine discourages American companies from cooperating with foreign companies in ways which would increase our ability to compete in world markets. This situation can result in the loss of export opportunities and the diminution of the strength of our companies at a time when our efforts should be to foster U.S. trade interests. Foreign companies encounter no such discouragement from their governments.

A perfect example of the detrimental results of applying the actual potential entrant doctrine too broadly is the recent case involving the Brunswick Corp. In 1972, Brunswick entered into a 10-year joint venture with Yamaha, a Japanese company, for the manufacture of outboard engines in Japan. Yamaha had previously attempted unsuccessfully to penetrate the U.S. market on its own.

The joint venture was beneficial to both parties. Brunswick developed new markets in Europe, Australia, and Mexico and introduced a new line of outboard engines in the United States. Yamaha gained the needed technology to compete successfully here, and, with this, notified Brunswick in 1979 of its intentions to terminate the joint venture in 1982.

Yet, despite this and despite the fact that the Federal Trade Commission's administrative law judge had previously ruled that the joint venture promoted competition, the FTC, in 1979, found that the joint venture potentially restrained competition by temporarily preventing Yamaha from capturing a share of the U.S. market. The FTC ordered Brunswick to sell its interest in the successful joint venture to Yamaha and no one else at a price far below market value, which also jeopardized the continued supply of parts and engines at reasonable prices—all to the advantage of the foreign company.

The legislation I am introducing will simply make it clear that a U.S. company may join temporarily with a foreign company to engage in a line of commerce in which they do not compete in the United States, even if the foreign company is a potential competitor. The requirement that the joint venture have a limited term guarantees that the foreign company could not be indefinitely precluded from competing in the U.S. market on its own. But the legislation does not overrule the actual potential entrant doctrine, and it does not sanc-

tion joint venture arrangements among U.S. companies. Nor does the legislation sanction a joint venture between a U.S. company and a foreign company if the foreign company or any of its affiliates is actually and substantially engaged in the same line of commerce in the United States as the joint venture.

I urge my colleagues to support this legislation which will remove the unnecessary restrictions and impediments to our companies trying to compete in world markets.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1968

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "International Joint Venture Act of 1981".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds the following:

(1) The health and productivity of United States businesses have become increasingly dependent upon their ability to compete effectively in world markets.

(2) To complete effectively in world markets, United States businesses find it advantageous and often necessary to enter into certain limited joint venture arrangements with foreign businesses, through which United States businesses obtain valuable technology, supplemental product lines, raw materials, access to new export markets, and access to distribution, marketing, and manufacturing facilities.

(3) United States businesses are currently discouraged from entering into such joint ventures by the application of certain antitrust laws of the United States to cooperative arrangements with foreign businesses which are not currently competitors in the United States but which may, under the "actual potential entrant" doctrine, be characterized as future potential competitors.

(4) Such application of the antitrust laws reduces the competitiveness of United States businesses in world markets and is not necessary to promote the entry of foreign competitors in the United States.

(b) It is the purpose of this Act to promote the international competitiveness of United States businesses by permitting them to participate in certain limited international joint ventures.

DEFINITIONS

SEC. 3. For purposes of this Act—

(1) the term "United States person" means an individual who is a citizen of the United States, or a partnership, corporation, or other legal entity organized under the laws of the United States or any State or territory of the United States, and

(2) the term "foreign person" means any person other than a United States person.

CLAYTON AND FEDERAL TRADE COMMISSION ACTS

SEC. 4. Section 7 of the Clayton Act (15 U.S.C. 18) and section 5 of the Federal Trade Commission Act (15 U.S.C. 45) shall not be construed to prohibit a United States person from entering into any contract or agreement providing for the establishment, or the performance of the business of, a joint venture or to prohibit the acquisition or ownership by a United States person of stock, other capital, or assets of a joint venture if such joint venture—

(1) is formed by only such United States person and one or more foreign persons,

(2) does not engage, or is not intended to engage, in any line of commerce in the United States in which such foreign person, or any person controlling, controlled by, or under common control with such foreign person, is actually and substantially engaged in the United States at the time such joint venture is formed,

(3) is terminable at the will of any party to such joint venture no later than ten years after the date such joint venture is formed, and

(4)(A) provides for the exchange of licenses, patents, trade secrets, or other forms of technology, or

(B) provides access to raw materials or to distribution, marketing, or manufacturing facilities.

EFFECTIVE DATE

SEC. 5. This Act shall apply with respect to any proceeding which is pending on or after the date of the enactment of this Act.

By Mr. JACKSON:

S. 1970. A bill for the relief of James P. Purvis; to the Committee on the Judiciary.

RELIEF OF JAMES P. PURVIS

● Mr. JACKSON. Mr. President, today I am introducing a private relief bill in behalf of Mr. James Purvis of Spokane, Wash. I am also submitting a resolution which would refer this claim to the Court of Claims for review and recommendation in accordance with the procedures of Public Law 89-681 which governs private bills referred by the Congress to the Court of Claims for a hearing.

The history of the case of Purvis against United States is long and tortuous involving some two dozen separate administrative and judicial proceedings and spanning two decades from 1961 to the present. Briefly, James Purvis, then doing business as the Purvis Construction Co., was awarded a contract by the General Services Administration to construct the U.S. exhibit buildings at the Seattle World's Fair. Purvis was forced to accelerate performance on the contract to overcome delays and disruptions caused by the Government which resulted in greatly increased expenditures and ultimately bankrupted his construction company. For 20 years, Purvis sought recovery of his losses before the Boards of Contract Appeals and the Court of Claims.

Finally, in 1980, the Court of Claims ordered the Government to pay Purvis $390,248 in damages, since reduced by stipulation to $366,623.41, worth approximately $152,197 in 1961 dollars.

In its opinion in Purvis the Court said:

> The delays in final decision have become celebrated as among the horribles of (administrative) procedure.

Also, as stipulated by the parties, the award to Purvis—

> compensates plaintiff only to the extent presently permitted by law and is not intended to prejudice nor affect plaintiff's application for or receipt of private relief.

Since the Purvis case the Congress has changed the law and interest is paid on claims to a contractor from the date the contracting officer receives the claim until payment of the claim.

Although James Purvis can never be made financially whole, Congress can in its equity power grant a measure of relief comparable to what it has since provided for contract claims under the Contract Disputes Act. The congressional reference bill procedure by which the Court of Claims reviews cases such as this is an appropriate means for consideration of the merits of this case. I urge the committee to act promptly and favorably on the resolution so that we may get the opinion of the court on whether an equitable remedy is justified in this case.

(The text of the resolution, Senate Resolution 267, appears later in today's RECORD.) ●

By Mr. BRADLEY:

S. 1971. A bill to designate the New York Bulk and Foreign Mail Center located at 80 County Road, Jersey City, N.J., as the "Michael McDermott Bulk and Foreign Mail Center"; to the Committee on Governmental Affairs.

MICHAEL M'DERMOTT MAIL CENTERS

Mr. BRADLEY. Mr. President, today is a very sad day for the postal employees at the New York Bulk and Foreign Mail Center in Jersey City, N.J. It was exactly 2 years ago on this date that Michael McDermott, a 25-year-old postal employee was killed in a conveyor belt accident. At the time of his death in 1979 he was married and had an 8-month-old daughter. The bill which I am today introducing designates the New York Bulk and Foreign Mail Center at Jersey City as the "Michael McDermott Bulk and Foreign Mail Center".

The naming of this important postal facility for Michael McDermott will serve a dual purpose: It will remind us of both the public service and tragic sacrifice of this one individual, and it will also remind us of the need to monitor workplace safety and remove conditions which can cause injuries to postal employees across this Nation. The designation of the New York Bulk and Foreign Mail Center in honor of Michael McDermott will not erase the tragedy of 2 years ago, but it may help other postal employees avoid such accidents as they serve the public.

By Mr. RIEGLE:

S. 1972. A bill to amend the Internal Revenue Code of 1954 to exempt from the manufacturers' excise tax parts or accessories for light-duty trucks, and to allow manufacturers of a taxable truck body or chassis to combine it with certain taxable parts or accessories without incurring additional tax by reason of the combination; to the Committee on Finance.

EXCISE TAX ON TRUCK PARTS

● Mr. RIEGLE. Mr. President, today I am introducing legislation to amend the manufacturers' excise tax on truck parts and accessories. Similar legislation (H.R. 4452) has been introduced in the House of Representatives by Congressman BRODHEAD of Michigan.

The bill will help alleviate certain unfair competitive disadvantages within the industry caused by the current structure of the tax and ease the burden of complying with certain complicated provisions of the law. A more comprehensive reexamination of the excise tax burden that is addressed by S. 1179 which was introduced May 13, 1981 is still needed but the specific provisions of the legislation proposed today are judged noncontroversial, in that they are very limited and with minimal tax revenue impact.

This legislation aims at three improvements. First, it repeals the excise tax on the few remaining light duty truck parts not currently exempted. Currently, there are appreciable costs to industry to keep track of the few interchangeable parts which are subject to the truck tax, which is easily avoided to the competitive disadvantage of the conscientious manufacturer.

Second, the bill corrects the unfair situation where manufacturers of truck chassis who combine one or more of a specified list of parts must pay 10 percent tax on the entire unit, while nonmanufacturers when performing the same operation are liable for only 8 percent tax on the same part. There is no apparent justification for such discrimination against the truck assembler.

Finally, this legislation expands the current list of truck add-on items exempted from the 10-percent tax, to include chassis lengthening and factory assembly of lift axles. Currently these improvements are artificially delayed until after original purchase, for the sole purpose of circumventing applicable taxes and to the competitive detriment of truck fabricators.

In my view, these changes would immediately correct specific inequities within the industry caused by the present law. I urge my colleagues to join me in support of the amendments proposed.●

By Mr. RIEGLE:

S. 1973. A bill to amend the National Ocean Pollution Planning Act of 1978 to provide greater coordination of research efforts concerning the Great Lakes, and for other purposes; to the Committee on Environment and Public Works.

GREAT LAKES PROTECTION ACT OF 1981

● Mr. RIEGLE. Mr. President, today I am introducing the Great Lakes Protection Act of 1981. This bill has been introduced in the House of Representatives by my Michigan colleague, JIM BLANCHARD, and I commend him for the development of this important measure.

This bill will give the same level of recognition and attention to the Great Lakes that has been directed toward the oceans in recent years. I feel that this attention is long overdue, and there has been a tendency to overlook the critical importance of the lakes, and the tremendous resources and benefits that they provide for the country. More than 95 percent of the surface freshwater in the United States is contained in the five Great Lakes, and this is 20 percent of the world's total supply. More than 37 million people depend on the lakes for their potable water, industrial needs, transportation, fishing, and recreation. Clearly, we cannot afford to damage this resource and must begin a coordinated effort to insure their protection.

We have seen evidence of the lower priority given to the Great Lakes in several areas. Both the past and the present administrations proposed severe reductions in the work of the Large Lakes Research Lab at Grosse Isle, Mich. This is a unique facility, which monitors overall water quality in the lakes, and its impact on the health of surrounding populations. Fortunately, we were able to continue funding for Grosse Isle in the HUD and independent agencies appropriations bill, and legislation to continue the authorization for the lab has also advanced. In a more general sense, the administration has proposed other reductions in programs designed to protect Great Lakes resources and to enhance water quality efforts. These proposals have a potentially adverse impact on our relations with Canada, as well as threatening the vitality of the lakes for years to come.

This legislation contains two key features which will add to existing protections of the Great Lakes. The first mandates that all Federal agencies that begin projects with significant impacts on the Great Lakes identify and analyze those impacts. Since there is already a requirement for Federal agencies to prepare environmental impact statements, the Great Lakes analysis would simply add an additional section to the formal statement. The second feature of the bill would establish a coordinating office to oversee the actions of the 20 Federal agencies that have responsibility in Great Lakes matters. This Great Lakes office would prepare an analysis of significant Federal actions of recent years to determine where we have succeeded or failed in Great Lakes protections, as well as looking to the future in terms of streamlining coordination between Federal entities.

There is little budgetary impact in this legislation which places a ceiling on authorizations at $4 million annually after 1982. I feel strongly that this legislation will provide the needed impetus to grant the Great Lakes protection and recognition as extremely valuable natural and economic resources.●

By Mr. DURENBERGER:

S. 1974. A bill to amend section 7(j) of the Federal Deposit Insurance Act; to the Committee on Banking, Housing, and Urban Affairs.

SALE OF INSURED BANKS

● Mr. DURENBERGER. Mr. President, this is an era of regulatory reform for our financial institutions. It is clear that the maze of rules, regulations, and reporting requirements that we have imposed on all of our financial institutions has cost the consumer. Unfortunately, much of this regulation has been imposed layer by layer creating a variety of duplicative efforts at the State and national levels.

I am offering legislation today that would lift one such burden. This bill provides that an insured bank, other than a national bank or a district bank, could be sold or acquired subject to approval by a State bank supervisory agency which operates under State law which is substantially the same as the FDIC requirements in these cases. It serves little or no purpose to require approval by both the State and Federal banking agencies when they have similar requirements. The cost of this duplication in terms of time and money are exorbitant. This legislation should help improve the system.

I look forward to working with the Banking Committee on this provision which I believe Senator GARN has already expressed an interest in reviewing.●

By Mr. GRASSLEY:

S. 1975. A bill amend the Voting Rights Act of 1965 to extend the effect of certain provisions, and for other purposes; to the Committee on the Judiciary.

VOTING RIGHTS ACT AMENDMENTS OF 1981

Mr. GRASSLEY. Mr. President, on November 6, 1981, President Reagan announced his position on the issue of the Voting Rights Act of 1965. The President pledged that "no barrier would ever come between a secret ballot and the citizens' right to cast one."

I, too, am a wholehearted supporter of protecting the right to vote and feel the Voting Rights Act, and its extension, are both justified and necessary.

He also stated that he felt it was necessary to extend the Voting Rights Act "either through a direct extension of the act or through a modified version of the new bill recently passed by the House of Representatives." Essentially, the President endorsed a 10-year extension; reasonable "bail-out" provisions; extending the bilingual provisions to be concurrent with the other special provisions, and retaining the "intent" test in section 2.

After having considered the Voting Rights Act of 1965, the House bill, and statistics regarding both covered and noncovered jurisdictions, I formulated a measure which I feel embodies the spirit of President Reagan's position.

Initially, I want to emphasize that this proposal is not an administrative bill, but rather a bill which I feel squares in most respects with President Reagan's November 6 announcement.

I want to further emphasize that I am not personally wedded to each and every requirement mandated by this measure. The Subcommittee on the Constitution, of the Judiciary Committee, will open its hearings on the act in January and it is incumbent that the subcommittee have before it a vehicle which contains the President's endorsements for open and fair examination. I, too, may change my position on portions of this bill before it is all said and done.

Initially, this bill would extent the present form of the Voting Rights Act until at least 1987. I realize that the President suggested a 10-year extension, but the history of this legislation reveals its original term was for 5 years, the 1970 amendment was for 5 years, and the 1975 amendment was for 7 years. Accordingly, I believe that an additional period of at least 5 years is in keeping with the historical limitation dealing with this act and assures congressional oversight of the act.

In addition, all references to dates would be made concurrent with the 1987 date. This would be applicable to jurisdictions covered in the 1975 amendments dealing with minority language coverage as well as section 203(b) coverage of bilingual election material requirements. There would be one and only one "sunset" date for all jurisdictions.

Finally, this bill allows for immediate release by covered jurisdiction who can prove that for a 5-year period:

(1) No test or device for discriminatory purposes has been used;

(2) All substantial submissions for section 5 preclearance have been made;

(3) There have been no unremedied objections by the Attorney General; and

(4) There have been no court decrees that the jurisdiction purposefully denied or abridged the right to vote in violation of the act.

This requirement creates a higher burden of proof than is presently found in the law, and, of course, jurisdictions who cannot meet this burden will be unable to seek immediate release. This section also allows political subdivisions of covered jurisdictions to seek release as a separate unit.

Moreover, this new section would allow jurisdictions which seek immediate release to bring the action in a three judge court convened in the circuit in which the action arises. In light of the fact that the burden of proof for immediate release is made higher than that found in present law, this new requirement accomplishes two things: First, it precludes the involvement of a Federal judge from the State of the party-jurisdiction, yet, second, it does not require that the hearing be held within the District of Columbia. This will accommodate petitioning jurisdictions who will more than likely have to present much evidence. Moreover, it will accommodate those persons who may seek to be heard in opposition to the jurisdiction's petition.

Mr. President, this measure, as I have said, generally attempts to comport with what I believe the position of the President to be. I am certain that it will be subject to debate and criticism, but the fact remains it is time for us to take a close look at the Voting Rights Act and ask ourselves if we want an act to protect every citizen's right to unfettered access to the ballot; or in 1981, do we want to amend the rules of the game to seek new goals?

I believe this bill will be an aid in insuring that these questions be asked. We will all need to become more familiar with the issues and this bill will help. As I stated earlier, protecting the right to vote is still a paramount priority. The question now is whether sections of the country East, West, North, and South—will have to continue to seek Federal approval of their voting actions, or will we allow those jurisdictions which have abided by the law, both in fact as well as in spirit, to regain their sovereignty in a fair and realistic fashion.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1975

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Voting Rights Act Amendments of 1981".

SEC. 2. Section 4(a) of the Voting Rights Act of 1965 is amended—

(1) by inserting "(1)" after "(a)";

(2) by striking out "seventeen years" each place it appears and inserting in lieu thereof "twenty-two years";

(3) by striking out "ten years" each place it appears and inserting in lieu thereof "twelve years";

(4) by inserting ", except as hereinafter provided in section 4(a)(2) and section 4(a)(3)," after "*Provided*, that no such declaratory judgement shall issue with respect to any plaintiff" each place it appears; and

(5) by inserting at the end of the section new subsections to read as follows:

"(2) Notwithstanding the provisions of section 4(a)(1), any such State or any political subdivision thereof, although the determinations of section 4(b) were not made as to the subdivision as a separate unit, or any such political subdivision with respect to which the determinations of section 4(b) have been made, may at any time bring an action pursuant to the provisions of section 4(a)(3) against the United States for a declaratory judgement that during the five years preceding the filing of the action:

"(A) no test or device has been used within such State or political subdivision for the purpose or with the effect of denying or abridging the right to vote in contravention of the guarantees of this Act;

"(B) such State or political subdivision has made all substantial submissions in compliance with section 5 of this Act;

"(C) there remain no unremedied objections by the Attorney General to any submission made pursuant to section 5; and

"(D) there have been no final judgements of any court of the United States that such State or political subdivision purposefully denied or abridged the right of any citizen to vote in contravention of the guarantees of this Act.

"Upon making such a showing to the satisfaction of the Court, a declaratory judgement shall issue that with respect to such State or a separate political subdivision thereof or such political subdivision the terms of this section have been complied with."

"(3) Notwithstanding the provisions of section 4(a)(1), an action brought pursuant to section 4(a)(2) shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28 of the United States Code and appeal shall lie to the Supreme Court: *Provided*, That all filings for the request for three judges pursuant to this section shall be referred to the Chief Judge of the circuit who shall designate three judges from the circuit, other than from the petitioning State or from the State in which the petitioning political subdivision is located."

SEC. 3. Section 203(b) of the Voting Rights Act of 1965 is amended by striking out "August 6, 1985" and inserting in lieu thereof "August 6, 1987".

SEC. 4. This Act shall become effective on the date it is enacted.

By Mr. DURENBERGER (for himself, Mr. METZENBAUM, Mr. SPECTER, Mr. BAUCUS, and Mr. ROTH):

Senate Journal Resolution 269. A joint resolution expressing the sense of the Senate with respect to railroad retirement full funding; to the Committee on Labor and Human Resources.

RAILROAD RETIREMENT FUNDING

● Mr. DURENBERGER. Mr. President, in recent weeks no issue has provoked more calls and letters from angry, confused, and upset Minnesotans than the railroad retirement cutbacks. Railroad retirement—a lifeline to 400,000 senior citizens in this country—simply can no longer be the object of this ongoing political struggle over the Federal budget. The U.S. Congress must act immediately and firmly to assure those railroad retirees that their lives will no longer be put through the chaos of recent weeks.

If I may, Mr. President, let me set out in a simple and brief manner what has happened to railroad retirement in the last few months. Prior to 1974, railroad employees could be insured under both railroad retirement and social security. The benefits that these working people built up were part of a total compensation package offered through their employment and were considered deferred wages. In 1974, Congress eliminated the possibility of future retirees receiving benefits under both accounts. Those entitled to both benefits before 1975, however, were exempted from the change and Congress authorized annual appropriations from general revenues from 1976 to 2000 to finance the cost of phasing out the original program.

In the last few years, unfortunately the Office of Management and Budget has ignored congressional intent by failing to request the full appropriation required to fully fund that account, making up the short fall from the general account. This short-sighted action on the part of past administrations created a serious drain on the railroad retirement system.

During the budget reconciliation this fall, Congress made several changes in the railroad retirement fund. These changes were primarily aimed at insuring the solvency of the fund and included many cost saving provisions which amounted to $400 million over the next 3 years.

In addition to these changes, Congress provided for the "windfall" benefit to be paid out of a specific "dual benefits payment account" and stopped the practice of allowing the shortfalls to the windfall account to be funded by draining the general railroad retirement account.

It was not the intent of Congress to reduce the benefits of current railroad retirees. Rather, the intent of Congress at that time was to shore up the financially troubled fund and not to allow for new categories of beneficiaries. We accomplished this task with the support of both management and labor. Now we must correct this injustice inadvertently inflicted on the retirees—we must restore the full benefits of all railroad retirees.

During consideration of the "first" continuing resolution in November, the Senate passed an amendment offered by Senator METZENBAUM, Senator ROTH, myself, and several others that would have restored the benefits of all retirees to their rightful level. However, to the dismay of all of us in the Senate, the funds provided by that amendment were cut in half by the House-Senate Conference Committee. The whole issue became temporarily moot when the President vetoed the entire continuing resolution.

We have now passed a "second" continuing resolution to provide funding for the Government through March 31. Unfortunately, though, only half of the October 1 cut to railroad retirees—minus the across-the-board 4-percent cut that virtually all Government programs were subjected to—will now be restored.

Mr. President, this nonsense must cease once and for all. It is time to give the railroad retirees of this Nation the full benefits they worked many years to earn. I come from a railroad family, and I know what these benefits mean to railroad retirees. The resolution I am offering today will express these sentiments clearly and publically. The resolution will leave no doubt that we intend to move to restore this funding at the next available opportunity. Mr. President, I urge all my colleagues to work together to restore full benefits to railroad retirees as soon as we possibly can.●

ADDITIONAL STATEMENTS

LIBYAN INTERFERENCE IN ITALY

● Mr. EAST. Mr. President, in the last week, the American people have listened with dread to continued reports of a Libyan assassination team dispatched to this country by Colonel Qadhafi to kill the President and top leaders of the Government.

The continued interference, with lethal consequences, in the affairs of other countries by Colonel Qadhafi is an act of aggression and terrorism, and it is time that the civilized world take strong measures against this tyrant and aggressor.

However, the United States is not the only country that has been threatened by Qadhafi's intrigues. Over 40 countries in the world have been victimized by his support of terrorism and insurgency. One of the countries which has been targeted by Qadhafi is Italy, a strong NATO ally and a democratic government. Some weeks ago, I asked Dr. Vittorfranco S. Pisano of the Library of Congress to prepare a report on Libyan interference in Italian affairs. I am happy to say that this report is now ready, and I am asking that it be reprinted in the CONGRESSIONAL RECORD today.

Dr. Pisano is one of this country's foremost authorities on Italian affairs and politics, especially on Italian terrorism. He is senior foreign law specialist in the European Law Division of the Library of Congress and author of several publications on terrorism and intelligence. He has taught modern foreign governments in the Department of Government at Georgetown University.

The report follows:

LIBYA'S MULTIFACETED FOREIGN POLICY: THE ITALIAN APPLICATION

(By Vittorfranco S. Pisano)

Ongoing reports of Libyan "hit squads" tasked with the assassination of the President himself, together with senior officials of the Reagan administration, are likely to overshadow Libyan practices in other democracies committed to the preservation of Western values. Yet, it is at this very point in time that an in-depth global assessment of the Libyan modus operandi could prove highly opportune, if not indispensable.

Within such a broad spectrum, Libyan aims and actions in Italy—and, indeed, the manner in which they are represented and perceived—constitute an instructive case study, particularly in consideration of the fact that Italy appears to be Libya's most targeted nation outside of Libyan adventurism in the Afro-Islamic world.

On June 1, 1980, Italy's most circulated political weekly, the Left-oriented L'Espresso of Rome, appeared on the newsstands displaying a portrait of Qaddafi on the cover page. This was neither the first nor the last time that the Libyan leader would make the cover page of an Italian magazine, be it of the leftist or other persuasion. In point of fact, Qaddafi's image is the object of inordinate exposure in the Italian media. What actually made L'Espresso's cover page of June 1, 1980, food for thought was the caption: "Qaddafi I, King of Italy." Hyperbole aside, the Libyan presence—real, perceived, propagandized, or imagined—seems to weigh heavily on the Italian scene.

A careful and systematic reading of the Italian press suggests a multidirectional Libyan policy vis-a-vis the Italian peninsula. Although oftentimes in apparent contradiction with one another, Libyan overtures to Italy range from attestations of Libyan-Italian affinity, religious proselytism, cultural penetration, financial, industrial, and land investment, and mutually advantageous commercial opportunities to physical elimination of Libyan emigres living in Italy, support for Italian terrorist elements of the Left and of the Right, use of Italian territory for international terrorist operations, harassment of Italian fishing boats and oil-prospecting platforms, violations of Italian air space, and economic and military threats. Equally disquieting are media reports alleging a special relationship between Libya and the Italian intelligence services.

The island of Sicily is generally regarded as the avenue of approach for Libyan cultural, economic, and even subversive penetration into Italy. In a 1979 interview granted to Italian journalist Dina Nascetti, Colonel Qaddafi offered the following explanation for Libya's endeavors in Sicily: "Our interest lies in friendship and cooperation, while we are concerned with the aims of the United States that would want to transform Sicily into a large military base. Because of its geographic position and historical precedents, Sicily is for us a natural bridge in the relationship of cooperation with Italy. It should not be forgotten that a sizeable portion of the Sicilian population is of Arabic descent: in fact, the Arabs governed Sicily for many centuries thus giving birth to a prosperous civilization, whose existence is well documented."

Apart from the Colonel's self-serving statements, Libya's current cultural-economic hold on Sicily is not negligible. After an absence of one thousand years from the island, a mosque, financed with Libyan funds, is now open for worship in the city of Catania. Its opening conveniently provided the occasion to organize an essay contest for high school students on "the affinity between Sicily and the Arab world." Seventy of them were rewarded with a trip to Tripoli. At the same time, the Libyan Consulate in Palermo, in operation since 1975, indicated that 10,000 visas have been issued to Italians desiring to visit Libya for business reasons.

It has been estimated that the Libyans themselves have invested a minimum of 500 to 700 billion lire in the agricultural, construction, and fishing industries of the island. Cities with major Libyan investments include Palermo, Catania, and Siracusa. Moreover, Pantelleria—a considerably smaller island that is part of the Region of Sicily and is endowed with strategic-military importance—has been the target of vast Libyan investments in land and realty.

On the propaganda or "public relations" side, a bimonthly publication, Sicilia Oggi (Sicily Today), a private TV channel, Tele Sicilia Color, and a radio station, Radio Trinacria, afford ample resonance to the principles of Qaddafi's "green socialism." Some coverage of Libyan affairs is also provided in the Arabic bimonthly section of the Palermo daily L'Ora. At least in part, Libya's interests in Sicily have been promoted by Catania attorney Michele Papa, one of the founders of the pro-Libyan Sicilian-Arab Association and a former partisan of Sicilian independence from Italy. Papa's twofold role has entailed the development of Libyan business and the enhancement of Libya's image through cultural and other social events, frequently accompanied by lavish refreshments. Papa was also instrumental in establishing Billy Carter's Libyan connection. In the later case, Sicily served as a stepping stone not only to the Italian mainland, but also to the United States.

Officially, Libya's aggregate investments in Italy—Sicily included—amount to 370 billion lire, in addition to ownership of 100 billion lire in Treasury bonds. These figures include a 9.1 percent (13.4 percent by the end of 1982) holding—360 billion lire—in the stock of FIAT. Consequently, two Libyans sit on the Board of Directors of Italy's major private corporation. Moreover, Libya openly owns seven percent of the capital of the Union of Arab and European Banks. However, as the estimates cited for Libyan holdings in Sicily indicate, unchallenged journalistic investigations have revealed the existence of considerably larger investments throughout Italy's national territory. These "covert" investments are reportedly made by resorting to "dummy" corporations of different nationalities, "official" Italian investors, and obliging Libyan residents of Italy.

Attempts at cultural penetration in Italy's mainland frequently entail subsidies to various printing establishments throughout the peninsula, which publish, inter alia, Qaddafi's fundamentalist Green Book. Excerpts from the latter, as well as the Colonel's speeches, are regularly aired from a Rome private TV channel, Tele Tevere. Though not comparable to the exhibitionist role played by Papa in Sicily, Libya's frequently cited "agents of influence" on the mainland include Emo Egoli, Secretary of the Italian-Arabic Friendship Society in Rome, and Socialist politicians Enrico Manca and Michele Achilli.

While successfully pursuing economic and politico-cultural expansion into Italy, Libya has also insured Italian dependence on Libyan products and markets. On one hand, Italy relies on Libyan petroleum for 17 percent of domestic energy needs. On the other hand, Italian products and services for export find a highly lucrative market in Libya. Two examples pertaining to the armaments and construction sectors of the economy are particularly significant. Libya constitutes the best customer of the Italian armaments industry (Agusta, Aermacchi, Beretta, Oto-Melara, etc.), although the Italian Minister of Defense has recently stated that current deliveries substantially represent performance of past contractual obligations. It might be parenthetically pointed out that on a global level Italian arms exports have increased between 1970 and 1980 from 80 billion to 2,500 billion lire. With respect to construction, Italian firms and an Italian labor force have been contracted to build a 315-kilometer "defensive" barrier between Libya and Egypt.

The total Italian labor force employed in Libya on various projects comprises approximately 20,000 residents. Of comparable magnitude are the figures on Italy-Libya trade, which has increased from 2.421 billion lire in 1977 to 3.742 billion lire in 1979. Between January and October of 1980, Italian imports from Libya amounted to 2.390 billion lire, whereas exports amounted to 1.642 billion lire. Italy's heavy reliance on petroleum imports has consistently favored the Libyan balance of trade between the two countries.

The economy's need for Libyan investments, petroleum, and markets and the Government's concern for the safety of Italy's extensive labor force in Libya are normally regarded as the principal factors that make it possible for the Tripoli regime to embark upon a parallel foreign policy based on various forms of intimidation.

Of these, terrorism has been the most clamor-inducing. Between March 21 and June 11, 1980, Libyan elements in Rome and Milan targeted seven of their countrymen, who had expatriated taking along personal assets. Of the seven, five were murdered, one was wounded, and one managed to escape. These operations were reportedly directed from the Libyan Consulate in Palermo with the assistance of some 200 informants and trained killers. (Libyan concentration of effort on Italian territory is reflected by the fact that during the same time frame only five incidents of the same nature took place elsewhere in Europe and in the Middle East.) It is not clear whether these attacks were solely motivated by the victims' refusal to repatriate with their wealth or also by their uncooperative attitude vis-a-vis unlawful demands placed on them in Italy by Tripoli's emissaries. After the Italian police arrested a number of suspects, including a self-con-

fessed assassin, Qaddafi's Government retaliated by imprisoning nine Italians who work in Libya.

With respect to support for domestic Italian terrorism, a variety of allegations, testimony, and circumstantial evidence point an accusing finger at the Qaddafi regime. A locality near Bengasi—code name "Zujur"—has been indicated as a training camp attended by Italian terrorists. A diary kept by rightist extremist Mario Tuti, who killed two Carabinieri near Florence in 1975 and carried out sabotage operations against the railway system, makes reference to Libyan aid. Captured terrorist of the Left Fabrizio Giai revealed to the investigating magistrates that in 1978 Libya served as an intermediary in the acquisition of weapons from the Popular Front for the Liberation of Palestine by the leftist terrorist organizations Red Brigades (BR) and Front Line (PL). Other "repentant" terrorists have reportedly confirmed other instances of Libyan mediation. The fact that Tripoli appears to be aiding indiscriminately terrorism of the Right and of the Left has been attributed to broad destabilization designs on the part of Colonel Qaddafi in Italy.

Italian territory also constitutes an important base for Libyan terrorist enterprises unrelated to Libyan expatriates and Italian subversives. One of three major depots of arms maintained by the Qaddafi regime abroad is allegedly located in Sicily and used to support various Mediterranean extremist movements. Italian Senator Leo Valiani has been quoted by the press as having reminded his colleagues that it was the Libyan ambassador in Rome who delivered to German terrorist Klein diplomatic luggage filled with weapons, which were subsequently used in the assault on the Vienna OPEC summit meeting of 1975. In March of the following year, a group of Libyans armed with pistols and grenades was apprehended at the Rome international airport as it tried to board a flight to Paris.

On February 24, 1981, a "hit squad" comprising several guerrillas from African and Arab countries opened fire also at the Rome international airport against four individuals of diverse Arab nationalities. One of the arrestees identified himself as "a Qaddafi guerrilla." Some news analyses have considered reports of Libyan training received by Mehmet Ali Agca, who, on May 13, 1981, fired upon Pope John Paul II—Supreme Pontiff of the Roman Catholic Church and head of the State of the Vatican City—as a possible indication of direct or indirect Libyan involvement in that transnational act of terror as well. Most recently, in October of 1981, Maxwell M. Rabb, U.S. Ambassador to Italy, was reportedly the target of a Libyan assassination plot discovered by the Italian authorities.

But, from the Italian perspective, the most sinister of the terrorist or terrorism-connected actions in which Libya has been involved, or suspected of responsibility, is the indiscriminate bombing of the Bologna railroad station, which caused 85 deaths and nearly 200 injuries among bystanders. In this case, allegations of Libyan involvement rest exclusively on circumstantial evidence, as the accusers themselves readily concede. The explosion took place in concomitance with the initial steps of the diplomatic process that led to the signing of the Italy-Malta agreement, pursuant to which the former guarantees the neutrality of the latter.

Because of its offshore oil deposits and strategic location in the Mediterranean, Malta has consistently been an objective of Qaddafi's expansionist designs. Moreover, some of the rightist extremists charged with the material perpetration of the Bologna massacre are believed to have a history of subversive ties with Libya. If Libya is in fact the principal behind this terrorist incident, whose destructiveness is unprecedented in Italy, it would have to be regarded as a message to the Italian Government itself.

Indeed, warnings, retaliation, and other hostile actions have been a highly visible component of Qaddafi's Italian policy. One of the first official acts of the Colonel, after his successful plot of September 1, 1969 to overthrow the pro-Western King Idris of Libya, was the confiscation of their property, estimated at 200,000 billion lire, and the expulsion of 20,000 Italian settlers—not to be confused with Italy's current labor force in Libya—whose presence there had outlasted Italian colonial rule. Likewise, Qaddafi's navy has regularly harassed Italian fishing vessels, accused of violating Libyan territorial waters, to the point of boarding one of them in 1978 from a submarine. Four years earlier, a Libyan jet had strafed an Italian warship in the Sicilian Channel.

In August of 1980, during a seven-day span, Libya resorted to two other intimidatory acts. On the 20th, two Libyan warships forced an Italian oil-drilling rig in the employ of Texaco and the Maltese Government to cease its prospecting activities in non-Libyan waters under dispute between Malta and Libya. Seven days later, the Tripoli regime demanded World War II damages from the Rome Government. Some commentators have interpreted these last two events as a follow-up on the Bologna massacre perpetrated earlier on in the month.

Most recently, following the Gulf of Sidra incident of August 19, 1981, in the course of which two Libyan warplanes were defensively downed by two U.S. counterparts, Libya's Qaddafi threatened to bomb select NATO installations in the Alliance's southern flank and placed Sicily at the top of the list. In reply to the Italian Government's protest, the Libyan Ambassador to Rome stated that the Colonel's "speech was misunderstood." Yet, according to Italian press accounts, Libyan missiles based in Tripoli and Kufra are assigned Italian targets and can actually reach Sicily, Sardinia, and the southern portion of the Italian mainland up to Naples.

It has further been submitted that Qaddafi's specific intent is to block the deployment on Italian territory of NATO's modernized Theater Nuclear Force. On his part, the Italian Minister of Defense, defined by Qaddafi as a "Fascist" and a "tool of the U.S. Central Intelligence Agency," downplayed the present missile threat, but acknowledged four disquieting eventualities: (1) Closer Soviet-Libyan ties; (2) deployment of Libyan commando units for "demonstrative" operations; (3) enhancement of the Libyan missile potential through East-German technical assistance; and (4) foreign policy leverage resulting from Libya's enormous stockpiling of armaments.

The massiveness of Libya's stockpiling has led some analysts to consider whether this might ultimately reflect an alternative Soviet plan, in the event of military hostilities, to approach Italy from the South and bypass its defenses in the North, where the preponderance of Italy's NATO-assigned troops is concentrated. Other observers have implied that Qaddafi's threat to Italy could be effectively carried out only by manning the stockpiled armaments with Soviet and Czech operators. Finally there are those who would restructure the disposition of Italy's armed forces to counter whatever threat may come from the South. It has been rebutted, however, that a goal of the Soviets is the weakening of Italy's defenses in the North, the traditional invasion route. Implicit to the rebuttal is Qaddafi's cooperation with the Soviet Union.

Italian efforts not to jeopardize Rome-Tripoli relations have reportedly required the intervention of the intelligence services. Media accounts allege that at the beginning of the 1970's Italian intelligence foiled an anti-Qaddafi plot to be executed by an international mercenary commando force. Shortly thereafter Italian intelligence reportedly delivered weapons to the Libyan Government on behalf of West Germany and even provided to the Libyans armaments "borrowed" from the Italian army in order to meet a deadline that the Italian company Oto Melara would otherwise have defaulted upon. The intelligence services are also believed to have been instrumental in reducing Italian-Libyan frictions over the seizure of fishing boats by directly paying ransoms to the Libyans and redispatching Italian fishermen toward the waters of the more friendly Tunisian neighbor.

Finally, dissident Libyan expatriates have accused the Italian secret services of turning over to Qaddafi—by direct home delivery or through his emissaries in Italy—captured members of "hit squads," dissenters themselves, and lists of dissenters with their Italian addresses. According to the dissenters, the Italian authorities are even unwilling to "tail" Qaddafi's agents.

The extent to which the reports and analyses surveyed herein are reliable, erroneous, willfully false, or simply superficial is frequently impossible to substantiate at the researcher's level. The lesson to be learned from the study of media accounts and official documents in the public domain is that Libya is perceived as a force and an influence in contemporary Italy. However, considerations pertaining to both Italian and collective Western security would suggest—and this becomes the investigator's task—that every effort be made to determine whether this perception of Libyan power should be attributed to questionable reporting techniques on the part of the media or to possible disinformation orchestrated by the Qaddafi regime and eventual Soviet mentors.●

JAPANESE ECONOMIC POLICIES

● Mr. MITCHELL. Mr. President, Japan's economic performance over the past several years has been the envy of the industrialized nations. Japan has managed to maintain a high level of economic growth and low rates of inflation, despite the two oil price shocks that seriously disrupted the economies of most developed countries.

Although structural and cultural differences between Japan and the United States would make it more difficult to be as successful with similar policies in the United States, an understanding of Japanese economic policies is helpful. I recommend to my colleagues a recent speech given by Takashi Kato, the Director-General of the International Finance Bureau of Ministry of Finance in Japan. The speech was delivered in Tokyo on November 18 to a group of U.S. security analysts, at a meeting sponsored by the American Family Life Assurance Co.

I ask that the speech be printed in the RECORD.

The speech follows:

ECONOMIC POLICY IN JAPAN

Today I would like to discuss some aspects of current and future Japanese economic policies, particularly its international aspects. First, for your background information, let me review briefly our current economic conditions.

1. THE CURRENT JAPANESE ECONOMY

Japan's economic growth rate continues to expand faster than most other major industrial countries. During the past half decade, the Japanese economy has grown at an average annual rate of nearly 5 percent (5.1 percent in FY 1976, 5.3 percent in FY 1977, 5.2 percent in FY 1978, 5.5 percent in FY 1979, and 3.8 percent in FY 1980). For FY 1981 (which began on April 1), we forecast an economic growth rate of 4.7 percent. This rate of growth is especially notable when compared with the U.S. and West

German economies which are both currently experiencing declining growth rates.

Japan's inflation rate remains among the lowest of the major industrial countries, despite almost entire reliance on crude oil imports. Compared with most other developed countries where inflation has been in double digits, the Japanese inflation rates have remained a single digit since 1976: 9.3 percent in 1976, 8.1 percent in 1977, 3.8 percent in 1978, 3.6 percent in 1979, and 8.0 percent in 1980. Only West Germany, with an average inflation rate of approximately 4 percent, outperformed Japan. Recently, prices have become increasingly stable. As measured by the Consumer Price Index, the rate of increase declined over the previous year from 4.4 percent in July to 4.1 percent in August and 3.9 percent in September. For the year as a whole, we estimate that the CPI increase will be limited to 5 percent.

Surprisingly, Japan managed to keep inflation relatively low during the second oil crisis, even though relying almost totally on imports for its supply of crude oil. We are justifiably proud of our efforts to control inflation and particularly of our adroit management of the second oil crisis.

Japan's balance of payments situation remains vulnerable because of our heavy reliance on imports for energy and other raw materials. During the past few years, we have experienced wide swings in our balance of payments primarily due to OPEC oil price increases. Before the second oil shock, Japan had a comfortable surplus in its current account, which was more or less offset by a constant outflow of long term capital. In FY 1978, the current account surplus was $11.9 billion, and the long term capital outflow $16.3 billion. In FY 1979, however, the oil price hikes caused a current account deficit of $13.9 billion, a swing of more than $25 billion in one year.

The balance of payments improved as the yen depreciated, oil prices stabilized, and the economy slowed. Although we had earlier pessimistically forecasted a current account deficit of $6 billion, we now expect a $7 billion or larger surplus for FY 1981. Obviously, this improvement in the current account is unlikely to continue at the present rate because anticipated faster economic growth should stimulate imports and restrain exports.

The yen has been quite volatile. It hit an all-time high of 176 yen to the dollar October 31, 1978. However, the next day, the Carter Administration announced a package of dollar rescue measures, which eventually led to a turn-around of the yen-dollar ratio. In the latter half of 1979, the rapid rise in oil prices led to a sharp deterioration in our balance of payments, which in turn caused the yen to depreciate considerably. As in the first oil crisis, perceived vulnerability of the Japanese economy due to its dependence on oil imports exaggerated the pessimism of the bearish. Further pressure on the yen occurred as U.S. interest rates began rising. On April 8, 1981, the yen hit a low of 260 yen to the dollar. As the balance of payments improved, the yen began to recover gradually, and, although it has fluctuated, it recently has stayed in the range of 215 to 220 to the dollar.

2. JAPAN'S CAPABILITY FOR ECONOMIC ADJUSTMENT

The oil crises of the 1970s were a great challenge to economic policymakers in oil-importing countries. Oil-importing countries, including OECD countries, piled up huge deficits as OPEC member countries accumulated enormous balance of payments surpluses. Non-oil-producing countries suffered from accelerating inflation and stagnating growth rates as a result of higher energy costs and huge capital accumulation in a limited number of countries. Japan was no exception to these effects.

The first and second oil crises together caused an eleven-fold increase in crude oil costs in less than eight years. The average price of imported crude oil, which was only $3.30 per barrel in 1973, rose to $36.70 in September 1981. Japan's crude oil bill rose from $6.0 billion in 1973 to nearly $54 billion in FY 1980. During the second oil crisis alone, the average price of a barrel of imported crude oil rose from $13.80 in November 1978 to $25.40 in December 1979 and to $36.70 in September of this year.

For Japan, it was particularly difficult to weather these two oil crises because Japan was so dependent on imports. However, by most indicators, we have successfully overcome the second "oil shock". Two major factors contributed to the successful adjustment of the Japanese economy.

The first factor was careful management of aggregate demand through flexible fiscal and monetary policies, easing or restraining the economy depending on its stage. Fiscal policy was most frequently and actively used in the form of increased government expenditures when an increase in aggregate demand was required. From FY 1976 to FY 1978, we undertook a sizable increase in public works expenditures. As a result, we became heavily dependent on public borrowing. About one third of the central government's general account expenditures was financed through public borrowing in FY 1980. Government bond issues in FY 1981 are estimated to be ¥12.27 trillion, approximately $56 billion, which is larger than that of the United States, and three to four times as large as that of West Germany or the United Kingdom.

As a result of huge borrowing requirements in successive years, government debt is enormous and has become a major constraint on fiscal and monetary policies. Government bonds outstanding may reach ¥82 trillion, roughly $370 billion, at the end of FY 1981. The interest payment on this debt amounts to $70 million per day. Consequently, the current administration has made reduction of this deficit a top priority and has been actively pursuing administrative and fiscal reforms.

Monetary policy also has been used extensively for demand management in Japan, just as in other countries. This has been very effective because of Japan's unique corporate financial structure which relies more heavily upon external financing that that of the U.S. Corporations in Japan tend to borrow from commercial banks relatively more than their U.S. counterparts, who may be more likely to raise funds directly in capital markets. Because Japanese banks are more responsive to administrative guidance from the Central Bank, monetary policy in Japan, which relies on adjustment of the discount rate, reserve requirements, or open market operations, generally tends to be more effective than in the U.S. and other countries where corporate reliance on commercial bank borrowing is smaller and commercial banks less responsive to central bank policies.

Our discount rate was lowered five times within a year to deal with economic stagnation following the second oil crisis. Since then it has been lowered several times more and now stands at 6.25 percent. It should be noted that a country's discount rate policy cannot escape the influence of the level of interest rates in other countries. For example, high interest rates in the U.S. would significantly discourage reduction in Japan's discount rate, even if it was needed to stimulate the domestic economy, because of its probable adverse effects upon the yen's value and capital outflows.

I would like to mention Japan's window guidance which the Bank of Japan implements to relatively large commercial banks. This is a measure taken by our central bank when the decrease in demand is required. The central bank sets limits to the increase in lending of the big commercial banks. This is an effective measure under the funding structure I mentioned before.

Demand management policy rather than the control of the money supply prevails in Japan. We do not attempt to set targets for the money supply. The Bank of Japan simply announces a quarterly forecast. This policy has been in force since the middle of 1978.

The second factor which contributed strongly to the Japanese economy's successful adjustment to the two oil crises was that each economic unit, whether business, household or individual, recognized the changes in the economic environments, both external and internal, and accepted its share of the burden of adjustment. The Economic Survey on Japan published by OECD described this as a successful "supply adjustment" and "flexibility of wages and labour units."

I personally feel that Japan's successful economic performance has been possible because the principle of the free market mechanism has worked effectively to facilitate needed changes in industrial structure and reallocation of the labor force. It always requires effort and pain to accept and adapt to new circumstances. In this regard, our achievements have been due to the painstaking efforts of the Japanese people.

3. INTERNATIONAL MONETARY POLICY

Next, I would like to discuss Japan's international monetary policy, which is my primary area of responsibility. Two specific policy areas, foreign exchange policy and internationalization of the yen, may interest you.

First, I would like to point out the foreign exchange policy problems posed by the present floating exchange rate system. Theoretically, under such a system, imbalances are supposed to be restored automatically through changes in the foreign exchange rate. Therefore, we should be able to concentrate on domestic economic policy goals, such as sustainable growth, price stability, and full employment, relatively free from interference by external actors. However, as a result of our eight years experience since the system started in 1973, we have learned there are two serious problems with the floating exchange rate system.

One problem is that the actual swings in the foreign exchange rate tend to be too drastic. For example, as I mentioned earlier, the yen, which on the day before the announcement of the dollar rescue measures in 1978, was 176 yen to the dollar, fell to 264 yen amidst the second oil crisis in April 1980. This was a depreciation of 33 percent in less than 2 years. The yen, which stood at 199 at the beginning of this year, closed at 226 recently, about a 12 percent swing. This extreme volatility, thus, implies that, at times, we have to continue to use monetary or fiscal policy to stabilize the currency.

The second problem relates to the adjustment process to restore external balance through the floating exchange rate. There is a tendency for the actual exchange rate to overshoot the proper exchange rate. Because there is a time lag between changes in the exchange rate and the restoration of external balance, known as the J-curve effect, we sometimes see, for example, deterioration of the current account at a time of currency depreciation, which in turn requires some corrective measures. For example, in addition to demand control through fiscal and monetary policy, we had to take yen defense measures mainly aimed at attracting capital to Japan in November 1979 and in March 1980.

These experiences have shown us the desirability of intervention in the foreign exchange market to avoid erratic and distorting currency swings. They also show the need for coordinated and cooperative action, including cooperative intervention by the monetary authorities of different countries.

Second, I want to express my views on the internationalization of the yen. If the internationalization of a currency is defined as the emergence of a currency having all three

traditional functions of money in the international system, namely measure of value, means of exchange, and store of value, then the world economic system has no international currency other than the dollar at present. The yen has become internationalized only to the extent that there is some advance in its use as a store of value. The share of yen assets in foreign currency reserves held by monetary authorities has been gradually increasing. It went up to 3.2 percent in 1979, as compared with 0.6 percent in 1975.

This may be seen as a part of a general trend of diversification of reserve assets, which is attributable to external and internal factors. Externally, reserve assets have been increasingly diversified as oil producing countries suddenly accumulated huge amounts of reserves to invest. Internally, countries such as Japan and Germany had to accept increased non-resident holdings of assets denominated in their current account deficits, which resulted from a sudden rise in crude oil prices. We may add that the increased confidence in the Japanese economy and the realization of the attractiveness of holding yen assets were additional factors which promoted the "internationalization" of the yen.

When a currency comes to be actively used internationally, there must be more frequent exchanges of the currency for other currencies. This may in turn limit the scope of domestic economic policies in the country concerned. Therefore, although the diversification of assets is a fact of life, we must monitor its development carefully. We need to discuss with different monetary authorities how best to deal with it. One school of thought holds that an increased use of SDRs would be useful as a means of controlling the undesirable effects of asset diversification, such as instability of foreign exchange rates.

Frankly, there are many unresolved problems with the concept of SDRs and there is little possibility of reaching an agreement in the near future. So until we find a satisfactory means of controlling different reserve currencies, we should not, in principle, advance policies which promote international usage of a home currency apart from the dollar.

We believe we should remain cautious toward the international use of the yen as long as it is used only as a store of value, one of the three inherent functions of a currency. At the same time, in view of the present developments of our balance of payments and economic environment at home and abroad, we have to accept, in principle, the inevitable international use of the yen. Consequently, we must endeavor to adapt the Japanese economy to the natural evolution of the world economy through sound economic policies in harmony with the world.●

BATF FUNDING

● Mrs. HAWKINS. Mr. President, without sufficient funding to do so, the Bureau of Alcohol, Tobacco, and Firearms (BATF) will be unable to enforce the Federal Contraband Cigarette Act. Should this occur, organized criminals will receive additional illegal windfall profits by increasing cigarette smuggling beyond the estimated $1.5 billion in 1978. I, therefore, support efforts to restore $2 million in funding for BATF.

Cigarette smuggling must be considered a national responsibility because State and local governments are ill equipped to fight it alone. Illegal opportunities for profit are, in fact, generated by taking advantage of differences in State and local taxation. By buying in low-tax States and selling in high-tax States, smugglers reap rewards intended for State and local treasuries. The only effective way State and local governments could fight such interstate trafficking is to eliminate differences in their taxation of cigarettes. While bending to such pressure would stop cigarette bootlegging, it violates the principle that each State and locality has the right to establish its own taxation policies. Therefore, only the Federal Government can stop organized efforts to defraud State and local governments through manipulation of differences in local taxation of easily transported commodities like cigarettes.

At a time when the fiscal pressures on State and local governments are mounting, it is especially important that they recoup as much as possible of the $391 million in annually lost revenue from cigarette smuggling. My own State now loses about $36 million because of lax enforcement. Cutting BATF enforcement funds will only drive these losses up and further enrich those who make a living breaking the law.●

THE ENERGY CRISIS

● Mr. TSONGAS. Mr. President, for months, newspapers have proclaimed the presence of an oil glut. With prices dropping on the spot market, some analysts predict that OPEC's day is done. They say that ongoing structural changes in the U.S. economy will quickly lead to energy independence.

Is the energy crisis over? The answer is "No." Several factors lead inescapably to this conclusion.

First, it is true that conservation efforts, a slowed world economy, depletion of larger than normal commercial reserves, and high Saudi production have provided a roughly 5-percent excess in crude supply over demand—even in the face of a substantial decrease in overall OPEC production. However, this oil surplus could end at any time. Oil supply disruptions, an expanding world economy, inventory buildup, or a host of other factors could rapidly soak up the surplus. The recent Saudi decision to cut production to 8.5 million barrels of oil per day (MBD)—2 MBD below its summer peak—is likely to end this surplus by late spring.

Second, the current world oil surplus does not signal an end to the energy crisis—nor will energy independence. Oil is a finite and diminishing resource—one that we are rapidly using up. Current efforts to increase domestic production and reduce our foreign dependence are nothing more than a "drain America first" policy. What will we do when our own reserves are used up and we have not developed renewable alternatives? We must see the energy crisis as a long-term problem.

Third, the so-called structural changes some analysts have noted in our economy are nothing more than a modest response to significant price increases. The absolutely essential changes in the structure of our economy to allow the natural transition to renewables have barely begun:

Energy continues to be undervalued;

Energy production continues to be subsidized at the expense of conservation; and

Market and financial barriers continue to impede the implementation of conservation and renewables.

In the world series of energy, it is not the top of the ninth, it is only the bottom of the second. Let us examine these points in detail.

TODAY'S OIL SURPLUS IS TEMPORARY

There is, indeed, a surplus of oil on the world market today. OPEC production has dropped from nearly 31 MBD in mid-1979 to roughly 24 MBD today, and there is still a 2 to 3 MBD or 5 percent worldwide surplus over demand. In response, a number of producing countries, faced with dwindling oil sales and large development programs to finance, have reduced prices to recapture their share of the market. Recently, Nigeria cut prices from $40 per barrel to $36 per barrel. Spot market prices may fall further yet.

In context, however, the price readjustment has been exceedingly modest. The past 2 years saw Saudi light crude jump from $13 per barrel at the start of 1979 to $34 per barrel today, and spot market prices for some crudes climb to over $40 per barrel. The current oil surplus, on the other hand, has forced the average world price of oil down by only $1.20 from its peak of $35.53 per barrel in February. Today's average price of oil is still above that of last December.

It should also be noted that today's surplus of roughly 5 percent in free world oil supply over demand is about the same size as the shortfall in 1979 that drove prices up by a factor of three. Clearly, we are not seeing signs of a major breakup of OPEC power. To the contrary, in their most recent meeting in Geneva, the OPEC oil ministers agreed on a unified price structure. At best, we will have stable prices for a while, but Mideast political instability will not likely allow them for long.

Worldwide energy conservation efforts have been a major factor in producing this oil surplus. In 1979, the 21 nations of the International Energy Agency—principally Western Europe, the United States, Canada, and Japan—used 35.9 MBD. In 1980 this dropped to 33 MBD and this year the rate is roughly 31 MBD. In the United States, oil imports have dropped from 8.8 MBD in 1978 to roughly 5.4 MBD today. Our gasoline consumption so far this year has been 2 percent less than 1980 and 8 percent less than in 1979, due to less driving and more efficient automobiles.

Slowed economic growth has also been a factor in these reductions in consumption. In 1979, the annual eonomic growth of the developed countries grew at just 1.1 percent in 1980. This caused a 2- to 3-percent lower demand than would have otherwise been expected.

A third factor is that since last fall, commercial stocks have been reduced by 500 million barrels—a 10-percent reduction. As it cost $6 to $9 per year to store a barrel of oil, it makes sense for the industry to not maintain excessively high stocks. At the same time, this has reduced world demand by over 1 MBD.

A fourth factor in causing the current oil surplus was the Saudi maintenance of higher than normal production. Last summer, the Saudis were producing oil at roughly 10.5 Mbbl/d. They have since

agreed to reduce it to 8.5 Mbbl/d as part of OPEC's effort to unify prices at $34 per barrel. Some argue that the Saudi's maintained high production levels to force prices to stabilize and even drop. In contrast to many OPEC members whose oil reserves will be substantially depleted during the next 20 years, Saudi reserves will last well into the next century. The Saudis thus must be concerned about maintaining a market for their oil for a long period. Their OPEC partners want the highest possible price for their dwindling reserves today, even though this will force more rapid development of alternatives. The Saudis' high production levels to control prices is nothing more, it is argued, than an attempt to keep us on the oil fix and insure their market into the next century. Whatever their motives may have been, the recent OPEC agreement ended the high Saudi production rates.

The current oil surplus could end at any moment; we have a breathing space—no more. Political turbulence in the Middle East could result in a sudden supply disruption and another round of price increases such as followed the collapse of Iran 2 years ago. Even if it were possible, American energy independence would not end our vulnerability. Our European and Pacific allies will continue to be highly dependent on OPEC oil. Currently, West Germany is dependent on OPEC for 64 percent of its oil; Japan's dependence is 77 percent; France's is 95 percent.

THE ENERGY CRISIS IS A LONG TERM PROBLEM

Even without a sudden disruption, the current surplus cannot be expected to last and prices will eventually again rise. In the long term, OPEC policies will matter very little. Worldwide oil demand will increase while supplies decrease.

The world's population is growing and with it, the demand for oil. As the Western economy rebounds from the last 2 years of sluggish growth, oil use will do the same. Similarly, oil use to fuel the growth of less developed countries is expected to increase 70 percent by 1990. A strong commitment to develop cost-effective conservation alternatives to offset these demands is essential now and into the future.

Simultaneously, world oil resources are falling steadily. Production by several OPEC nations such as Algeria and Libya will end by the turn of the century. North Sea production is expected to level off as is Alaskan North Slope production. Oil production in the continental United States is expected to decline. The Congressional Office of Technology Assessment study, "World Petroleum Availability, 1980–2000," predicts that U.S. oil production will fall from its current level of 10.2 MBD to a level of 7.2 to 8.5 MBD in 1985 and 4 to 7 MBD in the year 2000.

Projections by major oil companies such as Exxon are comparable. The amount of oil produced per foot of well drilled in the lower 48 States has declined for the last 40 years—despite improved technology and better understanding of geology. Some studies have predicted that within 20 years, it may take, on the average, more energy to drill an oil well in the continental United States than the well would produce. Alternatives must be developed and soon.

THE TRANSITION TO RENEWABLES

Over the next few decades we will be faced with an increasingly serious shortage of oil. We have no choice but to develop alternative energy resources. In the near term, the strategic petroleum reserve (SPR) can provide us insurance against a sudden oil cutoff. Energy conservation can cut our energy consumption—reducing our vulnerability to a sudden disruption. This will also extend the life of our oil resources and give us more time to develop alternatives to oil.

In the midterm, other more abundant fossil fuels such as coal, and the synfuels derived from coal, may help ease the shortages. However, the environmental impacts—such as acid rain and the greenhouse effect—of fossil fuel use generally and coal in particular may necessitate limiting their use.

In the long term, renewable energy resources are the only answer. They must be developed and implemented well before our fossil fuel resources run out or their use is restricted. That does not leave us much time.

Transition will require fundamental changes in our economy. The decontrol of oil prices was an important first step but hardly sufficient. Further changes are vital. They include the following steps:

First, the marketplace must be allowed to function rationally. The price of energy to the consumer must reflect its true cost, including environmental, national security, and other indirect costs. Direct and indirect subsidies of energy production and use must be eliminated. When possible, the price of energy should reflect the cost of providing new energy resources, not the average cost of old plus new resources. These changes will provide the correct signals to the consumer to make rational energy choices. At the same time, consumers need assistance in adjusting to these market realities.

Second, intrinsic market barriers must be removed. Many cost-effective investments in energy conservation or alternative energy resources are possible today but cannot be taken advantage of due to market imperfections. One example is the difficulty of inducing the landlord or the tenants to weatherize a rental unit. A second is the difficulty of financing the high front end capital costs of cost effective alternative energy improvements by a homeowner or a small business. A third is that major appliances such as furnaces and central air conditioners are usually purchased by the builder, not the homeowner or renter, and are usually purchased on the basis of their lowest first cost. The homeowner/renter is then stuck with appliances that usually prove to be the most expensive to operate and the most expensive in total lifetime costs.

Third, the short time horizons of the marketplace must be overcome. Investors in energy efficiency improvements typically demand a payback in 3 or 4 years or less. They do not consider potential energy price increases and shortages in later years. Given a building lifetime of 40 years and more, for example, failure to take future events into account could cost us dearly. The buildings we construct today may not be operable 10 years from now.

FEDERAL RESPONSES

Energy analysts all agree that we must speed the development and implementation of energy conservation and renewable energy resources. Politically, however, we have gone in circles. Each time we have an energy crisis we have had to relearn the basic facts about energy over again. Every Congress and administration in recent years has had to face these facts but have never developed an adequate response. The programs developed have never been sufficient to meet the need.

This is not to argue for an overwhelming Federal presence in energy; that is neither necessary nor desirable. However, a greater Federal effort is needed to develop sufficient workable emergency response and to overcome existing market distortions and imperfections.

Mr. President, contrary to what many are saying in the face of the current oil surplus, the energy ball game has not yet been won. On the contrary, it is only the bottom of the second and already we are way behind. I would ask that we carefully reexamine current national energy policy and reformulate it to address energy reality. We must be more prepared for emergencies, we must encourage energy efficiency, and we must make the transition to renewables.●

THE TRADE POLICY OF THE REAGAN ADMINISTRATION

● Mr. LUGAR. Mr. President, our distinguished Ambassador to the Federal Republic of Germany, Arthur Burns, recently delivered an address on "The Trade Policy of the Reagan Administration." The address outlines with the usual clarity of its author the relationship between foreign policy, trade policy, and domestic economic policy.

Dr. Burns says:

A thriving international commerce requires not only freedom from tariffs, quotas, and other governmental inhibitions; it also requires and at the same time promotes a politically stable and peaceful world.

Dr. Burns indicates the importance of the American resolve to defend an international environment that assures the preservation of democratic values, freedom, and peace. I commend Dr. Burns' speech to my colleagues, and ask permission that it be reprinted in full:

Dr. Burns' speech follows:

THE TRADE POLICY OF THE REAGAN ADMINISTRATION

(By Arthur F. Burns)

My aim this evening is to discuss the foreign trade policy of the Reagan Administration. I have chosen to address this distinguished audience on that subject because of my admiration, as well as that of my government, for the contribution that the German business community has made over the years to the strengthening of international trade and investment.

The importance of foreign trade to the German economy is well known, but its importance to the United States is neither as well known nor as much appreciated. Twenty years ago, merchandise exports constituted less than 4 percent of America's gross na-

tional product. By 1980 they amounted to more than 8.5 percent of our gross national product. Export industries, of course, have always played a larger role in Germany than in the United States. It is nevertheless interesting to note that the doubling in the past twenty years of the role of exports in the over-all performance of the American economy exceeds the growth of Germany's exports relative to the over-all performance of its economy.

The United States may never export as large a portion of its total production as does Germany. Our population, Geographic size, and physical location militate against this. Even so, merchandise exports constitute a significant and growing sector of our economy.

But if American exports have been growing, so too have our imports; indeed, imports have grown much faster than exports. Our trade balance has consequently been almost steadily in deficit during the past decade. To be sure, our international accounts have been powerfully reinforced by earnings from foreign investments and from trade in services. Even so, the balance of payments of the United States has been weaker during the past decade than at any earlier time in our history. The position of the dollar has improved materially in the past year, as you well know. But today's dollar no longer enjoys the confidence of international traders or financiers that the dollar had in 1950 or even in 1970. The need to expand merchandise exports further has thus inevitably become a major objective of American Economic policy.

The trade policy of the Reagan Administration is best understood as an integral part of the Reagan macroeconomic program. That program is directed to meeting two urgent needs of the American economy that by now are well understood by thoughtful Americans across the political spectrum.

In recent years, business investment in new plant and equipment has languished in the United States. Unemployment—particularly among young people—has materially increased. Moreover, the historic upward trend of industrial productivity—that is, output per manhour—has decisively flattened out. The need to put an end to the sluggishness of the American economy has therefore become urgent. Another and no less vital need is to unwind the inflation of costs and prices that has afflicted the United States since the mid-1960's.

These two needs—to curb inflation and to reinvigorate the economy—are, of course, closely related. As long as inflationary fears and expectations govern the outlook of businessmen and consumers, the American economy cannot prosper. In an inflationary environment, incentives to save and to invest tend to deteriorate.

Not only that, but much of the finest energy of businessmen and investors is gradually diverted from creative entrepreneurial activities into speculative pursuits that add little to the nation's economic strength—such as acquiring or trading in real estate, in commodity futures, in paintings, old coins, foreign currency and whatnot. All this, of course, has been widely practiced in the United States in the anxious hope of somehow keeping up with, or possibly staying ahead of, inflation.

Keynesian remedies for stimulating general economic activity, however great their merits in the early postwar years, have by now lost their potency and are no longer promising. As a practical matter, at least in the case of the United States, economic sluggishness can no longer be effectively remedied by easy credit or by enlarging the government sector. To reinvigorate the economy, the Reagan Administration is therefore seeking to create a better environment for business enterprise.

It is doing this by curbing government expenditures, by lowering both individual and corporate income taxes, by reducing the burdens that governmental regulation imposes on business, by reducing the growth of the money supply, and—perhaps most important of all—by assuring the business world that these reforms will be carried out in a cumulative way—that is, that they will not be temporary, that they will not be confined to this year, but that they will in fact be enlarged progressively in the years ahead.

The thinking behind this economic program is by now familiar. Lower tax rates are expected to strengthen incentives to work, to save, and to innovate. Tax relief will enlarge the pool of funds available for business investment. With savings increasing, new investments in plant, machinery, and equipment will be facilitated. The basic force driving capital investment forward will be the emergence of a more favorable business environment—an environment marked by more moderate government spending, lower tax rates, faster depreciation, fewer regulatory obstacles to enterprise, and a monetary policy that aims to gradually restore a stable price level. The reasoning goes that in such an environment, business confidence will again flourish, so that capital investment will keep expanding, industrial productivity will resume its customary upward course, and job opportunities for both the young and the old will multiply.

This economic theory was questioned at the start by not a few economists, and skepticism concerning it has certainly mounted in the past two or three months. For my own part, I believe that the implementation of the theory has not measured up to its original promise—more specifically, that tax reduction has been pushed too far while reduction in projected government spending have not been pushed far enough. Fortunately, political forces are now gathering in the United States to restore a better fiscal balance. But whether or not this is accomplished in the near future, the implications for trade policy of the Reagan economic program are both clear and important.

To the extent that the program succeeds in improving industrial productivity and curbing cost and price inflation, it will also improve the competitiveness of American businesses both in their home market and in foreign markets—provided, of course, that protectionist forces are kept in check. With business capital investment increasing, outlays on research and development growing, and general business activity again advancing at a satisfactory rate, American firms and workers will be able to adjust more easily to changing competitive conditions in international markets.

In view of these expectations, as well as because of the Reagan commitment to broad regulatory relief, it should not be surprising that the Reagan economic program has given new and added impetus to American advocacy of open and unrestricted international trade. At recent international gatherings the United States has taken every opportunity to urge strong support of an open trading system and full implementation of the Tokyo Round Agreements. That approach to trade policy is by no means new for the United States; but it is now more tightly linked to the basic economic philosophy of free enterprise, and this fact should be reassuring to the international business community.

The Reagan economic program has additional favorable implications for international trade. To the extent that it succeeds in breaking the cost-price spiral, the inflationary premium that has become imbedded in American interest rates will be reduced or even eliminated. The unwinding of inflationary expectations would therefore result in lower interest rates. Once both inflation and interest rates are substantially lower in the United States, foreign exchange markets should gain in stability. This in turn will make it easier for businessmen to engage in international trade. When foreign exchange markets are highly volatile, as they have become of late, businessmen must not only cope with the rigors of international competition but also with abrupt changes that may occur in the value of their country's currency relative to the currency of the foreign firms to which they sell or from whom they buy.

To some extent bankers have developed new financial mechanisms for shielding traders from exchange rate fluctuations. Most traders, however, would undoubtedly prefer stable foreign currency markets to the large and unpredictable swings that have marked recent years. By contributing to stability in foreign exchange markets, a dollar of stable domestic purchasing power would surely exert a positive influence on international trade.

My remarks thus far have been devoted to showing how the broad thrust of the Reagan Administration's foreign trade policy is related to its basic macroeconomic program. I would like to turn next to some of the specific problems in international trade that now concern American policy makers and that are likely to loom increasingly important in the years immediately ahead.

First of all, the Administration is taking steps to remove or reduce the obstacles to exporting for which our government is itself responsible. By easing the income tax burden on American businessmen working abroad, this year's legislation has placed American executives in a position similar to that of many foreign executives working outside their countries. The new legislation should improve the ability of American firms to compete overseas, particularly in places where it is difficult or impossible to find qualified local distributors or representatives. The Administration is also seeking to amend the Foreign Corrupt Practices Act since uncertainty about interpreting its provisions has led to some loss of foreign sales. Still another proposal on the administration's agenda has the aim of easing antitrust barriers to the formation of joint export trading companies.

Second, the Administration is launching a drive to liberalize world trade in services. The reasons for special attention to this area are compelling. For many years the service sector has been growing more rapidly in the United States than the production of goods. The trend in other industrial countries has been similar. American service firms—that is, firms engaged in engineering, shipping, air transport, banking, insurance, advertising, communications, and so on—have thus become an increasingly important factor in the international economy as well as in our own economy.

Despite this growth, trade negotiations between the United States and other countries have continued to focus on problems faced by manufacturers and farmers. Governmental barriers that limit international trade in services—for example, subsidies of domestic enterprises or regulatory restraints on foreign firms—have hitherto been largely neglected. That is why a major aim of American trade policy at present is to seek a framework in the GATT for resolving trade problems in the service area that will be as effective as the existing framework for handling trade problems in the goods area.

A third objective of American trade policy is to impress on the rest of the world, especially on developing countries, the importance of a liberal investment policy. Some countries impose special conditions for foreign investments within their boundaries and thereby circumvent internationally agreed trade arrangements. Governmental regula-

tions that subject foreign enterprises to performance requirements—such as the extent to which locally produced parts must be used or the extent to which final products must be sold abroad—distort trade as effectively as traditional tariff barriers.

If these more subtle forms of protectionism remain unchecked, much of the trade liberalization that has been accomplished in the past thirty years may be undone. Therefore, the Reagan Administration is not only resolved to maintain an open investment environment domestically; it will just as firmly seek the reduction of foreign barriers to American investments—partly, to be sure, for the sake of American business, but also in the hope of fostering economic growth abroad, particularly in the developing countries.

A fourth objective of American trade policy is to reduce the interference with normal market forces to which various foreign countries are resorting in order to protect their high technology industries—among them, the firms involved in producing aircraft, computers, power plants, telecommunications, and pharmaceutical goods. High technology industries are clearly of major importance to America's economic future, as well as to our national security. Our government is therefore determined to seek an international environment in which other governments will be less inclined to favor their domestic producers through preferential tax policies, subsidized export financing, or other forms of intervention.

Some progress in reducing subsidized export credit arrangements in Europe and Japan has recently been achieved, but much more needs to be done to bring interest rates on foreign credit sales into line with prevailing market rates. A free trade environment in high technology goods will be increasingly stressed by the American government both in bilateral and multilateral negotiations next year and in the years ahead.

Finally, the older concerns of American trade policy—those centering on trade in agricultural products, steel, shoes, and textiles—as well as the more recent concerns about automobile imports will continue to count in the domestic politics of the United States and will be accorded some international expression. That is practically unavoidable, particularly when the general economy is sluggish and some industries are severely depressed.

But the preponderant emphasis of American trade policy during the coming decade is likely to be on the several trade issues on which I have dwelt—namely, the removal of American disincentives to exports, the need to expand international trade in services, the avoidance of investment regulations that distort international trade and the critical imporance of high technology exports to the future of the United States.

At the beginning of my address I pointed out that the internal logic of the Reagan Administration's macroeconomic program requires a basic commitment to open markets and unfettered international trade. Before concluding my remarks this evening, I also want to note how the Administration's trade policy is related to its overall foreign policy.

The fundamental objective of American foreign policy is to foster an international environment that assures the preservation of our democratic way of life in a world that remains at peace. The great majority of the American people are by now convinced that a stronger national defense is needed to provide that assurance.

The Reagan Administration has therefore projected substantially larger outlays on defense at the very time when it is boldly moving to cut back the portion of the nation's resources of labor and capital that the government has been absorbing. A strengthened national defense, it is reasoned, will not only deter aggressive Soviet adventures; it will also protect the flow of foreign raw materials that is vital to our own economy and that of our NATO allies.

A thriving international commerce requires not only substantial freedom from tariffs, quotas, and other governmental inhibitions; it also requires and at the same time promotes a politically stable and peaceful world. In its turn a stable and peaceful world favors the liberalization of trade that is so essential to the economic growth and welfare of the international community.

These are major reasons why the United States, besides maintaining a generally open market for foreign products, is participating actively in the "general system of preferences" that enables developing countries to export many of their products on a duty-free basis. Although statutory authority for this preferential system does not expire until January 1985, the Reagan Administration has already decided to seek an extension of that authority and is now consulting with the European Community and Japan on ways to reform the system so that developing nations may derive greater benefits from it.

There is also an opposite development in trade policy that I must not leave unmentioned—namely, the Reagan Administration's departure from the principle of free trade in connection with exports of strategic goods to the Soviet Union and Eastern Europe. It is my strong personal hope, as well as that of my Government, that intervention in East-West trade will not last many years. But in view of the urgent security needs now facing the United States and our Allies, the efforts of the Soviet Union and its East European partners to purchase military or quasi-military goods from Western suppliers cannot be ignored.

The Reagan Administration is engaged in a thorough re-examination of the procedures now being used to license exports to the Soviet Union and Eastern Europe. That is being done in consultation with our Allies in the hope that we may mutually agree to tighten existing export standards. Agreement in this area is not easy. Individual governments have different views concerning what constitutes or contributes to military technology.

Different views also exist about the proper economic relationship between West and East. Discussion of these matters is made more difficult by current economic weakness in both the United States and Europe. When order books are thin and growth prospects low, it is tempting to focus on the benefits to jobs and profits that can result from larger East-West trade. It is also tempting to argue that if the Soviets and East Europeans cannot buy goods in one country, they will be able to do so in another.

While all this is an inherently complex subject, neither the United States nor its Allies can permit the enticements of East-West trade to undermine our collective efforts to strengthen and modernize the common defense.

Let me say, in conclusion, that the American commitment to open markets and unfettered foreign trade, while by no means absolute, is still far reaching. The objective of this commitment is not only to advance the economic and political interests of the United States; the objective is also to promote the economic and political interests of the international community at large. Free trade permits specialization of individual countries along lines of comparative advantage. It rewards productive efficiency and penalizes inefficiency. By encouraging new technologies and effective marketing, it keeps production costs down and therefore serves as a significant counterforce to inflation.

These are fundamental teachings of both economic theory and economy history. They have not always been respected by the United States or other countries of the world; and they are not fully respected today in the United States or elsewhere. But the fact of paramount importance is that despite the economic difficulties of recent years, both the United States and most other countries have largely avoided the short-run advantages that can occasionally be achieved through protectionism.

Fortunately, American policy makers as well as those in Germany and many other countries fully recognize that the gains from protectionism are often illusory even in the short run, and that they are certainly overshadowed in the long run by the loss to society that results from inefficient use of scarce resources. I hope that the members of this distinguished audience will deem it fitting to participate in disseminating this basic truth.●

COUNCIL OF JEWISH FEDERATIONS 50TH ANNIVERSARY GENERAL ASSEMBLY

● Mr. LEVIN. Mr. President, it is with pleasure that I rise on the floor to recognize the splendid activities of the Council of Jewish Federations on its 50th anniversary general assembly which was held in St. Louis, Mo., November 10–15, 1981.

Mr. President, I am delighted with the election of a distinguished citizen of Michigan, Mr. Martin Citrin, as the new president of the Council of Jewish Federations at this 50th anniversary general assembly. Mr. Citrin has had a long and distinguished career as a national leader in philanthropic sector. He will be serving in this position to which he was elected for a 3-year term. We extend to him our heartiest congratulations and best wishes for a successful and productive presidency.

The Council of Jewish Federations is comprised of 200 local Jewish community federations which in turn are an umbrella for over 800 social services agencies in hundreds of communities throughout the United States.

This 50th year anniversary is one of particular great celebration because of the splendid work the council and its local affiliate federations have consistently done over the past 50 years.

Jewish federations throughout the country have provided direct highly professional, volunteer lead, delivery of service in health care, meeting the needs of our elderly, educational activities, community center activities, recreation, athletics, family service, vocational service and a myriad of other activities which have met the needs of the Jewish community as well as the non-Jewish community in which the agencies are located.

The Council of Jewish Federations has symbolized to me and to millions of others around the United States some of the best examples of what voluntarism can produce in the delivery of real services to citizens throughout the United States.

In addition, the council and its local federations have contributed mightly through their voluntary activities as well as their financial assistance to communities in need throughout the world and

to the continuing relationship with the people of the State of Israel.

Over 2,500 delegates were elected by local communities to the 50th anniversary general assembly. In connection with seminars and meetings on vital subjects, the delegates considered very important resolutions which were developed over the past year in connection with public concerns on which they wanted to express their feelings.

I wish to have printed at this point in the RECORD six major resolutions on very diverse areas of interest so that this body and the country can have the benefit of the thinking of this outstanding organization and its membership.

I know the Senate wishes to join me in congratulating the Council of Jewish Federations on the celebration of its very productive 50 years of service to America and to the world.

The resolutions of the 50th anniversary General Assembly of the Council of Jewish Federations are as follows:

RESOLUTIONS—NATIONAL AND COMMUNITY ACTIONS

The resolutions adopted by the CJF General Assembly express the views of the delegates of the member Federations.

The General Assembly is the governing body of the CJF. Its actions define the policies which govern the board and staff of the Council. They serve as recommendations and guides to communities for local actions.

A number of the resolutions urge specific actions to be taken in each community. Only to the extent that these actions take place, can the resolution move forward from the platform statement to reality; the essence of many of these resolutions can be achieved if, in each community which approves them. they are followed by concrete performance to carry out the objectives of the resolutions. Accordingly, we look forward to community approval by action rather than merely approval in principle.

Resolutions adopted by the Assembly in previous years continue in force, unless revised by subsequent Assembly actions.

PEACE IN THE MIDDLE EAST

Recent events in the Middle East have underscored the importance of building a solid structure of peace. While it is gratifying that the new leadership of Egypt has committed itself to the continued carrying out of the terms of the Camp David accords and normalization of relations with Israel, we believe the United States must reaffirm the validity and importance of these agreements as the only appropriate framework and process for the negotiation and resolution of remaining points of dispute in the Arab-Israeli conflict.

Given the serious risks Israel undertook in giving back all of Sinai to Egypt, the negotiations relating to autonomy in Judea-Samaria should take into consideration Israel's security needs. We urge the United States government to reject the Saudi-Arabian 8-point proposal which is an imposed settlement intended to destroy the Camp David process and would lead to the destruction of Israel.

We call upon the United States Administration to demonstrate its commitment to the Camp David process as the only instrument to achieve peace.

The United States Administration is to be commended for its recognition of the Middle East as an arena of East-West conflict in which Israel is an essential strategic ally of the United States and we welcome the proposal by the Reagan Administration to engage in strategic cooperation with Israel as part of the United States program to build a regional anti-Soviet strategic consensus. We hope that strategic cooperation between the United States and Israel will soon be demonstrated in tangible and significant programs of mutual benefit since Israel is America's only stable, militarily viable ally in the region.

In order to maintain the strategic balance of power, which is an essential stabilizing factor in the region, the United States must be mindful of the massive military build-up in the Arab world and resist Arab pressure to accept a linkage between oil supplies in exchange for arms.

In this context, the Administration's sale to Saudi Arabia of AWACS planes and offensive sophisticated military equipment, we still believe, is not in the best interests of the United States. These arms will not only undermine Israel's military position, they constitute a clear and present danger to the United States military interests because they may fall into unfriendly hands. The experience with the United States equipment in Iran should serve as a reminder and a warning. In seeking congressional approval of the sale the Administration argued that the Saudis would be drawn closer to the United States and the United States-sponsored peace process; the Administration now bears the obligation of demonstrating the soundness of this rationale, and must continue to evaluate the process as it unfolds. The Administration should also take steps to insure that the assurances given the U.S. Senate on the manning of the aircraft should be faithfully carried out.

It should be noted that the events of the past year have confirmed that United States access to the oil of the Persian Gulf does not rest on the Arab-Israeli equation. Many other factors impinge on the situation, including the continued Soviet involvement in Afghanistan, the Iranian revolution, the Iraq-Iranian war, the Syrian occupation of Lebanon and the rise of fanatical Islamic fundamentalism that acts out its views in murder and assassination.

We commend the United States Administration's continued commitment to military and economic assistance to Israel as a vital link in the free world's defense of the Middle East.

The President and Secretary of State should be commended for adhering to the United States position that the United States will not negotiate with the PLO so long as that terrorist organization refuses to recognize Israel's right to exist and refuses to accept UN Resolutions 242 and 338 which are the basis of the Camp David agreements.

The true terrorist nature of the PLO was visible for all to see in the murderous bombings of synagogues in Antwerp, Vienna and Paris as well as in the events that have unfolded in Lebanon. Here a country is being ripped to shreds and all but destroyed by the PLO and its Syrian and Libyan sponsors—in turn supported by the Soviet Union.

The Syrian missiles still threaten Israel and it is essential that the United States revive the Habib Mission so that these weapons can be removed promptly from Lebanon.

We also take note of the substantial arms build-up by the PLO during the ceasefire, and the threats that these weapons represent to the peace of the area.

Recently, there have appeared some unfortunate statements that American Jews should not express their views on American foreign policy or issues of United States security or American-Israel relations. The Council of Jewish Federations, deeply conscious of the values on which this country is based, and the pluralistic nature of American society, unequivocally asserts the constitutional rights and duties of all United States citizens to petition members of Congress and to state their views to the Executive branch on all issues foreign and domestic.

WOMEN'S CONCERNS AND WOMEN'S RIGHTS

In 1975, this General Assembly adopted a resolution calling for non-discrimination in the selection of men and women for the highest Jewish communal responsibilities. It applauded the actions of communities where women were participating in the highest policy-making roles and urged all member Federations to make the fullest utilization of the talents of all individuals. We now call attention to the continuing need for Federations to take action in this area.

The Council of Jewish Federations reaffirms its commitment to equality and urges all member Federations to maximize involvement of women in communal leadership roles and to upgrade women professional workers in Jewish communal service as well as practice non-discrimination in pay scales. CJF commits itself to take additional steps to increase the number of women in leadership roles in CJF.

In the general community women continue to suffer from discriminatory treatment in the workplace and in other areas of life. Whenever women suffer such discrimination, we call upon our member Federations to take all appropriate actions to assure equal rights for women, including support of the Equal Rights Amendment.

REDUCTION IN GOVERNMENT FUNDS FOR HUMAN SERVICES

A week after the Presidential elections last year, this General Assembly took the position that "an unfair portion of the burden of our economic situation should not be imposed on that portion of the population least able to bear it—the poor, the aged, the unemployed and minorities."

As the Reagan Administration's plan began to unfold, this position was reiterated by the CJF Board in April, 1981.

Despite commitments by the Administration to maintenance of a "social safety net", the budgetary cutback of more than $35 billion is demonstrably hurting the elderly, the working poor, the sick, those needing food supplements. Direct losses to voluntary agencies in federal funding in 1982 will exceed $4 billion, with no likelihood of voluntary contributions being able to make up this amount.

But even the $35 billion reduction will not be the end for 1982. The Administration has called for additional cutbacks that may go as high as $12 billion in order to reach its planned goals. And these reductions must come out of the programs already sharply reduced in the first wave of reductions.

We state our firm opposition to further cutbacks. The consequences can be disastrous. Not only are the lives and families of millions of citizens adversely affected, but the very fabric and unity of our society is being tested.

The Federations have a special role to play. Many Federations have already assessed the impact on their agencies and their clients, and others should do so immediately. It is essential that we who know the human consequences should articulate them to the public and our elected representatives. We should continue to monitor the impact on a day-to-day basis.

Federations and CJF should take steps to develop know-how, expertise, guidelines, and contacts at state and local levels in order to be effective in influencing the direction of state block grant expenditures. This means each Federation must assign volunteer and staff leadership to this area of activity and will call for inter-Federation collaboration at a higher level than ever before. A number of Federations have joined together to develop action at the State level in such areas as Maryland, Florida, Illinois, New Jersey, Ohio, California, Pennsylvania, and New York. CJF is working with these efforts and offering assistance and encouragement. Our Washington Action office is actively involved.

The entire voluntary sector has expressed its concern with these developments. The Administration has indicated its commitment to work to strengthen the voluntary sector and

this is a development to be welcomed and commended. But there should be no illusion that the voluntary sector can effectively approach the level of making up for the public cutbacks. In the voluntary sector there will be a greater need for coalition-building and inter-agency collaboration. Federations are urged to work with their local counterparts, even as CJF works at the national level with like-minded groups.

STRENGTHENING ADVOCACY ON BEHALF OF SOVIET JEWRY

The number of Jews being permitted to leave the Soviet Union has dropped precipitously as the result of a deliberate Soviet policy implemented by complex and cumbersome regulations. The consequence of these actions has been the almost total demoralization of the Jewish activist movement in Soviet Russia. Unless this situation is reversed we may be faced with the possibility of the total loss to the Jewish people of hundreds of thousands of Jews who are eager to exit Russia and reunite with their people.

We must dedicate ourselves anew to the sacred tasks before us. We pledge to redouble our efforts to insure that United States and Canadian public opinion supports expanded Soviet Jewish emigration in conformity with the Helsinki accords and basic human rights. The Madrid Conference designed to monitor the implementation of Helsinki agreements is not yet concluded and we must make the maximum use of this forum as leverage for change.

The Soviet Union continues to use prison and the threat of prison to dampen the emigration movement. There must be a halt to these "trials" and a release of those imprisoned.

As a result of the denial of exit visas to the thousands who apply for emigration, the number of "refuseniks" has grown to tragic proportions. These people face the loss of their rights to work and to live as decent human beings. These cruel and inhuman practices must cease.

There is continuing evidence of growing anti-Semitism in the Soviet Union and Russia is now the world center for dissemination of racist and anti-Semitic literature. As in the past, Jews are denied the rights guaranteed by the Soviet constitution to their distinctive cultural and religious life—with no publications in Hebrew, no genuine newspapers, theater, schools, or other tools of religious and cultural life.

North American Jewry is now confronted with a major crisis in the movement for redemption of Soviet Jewry. If we fail, the historic consequences will be devastating. We must rededicate ourselves to a revitalized effort to meet the dimensions of the challenge.

We call upon both the U.S. and Canadian governments to make the fullest use of the forums available to them to raise the issue of the fate of Soviet Jewry with the Soviet government, including negotiations around trade and economic issues.

We call upon the about-to-be-appointed U.S. Under Secretary of Human Rights to keep the issue of Soviet Jewry high on the agenda of our country's concern.

UNITED STATES HOLOCAUST MEMORIAL

The Council of Jewish Federations strongly commends the United States government's commitment to perpetuate the memory of the Holocaust, as expressed in its establishment in 1978 by President Carter and ongoing support for the United States Holocaust Memorial Council. As President Reagan said at the second annual commemoration of Days of Remembrance, ". . . we need always guard against that kind of tyranny and inhumanity. Our spirit is strengthened by remembering."

We wish to commend the United States Holocaust Memorial Council and the U.S. government for sponsoring the unique and highly successful International Conference of Liberators of the Concentration Camps. We look forward to the availability of the video and printed records of the entire remarkable proceedings for use by communities throughout the country.

The Council of Jewish Federations hereby strongly supports the efforts of the United States Holocaust Memorial Council to develop a dignified and enduring commemorative institution, the National Holocaust Museum, in Washington, D.C.

ENERGY CONSERVATION

We reaffirm the Resolution on Energy Conservation passed by the 1979 General Assembly with amendments as follows:

"One of the greatest challenges facing the United States today is the reduction of its dependence on unstable Persian Gulf oil sources. The development of an effective United States energy policy is vital to the economic and social well-being of our country, to our national security, to the maintenance of an independent United States foreign policy, and to world economic and political stability.

"The American Jewish community has a crucial stake and important role to play in promoting sound United States policies to reduce our dependence and in practicing individual energy conservation. America's reliance on imported oil at ever-increasing prices (over tenfold since 1973) contributes to staggering inflation in the United States, a shrinking dollar, and a United States balance of payments deficit of over 28 billion dollars. This threatens to curtail U.S. economic growth and to exacerbate group tensions over a shrinking economic pie. Energy decisions will help determine whether we have an expanding or contracting economy and whether the American government can continue to fund the social and economic programs which the Jewish community has traditionally endorsed.

"Moreover, energy decisions are key to the future security of Israel. Arab oil revenues (over 50 billion dollars invested in the United States and an additional 16 billion dollars in trade) provide the increasing leverage of the Arab-OPEC countries' negative influence on the independence of the foreign policy of the United States and of other energy-dependent countries.

"The Jewish community as well as all other Americans have a responsibility to make energy programming a top priority and to urge that the United States adopt energy policies which will result in substantial reductions of the United States oil dependence through a balanced program to reduce wasteful energy consumption, increase domestic and non-OPEC supplies, develop alternative, renewable sources, guard the United States against supply cut-off, and protect the poor against increased energy costs.

"The Council of Jewish Federations urges its member Federations and affiliated agencies to devise and practice diligently all possible measures of energy conservation. Such measures include conducting a conservation energy audit of Federation and agency facilities to ascertain their operating efficiency from a conservation point of view. Efforts should be made to make the community aware of the problem of energy waste and consumption, and current conservation information should be regularly circulated among the million families affiliated with the Federation constituency.

"The following facts about oil consumption in U.S. transportation should be made widely known:

"1. The transportation sector accounts for 26 percent of United States energy consumption and 50 percent of United States oil consumption.

"2. The Americans who drive automobiles alone consume one-ninth of the oil consumed daily in the world.

"We believe that the American people are prepared to make sacrifices on an equitable basis, and we call upon the United States Congress to give leadership in this regard.

"In addition to developing practical programs for energy conservation in the buildings controlled by the Federation and their agencies and encouraging public discussion of energy issues, we call for stepped-up United States government funds to provide incentives for conservation measures which will have a substantial impact on the energy habits of this nation.

"We urge the United States to expend available domestic energy resources, accommodating to necessary environmental and other safeguards, but propelled by an understanding of the serious economic and political hazards of increasing dependence on overseas energy sources.

"We further urge government and industry to undertake more intensive research and develop programs on the various alternative energy sources such as solar, wind, hydro-electric, geothermal, fusion, synthetic fuels, biomas (including gasohol), and any others which give promise of technical and commercial feasibility in the near and long term."●

TUITION TAX CREDITS

● Mr. GARN. Mr. President, as many of my colleagues have, I am sure, I have received a number of letters from my constituents, predominantly educators, about my position in favor of the concept of tuition tax credits. Many of these letters are thoughtful and insightful; some of them reflect a misunderstanding of some of the proposals for tuition tax credits; many more reflect a basic difference of philosophy about the nature of public education. About these latter differences there is not much that can be done, other than to communicate as clearly as possible the philosophy which leads me to support tuition tax credits. Today I would like to take a moment to do that.

To begin with, I should note that I am a product of the public schools. My children have attended and continue to attend public schools. I have never seriously considered the possibility of private schools. I am grateful to my teachers and to the school administrators who made possible for me and my children what I consider to be an excellent education. At the same time, I certainly recognize that there are those whose experience with the public schools has been less satisfactory than mine, and those whose expectations of what a school should provide are different from mine.

Having said that, let me outline some of the objections to tuition tax credits as expressed by my constituents, with my own reaction and comments.

First. Tuition tax credits are unconstitutional. It is certainly difficult to know what the Supreme Court will do with tuition tax credit legislation when faced with it. The Court's record in this area is very mixed. However, whatever the Court thinks, I think that aid to individuals in procuring education for their children is constitutional, even if that education is provided by a religious institution. Historically, I think my case is unassailable: The Congress that pro-

posed the 1st and 14th amendments to the States certainly could not have been suggesting that there was anything wrong with fairly overt assistance by Government to religion in general, though they were careful not to favor one church over another.

But the historical argument aside, I would simply argue that this society, as any successful society, must rest upon a foundation of religious morality. It may be unpopular to say it in these days of rampant secularism, but I know of no long-lasting society which has ever been built on any other foundation, and I am concerned about the trend toward eradication of religious influence in our daily lives.

Besides, I see no real constitutional problems in designing a system of aid to individuals, rather than to religious schools. The G.I. Bill did exactly that for higher education, and the line between higher education and elementary and secondary is purely arbitrary.

Second. Tuition tax credits would encourage the establishment of inadequate schools. There is no reason for this to happen. Schools would continue to have to meet State certification requirements, just as they do now. Besides, there are those who argue that the public schools are already performing inadequately, and that it ill behooves them to be casting stones.

Third. Tuition tax credits would drain money away from the public education budget. It is true that tax credits will reduce Federal revenue but it does not mean that the education budget will be directly reduced by that amount.

Fourth. Public school parents will be taxed twice, once to pay for the public schools and again to assume the burden of the credit to private school parents. I confess that this is a difficult charge for me to understand. It appears to arise out of a difference in philosophy about the nature of taxation. As I see it, public school parents will continue to have the education of their children subsidized, first by those who have no children—an ever-increasing proportion of Americans—and second by parents of private school children, whose tax credits do not match the savings they bequeath to society by taking their children out of public schools.

Fifth. Tuition tax credits provide more assistance, per pupil, to private schools than is currently spent for public schools. That is true by considering only direct Federal expenditures. Since the Federal share of the education budget is less than 10 percent of the total, this is surely a misleading charge.

Sixth. Private schools do not have to accept all students, and thus should not receive public support. But whether they have to or not, private schools do accept the handicapped, the learning disabled, the disruptive, and the criminal. And in some cases they do an excellent job of teaching them. Marva Collins, in Chicago, has taken children who have been permanently expelled from the public schools, and has taught them successfully, at a lower cost than the public schools. As for the poor, it is a desire to give the poor the option of going to private schools that led to the idea of tuition tax credits in the first place. Nor are private schools a haven for racial bigots. They would have to comply with applicable law in order to qualify for tax credits, of course, but studies already show that private schools are more integrated than public schools.

Seventh. Tuition tax credits would help the wealthy more than they would the poor. That is always a problem with any kind of tax relief, since the wealthy pay more taxes than the poor do. The important thing is that at present, the wealthy can send their children to private schools if they wish. It is the poor who cannot. Tuition tax credits will make it possible, for the first time, for poorer people to take advantage of private schools. In that sense, they will help the poor people more than they will the rich people.

Eighth. Government support will bring Government control over private schools. This argument is somewhat suspect when it is raised by those who oppose private schools. It is a legitimate fear of those who have struggled to keep their private schools out from the regulations Government is already attempting to impose on them. However, in my view the beauty of tuition tax credits is that they avoid controls, since the assistance goes to the parents, and not to the institution itself. Schools would have to meet minimal accreditation requirements, but would not become subdivisions of the Government.

Mr. President, these are the major arguments raised against tuition tax credits. But in the letters, and in my conversations with those opposing the credits, I sense some other currents at work, and I would like to address them for a moment.

Once is that tuition tax credits will destroy the public schools. One constituent went so far as to say "let's not destroy the system by allowing competition."

Mr. President, I reject the idea that the public schools are so bad that they will be destroyed by competition. If the charge is true, then things have come to a sorry pass, and perhaps the public schools ought to disappear. It is not true, and I am confident that the public schools will meet the competition. They will have to make some changes, I am sure. But I think that some changes are warranted. I have faith in the principle of competition in education as in economics, and I see no harm coming from the minimal competition that a modest tuition tax credit will provide.

A second unspoken current concerns the question of diversity and homogeneity. Many of my constituents allude to the role of the public schools in melding Americans from all ethnic, racial, and economic backgrounds into a cohesive whole. I think the schools have done that, to some extent, in the past, and I am grateful for it. At the same time, the problem confronting us now may be too much homogeneity. It may be that we could do with a bit more variety in backgrounds than we have now. I have often said on the floor of this Senate that the Nation would be better served if our lawmakers were not so overwhelmingly members of a single profession, the legal profession. There are great homogenizing instruments at work in the United States today, the most powerful being television. It will not hurt us to maintain some variety in our educational institutions.

A final current, and perhaps the most serious one, is the fear on the part of many educators, whether expressed or not, that the public schools have irretrievably lost the confidence of the people they serve. This current is related to the one I mentioned first earlier, but it is not quite the same. This one involves a recognition that the schools have undertaken, in many cases unwillingly, sometimes with gladness, tasks not suited to them. The result has been failure, and a failure that has spilled over into more traditional areas of academic life.

To choose an innocent example, the schools have been charged with teaching driving skills. This was not something forced upon them, but something they went out and sought, sometimes to give the football coach something to do until sixth period. The schools have taught driver training, but they have not succeeded: Adolescents who have taken driver ed have as many accidents as those who have not.

As I said, this failure of the schools in a nonacademic area is a harmless one. At least those who take driver's ed do not have more accidents. The failure of the schools in sex education is much more serious, much more divisive, and much more erosive of the basis of support the schools must have if they are to continue to survive public scrutiny. Under the circumstances, it is a wonder to me that any school board would seek to take on these added responsibilities, but they seem to.

Besides these self-inflicted wounds, the schools have also had thrust upon them a variety of responsibilities as a result of Federal court decisions and the machinations of Federal education bureaucrats. These range from the bilingual education programs that have been the subject of so much controversy to the establishment of coequal athletic programs for boys and girls, with the resulting public controversy and budgetary demands.

The result is a failure of school bond issues, a declining enrollment, public criticism of teachers and administrators, a fall-off in respect for the educational establishment, and a spiralling loss of authority and discipline. Under the circumstances, it is a wonder, as one commentator on the District of Columbia tuition tax credit proposal remarked, that this movement has been so long in developing.

That same observer expressed the wish that, if the proposal failed in the District of Columbia, which it did, of course, that that not be taken as an expression of approval for the way the schools in the District are operated. I hope that as well, and suggest that school districts around the country take a look at what the Washington schools are like, as a preview of what could very well happen in

any school district which yields to the extreme demands of groups determined to use the schools to promote broad social change.

Such groups are abroad in the land, and that is what leads to tuition tax credit demands. These demands are legitimate, and I support them, even though I do not make them myself. Mr. President, I hope this brief speech has clarified my own position, and make it intelligible to my constituents.●

UNIVERSITY OF CONNECTICUT SOCCER TEAM

● Mr. DODD. Mr. President, less than 2 weeks ago, the University of Connecticut soccer team won its 20th game this season and, with that victory, the national soccer championship. That 2 to 1 win over Alabama A. & M. at the National Collegiate Athletic Association tournament reinforced what we in Connecticut have believed for years: the University of Connecticut soccer team is the best in America.

In the past 7 years, no soccer team in the country has achieved more in player development, fan support, national recognition, and consistency—and it is consistency that Connecticut soccer coach Joe Morrone stresses.

Coach Morrone's efforts have paid off. In the past 13 years, against the Nation's top-ranked teams, the "UConn" soccer team has won more than 18 games six times, including at least two 20-victory seasons. Morrone has coached 12 All Americans (at this time 1981 selections have not been made), and sent nine players to professional soccer teams.

Mr. President, in an era of college soccer teams dominated by foreign born and recruited players, the UConn team is a welcome anomaly. They have been for years, in large part due to Coach Morrone's commitment to soccer in Connecticut and in this country.

The UConn soccer team and its coach have won the hearts and minds of us all in Connecticut. We take tremendous pride in their accomplishments—in not only the victories but also that special brand of commitment, discipline, and skill that has become their trademark. There is a special congratulations this year for a hard-fought and well-deserved championship but every year this team proves itself unique and earns our continuing admiration and respect.

Mr. President, I ask that a list of the University of Connecticut soccer team, its coaches, managers, and others who made the championship a reality be inserted into the RECORD at the end of my remarks.

My congratulations go to these individuals and to the thousands of others who have joined me in supporting UConn teams over the years.

To the seniors on this year's team, captain Charles J. McSpiritt, Carlos M. Carlos, Elvis A. Comrie, Pedro G. DeBrito, James J. Renehan, and James J. Lyman, this season marks a brilliant finish to intercollegiate athletic careers already marked by excellence. To them, and to coach Morrone and UConn athletic director John Toner, along with the remainder of the team, this season was a dream come true.

The information follows:

THE UNIVERSITY OF CONNECTICUT 1981 NATIONAL CHAMPIONSHIP SOCCER TEAM

Charles J. McSpiritt, Captain; Carlos M. Carlos, Elvis A. Comrie, Pedro G. DeBrito, James J. Renehan, James A. Lyman, John R. Brubacher, Graziano Cornolo, Paul F. Hunter, Timothy H. Masley, William T. Morrone, James A. D'Orsaneo, Edward J. Lynch, Anthony L. Pierce.

Elio Romeo, Carlos A. Almeida, Kieran P. Coffey, Jeffrey S. Dunn, James K. Kiernan, Noel H. Moon, Eric T. Myren, Thoukis Stavrianidis, Brian H. Stevenson, Shawn L. Sullivan, Thomas F. Thompson, Roger P. Vergries.

Head Coach: Joseph J. Morrone.

Assistant Coaches: Eric J. Swallow, James F. Luce.

Managers: Ann M. Maher, Karen L. Shaw.

Athletic Director: John Toner.

Sports Information Director: Joseph J. Soltys.

Trainer: Ralph C. Mansell.

Administrator: Thomas W. Weston.●

SPECIAL OLYMPICS

● Mr. WEICKER. Mr. President, as chairman of the Subcommittee on the Handicapped, I continue to become more aware and sensitive to the needs and aspirations of individuals with handicaps, and their families. In this last month of the International Year of Disabled Persons we can look all across this country and observe private and governmental organizations working well together to strengthen public understanding of the potential contributions of disabled Americans. We must continue to invest in people and assist individuals with disabilities to become more independent and productive members of society.

A program worthy of our attention and recognition is the special olympics. It is the special olympics program which now serves over 1 million retarded individuals that has achieved a great victory of the spirit. A program of year-round sports training and athletic competition, special olympics honors the ideal of the Greek Olympics. Mentally retarded individuals have learned through sports they can compete and succeed in life.

On January 4, millions of Americans will have the opportunity to share in the feelings of joy and pride which special olympics brings to retarded individuals and their families through a very special television movie, "The Kid From Nowhere."

It is the story of a young mother raising her son, and a coach who introduces them to special olympics and a new way of life.

One of the greatest barriers parents face raising a retarded child is the problem of attitudes. This type of television movie can promote improved public understanding and sensitivity toward mental retardation. It reminds us that individuals who are mentally retarded are more like us than they are different. We must emphasize and develop the abilities of people, not isolate people because of their disabilities.

The star of this movie is Ricky Wittmann, a real-life special olympian from California. It is through Ricky that we are reminded of the need for mentally retarded individuals to be provided the chance to experience life and develop self-confidence.

Families everywhere, I believe, can benefit from watching "The Kid From Nowhere" on Monday night, January 4.●

OPPOSING THE INCREASE IN FEDERAL EXCISE TAXES ON DISTILLED SPIRITS

● Mr. HUDDLESTON. Mr. President, early next year, the Congress will again be considering various proposals to lower the rapidly escalating Federal deficits. One such proposal that has been put forth is an increase in excise taxes. Such a tax increase would be a discriminatory and inequitable method of raising additional revenues. The effect on the various industries that are involved would be disastrous.

I would like to share with my colleagues a resolution that was recently approved by the Kentucky Distillers' Association. This resolution states the firm opposition of these distillers to any increase in the Federal excise taxes on distilled spirits. In addition, it enumerates the already large tax burden borne by this industry, as well as the severe effects that a doubling of the excise tax would have on this industry.

I ask that the complete text of the resolution be printed in the RECORD. I offer it to my colleagues for their review.

The resolution follows:

RESOLUTION OPPOSING THE INCREASE IN FEDERAL EXCISE TAXES ON DISTILLED SPIRITS

Whereas, There is considerable discussion among officials of the Reagan Administration and members of Congress to increase the excise tax on distilled spirits from $10.50 to $21.00 per proof gallon; and,

Whereas, Such an increase is purported to add to the federal revenues to offset certain budget cuts, but is based on the erroneous assumption that the current rate of distilled spirits consumption in the United States would continue; and,

Whereas, The current total tax burden is already more than 50 percent of the purchase price of a medium priced bottle of distilled spirits; and,

Whereas, Such an increase on a product that already bears the heaviest tax burden of any consumer produce would reduce rather than increase the excise tax income. It is an unsound and unprincipled policy to levy excise tax on one industry to the exclusion of others; and,

Whereas, the retail price of distilled spirits has not kept pace or increased at nearly the same rate as other consumer products, and tax increases would significantly contribute to an inflationary economy through the Consumer Price Index; and,

Whereas, Distilled spirits have a right to be offered to the consumer without a tax burden that threatens the distiller viability as an industry, as well as the consumers right to enjoy the product; and,

Whereas, The adoption of such a tax increase would cause irrevocable harm to all distillers, and perhaps extinction of the smaller companies, reducing revenues to the local economy, and contributing to unemployment.

Therefore, be it Resolved, by the Kentucky Distillers' Association, that this resolution, adopted by unanimous vote of the membership at its meeting in Louisville, Kentucky, on October 20, 1981, be sent to all members of our Kentucky Congressional delegation,

and to others, seeking their support, help and assistance in strongly opposing increases of the federal excise tax on distilled spirits.●

MALCOLM BALDRIGE: A SUPERB SECRETARY OF COMMERCE

● Mr. PACKWOOD. Mr. President, it may be out of fashion, but I think it is still entirely appropriate to pay Government leaders a compliment when they deserve one. And while many of our department heads have become all too accustomed to receiving slings and arrows, I feel it is time to recognize the excellence some leaders bring to Washington.

Without question, Malcolm Baldrige is a superb Secretary of Commerce. From the day he began the job, he has played a significant role in national economic and trade policy. And from the day he first appeared before the Senate Commerce Committee, I quickly admired his easy manner, his self-confidence and his straight talk. I have watched him grow to become among the ablest of our President's advisers.

It is a privilege to work with Mac Baldrige on a daily basis it seems. The same can be said of his top staff members, who bring enormous skill and professionalism to their work. Together, I am delighted we are able to fulfill many of the goals President Reagan has set for us.

I am very pleased to realize that Malcolm Baldrige's accomplishments are not going unnoticed. For the record, Mr. President, I ask that a recent profile of Secretary Baldrige written by Clyde Farnsworth for the New York Times be printed at this point. Mr. Farnsworth's story is aptly entitled "Baldrige Sits Tall in the Saddle on Economic Policy."

The article follows:

BALDRIGE SITS TALL IN THE SADDLE ON ECONOMIC POLICY

(By Clyde H. Farnsworth)

WASHINGTON.—He was the first Cabinet officer to predict a recession this year, the first to talk about a jobless rate that could exceed 9 percent. And when the Administration was trying to figure out what to do about Japanese cars, Commerce Secretary Malcolm Baldrige was also calling the shots remarkably accurately. The Japanese, he said, would have to accept some voluntary limitations on exports. Now, as head of a conglomerate department whose 38,000 bureaucrats manage public works, chart the seas, forecast the weather, count the population, collect economic statistics and control imports and exports, Mr. Baldrige is at the vortex of the budget debate.

It's an unusual place for a Commerce Secretary to be, but he's an unusual Commerce Secretary. His rapport with President Reagan is the closest since Maurice Stans' with Richard Nixon. And, though far less visible than either budget director David A. Stockman or Treasury Secretary Donald T. Regan, Mr. Baldrige has become the Cabinet's consensus molder. One of his advantages, he says, is that he does not identify, and is not identified, with currently fashionable economic schools. Neither a monetarist nor a supply-sider, he observes: "I've got a more eclectic background. I don't think you can just take one economic theory. You have to take ideas from several."

So, Mr. Baldrige agrees with the supply-siders in the Treasury that the tax cuts already in place combined with what has already been a 25 percent reduction in the inflation rate over the past 12 months will generate a strong recovery by early summer. "I don't think they are being too optimistic," he comments. He does cite the monetarists, agreeing that the deficit, no matter what its size, must not be financed by inflation, that is, by excessive growth of the money supply. And despite public statements to the contrary last week by members of the Council of Economic Advisers, he believes that it's important to cut spending, that deficits do matter. But what matters most, he says, is the trend—the demonstration that the deficit will be contracting over time.

To any who will listen, the Secretary offers this advice which may be especially needed now: "Underpromise and overdeliver." As for Mr. Stockman, Mr. Baldrige takes his forecasts of mighty $100-billion-plus deficits with a grain of salt. They are "ultra-cautious," he says, so that Mr. Stockman "won't be caught off base."

Although Mr. Baldrige is fighting budget office efforts to slash his department's export promotion, the former corporate chief executive is very much a team player, who refuses to comment on the struggles. "You read and hear about disarray in the Cabinet," he says. "It isn't disarray, it's disagreement. President Reagan didn't appoint each of us to sit around the table and nod our heads 'yes.' He put us there to be advisers, which means there will be disagreements—not disagreements on goals, but on ways to reach those goals. And that's good effective management."

A George Bush man during the election campaign (he ran the Connecticut primary for Mr. Bush, one of the few in which Mr. Bush defeated Mr. Reagan), Mr. Baldrige has only in recent months come to know the President well. They took to each other. Mr. Baldrige's grey pinstripe only partly conceals his hand-tooled Western belt, and he seems of the same cowboy mold as the film roles the President once played. (In fact, the Secretary is so serious about his steer-roping that he remains a card-carrying member of the Professional Rodeo Cowboys Association.)

KINSHIP WITH THE PRESIDENT

Beyond that kinship, his plain-speaking, and credentials, as a self-made businessman which the President especially admires, Mr. Baldrige's influence lies in the power base that the long-neglected Commerce Department is becoming. Its economic and trade roles have been strengthened, Mr. Baldrige says, "because the President wants it that way." To reinforce its analytical and economic forecasting functions, the Department now has an assistant secretary for economic affairs as well as a chief economist. A Bureau of Competitive Asessment has been created, to project where each industrial sector will be in comparison with competitors worldwide by 1990. And Edwin Meese 3d, counselor to the President, is pressing to have the Office of the United States Trade Representative, now headed by William E. Brock 3d, former chairman of the Republican National Committee, swallowed up by Commerce as well.

The Department now also monitors and controls imports, a function that it took over from the Treasury. Mr. Baldrige has just filed complaints against seven countries, accusing them of selling unfairly low-priced, subsidized steel in the United States. But the Department also leads the Administration's auto task force and has just reported that the domestic industry, depressed by the worst sales in two decades, may run out of working capital by the end of this year. Although he decries protectionism, he favored limitations by the Japanese on their exports to give American companies, as he put it, "some running room."

With all of these responsibilities and others besides, such as overseeing telecommunications deregulation, Mr. Baldrige sits on three Cabinet Councils, as many as Treasury Secretary Regan. He is chairman of the Cabinet Council on Commerce and Trade, a member of the Council on Economic Affairs and of the Council on Natural Resources. He also sits in on the Cabinet forecasting sessions of the Treasury, the Office of Management and Budget and the Council of Economic Advisers, the first time a Commerce Secretary has joined the so-called Troika.

While he goes to a lot of meetings, he refuses to get tangled in details, so much so that in some negotiating sessions with foreign governments he's been criticized for failing to prepare adequately. But the critics also remember that when in business, Mr. Baldrige took a 180-year-old Connecticut manufacturer of brass buttons, Scovill, Inc., and turned it into a diversified producer of housing fixtures, appliances and other products. Under his tenure, the company's sales grew five-fold.●

50TH BIRTHDAY OF SRI CHINMOY

● Mr. TSONGAS. Mr. President, I call attention today, as we see 1981 coming to a close, to the occasion of this year marking the 50th birthday of Sri Chinmoy. Sports enthusiast, artist, musician, poet, and director of a meditation group at the United Nations, Sri Chinmoy in a very brief period has accomplished more than most people do in a lifetime. We wish Sri Chinmoy in all his endeavors that help so many, success in the years ahead and best wishes for a long and continuingly fruitful life.●

NATIONAL DISABLED VETERANS WEEK

● Mr. SIMPSON. Mr. President, I wish to speak in behalf of the resolution introduced by my fine colleague from the State of California (Mr. HAYAKAWA) as amended. The resolution to designate the week of November 7, 1982, as "National Disabled Veterans Week" indeed recognizes in a most positive way those who have sacrificed the most in defending our Nation. There are currently some 2.3 million veterans suffering from service-connected disabilities. Many of these are disabled as the result of injuries received in combat.

Mr. President, any recognition we may give to these courageous men and women pales into insignificance when compared with the sacrifices they made when they answered their Nation's call. Yet we must always continue to recognize what they have done for us. Naming the week within which falls Veterans Day, November 11, a "National Disabled Veterans Week" indeed does express recognition, humble and inadequate though it be, to these persons and to their families.

Mr. President, I have served as chairman of the Senate Veterans' Affairs Committee throughout this session of the Congress. Prior to that I had the privilege to serve as the ranking minority member with my good friend, esteemed colleague, and former chairman, the senior Senator from California, who now serves as the ranking minority member.

I have in this time of legislative service developed a deep respect for the contributions made by our Nation's veterans. This respect, and indeed, a feeling of humility and pride are especially pro-

found as I consider the sacrifices of those who were disabled during their time in service. I know that all Members of this body share these feelings with me. Indeed, some of our Members are themselves veterans wounded in combat. I ask that all join in unanimous support of Senate Joint Resolution 123 naming the week of November 7 through 13, 1982, as "National Disabled Veterans Week," and I am pleased that it has passed the Senate.●

TRIBUTE TO WILLIAM N. PLYMAT

● Mr. JEPSEN. Mr. President, many people have contributed to our knowledge concerning alcohol problems, especially those relating to the problems of drunk driving. Few, however, have contributed as much as William N. Plymat of Des Moines.

Bill Plymat is a lawyer and former Iowa State senator who has given selflessly of his time and energy over the past 50 years to educate the public about this serious problem. Currently he serves as chairman of the Iowa Commission on Substance Abuse, is executive director of the American Council on Alcohol Abuse, and is chairman emeritus of the Preferred Risk Mutual Insurance Company in Des Moines.

While associated with an auto insurance company, Bill became interested in the problem of alcohol-related accidents. During that time, he conducted a national study of the nature and extent of the drunk driving problem. Consequently, he became cofounder of the Preferred Risk Mutual Insurance Company founded on the idea of insuring people who do not use alcohol. The company has grown successfully over the years under Bill's guidance and currently has a net worth of $67 million. It insures over 400,000 people and has offices in 48 States.

Bill has been associated for many years with the American Council on Alcohol Problems. He has served as legal counsel and, since his retirement from active duty at Preferred Risk, has been the council's executive director.

This organization is over 75 years old, with some 30 State group affiliates and 2,000 individual associate members. Recently Bill has been a guiding force behind the letter sent to President Reagan which so many Members of the Senate and House of Representatives signed. The letter requests that the President form a national commission to study and make recommendations on how to solve the drunk driving problem.

The idea for this letter started at the annual board meeting of the Council in Minneapolis. Sandy Golden, an investigative journalist from Washington, suggested the idea. Bill Plymat then directed all his energy to make this project successful. His efforts were highly successful; 305 Members, including myself, signed the letter, which was delivered to the President on November 13.

As I stated earlier, few people have given as much time and effort to solving a problem as Bill Plymat has given to the problem of drunk driving, and few have been as successful. I commend Bill for his dedication and resolve. He has proved to be a valuable asset to his country and to his fellow man. He sets a splendid example of voluntarism for others to follow.

Mr. President, at this point I ask that Bill Plymat's testimony before the Senate Judiciary Subcommittee on Courts concerning driving while intoxicated be entered into the RECORD.

The testimony follows:

HEARING ON THE ADJUDICATION BY STATE AND LOCAL COURTS OF DRIVING WHILE INTOXICATED-DUI

(By William N. Plymat)

The announced purpose of this hearing is to examine the actions of state and local courts as they respond to our severe drinking-driving problem. If we are to make real progress, however, we must examine the whole spectrum of the drinking-driving problem.

We must find out what is happening across the country—what the specific problems are and how they are now being approached. We must examine all phases of the problem. This may involve many things not related to the court system directly. And we should come up with a comprehensive program of action. This will require research, exchanges of information between states, cities, courts, public officials, legislators, police, safety organizations, schools, and multitudes of ordinary citizens.

The general public needs to be made aware of the nature and extent of the problem. Citizen involvement in prevention should be invited. Then they will become volunteers who can aid law enforcement officials and courts and back the actions of judges who develop the courage to assess adequate penalties and provide proper restrictions.

Today our judicial system is overburdened and cannot handle the volume of cases that normally arise. We must do things that find the alcoholics and get them off the roads and into therapy. We must also deal with the careless social drinkers who drink and drive with little concern for others.

Police are often reluctant to arrest drinking drivers because they feel the courts will not do justice to the cases. The foundation of this problem is the fact that in most states we have inadequate laws which are vague and indefinite. These laws operate with presumptions instead of a specific standard of law violation. Therefore police feel it is futile to arrest those who are drinking and driving. Often charges are reduced to reckless driving. Often bail is set at a low figure and the driver is back on the street, quickly drinking and driving again. Until our people become educated and become active in supporting police and the courts there will be no really effective judicial action.

I feel qualified to respond with my testimony today because I have been involved in the area of alcohol concerns for the past fifty years. In my high school and college days I was a leader in youth education about alcohol. After entering the practice of law in Des Moines, I worked to improve the laws in my state which related to the use of alcohol, and also a number of years later when I became a State Senator. While affiliated with an auto insurance company, I became interested in the specific problem of alcohol-related accidents. I conducted a national study of the nature and extent of the drinking-driving problem, consulting traffic officials and coroners. I became convinced in the early 1940's that drinking was involved in 50 percent of all fatal traffic accidents.

This led me to conceive the idea of an auto insurance company to insure exclusively persons who did not use alcohol. This company, the Preferred Risk Mutual Insurance Company of Des Moines, started with a very modest capital in 1947. Today it is one of the largest and most successful companies in the country. Its 1980 asset total was over $160,000,000; its premium collection over $119,000,000; its policies in force over 400,000; it's current surplus (net worth) is over $57,000,000. It is a mutual company owned by its policyholders; it has 2500 agents, is licensed in 48 states and has 37 branch offices. Best's Insurance Reports gives the company an A+ rating and says that its rate structure averages 15 percent to 20 percent below the so-called "Manual" which are the rates charged by the "Bureau" companies, which comprise 60 percent of the companies writing casualty insurance. The record of this company provides some evidence of what might be hoped for if we were able to substantially reduce the excessive costs of drinking-driving accidents across our country. The losses as a result of a drinking-driving accident are sometimes astronomical in dollar costs.

I have served Preferred Risk for many years as President and then Board Chairman and am now Chairman of the Board Emeritus. For many years I served as legal counsel for the American Council on Alcohol Problems. Since my retirement from active duty at Preferred Risk, I have served the organization as Executive Director. This organization has operated in the field for over 75 years and has some thirty state groups affiliated with it and some 2,000 individual associate members. It issues a quarterly publication, The American Issue, and its main office is at 6955 University Avenue in Des Moines, Iowa.

COURTS NEED TO DEAL DIFFERENTLY WITH TWO CLASSES OF DRINKING DRIVERS

There are two kinds of drinking drivers. One consists of alcoholics or severe problem drinkers who should be viewed as addicts to the drug alcohol and who do not have adequate control of their actions in drinking. The other group consists of persons who drink excessively in bars and in social groups without real concern for the dangers they create. Hopefully their minds can be reached and actions can be controlled if they are dealt with quickly by immediate prosecutions and penalties. Prompt and positive actions by courts will reach the press and the minds of thousands who are drinking and driving without regard to the dangers or the penalties will be reached and hopefully they will conclude that the day of reckoning has arrived.

The average judge needs a great deal of education in order to make an initial decision on the category that each offender fits as he comes before him. However, judges, even if well educated, can not always be expected to do a really efficient job of this task. This is where specialists are needed.

A PROGRAM DEALING WITH ALCOHOLICS AND PROBLEM DRINKERS

In Polk County, Iowa (Des Moines) an innovative program is in operation. If an offender has no felony record and is not otherwise barred, he or she is turned over to an assessment center for evaluation. This evaluation takes over two hours. It uses testing, a mental examination, contacts with others, use of a check list of factors that indicate addiction, etc. If this study indicates that the offender is truly an alcoholic or severe problem drinker, lacking in adequate mental control over his or her conduct, the person is referred to a therapy facility for a long term program which hopefully will result in the solution of the problem. In the past fiscal year, ending June 30, 1981, the total arrests in Polk County were 1963 and 968 persons were referred to this agency for assessment. In the case of the 968, around 90% were referred to a therapy facility, and the remainder were returned to the County Attorney for immediate prosecution. Those who were turned over to the therapy groups were given deferred

prosecution, which will continue for one year, provided there is no recurrence of a drinking-driving charge. At the end of the year, if the therapy appears to have resulted in success, and they do 40 hours of public service work, the charge is dropped.

At this time it is impossible to know if this program is effective in handling the problem of repeat offenses. One may question how many of this group do find and maintain sobriety, i.e., continuing total abstinence (the only real answer to these problems), but it is possible that if some of these people do continue to drink, they may conclude that they will not drink and drive under any circumstance. A study will be made to determine the long term effectiveness of this program. This deferred prosecution response is based upon the claimed prosecutor's discretion right. These people are considered to be entitled to this type of handling on the basis of the belief that the individuals are sick and unable to control their conduct at the time of the offense and this fact justifies the different treatment from those who may be considered purely volitional violators. This innovative program was instituted by Polk County Attorney Dan Johnston and John Tapscott, who is head of the Des Moines Chapter of the National Council on Alcoholism. Mr. Tapscott, with the aid of state and county money, set up the assessment center.

IMPORTANT ACTIONS NEEDED FOR RECKLESS SOCIAL DRINKERS

Records indicate that many offenders are persons in their teens and twenties. Most often these persons are not alcoholics or severe problem drinkers. Also, many others do not classify as alcoholics. The courts should view these people as purely volitional law violators. They should be handled firmly by the courts with adequate fines, etc. In one recent case a young teenage driver (the press reported as intoxicated on alcohol and drugs) ran into two girls on bicycles and killed one and injured the other. The bail set by the court was only $300. In another recent case in Iowa a 19-year-old driver who had been convicted of speeding seven times in 1981 was driving between 75 and 100 miles an hour at 2:35 A.M. While traveling in the wrong lane of an interstate four-lane road, he ran into another car, killing the other driver and severely injuring the driver's wife. The police had been looking for this youth for many months to serve a suspension of driver's license. He is charged with manslaughter and drunk driving. He was released from jail the same day upon posting a bond of $5500.00.

Should our law and court administration be such as to permit such a driver to be free to drive again immediately, as he might do, even without a legal license? What should penalties be in the case of this offense? Should deferred sentences be permitted under the law? If so, on what terms? In such cases should there be suspension of licenses to drive for some period of time? Some states require a two-day mandatory jail term for convicted drivers. Is this a wise penalty? I will consider this a bit later.

THE IMPORTANCE OF A "PER SE" LAW IN ADMINISTRATION

We need the passage of "per se" laws by all states which have not already passed such laws. Such a law simply says that operating a motor vehicle with an alcohol level above a specified percentage in the blood (.10% in the usual case) is an offense "per se" (in itself). A penalty is then affixed for the offense. I believe ten states have such laws. They constitute an important and necessary improvement over the usual laws which simply outlaw "driving while intoxicated" or "driving under the influence." These usual laws have defined this state in terms of a percentage of blood alcohol and then said that if an alcohol reading is that percentage or above, the driver is "presumed" guilty of the offense. Unfortunately, those presumptions are often quite effectively overcome by testimony of the defendant and his friends. Under a "per se" law a specific and effective "speed limit" is put on drinking and driving.

Under the presumption laws the judge submits the chemical test (blood or breath) of the defendant for the jury's consideration in connection with the testimony of the defendant and friends. Under the "per se" law the judge simply instructs the jury to determine if the test of blood or breath has been properly given. If that is found and the test given has revealed (the usual) .10%, the judge says the jury shall find the defendant guilty of an offense.

In the early days of our country the offense of speeding was simply defined as "unreasonable speed." We got nowhere in controlling speed under such a vague standard. In a similar way we have not made progress under our presumption laws in controlling drinking driving. We need the specific limit, as we have in the case of speed.

When we have a "per se" law we can expect a new attitude on the part of police. When an officer finds a reading of .10% or above he can tell the driver this is an offense. The offender may decide he has no real option but to plead guilty. Today when police radar says a person has been exceeding the speed limit, there is not much he can do but plead guilty. That has caused most drivers to decide they must obey the law. When "per se" laws are adopted and the public is adequately educated, with the help of the media, there is reason to believe drivers will decide they can no longer get away with drinking and driving if caught. Courts will find their case loads dropping to reasonable levels. There will be very few jury trials on the question of "driving while intoxicated." Such a case may still occur, however, where for one reason or another no chemical test reading has been obtained.

It is believed that with "per se" laws, police will be inspired to intensify their efforts to apprehend those who are drinking and driving. And with the public demanding such action, we will begin to reduce the problem. I am informed that the following states now have "per se" laws: Vermont, New York, Delaware, North Carolina, Florida, Wisconsin, Minnesota, Missouri, South Dakota, Nebraska, Utah, Oregon, Maine, California and Iowa.

There is ample justification for "per se" laws based on blood alcohol levels of .10% or lower. Researchers have known for years that even a small amount of alcohol in the blood impairs driving ability. In 1951 the Reader's Digest reported on a well-known Swedish study of expert drivers which revealed that even a slight amount of alcohol "caused a deterioration of between 25 and 30 percent in driving performance." This and many other tests have revealed the somewhat surprising conclusion that impairment is significant after as little as two beers or two mixed drinks, at a blood-alcohol level of .05%. Various experts have concluded that when a blood alcohol level of .10% is reached, a person is physically unfit to drive a car.

During my term in the Iowa Senate (1972–1976) I was unable to convince the Senate that Iowa should pass a "per se" law; but in 1981 the Iowa Legislature did pass such a law with the level of .13%, which I believe is too high.

SHOULD MANDATORY TWO-DAY JAIL SENTENCES BE REQUIRED?

While I was unable to secure a "per se" law, as a result of my efforts in the Senate, the Iowa Legislature finally passed a requirement of a two-day jail sentence for convicted drinking-driving offenders. At that time I sincerely believed this was wise and would have deterrent value on the drinking-driving public. For those who went through the traumatic experience it would be a powerful message not to repeat the performance.

I came to this belief upon learning about experience in the courts of Chicago. In 1970 a study was conducted there under the supervision of Dr. Edward J. Kelleher, Director of the Circuit Court Psychiatric Institute. The study was of 400 drivers who had been arrested for driving while intoxicated—250 of which were convicted, 100 found not guilty and 50 of whom were defendants from suburban courts. It revealed that only 20 percent were alcoholics and 80 percent were occasional or social drinkers. This led Judge Raymond K. Berg to say that there existed a prevalent and deplorable attitude among the driving public that DWI laws were made for chronic alcoholics and not for the occasional or social drinker. He said he thought the occasional drinker would think, "That man they're talking about is a drunk, an alcoholic, not me." This attitude, Judge Berg concluded, increased the possibility that the social drinker would overdrink and drive.

It is well-known that during the Christmas and New Year season there are higher levels of drinking and resulting drinking-driving. In December, 1970, under the leadership of Judge Berg, then supervising judge of the Traffic Court in the Circuit Court of Cook County, Illinois, an announcement was made by the judges of that court that anyone convicted of driving while under the influence after December 17th that year would be sentenced to a minimum of seven days in jail coupled with a one-year's driver license revocation. This was widely publicized by the media in Chicago and known throughout the area. In fact, when I rode a plane to Chicago during that period I was warned by a passenger sitting next to me to avoid all drinking-driving in Chicago.

Fatalities during the period December 18 through January 3 totaled 8 compared with 22 for the same period in 1969; 23 in 1968; and 25 in 1967. During that period also there were 994 personal injury accidents, a substantial drop from the totals of 2,003, 2,028 and 2,156 in the three previous years. This program was continued during the first quarter of 1971. The fatalities for the first quarter of 1971 represented a 32-percent decrease from the first quarter of 1970; a 42-percent decrease from the first quarter of 1969; and a 41-percent decrease from the first quarter of 1968. The March 31, 1971 report of the Illinois State Police covering traffic fatalities throughout the state indicated that they were up throughout the state with the exception of Chicago. Also, personal injury and property damage accidents dropped during the first quarter of 1971 over 1970. Personal injuries dropped from 9,491 to 8,341 and property damage accidents dropped from 36,116 to 32,891.

A year later there was a report of a study by three researchers which claimed that the Chicago "crackdown" produced no reduction in the city's number of car-crash fatalities or arrests. I read the report and was not impressed by what seemed to me to be efforts to explain away the figures by suggesting other possible factors, and a claim that Milwaukee had had similar reductions without a "crackdown". It is quite possible that the "fear" of arrest on drinking and driving developed in Chicago may have carried over into nearby Milwaukee and caused the comparable reduction without an actual "crackdown."

I hear comments that some experts in the field of traffic safety are opposed to the mandatory short jail sentence. They say it would fill the jails beyond capacity. But an Iowa state safety official who supports mandatory jail terms says that during the week most county jails are only 20 percent filled. There is some fear that a jail sentence provision would cause some people to believe this is all that needs to be done. Many times the jail sentence is avoided by judges who permit

persons to "plea bargain" down to reckless driving. The severity of penalty is less important than the feeling that one will be caught and suffer almost certain conviction and penalty.

New York this year passed a law mandating jail sentences of 7 to 180 days and fines of $200 to $500 for those convicted of drunken driving after their licenses were suspended or revoked for an alcohol-related driving offense.

Maine has just passed new laws on drunken driving. In the case of repeat offenders and speeders charged with criminal violations and convicted, judges are required to impose a minimum $350 fine and at least a two-day jail term. Governor Joseph Brennan recently said: "I never believed in mandatory jail sentence before, but we felt that nothing else had worked."

Whether the fear of a jail term provides good deterrence can probably only be ascertained by further research—interviews with those who have received this punishment and study of records to determine whether those so punished repeat their offenses as frequently as those who have not been jailed.

When I was in the Iowa Senate and we were considering decriminalizing intoxication, a lawyer who was a recovered alcoholic called me and urged me not to vote for that. He said he had had a severe drinking problem but had been refusing to admit that he was an alcoholic. Then one night he was picked up and taken to jail. He said: "When that jail door swung closed on me and I found myself locked up for the night like a caged animal, it hit me like a ton of brick. The next morning when I got out I made a decision that this was the end of my drinking days. I went for therapy and have been 100% sober since." This caused me to decide that the two-day jail sentence was at least worth a real try in my state.

MONITORING COURT ACTIONS

Practices of deferred sentences, deferred prosecutions and plea bargaining have had an adverse effect in causing many persons who drink and drive to feel that even if they are caught, the penalty will not be severe. The Iowa Legislature has passed a law requiring a period of suspension of driver's license if a deferred sentence is granted. There are serious questions on the granting of low bail and paroles for persons who have been arrested for drinking driving offenses. Sometimes very modest amounts are set, even where there is a death or severe injury in an accident. Citizen groups need to monitor what is going on in the courts and perhaps see that there is adequate publicity on outcomes, which in turn may result in improved actions in our court system. The suspension of drivers' licenses is important because, as it has been said: "Many a man will not stop drinking and driving to protect himself or others from injury or loss of life, but he will do so to protect his driver's license."

If the courts learn that their actions are being monitored by persons who are in the court when cases are heard and by those who may check and tabulate results, it will create strong pressure on judges to resist the often skillful work of defense lawyers who are able to get people quickly released on modest bail, pled down to lesser charges, and in other ways dealt with leniently.

MONEY FOR ENFORCEMENT ACTIONS

It is widely believed that the police do not have sufficient funds to properly seek out and arrest drunk drivers, even where federally funded alcohol action safety projects have been in operation. I hear that many of these federally funded programs are being eliminated because of the reduction in federal expenditures. Money is needed to provide adequate numbers of police, court officials and others in an effective program seeking out and arresting violators. It is believed that even where drivers' licenses are suspended, large numbers of drivers continue to drive without a license. We need officers to monitor such persons by frequently watching them when they depart from their residences or business places. Severe penalties should be imposed upon the offense of driving without a license.

Efforts have been made in Minnesota to pass a law to assess a 5-cent tax on liquor-by-the-drink sales. The amount of money that such a tax would raise is very large indeed. It would fund good action programs as well as needed funds for alcoholic rehabilitation programs. So far the legislature there has refused to bring such a bill up for serious consideration.

A good solution would be to raise the federal tax on beer, wine and whiskey. There have been proposals in recent days to raise such taxes and taxes on tobacco by 100 percent, which might come close to meeting the federal deficit. It appears no such sizable taxes will be seriously considered with the 1982 elections looming. But a modest tax increase might well be adopted to meet money needs in dealing with the drinking driving problem.

MONITORING OF BARS

When Prohibition ended, many states set up state-owned liquor stores. It was claimed that the old saloon would not come back. The contention was that those wanting to drink should buy their bottles and take them home. Yet in due course liquor by the drink came back. Most of today's bars run into the wee hours, sometimes to 4 and even 5 A.M. I believe it is all night in Nevada.

My study in Iowa covering the years 1970, 1971 and 1972 showed that the period from 9 P.M. to 3 A.M. of each day of the week accounted for 301 out of 665 fatal alcohol-related accidents, or 52.8 percent. These periods starting at 9 P.M. on Friday and Saturday nights accounted for 196 out of the 665 total or 29.5 percent. A similar study I did of the years 1976, 1977, 1978, and 1979 showed that these hours accounted for 514 such accidents, or 58.9 percent of the total, and the Friday and Saturday night periods accounted for 289, or 32 percent of the total.

When liquor-by-the-drink became legal in most states it was argued that a man should be able to have a drink with his dinner. But bars do not close at the end of a normal dinner period, but run for hours afterward.

It would be wise to require that any bar legally operating after 9 P.M. should be required at its cost to have an officer in attendance to observe patrons leaving the bar. The officer could invite patrons to test themselves with a convenient breath-testing device. If one suspected of being impaired were to refuse, the officer could say that he or she would be followed. If the driver's conduct seemed impaired, then the person would be stopped and required to submit to a test on pain of losing a license in states which have the implied consent laws.

Since the passage of the new tough Maine laws on drinking and driving, one popular night spot in Bangor added to their establishment a pocket-size gadget which would test the blood alcohol level. A green light indicates the driver can drive safely and an amber light indicates that someone who is sober should take the person home.

If lawmakers are unwilling to require bars to pay for such monitoring, it could be done with public funds, and then on a spot check basis, if funds were not ample to serve all bars in an area.

CLOSING BARS AT AN EARLIER HOUR

If bars were required by law to close at 9 or 10 P.M., I believe there would be a great reduction in our alcohol-related accident toll. Some claim this would merely shift the problem from the late night hours of closing to the hour after an earlier closing. This might be true to some degree. But when bars run into the wee hours, people who might have to go home earlier before they became impaired sit and drink on and on, often losing track of the number of drinks they have had. They wind up a real menace on the road. Perhaps it seems unrealistic to expect that state laws could be passed to do this in the immediate future, but undoubtedly many city and county ordinances could be passed in areas where public concern proves adequate.

MEDIA SHOULD RESPOND TO THE PROBLEM

It is believed that the media has not given proper attention to the problem. There should be special efforts to get the media to carry the message to the public about the fact that in the case of arrest there will be adequate investigations, license suspensions, adequate bail, and that citizen groups will monitor court actions. This would have deterrent value. The recommendation for people to avoid driving on streets and highways after 9 P.M. to the maximum extent possible would eliminate many targets for drinking drivers. There is a real challenge for the media in educating the public.

NEEDED WARNINGS ON DANGERS OF MODERATE DRINKING AND DRIVING

Most Americans drive with little knowledge of the dangers involved in even moderate drinking. They need to be informed that the National Safety Council has recommended that everyone should wait one hour after every drink before driving. The alcoholic beverage trade has campaigned with the statement that everyone should "know your limits." This implies that there is a safe level of alcohol as far as driving is concerned. The focus should be on the avoidance of all drinking and driving.

Attention should be given to the fact that "half drunk drivers are dangerous, too." This is the title of a very popular and effective educational leaflet which has been widely distributed by the Preferred Risk Mutual Insurance Company and the American Council on Alcohol Problems. My son, William N. Plymat, Jr., was the author of this leaflet.

A NEW NATIONAL ETHIC NEEDS DEVELOPMENT

This same idea is now being presented in the State of Wisconsin. Dr. Ralph F. Hudson of Eau Claire, Wisconsin, has challenged his fellow doctors in a three county medical society to adopt a resolution that all drivers be required to follow the requirements imposed on public vehicle drivers and operators who must have zero percent level of alcohol in the blood. Railroad engineers, bus drivers, airplane pilots and ambulance drivers and others are required to be total abstainers while driving.

As a result their safety records are outstanding. This doctor, who has seen the sad results of many alcohol-related accidents, asks why all drivers should not be required to refrain from all use of alcohol. He is asking his state medical society to urge that policy as a matter of law. Following his leadership, a high school leader in his town and his principal have just dispatched a letter to all high schools in Wisconsin, calling attention to the fact that one of their student leaders was killed by a drunk driver, and asking that the above-mentioned policy of no alcohol for drivers be made a matter of law in Wisconsin.

Hopefully the day will arrive when this would become a national policy. Similar citizen action throughout the country may hasten that day. In the meantime, even without such a law, good citizens should be stimulated to indicate their intentions to refrain from driving after drinking.

NEED FOR EDUCATION

As we said at the beginning, there is a need to face the entire alcohol problem if we are going to solve the drinking driving problem, and this calls for much education of the public, especially youth and newly licensed drivers. The American Council on Alcohol Problems last year brought forth a leaflet

titled, "What You Need to Know About Alcohol for Your Health and Safety." This covered the subject of drinking and driving, as well as other subjects and presented a proposed warning for alcoholic beverage bottles. We printed 600,000 copies of this leaflet for widespread distribution. We managed to persuade state-owned liquor stores to distribute these to their customers. Now we have brought forth a new leaflet considered to be of special value in educating youth. It is titled, "Alcohol Facts—5 Ways Drinking Can Hurt You." It also deals with drinking and driving. Over 200,000 of these will be printed and made available very shortly.

NEED FOR LABEL WARNINGS

This need is now being recognized. S. 1543 which would require warnings on labels of liquor bottles is a bill which should pass. Purchasers of bottled liquor should be confronted with the information such warnings would contain, and constantly reminded of the dangers involved. A section of such a warning refers to the danger of drinking and driving. S. 1543 is being cosponsored by 12 U.S. Senators. There is a companion bill in the House sponsored by Rep. Geo. E. Brown, Jr. and cosponsored by 17 other Representatives. Senator Jepsen proposes to amend S. 1543 to include warnings on beer and wine bottles also.

ALCOHOL ADVERTISING

It is reported that about $500 million a year is expended by the alcoholic beverage industries in promoting consumption of their products. Much of this is glamorous in nature and directed at youth, women and minority groups. It would be very desirable if such a volume of advertising could be reduced. Even where it is permitted, so-called "lifestyle" ads should be avoided. If the industry wishes to prove its sincerity in preventing alcohol problems and accidents, without the requirements of legislation, it could avoid such advertising.

The passage of the bill, H.R. 1800, by Rep. Geo. E. Brown, Jr. (D., CA) to make expenditures for alcoholic beverage advertising a non-deductible business expense in computing net income for tax purposes would be of value, and also increase tax revenues into the U.S. Treasury. It could, in itself, provide the extra funds needed for the actions specified above.

CURRENT EFFORT TO OBTAIN A NATIONAL COMMISSION

The current Congressional effort to secure a National Commission to be appointed by the President on the drinking driver problem follows the effort which began with the American Council on Alcohol Problems to obtain such a Commission. In August I was contacted by Sandy Golden, of Gaithersburg, Maryland, an investigative reporter, who told me of his efforts spanning 15 months to secure such a Commission. I invited him to speak at the Annual Board Meeting of our Council in Minneapolis on September 17th. He suggested a letter to President Reagan and presented a proposed text. The Board responded immediately and 45 persons present at that meeting, representing some 30 organizations, joined in signing it. This was sent to the President and we are hopefully awaiting a reply.

This led, in turn, to a Congressional press conference on October 6th. The conference was hosted by Representatives Michael D. Barnes, James V. Hansen and Glenn Anderson, and resulted in many newspaper articles across the country and including the Washington Post. Mr. Golden was involved in helping preparations, testifying at the hearing and exhibiting a film which showed the problem and the needs. At this conference, the Representatives mentioned announced they were sending a "Dear Colleague" letter to all members of the House and Senate, asking them to join with them in signing a letter to President Reagan, which was essentially the same in text as our letter. Already, at the time of preparing this statement, 30 Senators and 143 Representatives have authoried their names to be attached to the letter going to the President.

Sandy Golden left private investigative work to dedicate himself to this mission of research, public speaking on the issue, working with government agencies, and organizing public education and activities in this field. He has worked independently without compensation during this period and deserves much credit. It shows what can be accomplished by one person when a serious human problem is recognized and needs attention.

WHAT CAN A FEDERAL COMMISSION DO?

As this statement indicates, there are many important aspects to be considered in responding totally to the seriousness of the drinking driving problem. I have outlined a number of them. This leads to the realization of the reason why a National Commission on this problem would be helpful—even necessary. It could produce a master plan to cope with this problem. It could provide leadership and coordination for the task. It could develop public awareness and inspire individuals, communities and states to volunteer their vigilance and support. Further, it could:

1. Make investigations and receive reports of conditions in the various states; study trends in the problem and actions taken which have worked and could be followed in other states; study laws in various states and suggest changes; seek uniformity of laws across the country.

2. Encourage formation of state and local task forces to take needed action. Efforts of citizen task forces in Maryland and California have already accomplished much with new laws being passed, law enforcement enhanced and citizen involvement accomplished.

3. Seek collaboration with enforcement authorities, courts, media, rehabilitation agencies, public officials, schools and citizen groups.

4. Develop changes in public attitudes on drinking and driving to prevent accidents.

A National Commission on the drinking driving problem would implement many of the ideas and suggestions contained in this statement, and in the end result in a substantial reduction of the annual death toll from this problem. It would result in the reduction also of many other costs which are now borne by the taxpayers of this country. I am hopeful there will be immediate forward motion in this direction.●

PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress received advance notification of proposed arms sales under that act in excess of $25 million, or in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that three such notifications have been received.

Interested Senators may inquire as to the details of these preliminary notifications at the office of the Committee on Foreign Relations, room 4229, Dirksen Building.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C.

In reply refer to: I-02308/81ct.

DR. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The American Institute in Taiwan is considering an offer to the Coordination Council for North American Affairs tentatively estimated to cost in excess of $25 million.

Sincerely,

ERICH F. VON MARBOD,
Director.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C.

In reply refer to: I-2154/81.

DR. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The American Institute in Taiwan is considering an offer to the Coordination Council for North American Affairs tentatively estimated to cost in excess of $25 million.

Sincerely,

ERICH F. VON MARBOD,
Director.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C.

In reply refer to: I-12434/81ct.

DR. HANS BINNENDIJK,
Professional Staff, Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director. Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Northeast Asian country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERICH F. VON MARBOD,
Director.●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 mil-

lion. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulated that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is immediately available to the full Senate, I ask to have printed in the RECORD at this point the notification which has been received. The classified annex referred to in the covering letter is available to Senators in the office of the Foreign Relations Committee, room 4229 of the Dirksen Building.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C.

In reply refer to: I-03686/81ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 82-14 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter of Offer to Egypt for defense articles and services estimated to cost $25 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

ERICH F. VON MARBOD,
Director.

TRANSMITTAL NO. 82-14

(Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act)

(i) Prospective Purchaser: Egypt.

(ii) Total Estimated Value:

	Millions
Major Defense Equipment*	$21
Other	4
Total	25

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(iii) Description of Articles or Services Offered: Six AN/TPQ-36 mortar locating radars with required support equipment, spare parts, and support services.

(iv) Military Department: Army (UDR).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Included in report for quarter ending September 30, 1981.

(viii) Date Report Delivered to Congress: December 14, 1981.

POLICY JUSTIFICATION

EGYPT—MORTAR LOCATING RADARS

The Government of Egypt has requested the purchase of six AN/TPQ-36 mortar locating radars with required support equipment, spare parts, and support services at an estimated cost of $25 million.

This sale is consistent with the stated U.S. policy of assisting other nations to provide for their own defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continuing willingness of the United States to support the Egyptian effort to improve the security of the country through modernization of the Egyptian forces.

The purchase of the radars and support will provide the Egyptian Army an automated capability for locating hostile mortars. As such, it will enhance the effectiveness of Egyptian counter-mortar fire.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Hughes Aircraft Corporation of Fullerton, California.

Implementation of this sale will require the assignment of a small U.S. military training team to Egypt for approximately six months and the assignment of a small contractor contingent for approximately two years.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

CONGRESSIONAL BUDGET PROCESS

● Mr. HART. Mr. President, today the Washington Post published an excellent article written by Senator CHILES which discusses how recent congressional budget decisions have undermined the congressional accountability which the public deserves on Federal spending matters.

As a colleague of Senator CHILES on the Senate Budget Committee, I share his concern about maintaining the strength and integrity of the congressional budget process. His article provides some extremely useful insights into what the appropriate roles should be for Congress and the executive branch in the budget process.

I ask the article be printed in the RECORD at this point.

The article follows:

THE BUDGET: DON'T CUT CONGRESS OUT

(By LAWTON CHILES)

Recent congressional actions on appropriations measures have posed a serious threat to the integrity of the legislative process. The immediate disputes over funding levels should not be allowed to obscure the longer-term procedural issues. What we have at stake is not a power struggle between Congress and the president, or between Democrats and Republicans. The real stake is in maintaining our constitutional system of checks and balances, which ensures a full measure of accountability to the public for federal spending decisions. Accountability means putting specific spending figures into laws and having members of Congress stand up and be counted on where to cut and where to add.

The most recent threat to constitutional checks and balances came in the continuing resolution passed by the Congress last Friday. The press and the public have focused on the funds cut by that resolution and paid too little attention to the methods by which it would be carried out. The language of the resolution requires the president to make a 4 percent cut in spending for domestic programs in five large appropriation areas. Within each spending account, the administration may decide to cut a particular program or activity by anywhere from zero to 6 percent as long as the overall account is reduced by 4 percent. In the floor debate in the Senate, however, it was clarified that Congress expects the administration to seek approval for any particular cut that deviates from the 4 percent.

Not all the detailed decisions made in the appropriations bill are made by the president. Anyone who has worked through appropriations bills knows that only a few major decisions, like the B1 bomber or Social Security benefits, are actually made by the president. Most of the 1-, 5-, or 50-million-dollar decisions are made by mid-level bureaucrats in the agencies or in OMB. Those bureaucrats have some professional judgments about what is good for the country; they also have personal opinions, whims and pet projects, like anyone else. But those bureaucrats do not have to go home to 50 states and 435 congressional districts to defend their decisions or see the results. The legislative process may be cumbersome, but it is tremendously open to the public. Once the president's budget proposals come out, members of Congress—particularly those of us on the Budget and Appropriations committees—get a flood of firsthand information about the details of those programs. Farmers tell us which pest control program works and which should be scrapped. Parents and schoolteachers tell us which education programs are effective. Local officials and concerned citizens tell us what will happen if we delay or proceed to build a new road or park. While congressional revision of administration proposals sometimes reflects the protection of special interests, to a greater degree it reflects the role of the American public in shaping legislation.

The only way the public can hold members of Congress accountable for spending is by requiring them to stand up and be counted on specific budget figures, whether they be cuts or increases. It is far too tempting to be able to stand up and tell each group—farmers, schools, retirees, defense—that you voted for full funding of their program, but then turn around and say you voted for a balanced budget, because you gave the President the authority to withhold 5 or 10 percent. No one would know what you really stood for. That is what we had before the 1974 Budget Act. Members voted for individual spending bills, but never had to vote on the bottom-line total. The result was massive spending and huge deficits.

Impoundment authority would also undermine public accountability of the president. He could submit a budget that made all his major constituents happy—and all presidents like to make people happy—by not detailing his proposed cuts. He could then request a 5, 1 or 25 percent cut authority to hold down the total. No one would even really know what the budget for a program was, or who had cut it. The full funding figure would be printed in the books, but somehow it would not get spent. That may be the easy way out for politicians, but it is not a good way to let the public grade the people it elects.

Tough as this year's budget decisions are, next year's will be even worse. At the Budget Committee we are looking at federal deficit projections ranging from $92 billion in 1982 to $165 billion in 1984. The American people are still being told that they can have only good things—a 25 percent tax cut, a big national defense buildup and painless cuts of waste and fat in domestic programs.

Moving to a balanced budget is going to require telling the American people that they cannot have all these things at once. Cutting back tens of billions of dollars in federal spending is going to require hard decisions that many politicians would rather avoid. Making those cuts in a fair and efficient manner is going to require that the public be given a full chance to participate by means of the legislative process, and that members of Congress continue to listen to the wisdom of the public.●

BUDGET LEAKS

● Mr. EAST. Mr. President, we are all aware of what the burden of increased military spending means for the American people. While I am convinced that there is a genuine need for us to upgrade our defenses, I am also concerned that this money be wisely spent.

I was therefore most gratified to read of the strenuous efforts that are being

made within the Defense Department to curb fraud, waste, and mismanagement. In a recent article for the Christian Science Monitor, reporter Stephen Webbe summarizes the efforts of Deputy Defense Secretary Frank Carlucci in this area.

Mr. President, I commend Mr. Carlucci for his diligence, and I commend Mr. Webbe and the Monitor for giving him due credit for his work. As we all know, it is a rare thing for the public media to cover the efforts being made within the Defense Department to give American taxpayers their money's worth. I ask that the complete text of Mr. Webbe's article be reprinted in the RECORD.

The article follows:

PENTAGON PLUGS LEAKS IN BUDGET

(By Stephen Webbe)

The Pentagon says it is saving billions of dollars in a crackdown on fraud, waste, and inefficient management.

Deputy Defense Secretary Frank C. Carlucci says defense auditors probed $12 billion worth of contracts this year and refused to pay contractors about $3.5 billion they demanded. Fifty-three percent of the saving stemmed from audits conducted since April 1, 1981, and 47 percent stemmed from earlier investigations.

Mr. Carlucci was commenting Dec. 8 on the release of the semiannual report to Congress detailing the efforts of the Defense Contract Audit Agency (DCAA) to eliminate fraud, waste, and inefficiency from the Pentagon during the six-month period ending Sept. 30, 1981.

Some of the 33,600 audits carried out by the DCAA turned up potentially fraudulent activities by contractors. One subcontractor allegedly charged the government $275,000 for material ordered but never delivered. It also notes that a roofing contractor claimed $500,000 for work that was not performed. Both cases are under investigation.

The Pentagon report reveals that 27 cases of potential fraud ferreted out by investigators were referred to the Justice Department. Another 11 were referred to military commanders for further action. Altogether these 38 cases involved losses of $11.8 million, say defense officials, adding that the Pentagon succeeded in recovering some $750,000.

According to Carlucci, there has been a "dramatic increase" in the use of the Pentagon hot line set up to permit the anonymous reporting of cases of fraud and waste. "Six hundred sixty calls and letters were received, and 554 of the most substantive ones were referred . . . for appropriate action," the report observes.

Carlucci says auditors identified procedures that if corrected could save more than $1.2 billion. For example, the Defense Department report says a US Army brigade in Europe was not "effectively using programs designed to identify excess repair parts." The brigade accumulated about $2 million worth of unneeded repair parts—at the same time it had an additional $650,000 worth of parts on order.

Carlucci says the Pentagon, which will be requesting some $244 billion for its fiscal 1983 budget, aims to chalk up $31 billion in savings over the next six years.

In an effort to increase economy and management efficiency, the Air Force has set its own program, supervised by Under Secretary of the Air Force Edward C. Aldridge.

When the Air Force Weapons Laboratory at Kirtland Air Force Base in New Mexico wanted large pressure tanks for a chemical laser experiment it found two surplus tanks at Patrick Air Force Base in Florida. "These were transported to Kirtland, refurbished and installed at a cost of $5,000," says an Air Force spokesman. "The original manufacturer estimated the cost of new tanks as $1.6 million, with delivery in 38–40 weeks. By using the surplus tanks, the Air Force obtained a cost avoidance of almost $1.6 million."

In his now-famous interview in The Atlantic Office of Management and Budget Director David A. Stockman was quoted as saying that the Pentagon suffered from "blatant inefficiency, poor deployment of manpower, [and] contracting idiocy." He estimated that there is a "swamp of $10 to $20 to $30 billion worth of waste in the Pentagon that can be ferreted out if you really push hard."

Defense Secretary Caspar W. Weinberger later retorted that the Pentagon is "very dry land," adding that "there is not that degree of waste or inefficiency or ineffectiveness in what we're doing."●

ACID RAIN BOOMERANG

● Mr. STAFFORD. Mr. President, the best laid plans often go astray. That seems to be the case with a series of newspaper ads which have been running recently in the Washington Post, the New York Times, and other newspapers.

The ads are sponsored by the "Coalition for Environmental-Energy Balance," which is apparently headquartered in Columbus, Ohio. Their purpose is to cast a shadow over acid rain legislation sponsored by Senators including the Senator from Maine (Mr. MITCHELL), the Senator from Rhode Island (Mr. CHAFEE), the Senator from New York (Mr. MOYNIHAN), and myself, as well as others. The ad implies that acid rain proposals are a product of "overreaction and overregulation." It concludes that "this is bad legislation. We believe we ought to say so publicly, and urge you to do so too."

Judging from the letters I have received, the public reaction is probably not quite what the coalition for an environmental-energy balance had in mind. People are writing, to be sure. But what they are saying is not that acid rain legislation is a bad idea, but that it is good. As one correspondent said:

The Advertisement also argues that "quick Congressional 'fixes' (of this type) can cause irreparable harm." I fail to see the irreparable harm which might be caused by cleaning up pollution. Perhaps the coalition refers to the damage done to their collective wallet by anti-pollution restraints.

Mr. President, I would like to take this opportunity to do two things.

First, if there is no objection, ask that the advertisement be printed in the RECORD at this point, together with the text of two letters supporting acid rain legislation. I have deleted the names and addresses of the authors.

Second, I would like to express my appreciation to the coalition for an environmental-energy balance, whoever they are and wherever they are. I have received no letters in support of their ad. But thanks to their advertisement, I now know for a certainty that many voters in fact care a great deal about acid rain. And what they want is action, not inaction.

The material follows:

THINGS TO REMEMBER ABOUT ACID RAIN . . .

Almost daily we read, hear or see information about "acid rain". Some of the information is scientific, much of it is opinion.

In trying to sort it all out, there are a few things to remember about the subject of "acid rain."

It is worldwide in scope.

The issue is not confined to one nation, one region, one state or one community. Since it is an issue of greater than national scope, there is no easy, simple local or regional answer.

Because it is worldwide in scope, it doubtless results from a variety of causes.

It may be that one or more of these causes are larger factors than others, but that cannot be stated with certainty.

Given that uncertainty, quick Congressional "fixes" can cause irreparable harm.

For example, the Senate Environment and Public Works Committee is considering two measures concerning acid rain.

The sponsor of one bill admits that the proposed standards are "arbitrary." And, an aide has said "no one knows" if the program will work.

The Congressional Office of Technology Assessment has analyzed the bills and reported that in 31 states bordering on and east of the Mississippi River, consumers' cost as a result of such legislation would be between $2.2 and $4.1 billion each and every year. For consumers in at least three states, Ohio, Indiana, and Illinois, this could mean increases of as much as 50 percent in their electric bill.

We thought the era of overreaction and overregulation had passed from the scene in Washington. Apparently not.

We think this is bad legislation. We believe we ought to say so publicly, and we urge you to do so, too. You can do so by letter, wire or phone to the following Committee members: Stafford (R-VT), Baker (R-Tenn.), Domenici (R-N. Mex.), Chafee (R-R.I.), Simpson (R-Wyo.), Abdnor (R-S.D.), Symms (R-ID), Gorton (R-WA), Murkowski (R-AK), Randolph (D-W. Va.), Bentsen (D-Tex.), Burdick (D-N.D.), Hart (D-CO), Moynihan (D-N.Y.), Mitchell (D-Me.), Baucus (D-MT).

If you would like more "Things to Remember" write: Coalition for Environmental Energy Balance, P.O. Box 15026, Columbus, Ohio 43215 (614) 464–0771.

DEAR SIR: The Washington Post of November 25, 1981 contains the enclosed political advertisement urging citizens to communicate to you their positions on the issue of "acid rain." I am taking this opportunity to do just that.

According to the ad, which opposes the efforts of your Committee to regulate causes of acid rain here in the United States, the problem is "worldwide in scope." This is certainly true. However, the fact that this problem is worldwide in scope is no reason for the United States to abdicate its responsibility to preserve the Earth for future generations. To argue that this country need not do what it can to alleviate a problem just because "everybody else does it," is absurd. Furthermore, as a (and perhaps the) major nation responsible for acid rain, the U.S.A. might set a sterling example for the rest of the world in dealing with this problem.

The advertisement also argues that "quick Congressional 'fixes' (of this type) can cause irreparable harm." I fail to see this irreparable harm which might be caused by cleaning up pollution. Perhaps the Coalition refers to the damage done to their collective wallet by the imposition of anti-pollution restraints.

I urge you and your Committee, therefore, to stand firm in the face of this pressure. The preservation of our environment cannot be quantified in monetary terms. It is invaluable, and therefore must be maintained. Your efforts in this area would be greatly appreciated.

DECEMBER 2, 1981.

HON. ROBERT T. STAFFORD,
Senate Office Building,
Washington, D.C.

DEAR SENATOR: The New York Times has been running a series of advertisements sim-

ilar to the one attached regarding the acid rain issue. These advertisements are clearly designed to accomplish two goals; (1) create a smoke screen of doubt by saying "do we really know the cause" and, (2) to purposely induce fear into the readership by stating that unless you leave us alone your costs will skyrocket in the near future. In my opinion the advertisements are arrogant and repugnant.

At stake here is not only an environmental issue but an international issue. At question is the integrity of the United States as viewed by other countries and its clear responsibility to its own citizens to provide a strong country in future years.

I do not consider myself to be an environmental extremist but I am weary of and angry over continued attempts by industrialists to preserve the status quo and the profit motive at all costs. This issue will not disappear, it will only increase in severity.

What will it take for governmental leaders to resist these continuous assaults and chart a course that does demonstrate integrity—for other countries, for our own countrymen and for our environment?●

"JIMMY MILLER DAY" IN CONYERS

● Mr. MATTINGLY. Mr. President, I am proud to join with the good people of Conyers. Ga., in honoring their former classmate and neighbor, James C. Miller III.

December 19 has been designated "Jimmy Miller Day" in Conyers. Dr. Miller's many hometown friends are justifiably proud of his accomplishments, including his most recent honor of being nominated by President Reagan and confirmed by the Senate as Chairman of the Federal Trade Commission.

Jim Miller is a man in whom all Georgians and other Americans can take pride. As Administrator of the Presidential Task Force on Regulatory Relief before his confirmation to the FTC Chairmanship, Dr. Miller's staff leadership greatly contributed to the administration's efforts to identify and eliminate unnecessary regulation.

"Jimmy Miller Day" is a fitting tribute to a fine American. Conyers has much to be proud of.

Mr. President, I ask that the announcement of "Jimmy Miller Day" circulated by Dr. Miller's classmates be printed in the RECORD.

The announcement follows:

SENIOR CLASS OF ROCKDALE COUNTY HIGH SCHOOL, 1960

DEAR FELLOW CLASSMATE: I am sure you will be interested in knowing that Jimmy Miller was recently appointed Chairman of the Federal Trade Commission by President Reagan. This is a real honor and an outstanding achievement.

Mayor Charles Walker has declared December 19, 1981, as JIMMY MILLER DAY in Conyers. A number of recognition ceremonies and receptions are being planned for that weekend. I know you will agree with me that our graduating class would like to participate in the festivities honoring Jimmy.

On Friday night, December 18, 1981, we are planning to have an informal gathering for R C H S Class of 1960 at Lucas' Ranch House Barbecue Restaurant on Highway 138 in Conyers. We will begin at 6:30 P.M. We would like for everyone to have dinner there. There will not be a planned schedule. You will be free to order dinner whenever you would like to eat. A country band begins playing at 9:00 P.M. if anyone is interested in staying for the music.

If you have other parties planned for that weekend, perhaps you can just drop by and say "hello" to Jimmy and his family. Please feel free to bring your family with you.

I am looking forward to this opportunity to let Jimmy know how proud we are of his accomplishments. I hope you will join our other classmates and me on Decemoer 18th.

DANNY ADOCK,
Class President.●

CIVIL AIR PATROL HAS SERVED AMERICA IN WAR AND PEACE FOR FOUR DECADES; SAVING LIVES IS ITS PRIMARY MISSION

● Mr. RANDOLPH. Mr. President, this month marks the 40th anniversary of the establishment of the Civil Air Patrol, an organization which has served valiantly as an auxiliary to the Army Air Corps and U.S. Air Force in both times of peace and war.

The Civil Air Patrol was established on December 1, 1941, as a force to augment the Nation's military defenses. It has continued to serve as the volunteer civilian auxiliary of the U.S. Air Force.

In 1946, it was chartered by Congress as a private nonprofit corporation. In 1948 the CAP became a civilian auxiliary of the Air Force by act of Congress.

At the outbreak of the Second World War, the Civil Air Patrol went on coastal patrol duty, and its members flew 86,685 missions covering 24 million miles in 244,600 hours of flying hours. As the result of these efforts, 173 submarines were sighted, 83 bombs and depth charges were dropped on 57 of them, and a number of the subs were destroyed.

In 1980, the CAP was involved in 1,175 missions—search and rescue—with 14,424 hours flown. It had 469 finds and 115 saves.

CAP personnel assisted in 14 natural disasters in 11 States.

There are 60,000 members—23,000 cadets and 37,000 seniors.

There areo ver 600 members in West Virginia.

The three CAP missions are: First, a national program of aerospace education for adults and youth; second, search and rescue and disaster relief missions; and third, a cadet program to develop tomorrow's leaders.

During today's Capitol Hill luncheon commemorating the 40th anniversary of the Civil Air Patrol, my able colleague Senator ROBERT STAFFORD of Vermont—an active pilot—told of the importance of the CAP.

Joining with us from the House of Representatives were Representative NICK RAHALL, CAP congressional squadron commander; and Representative LINDY BOGGS, CAP congressional squadron vice commander, who spoke briefly.

Also present was Arthur C. Hyde, a native of Moorefield, W. Va., who was wing commander of the Civil Air Patrol for Maryland, the District of Columbia, and parts of Virginia. during the forties. On November 6, 1943, Mr. Hyde piloted a single-engine plane 175 miles from Morgantown, W. Va., to Washington National Airport on aviation fuel processed from coal.

Mr. President, I ask unanimous consent that the names of those CAP and U.S. Air Force officials participating in today s 40th anniversary celebration be inserted in the RECORD as proper recognition for their service to America.

The information follows:

Brig. Gen. Jim Gormley, USAF-ret., former Deputy Director of Air Force legislative liaison;

Brig. Gen. B. D. Lary, USAF, Deputy Director for Air Force legislative liaison;

Brig. Gen. David Patton, USAF, Executive Director of CAP and Commander of CAP Headquarters, Maxwell AFB;

Col. Walt Flint, USAF-ret., former Curator of the National Air and Space Museum;

Col. David Brandt, USAF, Officer for Middle East Region/CAP;

Col. William Shea, CAP/USAF, Director of Airports/FAA;

Maj. Tom Handley, USAF-ret., National Legal Officer /CAP; and

Lt. Col. James B. Huggins, Deputy Commander and Executive Officer of CAP Congressional Squadron who coordinated arrangements for today's anniversary luncheon.●

WAR TALK DOWN SOUTH

● Mr. DURENBERGER. Mr. President, the view from the United States of current events in Central America is often colored by preconceptions, misinterpretations and—on occasion—self-fulfilling prophets.

It is a difficult situation and without precedent. For those with an open mind and a need to be helpful, I suggest the article "War Talk Down South" from the December 23 issue of the New Republic.

Mr. President, I ask that the article be printed in the RECORD.

The article follows:

WAR TALK DOWN SOUTH

It appears that the United States is not going to war with Cuba or Nicaragua, or both. after all. If you were scared by State Department and White House chatter about a naval blockade (and the consequences, perhaps, if a Soviet ship should try to run it), or if you thought that the top officials of this Administration had taken leave of their senses (assuming you thought they had any to begin with) by planning acts of war, you can relax. The word from the Administration this week is that the saber-rattling of last week and the week before—Secretary Haig's hints of military intervention, President Reagan's ruling out of ground combat operations "at this time," Edwin Meese's refusal to rule out the naval operation—was just psychological warfare designed to raise the consciousness of other Western Hemisphere nations about Cuban and Nicaraguan misbehavior and to throw a scare into Havana and Managua. The damage that is thereby done to the peace of mind of American citizens, or to the credibility of the Administration itself, is supposed to be just part of the price one pays for global gamesmanship. This is the second time this year the Administration has indulged in such war-game tactics—the last time, Secretary Haig was going to "go to the source"—and then called them off. Now the military chest-thumping needs to stop, or else it will appear pure bluff.

Overall, however, we think that the Administration's strategy in Central America and the Caribbean is basically right and is not appreciated by most Americans. We have been pleasantly surprised by the development of Reagan policy. When the Administration first came into office, it appeared that liberals'

worst fears about the conservative Republicans would be borne out—that they would make Hemispheric policy a mere extension of reflexive anti-Sovietism, that they would rely more or less exclusively on military solutions, that they would identify with the region's most brutal reactionaries and would succeed in squandering the credit the U.S. earned during the Carter Administration as a force for democracy and human rights—and that all this would cause sympathy and support to flow toward Cuba and Nicaragua.

This hasn't happened. To be sure, military aid, training, and threats are more important aspects of Mr. Reagan's policy than they were of Jimmy Carter's (though it was Mr. Carter, one should remember, who resumed military aid to El Salvador to counter supplies from Cuba and Nicaragua). It's true that this Administration has stopped publicly criticizing—and has improved relations with—some of the region's most notorious human rights malefactors. But it is also true that the Reagan policy is not exclusively military. There has been a political component to it, an economic component, a propaganda component, and even a human rights component. And the Administration's policies are showing progress. With strong U.S. encouragement, Honduras has just held elections and switched from military to civilian rule. The U.S. is pushing elections, too, in Guatemala and El Salvador, and although those countries are not about to become perfect democracies any time soon—Guatemala, in particular, remains a human rights horror—the fact that elections are scheduled at all distinguishes them from Cuba and Nicaragua, where supposedly popular regimes do not even make a pretense of submitting themselves to the judgment of the people.

Left-wing opinion in the U.S., Europe, and elsewhere scorns the idea of elections in El Salvador, but it is a mistake to suppose that the whole of Latin America—fascist dictators excepted, of course—shares that scorn and supports the French-Mexican call for a negotiated settlement between the Salvadoran government and the left-wing opposition. In fact, the French-Mexican initiative, has been roundly condemned by most of Latin America's democracies. On December 7, in a step that went practically unreported in the U.S. press, 22 of the 29 nations in the Organization of American States backed a resolution supporting Salvadoran President José Napoleón Duarte's election plan. Those opposed were Nicaragua, Grenada, and Mexico.

On December 4, at the OAS meeting on the island of St. Lucia, Secretary Haig delivered an encouraging speech on U.S. aims in Latin America. It was, in a way, a counterpart to President Reagan's nuclear policy speech of November 18—a clear statement of U.S. ideals, an abandonment of bellicosity, and an appeal for cooperation among U.S. allies. Mr. Haig called on the OAS to reaffirm and promote democracy and declared that "the United States opposes human rights abuses regardless of the source. Our judgment of events must be fair and we must not allow ourselves a double standard. We should not be more tolerant of the infractions of those who reject democratic values and peaceful change, yet more critical of the lapses of those searching for democracy and social justice. Clearly a nation cannot be liberated when its people are deprived of liberty. A civilization cannot be creative when its poets and philosophers are in jail or in exile. A state cannot be free when its independence is subordinated to a foreign power. And a government cannot be democratic if it refuses to submit to the test of a free election." Mr. Haig's remarks clearly were honed to cut most strongly against Marxist-Leninist regimes, but they also cut against right-wing dictatorships. And they provide a standard against which to judge U.S. activities. To be true to Mr. Haig's words, the Administration should be active in securing the release of jailed intellectuals—which it has so far almost wholly failed to do—and should avoid imposing its will on independent countries which do not pose a threat to their neighbors.

Mr. Haig also reaffirmed that the U.S. soon will take steps to deal with the economic crisis afflicting much of the Caribbean region through an initiative that includes a one-way free trade zone whereby almost all Caribbean products would enter the U.S. without duty, special incentives for U.S. investment in Caribbean countries, and an increase in U.S. economic assistance by some $200 million next year. The full "Caribbean Basin Initiative" is to be unveiled in January and will require congressional approval, which may not be easy to obtain in the midst of a recession. The Administration can't duplicate the Marshall Plan or the Alliance for Progress, but its initative does deserve support.

The main Haig message in St. Lucia, of course, was a renewed verbal assault on Cuba and Nicaragua—but with the difference that instead of again threatening unilateral U.S. action, the U.S. this time was calling for collective attention—and possible collective action—to uphold the principle of nonintervention in the Hemisphere.

"We must all face up to the fact," Mr. Haig declared, "that the principle of nonintervention is being violated today." He said that "since 1978, Cuba, with the support of the Soviet Union, has embarked on a systematic campaign of increasing interference against its neighbors," uniting feuding anti-government guerrilla groups, training revolutionaries, supplying weapons, and providing political support.

The Sandinista regime in Nicaragua, Mr. Haig pointed out, now has an army three times the size of that maintained by the Somoza dictatorship it replaced. It is on its way to establishing the largest force in Central American history, with assistance from 1,500 Cuban advisers. Nicaragua has tanks and other heavy equipment never before deployed in Central America, and apparently is getting ready to acquire modern jet fighter planes.

In the post-Watergate, post-Vietnam atmosphere still prevailing in the U.S., there is a tendency on the part of the press, Congress, and the people to demand courtroom-quality proof of official assertions such as Mr. Haig's. The Administration's white paper on Communist assistance to the Salvadoran insurgents is widely regarded as a fraud because it failed to prove that all the weapons requested from the Soviet Union, Vietnam, Ethiopia, and other countries actually made it to El Salvador and were trans-shipped, as charged, through Cuba and Nicaragua. The Administration did overstate its case about the centrality of outside influence in El Salvador (as though there would be no insurgency except for Cuban intervention), but the fact remains that insurgent leaders did go to Communist countries for arms, and arms—including some heavy arms—did duly show up.

The Administration is coming out with a new bill of particulars in January, this one to bolster charges of Cuban subversion in the Hemisphere. Obviously the document shouldn't be accepted uncritically, but it should be read with certain facts in mind which have nothing to do with Reagan Administration ideology. For example, last March the government of Colombia (a democracy) rounded up more than 100 would-be insurgents who said they had been trained in Cuba and returned for the purpose of organizing a "people's army." Some members of the band turned out to be participants in the February 1980 armed takeover of the Dominican embassy in Boogta by the M–19 guerrilla movement. As part of the hostage-release settlement, the M–19 group was flown to Cuba via Panama. In an interview with the German magazine Der Spiegel, Cuban Vice President Carlo Rafael Rodriguez admitted that his country had trained the Colombians. On March 23, Colombia suspended diplomatic relations with Cuba—another story that failed to make it into prominent positions in U.S. newspapers.

Last month, Jamaica broke diplomatic relations with Cuba after evidence was developed that Jamaicans sent to Cuba for training in construction skills were given military and ideological training, apparently so that they would return home as insurgents. In all, six Latin democracies have either broken or down-graded diplomatic relations with Cuba in the past two years.

There is increasing concern in the Hemisphere, too, about Nicaragua, but it has not reached anything like the sense of outrage and danger that is building over Cuba. The Reagan Administration should not create sympathy for the Sandinistas, therefore, by making war threats. Nicaragua is not a Marxist-Leninist country yet, even though it has thrown four business leaders in jail and has repeatedly closed down the independent newspaper La Prensa (which is something even Anastasio Somoza never did). It is not a Soviet or Cuban satellite yet either, even though Communist bloc countries are gaining increasing influence and even though Nicaragua increasingly votes with the Soviets in international forums. The United States should do everything possible to prevent Nicaragua from going over the brink that its leaders are driving it toward, including continuing economic aid to sustain the independent private sector. Most important, the United States should do nothing that would leave it liable to charges of having pushed Nicaragua into the arms of the Cubans and Soviets. If the Sandinistas choose to snuff out liberty in their country, the responsibility ought to be entirely on their heads. They should not be able to claim that threats of invasion, blockade, or economic destabilization from the United States forced them to build a massive army or deny freedom to their population.

It is important that the Administration stop talking about acts of war against either Cuba or Nicaragua. Talking and failing to act sap U.S. credibility both in the Hemisphere and at home. Right now, the Administration's credibility is most in need of repair at home. The Reaganites need to spread the word about actions such as Jamaica's and Colombia's in breaking relations with Cuba. They should also tell what they know about the activities and political programs of guerrilla groups in El Salvador and Guatemala. In the United States it is beginning to sink in that Nicaragua gained little in the trade between Somoza and the Sandinistas, but it is still widely believed here that any regime would be preferable to the present ones in Salvador and Guatemala. The Administration has to make it plain, at home and in the Hemisphere, that it is working urgently to create alternatives to domination by the brutal right and brutal left.●

THREE BRAVE YOUNG MEN

● Mr. DECONCINI. Mr. President, I wish to call to the attention of my colleagues an act of heroism and valor which occurred recently in my home State of Arizona.

Three Arizonans, Allen Hullenaar, Jeff Corallo, and Steve Loper, came upon the scene of an accident near Sunflower, Ariz., on the evening of October 30. As they approached the burning wreckage of the two vehicles, a voice could be heard crying, "Help, I'm burning."

The three men were unable to open the doors of the vehicle, and quickly broke out the windows. They then pulled Try Castorena, age 10, and Chad Castorena, age 9, from the vehicle, in the process half-climbing into a vehicle which was in imminent danger of exploding.

These two boys would surely have perished in a terrible inferno had Allen Hullenaar, Jeff Corallo, and Steve Loper not responded to this crisis as they did. How many of us can say that we would be able to respond with such courageous disregard for our own lives if we were to be confronted with such a situation? We should all take a moment to reflect with pride on these great citizens, who risked their own lives to save the lives of others.

I would also like to thank Mr. Rexbell Young, the Arizona State legislative officer for the Veterans of Foreign Wars, for calling to my attention the heroism of these three fine Arizonans.●

IN TRIBUTE TO JERRY WURF

● Mr. WILLIAMS. The news of Jerry Wurf's death on Tuesday, December 10, touched me deeply. As international president of the American Federation of State, County, and Municipal Employees for 17 years, Jerry Wurf and I had worked closely together as I struggled with the many issues facing the Labor and Human Resources Committee—or as it is often referred to—the People's Committee.

While employee working conditions and dignity were always foremost on his mind, Jerry Wurf fought equally hard for the rights of the elderly, blacks and other racial minorities, women, and the disabled. To him, equality was the issue and oppression the fight. I, for one, was of one mind with him. My own legislative responsibilities and personal objectives cut across all of those issues and I often relied on Jerry Wurf's counsel and advice. No longer to have such counsel is a personal loss for me. For this country no longer to have the strong, relentless voice on behalf of workers and other Americans is a great loss to us all.

Among his accomplishments, Jerry Wurf succeeded in leading the growth of AFSCME to 1 million members presently, making it the third largest union in the AFL–CIO. Additionally, he led the fight for public employee collective bargaining laws in several States, he was a founder of the Congress of Racial Equality, he was the author of the civil rights document "the Strategy of the Cities," and he was a member of the Board of the Leadership Conference on Civil Rights.

I point out in my tribute today Mr. Wurf's activities and credits in community services and his leadership on national social policy issues partly as the best eulogy I can offer to this friend and American. But, in addition, reflecting on his words and his activities, I am reminded how many visions we shared about America: That national priorities had to reflect the most descriminated against and the neediest Americans, that some Americans are less powerful than others in influencing policy unless they join together in one voice on behalf of each other. It makes me feel optimistic about the future knowing that, even in the face of irresponsible budget cuts in programs that affect people's lives and even in the midst of new administration policies that cut the strings from those Americans who were informed that they would be protected in a so-called safety net—even with all of this, people who sacrifice their own personal lives to organize Americans for common social good will reverse these administration trends and the people will be heard again. Jerry Wurf was one of these Americans whose own contributions can be measured in this country's work places as well as the cities. His continued contribution will be missed.●

FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

● Mr. DURENBERGER. Mr. President, in the last several years, making scapegoats out of Federal employees has become a national pastime. Bureaucrats get blamed for everything. Good sense may tell you to stay away from politics or religion at a cocktail party, but mention the insensitivity of bureaucrats and you are guaranteed a bigger audience than E. F. Hutton.

Of course there are lazy bureaucrats. There are bureaucrats who should not be on the job. Bureaucrats who are insensitive to the needs of the people they were hired to serve.

But the same can be said about politicians, lawyers, doctors, construction workers; in short, the same can be said about any group of people.

The fact of the matter is that the vast majority of the 3 million Federal employees is dedicated and hard working. Yet, we—the politicians are more guilty of this than anyone I know—continue to lump all Federal employees into one group. It seems that all we have to do to get a nod of approval is to mention the buzzword "bureaucrat" and we have scored a point with constituents.

Perhaps, if that is all we were doing to Federal employees, it would not be so bad. But we have not stopped at that. This year we gave them a 4.8-percent pay increase when the projected rate of inflation is exactly twice that amount. We also promised them we will address their concerns next year, but we have been saying that since I got here—with no result.

We make our Federal employees uncertain about their future employment. And now we are telling them that their health care benefits will be cut while their premiums will be increased—maybe by as much as 40 percent. What is more, they have been denied the opportunity to change plans. They will be locked into their existing plan and forced to accept whatever changes their plan makes. A marketplace philosophy does not mean much when you do not give the consumer a chance to make choices.

Not only have Federal employees been denied a choice of plans, but also, they have been denied a voice in shaping what those plans look like. The benefit cuts negotiated between the Office of Personnel Management and the participating plans had little or no input from employees. Thus, when Blue Cross made its cuts in mental health coverage, the enrollees had little to say about it.

Frankly, I regret the Blue Cross decision to reduce mental health coverage. But I do not believe the Government should single out any plan and impose minimum benefit standards. Minimum benefits should apply to all plans, not just select ones, and employees should be involved in establishing those standards.

To be sure, the problem this year has its roots in many causes—the policies of past administrations, health cost increases, the Office of Personnel Management, the participating health plans, and in the structure of the Federal employees health benefits plan itself.

Many of the problems are now being addressed in the courts. I hope they can be resolved as expeditiously as possible so that an open season can occur. However, the problems we are now experiencing are symptoms of deep-seated deficiences in the entire program. We must address these deficiencies and correct them if we expect to avoid similar problems in the future. I, for one, intend to vigorously pursue legislative reform of the Federal employees health benefits plan next year.

Mr. President, I intended to offer amendment 1240 to H.R. 4121, the bill making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1982, and for other purposes. That amendment, in the form of a resolution, expressed the concern I have about the status of the Federal employees health benefits plan this year and the impact on Federal employees and their families. Federal employees need to know that we are aware of the problems and that we are working hard to remedy them.

The Office of Personnel Management needs to know that it is important to minimize the disruption that will occur to Federal employees. OPM should do everything possible to maintain the integrity of the FEHBP. An open season should be scheduled as soon as the benefit levels are decided in the courts and informational material can be prepared and distributed.

The participating health plans need to know that the Government will honor its commitment to provide Federal employees with the opportunity to change health plans.

A well-organized open season, in which Federal employees have adequate information from which to make a choice, is in the best interests of all concerned parties.

I believe the Federal Government can operate with fewer employees. I believe we should make every effort to weed out ineffective employees. I believe we should assure taxpayers that they are getting their dollar's worth from their employees.

But let us be up front about it. What we are doing is making Federal employees

and their families pay a steep price for the inability to make decisions and carry out effective policies.

I must say, Mr. President, that it is in the health care benefit that we have the greatest obligation to those whose job effectiveness we cannot measure—the children and the families of Federal employees. Federal employees and their families have needs just like the rest of us. Government spending cuts should not be achieved at the expense of their health. Let us see to it that we act as responsible employers in addressing this very important issue.●

ARMS CONTROL AND THE REAGAN ADMINISTRATION

● Mr. PRESSLER. Mr. President, today, I should like to comment on the Reagan administration's arms control policy and practice. At least until President Reagan's address on Theatre Nuclear Forces on November 18th, many would have concluded that this will be a very short speech. They might have suggested that the subject would parallel in brevity the chapter on the owls of Iceland in Bishop Pontoppidan's history of Iceland, which consisted of a single sentence declaring that there are no owls in Iceland.

To be sure, there have been doubts and skepticism about the intentions of the President himself and his principal advisers respecting arms control. Many have observed that the administration's interests are primarily domestic and that foreign affairs has been relegated to the rumble seat, with arms control dragging behind on a fraying rope. I do not share that view.

I do not share it for several reasons—some based on actual developments since President Reagan took office and some based on what I consider to be strong potential developments. We should remember that this administration entered office with a philosophy of government sharply contrasting with that of its predecessor. Clearly, too, it did give priority to domestic issues, particularly the economy, which it attacked vigorously and quickly. One may argue with the particulars or question the results, but hardly deny the resolve and energy of the approach. I believe that we shall soon see a good bit of that energy funneled into foreign policy and arms control issues.

Some delay on the part of the administration in respect to foreign policy and arms control seems excusable. Clearly, there was good reason to examine carefully all aspects of the foreign policy inherited from President Carter which, as you remember, came under frequent and intense criticism. A rather considerable housecleaning of personnel in the upper levels of the administration occurred in this area, and it is natural that the new appointees require some months to become familiar with their responsibilities. There is a balance to be struck here, of course, as we do not need the pace of a glacier either.

I do know that the administration is undertaking interdepartmental studies of arms control issues. I cannot blame them for not wanting to be overly hasty in making decisions on matters that may well affect the United States for decades to come. We should remember that previous administrations have not exactly set world records for speed in negotiating arms control agreements. If the first year of President Reagan's term of office produces sound analyses of arms control issues, which as we all know are monumentally complex, that will be a small price to pay. It hardly is necessary for me to discuss here in detail the substance of the President's dramatic speech on TNF. That speech, more than any other single event, has convinced many people in the United States and Europe that the Reagan administration is committed to a serious and full-scale arms reduction program.

I have pointed out in a speech that I gave in July what I then identified as some positive steps that the administration had taken in the field of strategic theater negotiations. I cannot overestimate the significance of our decision to enter into negotiations on limiting land-based nuclear weapons in Europe, the Theatre Nuclear Forces Talks. They began in Geneva on November 30.

The United States has made perfectly clear at an early date that it intends to respect the SALT I and SALT II restrictions on strategic offensive armaments. The strategic modernization program recently announced by the President does not conflict with this intention, although both Secretary Weinberger and Secretary Haig have reiterated their commitment not only to observing SALT I and SALT II but also to opening new strategic weapons negotiations, probably in February or March. I should also add that the United States has continued to meet with the U.S.S.R. on the Standing Consultative Commission. The summer meeting did not become, as some in the United States would have liked, a forum to attack the Soviets for alleged violations of the SALT process. The session instead made some progress, and the SCC will continue to meet in future sessions.

In addition to actions in the strategic and theater arms control arena, the administration has continued to participate fully in other arms control forums—namely, the Conference on Security and Cooperation in Europe, which is meeting in Madrid; the Mutual and Balanced Force Reductions talks in Vienna, and the Committee on Disarmament in Geneva. The United Nations itself continues to serve as an overall platform for arms control questions.

It has largely escaped notice that within 3 weeks the Reagan administration made a bold move in the Conference on Security and Cooperation. This Conference, stemming from the prestigious Helsinki accords of 1975, is the only all-European forum given over to security questions, as well as to human rights and some issues of economic cooperation. The Carter administration had vacillated for months over whether to agree to a French proposal for a Conference on Disarmament in Europe. Within a month of taking office, this administration boldly decided to support the French initiative and at a single stroke ended a long period of tension and bickering with our allies. I should also add that President Reagan left as the Ambassador to CSCE that very effective negotiator, Max Kampleman, who has continued to do a superb job.

The very fact that the President has elected to continue full participation in the Mutual and Balanced Force Reduction talks is, to me, an important sign of serious intentions in respect to arms control. Without for a moment discounting the enormous significance of strategic nuclear weapons, it is still with conventional forces that a war is most likely to be fought. I suspect that MBFR may before long make a sweeping contribution to arms reductions. But I would like to defer discussions of why until a bit later, as the subject belongs to the part of the speech dealing with potential developments.

Another arms control milestone—the protocol of the Treaty of Tlatelolco, due to Reagan administration leadership, has been ratified by the Senate. The basic treaty prohibits nuclear weapons in Latin America, whereas protocol I obligates countries that have nonself-governing territories to adhere to the treaty. In the case of the United States, such territories include Puerto Rico, the Virgin Islands, and Guantanamo Naval Base. This protocol represents the first tangible step for the administration in the arms control arena, and I consider it substantively and symbolically important.

The administration also announced after a few months its nuclear nonproliferation policy and its conventional arms transfer policy. In outline they were similar to President Carter's, although they tend now to stress greater willingness to supply armaments and nuclear materials to states that are friendly to us. The AWACS sale was of course part of the arms transfer policy. The closeness of the vote and the intensity of the process must have sent a clear signal that Congress is keeping a close watch. Again, there will be differences of opinion, but I suspect that there will be a great deal of restraint in respect to these two sensitive categories—nuclear materials and sophisticated conventional arms.

Regarding nuclear matters, there are strong currents that lead one to expect that the administration will urge the ratification of both the Threshold Test Ban and Peaceful Nuclear Explosions Treaties between the United States and the U.S.S.R. They do not go as far as some may wish, but they seem to be giant strides toward bringing the nuclear monster under control.

I have touched upon what I consider some solid progress that President Reagan has made in arms control. Now I want to turn to some factors that I believe will make arms control a perma-

nent and large part of this administration's foreign policy. I say this of course on the assumption that the Soviets are at least half as sincere about peace as Mr. Brezhnev indicated in his speech on November 3, and that they do not invade Poland or commit some other egregious act.

At the beginning of my speech, I mentioned President Reagan's having given priority to the domestic economy. I suspect that this will also impact on his arms control policy. News reports daily tell us that the economy is in difficulty—a recession, high unemployment, huge deficits for this next year, talk of tax increases, and high interest rates. I cannot see how the Defense Establishment can eventually escape its share of cuts. Arms control, again assuming Soviet willingness, is a means of reducing defense costs and at the same time meeting our security requirements. Secretary Haig clearly enumerated this in his arms control speech in July. Necessity may again be the mother of invention.

The recent demonstrations in Europe are another catalyst for arms control. Clearly our allies are under pressure from highly vocal elements in their countries to resist the emplacement of new U.S. weapons systems. I certainly resent the one-sidedness of the demonstrations, which usually ignore the Soviet menace, but the fact remains that the dynamics of European politics may dictate that arms control negotiations are not just an option but the only choice. The "zero-option," proposed by the President on November 18 is indicative of U.S. sensitivity to European opinion.

I believe, furthermore, that we may soon come to the point where conventional armament reductions in Europe will also be viable, most likely in the alliance-to-alliance Mutual and Balanced Force Reductions talks. It may be that retrenchment of U.S. forces in Europe would not be all that bad. It may well stimulate our allies to shoulder much more of the burden for their own defense, something that I have advocated for a long time. I suppose that I should also note that inspection of our military forces in Europe during the late summer left me with the distinct feeling that many of them belong not as our frontline forces but in the United States.

In summary, the Reagan administration has already demonstrated, to the surprise of some, a substantial interest in arms control. There have been no precipitous denunciations of arms control as a sellout of our defense effort or accusations that the arms controllers are fellow travelers or worse. The administration has systematic reviews under way of all aspects of arms control. It has adhered to the SALT agreements, has begun TNF discussions with a dynamic, far-reaching proposal, and has taken significant steps in CSCE to endorse arms control negotiations. The Treaty of Tlatelolco is clearly a bold stroke.

Economic necessity at home and political realities in Europe may serve as the catalyst for this administration to achieve a dramatic record in successful arms control. I have several times observed that it took a Republican President to establish normal relations with China, and so it may also take one to achieve a true breakthrough not just in arms limitations but in reductions. President Reagan has unimpeachable credentials as a loyal American totally devoted to our security and defense. He is perhaps uniquely capable of rallying the conservative support needed to negotiate real, not cosmetic, arms control agreements that will be verifiable and militarily sound. In support of these arms control efforts, I intend to chair hearings of my Arms Control Subcomittee in major U.S. cities in order to involve citizens more directly in the process.

At the beginning of my speech, I surmised that some would liken a speech on the Reagan arms control policy to the one sentence chapter of Bishop Pontoppidan on the owls of Iceland, in which he said there were none. I am happy to report that the good Bishop erred. There are owls in Iceland, and there is a Reagan arms control policy.●

WORLD PEACE LUNCHEON

● Mr. DURENBERGER. Mr. President, I went to Birmingham, Ala., to see my son march with the Marion Military Institute White Knights Drill Team on Veterans' Day 1981.

Not only did I see my son, but I had a special opportunity to gain insight to a unique part of our country and some very special people.

To a Minnesotan, Alabama is different. It is "the Deep South." But what I saw on November 11 opened my eyes to a tradition and a commitment Alabamians have made to America that is unique.

I participated in the world peace luncheon at the 35th celebration of National Veterans Day in Birmingham. It was a celebration of peace and the commitment that Americans of all walks of life have made to preserve that peace. People came from all over this great country to participate.

Most of all, it was the commitment of the people of Alabama I witnessed that noon and in the afternoon parade to preserve that peace through preparedness that was impressive.

Perhaps the theme for the occasion was best articulated by a Virginian who, as I was, was a guest. I cannot recall having heard a Veterans Day occasion honored more than it was in Birmingham on November 11, 1981, by the Secretary of the Army, the Honorable John Marsh.

Mr. President, I ask that Secretary Marsh's remarks, together with a moving introduction by Alabama Congressman BILL NICHOLS, be printed in the RECORD.

The material referred to follows:

INTRODUCTORY OF GUEST SPEAKER BY CONGRESSMAN BILL NICHOLS

Many years ago, a British soldier penciled on an old British Sentry box, in white chalk, the following words: ["God and Soldier, all men adore, in time of trouble, and then no more, for when war is over, and wrongs are righted, God is neglected, and the Soldier slighted."] I am pleased today, on this Veterans Day, that that cannot be said about this great country in which we live.

Governor James and General Cobb, I am pleased that that cannot be said about our great state of Alabama. Mr. Mayor Arrington certainly it cannot be said about our great city of Birmingham. So I will take this time to publicly thank all of those who have had a part in making this the largest Veterans Day commemoration in the entire United States.

Our speaker today is a native of the Old Dominion state of Virginia. Secretary Marsh comes from Winchester, which is in the apple country of the great state of Virginia. He is a constitutional scholar, following in the illustrious footsteps of his predecessors General George Washington, Thomas Jefferson, Robert E. Lee and Senator Byrd. He entered the United States Army in 1944. He was commissioned from Officer Candidate School as a 2d Lieutenant in 1945. He saw duty with the United States Occupational Forces in Germany in World War II at the ripe age of 19. In 1951 following World War II, he received his law degree from prestigious Washington and Lee University, and he was admitted to practice law in the Virginia Bar.

In 1962, however, politics got into the Secretary's blood. He elected to run, as a Democrat, from his district in Virginia for the United States Congress. He won over four other candidates and he served from 1963 to 1971.

I had the privilege of serving with this great Virginian. He was a member of the appropriations committee. He elected not to seek reelection for his fifth term, certainly not because he could not have been re-elected, but because he had other desires—to practice law—and so he went back into the law profession.

In January 1974, he became Vice President Ford's Assistant for National Security Affairs. His next position was Counselor with Cabinet rank to President Ford, a position he held from August 74 to January 1977.

After serving with President Gerald Ford, Secretary Marsh again elected to return to private law practice in Richmond, Virginia.

And so from 1951 to 1976, when he retired from the Army with the rank of Lieutenant Colonel, this distinguished speaker, and our guest today, served with the 116th Infantry Regiment of the 29th Infantry Division. He served with State Headquarters Detachment of the Virginia National Guard and, I might add, that he served with great distinction as a member of the board of visitors to Virginia Military Institute.

As an old foot soldier in the Brown Shoe Army, World War II, I recall a saying which soldiers often times credited to General George Patton. They said, "He was a soldier's soldier." What they meant by that is, they would follow him into battle, that they had trust in him, they had confidence in him, and I think that statement befits the man who brings us the message on this particular day. I believe it is correct to say that, he was the only member of the United States Congress who elected to do his Reserve training in the summer months in Vietnam. I think that says a great deal about Secretary John Marsh.

He has been awarded the Department of Defense Distinguished Public Service Medal, the American Legion Distinguished Service Medal, the National Guard Distinguished Service Medal.

I had the pleasure of flying down with him from Washington today with his most attractive wife and I think you would want to know that his two sons serve proudly today in the United States Army. His son Bob, former Special Forces Paramedic, now is a 2d Lieutenant in medical school, and his son Scott, a 2d Lieutenant Virginia National Guard. It is a pleasure for me to present to this home state audience, my distinguished friend, and great American, Secretary John Marsh, Secretary of the United States Army.

WORLD PEACE LUNCHEON
(By John O. Marsh, Jr.)

Of all the creatures of the earth, it is only man that has a sense of history. It is this gift which causes us to assemble here today.

In the town where I grew up as a youngster, in the Valley of Virginia, on a small plot of ground, at the intersection of Liberty and Main Streets, is a beautiful monument to those men of Harrisonburg and Rockingham County who gave their lives in World War I. It is a sculptured figure of Liberty mourning her dead.

Carved around the base of the monument are the words:

"They tasted death in youth that Liberty might grow old."

In the 1930's, I can remember in the classrooms on this day, the moment of silence as we paid tribute to mark the 11th hour, of the 11th day, of the 11th month when the Armistice was signed to end the war which was to have ended wars—to make the world safe for Democracy.

Now, over 60 years later, we know that the world has not been made safe for Democracy and wars have not ended. We gather here in Birmingham to pay homage to all of our veterans, not just those of World War I.

Normandy, Midway, Korea, and South Vietnam, these were places of violence and valor, far removed from the peaceful and prosperous state of Alabama.

It was an English poet who captured the solemnity of this moment, when the tempo of a nation slows to honor its dead:

"The tumult and the shouting dies,
The Captains and the Kings depart;
Still stands Thine ancient sacrifice,
An humble and a contrite heart.
Lord God of Hosts, be with us yet,
Lest we forget—lest we forget!"

And it was a Canadian soldier, who would be buried in the Fields of Flanders, of which he wrote, who reminded us, the living, of our commitment to our countrymen who fell in battle.

Perhaps we have become too sophisticated and the words seem too old-fashioned or hackneyed. We do not want to be reminded of the obligation of the soldier-poet who says to us:

"Take up our quarrel with the foe;
To you from failing hands we throw the torch; be yours to hold it high.
If you break faith with us who die
We shall not sleep, though poppies grow in Flanders fields."

The purpose in being here today is twofold. It is commemorative. It is commitment.

Commemoration of this day shall not be complete until such time as this Nation honors all of its veterans of all of its wars. You have done this in Birmingham.

In our public parks, in the hallways of our schools, at the campus, and in the town squares, in the court houses and in the churches, are the plaques, tableaus and statuary which have become community reminders to those who fell in other wars. However, too often there is no shrine to those who served and died on the battlefields of Vietnam. This should trouble our National Conscience. It should be set aright. They made no less a sacrifice for the cause of freedom.

In our time, the formula for a peaceful world is directly related to U.S. defense. A defense that deters war—a defense that causes any would-be aggressor to realize the foolhardiness of an attack on any U.S. interest.

As President Reagan recently stated at Yorktown:

". . . of equal concern to me is the uncertainty some seem to have about the need for a strong American defense . . .

"Military inferiority does not avoid a conflict, it only invites one, and then insures defeat. We have been trusted with freedom and must ensure it for our children and for their children. We're rebuilding our defenses so that our sons and daughters never need to be sent to war."

We do not seek empire, nor do we seek to force our will on others. Our record after both World Wars is testimony to that.

But, because we are not an aggressive nation, our potential adversaries nevertheless should not forget one of our early flags, carried by our successful Revolutionary forebearers. It was a pine tree displayed on a white background. Around the base of the tree was coiled a rattlesnake and printed across the bottom of that banner were the words, "Don't tread on me."

As we set ourselves to the task of strengthening America's defenses, let us remember that we have much to do. That it will not be done in a day. That it will require sacrifice. Yet, we must get on with it, and we shall get it done.

Let us speak to this commitment.

The world in which we live has three dimensions:

It is a world of crisis.

It is a world of change.

It is a world of ideas.

We live in a troubled world. We live in a world of precarious peace, a peace which is maintained only by U.S. strength. And, to the extent that the U.S. appears to be weakened, peace is weakened. It is only the U.S. leadership of the Free World and U.S. power that safe-guards an uneasy truce.

A hasty global overview points to the difficulties of our times. There are seven major geographic areas of concern today:

1. Europe—Where NATO forces are counter-posed to prevent aggression by the Warsaw Pact. Our attention is also riveted on the events in Poland.

2. Africa—That continent is the scene of great instability and political cross currents, but is vital to the West because of its resources;

3. The Middle East—which at times appears to be a tinderbox of conflict. This volatile area is the source of enormous energy supplies;

4. Southwest Asia—where we find 85,000 Soviet combat forces in Afghanistan;

5. Northeast Asia—where U.S. forces, along with our Korean allies, safeguard the Korean Peninsula;

6. Southeast Asia—which is still gripped by oppression; and,

7. Latin America—where we see growing unrest and instability in our own Hemisphere.

To meet these threats of violence, U.S. forces are organized on the basis of the Total Force Concept whereby the regulars, the Guard and the Reserve are co-equal partners.

It is vitally important that we give greater emphasis to the National Guard and the Reserve. In the Army in the coming year you will see greater attention to these essential civilian components.

Soviet power is awesome. Their intercontinental strategic arsenal includes 7,000 nuclear warheads—almost 1,400 of which are in their Intercontinental Ballistic Missile Force and over 900 of which are placed aboard Soviet submarines.

Like their land and sea forces, their air power is a formidable force—strategically and tactically.

A new Soviet blue water navy is appearing on the world's oceans. The naval force is designed to project Soviet power around the world.

The Soviet Ground Forces have now grown to more than 180 divisions. We have 24 divisions, eight of which are in the National Guard. They have about 47,000 tanks. We have 11,000. We find similar ratios in most other types of essential equipment.

While we have reduced our ability to produce equipment, they have increased theirs.

By any reasonable test, the Soviets have far more than they need to defend their own frontiers. The fact is they have the capability to launch such an attack and project military power beyond their borders.

I have spoken of the military role as we view this threat to our security. But what can others do? Specifically, what can the friends of the Armed Forces and the United States Army do?

I appeal to you this afternoon for special help in educating ourselves on matters that concern the Defense Establishment and the Army. You can tell this story to our fellow citizens who do not have the same level of knowledge or interest about defense matters as you do.

It is the story of: The threat we face, and what needs to be done in:

Manpower; readiness; modernization; and sustainability.

These needs are not easy and they have a price. Our changing times add to the challenge.

We live in a world of change impacted by technology, by communications, by transportation, by exploration into outer space. It is a world being changed by exploding populations and emerging nations.

However, the world is not changed by armies nor by machines. It is changed by ideas.

The world of ideas and hope is America's world. Its preservation requires dedication and sacrifice from each of its citizens. It requires your skills, your efforts and it requires your time.

You are our greatest resource. You are America's hope for the future.

The last line of the Declaration of Independence is a commitment:

"And for the support of this Declaration, with a firm Reliance on the Protection of divine Providence, we mutually pledge to each other our lives, our fortunes, and our sacred Honor."

We must make this pledge.

President Reagan at Yorktown said:

". . . The freedom we enjoy today has not always existed, and carries no guarantees. In our search for an everlasting peace, let all of us resolve to remain so sure of our strength that the victory for mankind we won here is never threatened."

Perhaps some historian at some future milestone will write—Here passed a small group of Americans, who in their time explored the reaches of outer space and raised the curtain on a new age of discovery.

Through science and medicine, they sought to conquer famine and disease, and helped alleviate human suffering by finding ways to lessen pain.

Through quiet strength and reason, they made less shrill the voices of prejudice and hate.

They paid Liberty's price of eternal vigilance, yet became neither oppressor nor oppressed.

To a land troubled by drugs and crime—by poverty and loss of destiny—they brought a measure of purpose and order as well as personal dignity.

They helped restore the beauty of the earth and safeguarded the elements of our planet vital to all forms of life.

They were a people who willingly bore the burdens of defense. Whose forces kept freedom's lonely vigil and were the guardian of their Nation's values.

And, to a world torn by war, they renewed again the hope of peace.

These things they were able to do because they possessed not only the knowledge, but the will to do them—and believed they could.

Let me leave a charge with you today which was the charge that Washington made to the delegates to the Constitutional Convention. At a time when it appeared the Convention would fall into disarray and the sacrifices of the American Revolution have gone for naught because of differences that developed in the Convention between regions over differences of political philosophies and economic concerns, Washington, the President of the Convention, charged the delegates as to their task with these words:

"Let us raise a standard to which the wise and the honest can repair. The event is in the hands of God."

Let us raise that standard today.●

MINORITY HEALTH CARE

● Mr. INOUYE. Mr. President, as I reflect today upon the many benefits that each one of us has derived from our Nation's health delivery system, I am afraid that the harsh reality is that even now, our Nation's minorities still face staggering obstacles in their efforts to achieve adequate health care for themselves and their families. The statistics that I have seen clearly reflect the severity of the problem. For example, it has been reported that twice as many minority women, compared to their white counterparts, lack prenatal care at almost every stage of pregnancy. Minority mothers die in childbirth three times as often. Of those who do survive, 1 in 40 must then watch her baby die in the first year of life.

Taking a more developmental approach, the evidence clearly indicates that minority children in this Nation of all ages are simply more prone to becoming ill; in my judgment, this is most likely primarily because their families are poor. One out of seven minority children under the age of 15 lacks a regular source of health care. Our overcrowded public hospital emergency departments and outpatient clinics frequently serve as their major source of health care services.

If we look at the data on alcoholism, we quickly find that among all special populations groups, American Indians have the highest reported frequency of problems associated with drinking. That the alcoholism rate among Native Americans is reported to be almost twice the overall national rate, or as high as 10 percent of the Native American population. The native Hawaiians in my State have the highest incidence of that dreaded disease, cancer. Our Nation's mental health experts have consistently stressed that there is a disporportionately high level of schizophrenia and drug abuse among our Nation's minority population.

Yet, who is it that has actually demonstrated their willingness to serve these many pressing needs? I would suggest that it has been our Nation's minority nurses. Everyone of us in Congress have received countless reports of serious shortages of minorities within every health manpower discipline, whether we are talking about clinical psychologists, physicians, and so forth.

We constantly are urged to do all that we can to insure that our Nation's health care practitioners will be truly sensitive to the many cultural nuances involved, that special efforts will be made to insure that our practitioners will have sufficient linguistic ability to truly communicate with their patients. Yet, it has been my observation that it has been our Nation's minority nurses who have been most willing to respond to this national challenge.

Simply stated, minority nurses today proportionally provide the majority of health care to the 20 percent of our population that are minorities. Thus, it comes as no surprise to me that when I talk informally with various representatives of our Nation's poor and/or minority interests, they make it quite clear that at this point in time, an even higher priority should be placed on the training of more of these dedicated professionals—not the higher paid, greater status practitioners, but those who have demonstrated their professional willingness to actually provide the types of care that are needed, to provide care in a manner that patients can afford.

Today, only 7.8 percent, 80,184, of the presently employed registered nurses are minorities; this in itself continues to represent a major barrier to providing adequate health care in our Nation. There clearly is a significant shortage of minority registered nurses and, accordingly, regardless of the popularity of the current day rhetoric emphasizing "budget balancing" and a diminished Federal role in health care, I personally feel most strongly that we must increase our Federal commitment to training these particular practitioners.

In many ways, our Nation's minority nurses can themselves be described as having a triple disadvantage. For this professional is a minority, a nurse, and usually a female. All three of these roles have traditionally been at the bottom of hierarchical recognition for health professionals. The minority nurse is first of all a registered nurse; that is, a graduate of an approved nursing education program authorized by the State to prepare persons for licensure. After successful completion of the program, this graduate must then meet various State requirements for licensure in the State in which he or she wishes to practice.

I am most pleased to report that there is an ever-increasing number of minority nurses being prepared at the baccalaureate and masters level in university programs that are accredited by the National League of Nursing. These minority nurses are being educated to function as community/public health nurses, certified nurse midwives, psychiatric mental health nurses and emergency department nurses, to name but a few.

Specifically, Federal assistance to these university programs through the Nurse Training Act has been the single most important factor in facilitating the entry of minorities into nursing. Through this act, 37 institutions across the Nation have been funded specifically to recruit, retain and graduate minority nurses.

I also think that it is important to expressly point out that the minority nurse is an especially good investment of our taxpayer's dollars. Minority nurses, when compared to others, are less likely to leave the ranks of nursing for another career. Proportionally, more minority nurses are employed in full-time nursing positions than their majority associates. These individuals tend to see their jobs as full-fledged careers to be continued as a source of financial support to their families.

History has shown that these professionals, in particular, are not likely to halt their careers for childbearing, even in the child's preschool years. Their perspective seems to be that the role of being a good provider and being a good mother are fully compatible.

For example, focusing upon one particular ethnic group, a 1980 study conducted by Dr. Eleanor Feldbaum for the Division of Nursing, U.S. Department of Health and Human Services, reported that black nurses were more likely to have worked with predominantly black clientel, 52.8 percent, than their white colleagues, 16.7 percent.

In addition, one-fourth of the black nurses had worked more than half their nursing years serving black clients, whereas only 5.2 percent of their white counterparts had done so. The mean percentage of time spent with black clients was 26.58 years for black nurses and 6.12 years for whites. It is clear from this data that the education of the minority nurses is necessary to provide a reliable, consistent source of health care for underserved populations.

As in all of our health disciplines, there is a continuing need in nursing for leadership, teaching, research, and the development of new refined strategies to provide a more efficient system of health care delivery to the American people. At the forefront of the nursing profession in this regard are those nurses who hold doctoral degrees in nursing science or a field related to their nursing specialty—for example, behavioral sciences and education.

There are an estimated 2,300 nurses in the United States with doctoral degrees, of which 183, 8.2 percent, are members of minority groups. In my judgment, this serious shortage of well-prepared minority leaders and researchers has a strangling effect on the development of culturally sensitive and relevant knowledge for the health care of the American people.

In an unprecedented effort to address this leadership vacuum, the center for minority group mental health programs of the National Institute of Mental Health under the creative leadership of Dr. James Ralph, funded the American nurses' association fellowship program in nursing for ethnic minorities in July 1974. The express purpose of this program was to assist in the preparation of doctoral level minority nurses for research and clinical practice in the mental health areas.

Over the past 5 years, a total of 45 minority nurses in 33 different universities—for example, University of Hawaii, Catholic University, University of Maryland, New York University, and so forth, have received support ranging from $3,000 to $7,500 per year.

As of August 1981, 39 fellows have earned their doctorates and affiliated themselves with institutions addressing health care problems of minority populations. And, in 1981, this program produced the country's first Native American doctorally prepared nurse, Dr. Jennie Joe from the University of California at Berkeley.

Two minority doctorally prepared nurses who were especially instrumental in the inception and progress of this unique program are respectively Dr. Mary Harper, director of research, progam, policy and issues, President's Commission on Aging, and Dr. Hattie Bessent, the American Nurses' Association's program director for the past 4 years.

Further, I would be remiss if I did not state that it was the center for minority group mental health programs that was the catalyst for my proposal to establish an associate director for minority concerns within the National Institute of Mental Health (Public Law 96-398).

Without question, as I have indicated, the primary reason for the current shortage of minority nurses is not due to a lack of interest in nursing as a career nor to the familial and childbearing demands of our society, but instead to the shortage of opportunities and resources available. Potential minority nurses are usually nontraditional college students—a 31-year-old married female, who is a mother with previous work experience, and heavy financial obligations.

The Nurse Training Act and the American Nurses' Association's fellowship program in nursing for ethnic minorities have both made significant steps in providing increasing numbers of competent health care providers for our underserved populations. But again, this is not the time to rest in our efforts.

Today, as we salute the services of our Nation's minority nurses, we must also reaffirm our commitment to their growth and continued contributions to the improvement of health care for our American people.●

VOLUNTARISM AND THE REAGAN ECONOMIC PROGRAM

● Mr. DURENBERGER. Mr. President, I ask that an article by Dr. Stuart Butler of the Heritage Foundation be printed in the RECORD at the conclusion of my remarks. The article is an analysis of the impact of the Economic Recovery Tax Act of 1981 on voluntary and nonprofit organizations.

Although I generally support Dr. Butler's analysis, there are three specific issues he raises that deserve further clarification. First, I do not believe that we have created a "gap." Second, religious and voluntary institutions can and should play a stronger role in the delivery of certain human services. Third, philanthropy is an important part of corporate responsibility.

THE "GAP"

Dr. Butler does an admirable job of putting the "gap" into perspective. However, I would take his arguments one step further—and that is to say that there is no "gap." What we have accomplished with our reductions in Federal spending is to stop the galloping growth in public programs that has threatened to bankrupt this Nation. And by doing so we have narrowed the gap between the tax revenues needed this year and what would have been needed next year had we allowed inflation to continue at a double-digit rate.

All we have done is to reduce the increase. That was the target. We have stretched out a few commitments. We have put a cap on a few programs. I invite anyone to go back to the budget figures of 2 or 3 years ago—back to 1978 and 1979. Look at who was being served, who was eligible, and try to make a case for a "gap" that needs filling.

We cannot measure needs in terms of Government-mandated services and satisfaction of needs by the amount of Federal dollars expended.

Needs must be identified by citizens who have the capacity to satisfy those needs through access to resources. Resources must be looked at as the totality of time, talent, and revenue generated by society and made available to its citizens. Government has a responsibility to insure access to those resources by its citizens but cannot be expected to produce those resources itself.

The myth that the Federal Government can, or should, be both the decider and the doer cannot continue. The Federal budget reduction and the Economic Recovery Tax Act are part of our effort to correct that myth.

BUDGET CUTS

In calculating the impact of the budget cuts, Butler challenges the assumption that for every Federal dollar removed there must be a private dollar found to replace it. To allow that assumption is to say that Federal dollars have only supported needed, effective, and efficient services—I believe few would argue that has always been the case.

There is also, as he points out, an underlying assumption that those services which are of value, and may face some reduction in Federal support, must now be supported solely by charitable contribution. Again, advocates for this view are minimizing the "contribution" to be made by such things as fees paid by the beneficiaries of services or the potential provision of some services by business for employees—such as transportation or childcare.

We have, for too long subsidized middle class America in order to insure equity for the poor—it is time I believe, and this administration believes, that we again turn the attention of the Federal dollar to those individuals who are truly in need. And, target those dollars to building their capacity to decide where and how their needs should be satisfied.

THE ROLE OF RELIGIOUS AND VOLUNTARY INSTITUTIONS

I agree with Butler's belief that the Urban Institute skewed the outcome of its report by not taking into account the influence of a change in demand for charitable dollars created by the Federal budget cuts. He asserts that this increase on the demand side of the equation will have a favorable impression on giving. As Butler says, if this is the case—

> The structure of giving will shift in favor of those organizations hurt by the cuts and seen by the public as socially valuable.

Religious and voluntary institutions who have traditionally played a strong role in the delivery of certain types of welfare services may reap the benefits of this phenomenon and certain provisions of the new tax law as well.

In a study just released by the Brookings Institution, authors Bruce Smith and Nelson Rosenbaum conclude:

> According to some estimates, churches and synagogues may well absorb more than half of the increases in giving spurred by the new law. This will provide an expanded fiscal base from which to finance not only sacramental activities but also the nonsacramental service activities in which so many religious institutions engage.
>
> Because of religion's expanded receipts and because religion occupies a stable, central role in American life, religious institutions will be looked to as a backup finance and delivery mechanism by other sub-sectors . . . particularly in the human services.

Religious organizations, frequently constrained by overzealous zoning regulations must be freed from unnecessary barriers to their increased involvement in solving our Nations social ills. We must be reminded that our religious institutions are one of the founding fathers of our national tradition of voluntarism. The potential shouldering of more human welfare responsibilities by churches and synagogues should be a welcome prospect for those people who in times of crisis turn to a church as one of the primary "mediating structures" in their lives.

THE ROLE OF CORPORATE PHILANTHROPY

Philanthropy is an important part of a corporation's role in society. On this point I challenge Butler's statement:

> The argument that business should blindly support charity out of some notion of corporate "conscience" is irrational . . . corporations would simply be controlling charitable dollars that should be allocated to shareholders. Surely it is better to have a situation in which the distribution of funds to charity reflects the cumulative decisions of individuals rather than the Boards of corporate America.

There are two basic reasons why people make contributions to charity, altruism, and self-interest. Individuals may give for either reason, or, in many cases, for both. Corporations on the other hand should, and generally do, look for self-interest—and corporate philanthropy is in the best self-interest of business. Ken Dayton of the Minnesota-based Dayton Hudson Corp. puts it this way:

> To begin with, building a better environment for free enterprise is crucial to business survival, as is building greater public confidence and credibility in the private sector. More importantly, to protect our business "bottom line" we must be concerned with the environment in which our businesses operate. Crime rates, housing conditions, the quality of education and cultural resources all influence our business success just as surely as productivity and management practices. So increasing corporate giving is also a smart business decision.

Corporations have another reason for contributing to society, its called corporate citizenship. When a company makes a decision to locate a plant in a particular community it has made a decision which has a variety of consequences for that community. To be sure the company will pay taxes. It will hire workers from the community. Frequently it will bring new residents and other businesses into the community. It will need sewer, water, roads and other services of the community. In short, it has become a citizen of the community.

That citizenship brings with it responsibilities which, I believe for the corporation, go beyond the basics of observing the laws and paying taxes.

There are many ways a business can meet these citizenship responsibilities. For example, active involvement in the local business association, transportation programs for employees, decisions about new hires and layoffs, loaned executives and employees serving as volunteers in local government and nonprofit organizations—and philanthropy.

Butler states that shareholders should be philanthropic, not companies. Nearly all shareholders today hold equities in more than one company. More often than not they are institutions representing groups of individuals—mutual funds, pension funds, trusts—and frequently they do not live in or near the communities where company plants are located.

Decisions about charitable contributions made by shareholders under these circumstances seldom reach the community most affected by the plant. The potential benefit to the employees, the community and the plant are therefore lost.

Butler is correct in suggesting that decisions about charitable contributions are best made by individuals concerned about their community "rather than by the boards of corporate America." Indeed with so many companies managed by absentee boards, philanthropic decisions made by them would have the same effect as those decisions made by absentee shareholders.

To respond to this concern, many companies have formed contributions committees comprised of company employees. Considering the benefits of contributions to charity by business, might this not be a more promising alternative?

Another frequently voiced argument against corporate philanthropy is that companies are ill-equipped to evaluate the requests they receive for contributions.

Clearly, it has been the case in many companies that the issue of corporate responsibility has been relegated to a small, underpaid and poorly qualified staff—if there is a staff assignment at all. Another common practice is to "dump" the responsibility on an about-to-retire executive. The result is all too often little pygmy grants spread all around the community in order to buy goodwill rather than a better community.

A truly meaningful and effective program is the one which employs professional staff and establishes very specific goals developed at the top of the corporation. Employees contributions committees can then serve as an excellent mechanism for evaluating requests or helping to design strategies for carrying out corporate philanthropic objectives.

In summary, corporations do have a philanthropic role—because it is good for employees, it is good for the community, and it is good for business.

CONCLUSION

I commend Dr. Butler's article to you because it is a thoughtful and realistic analysis of the consequences of the Economic Recovery Tax Act on voluntary organizations. In reviewing his study however, there are three things to keep in mind.

First, the foremost purpose of the Federal budget reductions and new tax policies has been economic revitalization for the country. It is only through economic revitalization and a reduction in Government spending that we can narrow the gap between revenues and inflation. We have not created a gap, we are closing one.

Second, both the budget reductions and the tax act have stimulated new opportunities for involvement of the private sector. Corporations and religious institutions in particular have a special role to play in bringing the solutions to society's problems closer to the people of America.

Finally, I believe that we should and will see an increase in giving by business. It will be spurred by the realization of business that it is part of economic recovery. It will be stimulated by changes in the tax law that build business' capacity to give. But, most importantly, it will happen because American businesses are beginning to believe that it can, and it will make a difference.

The article follows:

VOLUNTARISM AND THE REAGAN ECONOMIC PROGRAM

(By Stuart M. Butler)

INTRODUCTION

In recent speeches, President Reagan has stressed the voluntary sector as a crucial element in his strategy to alter the balance between the government and the people in American society. "Voluntarism is an essential part of our plan to give government back to the people," Mr. Reagan declared October 5 before the National Alliance of Business. He then announced the formation of a Presidential Task Force on Private Sector Initiatives, to be headed by Armco Inc. chairman William Verity, which will examine ways of stimulating voluntarism.

Considerable attention has been given to the feasibility of employing the voluntary sector as an alternative source of funding to offset the 1981 budget cuts in welfare and other programs, but Reagan has made it clear that he views the sector as far more than a new source of finance for reduced federal programs. It is a key part of the Administration's policy of moving the provision of services as close as possible to their intended recipients, so that local needs and sources of assistance can be blended. Strengthening the "mediating structures" between government and the individual—voluntary associations, churches, foundations, neighborhood groups, etc.—is seen as important in reinvigorating the bonds of community. The growth of the voluntary sector is also viewed by the Administration as necessary to the effective rebuilding of notions of social obligation and "good neighborliness"—fundamental features of American society that have been eroded by the growth of government.

Many representatives of the voluntary sector, however, seem to doubt that it can respond fully to its challenge and opportunity. Some analysts have argued, for instance, that tax law changes in 1969, together with the explosion of state and federal regulations concerning fundraising and other charitable activities, have caused stagnation in the sector. If this trend is not reversed, it will be impossible for philanthropy to reach its full potential.[1] Others go even further, by maintaining that at the very time the Reagan Administration is advocating an expansion of voluntarism, its 1981 tax and budget package actually will discourage charitable giving. A controversial Urban Institute study commissioned by the Independent Sector, an umbrella group of non-profit organizations, maintains that the budget and tax portions of the 1981 Economic Recovery Program will cost charities at least $45 billion during the 1981–1984 period, compared with what would have been available without the changes.[2] Independent Sector President Brian O'Connell claims that the Reagan Administration has delivered the voluntary sector a: "triple whammy . . . Federal program support has already been cut, contributions are now projected to go down, and all this at a time when everyone is looking to these same organizations to expand their services."

Yet the assumptions on which the Urban Institute study are based are open to serious challenge. When the assumptions are examined carefully, it becomes evident that much of the extreme pessimism of the charitable organizations is unwarranted. While there are tax and regulatory obstacles to philanthropy which could be removed, there are also good reasons to suppose that the "gap" left by the budget cuts is smaller than the critics believe, and that charitable giving will expand more rapidly than is generally expected.

The size and nature of the impending "gap," and the ability of the voluntary sector to fill it, is a critical issue in the Administration's policy of encouraging voluntarism. The Urban Institute study is the only comprehensive examination to date of this issue, and it has widely been used as the definitive analysis of the impact of the Economic Recovery Act. It is necessary, therefore, to scrutinize the study carefully.

Yet there is another important element in the debate on voluntarism—an element that is as much philosophical as practical in nature. Increasingly, the argument is raised that foundations and corporations should expand considerably their charitable activities to alleviate the burden on other segments of philanthropy. Not only is there doubt that foundations and corporations will increase their contributions significantly, given the existing regulations and tax law, but it is by no means obvious that corporations should be major sponsors of charity. A discussion of the appropriate role of corporations and foundations in philanthropy must therefore accompany an assessment of the outlook for voluntarism.

PART I: CAN THE GAP BE FILLED?

The budget cuts

Although the Urban Institute analysis of the budget changes was completed before the budget bill passed Congress, the difference between the Administration's proposals and the final outcome are not large enough to materially affect the study's claim that charitable non-profit organizations will lose approximately $27 billion in government funding during 1981–1984. This would constitute almost one-third of their direct government support. In addition, the study claims, reductions in federal outlays in areas of interest to non-profit groups will result in pressure on such groups to increase their public services. For the non-profit organizations to

Footnotes at end of article.

finance existing services previously funded by government—without regard to new demands—private giving allegedly would have to increase at three times the rate of previous years.

The Independent Sector and others who cite these conclusions as proof that an impossible task faces the voluntary sector seem to ignore an important caveat in the study:

"This report makes no effort to assess the merits of the budget proposals advanced by the current Administration, either with respect to particular proposals or with respect to the package as a whole. The focus of attention is on what the proposals are and what they will mean for non-profit organizations, not on whether they are desirable or undesirable." [3]

In other words, the study includes no assessment of the worth of programs cut in the budget. In calculating the gap, the assumption is that for every dollar reduction in government support to a non-profit organization, a private dollar must be found to replace it. This may be a necessary assumption to make in order to arrive at a "neutral" conclusion, but it weakens the study as a guide to future needs. Although the budget cuts were generally intended to reduce the level of federal spending, the Administration did not cut at random, but sought to concentrate the reductions in areas where government funding was of questionable efficiency, such as:

(a) Reductions in waste, fraud, and ineffective programs:

Several of the programs cut or eliminated were wasteful and unnecessarily bureaucratic. As Senator Proxmire often has pointed out, many research awards and other expenditures finance activities of highly questionable value. And many "service" organizations seem to be more interested in obtaining and consuming government grants than in providing tangible assistance to anyone. Must waste of this kind now be financed by the private sector?

Many government-supported programs have been of marginal use, while others arguably have been counterproductive. Certain community development programs, for example, seem to have done little to develop communities, and some may even have exacerbated the problems of depressed neighborhoods. The public-sector CETA program, for instance, has often been accused of providing little real training and of inculcating negative attitudes about private sector employment. In addition, many welfare programs have trapped their recipients in a state of dependency, rather than providing a ladder out of poverty.

Although there would be considerable debate over the value of the particular programs cut, it is clearly not valid to view all the cuts as necessarily requiring some alternative sources of support. In some cases, programs cut should be reduced and even allowed to die; in many other cases, enormous waste can be reduced without impairing the quality of services provided.

(b) Activities to be financed directly by recipients:

Part of the budget cutbacks for the arts and education, such as the new needs test for student loans, rests on the contention that users of some service should pay directly for the cost. While this involves trimming federal support of certain non-profit organizations, it does not mean that there is a gap to be filled by private donations. The gap, such as it is, is to be covered by the beneficiaries.

In addition to an analysis of the degree to which non-profit organizations would lose federal funding, the Urban Institute study also examined the effect of the 1981 Tax Act on the incentives for charitable donations.

Footnotes at end of article.

The tax act—individual income tax rates

Spokesmen for the voluntary sector have expressed considerable concern over the effect that the reduction in individual income tax rates will have on charitable giving. Stated simply, the argument is that the higher a taxpayer's marginal tax rate, the more a charitable deduction is worth and thus the lower is the "price" of a gift. A taxpayer in the top 70 percent bracket (prior to the new law), for instance, would pay only $30 "out-of-pocket" for a $100 donation. The new law raises this net cost of giving. Because the top rate in 1982 will be 50 percent, the after-tax cost of the $100 gift will be $50. The 25 percent cut in rates for the other brackets will have a similar effect. In every case, the new law will make charitable contributions more expensive compared with other ways of spending one's income.

There is strong evidence for the contention that the "price effect" tends to reduce charitable giving—but only if all other things are equal.[4] The evidence further suggests that price sensitivity is more pronounced at higher income levels than at lower. High income donors tend to give more heavily to educational and health organizations than to welfare or religious groups, and so the across-the-board tax cut can be expected to affect health and educational bodies to a greater degree than other non-profit organizations.

Complicating the calculation of the aggregate effects of the tax cut, however, are a number of factors:

(a) Deductions for non-itemizers:

Only taxpayers who itemize deductions are influenced by the price effect under normal circumstances. For the more than 60 percent of taxpayers (concentrated in the lower and middle income ranges) who take the standard deduction, the price of giving has been the full amount contributed. The 1981 Tax Act, however, contains a provision allowing non-itemizers a special deduction on the short form. This effectively reduces the price of donations by the amount of the taxpayers's marginal rate. If a taxpayer is in the 30-percent bracket and does not itemize his deductions, a $100 gift to charity has meant an out-of-pocket cost of $100. But under the new law, the donor will be able to deduct charitable gifts from his taxable income, and then take the standard deduction. So a future 100 donation by a non-itemizing taxpayer in the 30-percent bracket will cost him only $70. Until 1985, a ceiling will restrict this special deduction; after that, there will be no limit.

Although contributions by lower income donors tend to be less price sensitive than those by high income taxpayers, the special deduction should stimulate gifts to organizations supported by non-itemizers, in particular churches and social welfare organizations. Martin Feldstein and Lawrence Lindsey, of the National Bureau of Economic Research, estimate that the special deduction will increase total philanthropy by 12 percent.[5] This will offset at least part of the price effect stemming from the tax cut.

(b) Income Effects:

The negative effect of a reduction in marginal tax rates will also be offset by changes in the income of donors, both as a direct result of the tax cut, and because of future growth in the economy. The more money people earn, the more generous their giving. Central to any projection of giving in the future must be a set of assumptions regarding the growth of the economy, but there is no consensus on what that level of growth will be.

(c) Switching:

A third, albeit minor, complication involves the manner in which gifts are made. The Tax Act is so sweeping in its scope that it is likely to prompt changes in the pattern of giving. The reduction in estate taxes, for example, may reduce the level of bequests to charity, but donors could simply switch all or part of their intended contributions to gifts during their lifetime, thus swelling the aggregate of gifts by living individuals. This would depend on whether a donor wished to defer a contribution until his death, or simply wanted to give under the most favorable tax treatment. There are several other similar tax changes which will be summarized later. The interaction of these changes makes the net effect of the Tax Act very difficult to project accurately if the analysis is confined to only one form of giving, even if that method is the most common.

The Urban Institute Study[6]

The recent Urban Institute study on the implications of the Tax Cut for philanthropy has been widely quoted as concluding that individual contributions to churches, colleges, hospitals, and other non-profit organizations will fall by a total of over $18 billion during the next four years. If this is added to their earlier estimates of the losses to be suffered from the budget cuts, the combined shortfall could be $45 billion between 1981–1984. The study concluded that three-quarters of this "loss" would be from reduced giving by individuals in the top seven tax brackets, and so the greatest impact would be felt by organizations supported by higher income donors.

Like the earlier assessment of the budget cuts, the tax study rests on certain assumptions critical to its conclusions. Once again, these caveats were largely ignored in the media interpretations of the study. The principal assumptions and limitations of the study are:

(a) The exclusive focus on charitable donations by living individuals. Foundations, corporations, and bequests are not included. The authors defend these omissions on the grounds that reliable analyses of the giving behavior of these other donors are not available, and that contributions by living individuals account for well over 80 percent of total charitable giving.

(b) Basing projections on the relationships between tax, income, and donations that have been observed in the past. The study simply assumes that there will be no change in the basic pattern of philanthropy.

(c) Using the Carter Administration's economic forecast to estimate the level of giving that would have occurred in 1981–1984, had the pre-1981 tax law remained in force. For their projection of giving under the Reagan program, the authors used the present Administration's forecast for 1981–1984.

Limiting the analysis to living individuals may appear to be a valid approach. While the tax law does change the treatment of contributions by corporations and foundations, these probably will result in only a modest change in donations. In any case, individual support dominates total giving. On the other hand, 60 percent of gifts by living individuals are donated to religious organizations. Such gifts are a negligible proportion of donations by other segments of philanthropy. Of the non-religious element of giving, corporations and foundations account for over one-fifth. Thus, confining the study to living individuals greatly skews the outcome.

The second and third assumptions are even more problematical. The study concludes that under the Reagan Tax Act and economic scenario, charitable giving in real terms will increase faster during the next four years than during the last four years (a 14 percent total increase compared with 13.3 percent). If the study's projections of giving under the new Tax Act suggest a rate of increase that is greater than the trend in recent years, how

can the study conclude that there will be an $18 billion loss during 1981–1984? The answer: using the Carter economic forecast and tax law, the study projected a quite remarkable upturn in individual giving compared with 1976–1980. Over the next four years, said the study, giving would have increased by 25 percent—double the rate of increase during the last four years. As Table 1 illustrates, it would also have meant a complete reversal of the present downward trend of individual giving as a percentage of personal income. The Reagan figures require no such dramatic turnaround.

TABLE I.—INDIVIDUAL GIVING AS A PERCENTAGE OF PERSONAL INCOME, 1976–80, AND PROJECTIONS FOR 1981–84, 1981 TAX ACT VERSUS PRE-1981 LAW

Year	1981 tax act	Pre-1981 law
1976	NA	1.92
1977	NA	1.91
1978	NA	1.91
1979	NA	1.89
1980	NA	1.84
1981[1]	1.85	1.86
1982[1]	1.84	1.94
1983[1]	1.83	1.99
1984[1]	1.88	2.10

[1] Estimated by the authors.

Source: Clotfelter and Salamon, "The Federal Government and the Nonprofit Sector," p. 19.

The "decline" of $18 billion ($9.9 billion in constant 1980 dollars) in individual giving "below what it would have been under prior law, as a result of the recently enacted Economic Recovery Act of 1981" (as the authors put it) is therefore not a loss in any meaningful sense. It is only a comparative decline, based on a projection of giving which would have required a complete reversal of the trend of giving as a percentage of personal income and a doubling of the real rate of increase of contributions.

While the authors estimate that the rate of giving under Reagan will increase, they also claim that contributions to health and education will fall by 3 percent, in real terms, between 1981 and 1984. Religious and social welfare organizations will enjoy most of the increase. But this must be seen in context. Gifts to health and educational organizations showed virtually no increase, in real terms, during the 1970s.[7] So a decline of 3 percent would not be a major departure from the present trend, if one were to accept all the assumptions and reasoning of the study. Moreover, corporations and foundations are heavy supporters of health and education. Roughly two-thirds of all corporate contributions are split between these areas, and about 20 percent of all support to higher education comes from foundations.[8] Consequently, the future pattern of contributions to these two areas is likely to be influenced very strongly by factors that were not examined by the study.

Not only is the study's benchmark projection of giving under the pre-1981 law very suspect, but the assumption that the basic pattern of giving will remain unchanged over the next four years is also contentious. Patterns do change over time. In constant dollars, giving to religious organizations has risen steadily during the last twenty years. Gifts to education, on the other hand, doubled between 1960 and 1970 and then grew very little over the next ten years. Donations to welfare organizations, measured in constant dollars, actually fell between 1960 and 1970, while support to health more than doubled. Philanthropy patterns are complex, and can change greatly in a relatively short period.

Voodoo voluntarism?

The Urban Institute study assumes that the supply and demand for charitable dollars are completely unrelated. In assessing trends for the next four years, the authors assume that a person's desire to give is simply a function of the price of giving (which depends on the tax rate) and the level of his income. The principal reason why giving was projected to rise so rapidly under the pre-1981 law was because "bracket-creep" would have lowered the marginal cost of donations. The decision to give, in other words, is considered in the study to be exclusively a "supply-side" phenomenon (to borrow a phrase), bearing no relation to any change in demand for charitable dollars. The assumption that supply and demand are unconnected is a serious and very fundamental flaw which could discredit the study and leave it as merely an interesting example of voodoo voluntarism.

There are very strong reasons to suppose that donors take into account perceived needs when they contribute funds. People do respond to appeals. And as a direct result of federal budget cuts, there will be strong appeals for donations. If the flexible patterns of the past are a guide, the structure of giving will shift in favor of those organizations hurt by the cuts and seen by the public as socially valuable.

Another reason why we can expect charitable giving to increase to meet new needs is what may be called a "crowding-out" theory of philanthropy. According to this hypothesis, people within a society have a view of what they feel to be an appropriate level of public services in each field. This level will change over time, depending on attitudes and the wealth of the society, and the range of services thought necessary.

These services can be financed either through the private sector, in the form of fees or donations, or by government. If government funding of a particular service increases, private support will tend to fall. This is due, in part, to the popular feeling that private money is needed less. And it is due in part to the disinclination of people to contribute twice to the same organization—first in the form of a tax and then as a charitable donation. Government support of charities, according to the theory, has the effect of "crowding-out" private funding.

There is historical evidence to support the theory. The increase in government expenditures on public services has been accompanied by an erosion of private funding in many countries. The great charities of victorian England have declined in importance in the wake of the British welfare state. In America, the same trend is noticeable. Private donations to health, education, and welfare organizations have stagnated, in real terms, in the years since the Great Society programs were enacted.

If the "crowding-out" theory is correct, it should also operate in reverse. As government aid is cut to organizations which the public deems worthy of support, private giving will increase. The depth of the budget cuts, and the publicity given to them, will assist popular charities in their requests for private help, and provide a stimulus to giving, thus altering the pattern of support. And the tax cuts, rather than reducing the desire to give, as supposed by the Urban Institute researchers, may on balance tend to increase giving, because donors will see fewer dollars preempted by government. The future pattern of giving, therefore, probably will have very little to do with the state of the economy, previous patterns of giving, or even the price of gifts. It is more likely to be the product of a desire by the public to fund services that are considered of value to society. In other words, a simple case of philanthropy.

The tax act—estate and gift taxes

In addition to changes in taxes on income, the 1981 Act contained certain other provisions that will affect gifts made by individuals. The most important of these is probably the modification of the tax on estates and gifts.

Under the pre-1981 law, estates and accumulated gifts greater than $175,625 were liable to a tax ranging from 18 percent to 70 percent. A spouse, however, could inherit half of an estate free of this tax. The new law raises the tax-free gift and estate threshold in increments to $600,000 in 1987, and reduces the maximum rate on taxable gifts and estates to 50 percent by 1986. The exclusion from tax of transfers to a spouse is raised to 100 percent, and a lower valuation for farm and other real business property will be used for tax purposes. Furthermore, the annual level of gifts allowed as an exclusion from the tax is to climb from $3,000 per donee to $10,000.

The effect of these changes will be to increase the price (i.e., after-tax cost) of bequests and lifetime gifts to charity relative to disposals for other purposes. The degree to which this will affect total giving, however, is difficult to determine. It may cause a significant fall in the level of contributions to colleges and other organizations traditionally funded through bequests. On the other hand, it may cause an alteration in the form of gift, rather than in the amount. Some donors, for instance, may create a foundation rather than provide for a bequest.

There is understandable concern among college administrators about the net effect of these new provisions. But several fundraisers point out that the increase in the tax-free allowances will not substantially change the tax liability of the multimillion dollar estates that are the source of so many bequests. Richard Winter, director of deferred giving at Rice University, noted recently that large contributors tend to have estates much greater than $600,000. "The major donors are still going to have tax problems," he said.[9]

A provision in the Tax Act may encourage certain kinds of support to education and health organizations. The new law excludes tuition payments, training fees, and medical payments from the $10,000 annual tax-free gift allowance. There is no ceiling on this exclusion nor restriction on the relationship between the donor and the donee. So there will be a tax incentive for donors who take the full annual gift tax exclusion to consider providing scholarships (and hence funds for education).

PART II: FOUNDATIONS, CORPORATIONS AND VOLUNTARISM

While individuals provide over 80 percent of private support to non-profit organizations, increasing attention is being given to the role of foundations and corporations. Pressure is mounting for them to expand their charitable activities. This raises two questions: To what extent can foundations and corporations provide more support to charity, given the present tax law and regulations? And what should their role be?

The Tax Act and foundations

Under the pre-1981 law, private grantmaking foundations were required to distribute annually either 5 percent of their net investment assets or their realized new income, whichever was the greater. In the new law, this minimum payout requirement is limited to 5 percent of assets.

This change should help to reverse a trend that seemed destined to lead to the extinction of the private foundation as an important source of charitable funds. The payout requirement was instituted in 1969 to ensure that foundations distributed a reasonable share of their income each year. The 1970s, however, were a period in which the real value of equity investments fell, while the income yields of most assets rose. Tax-exempt bodies other than private foundations could defend their assets by holding high-yield instruments and reinvesting the proceeds. But the payout requirement prevented foundations from using this strategy to build up their financial base. The base eroded and the ability to give consequently declined. As a result, gifts by foundations, measured in con-

Footnotes at end of article.

stant dollars, have fallen by almost half since 1969, and, according to the Council of Foundations, the total real value of foundation assets has been reduced by about 40 percent.

The new flat 5 percent minimum, instead of the requirement that all net income must be disbursed, will enable surviving foundations to repair the damage of the last twelve years and stimulate the formation of new foundations, since the rigidity of the old payout requirement discouraged donors from establishing foundations.

The Tax Act and corporations

Pre-1981 law allowed a corporation to deduct no more than 5 percent of its taxable income as charitable contributions. This was raised to 10 percent by the new law. For tax-exempt corporations, created by non-profit organizations, the ceiling on tax-free unrelated business income remains at 5 percent.

Some spokesmen for non-profit groups seem to assume that raising the limit on deductible corporate contributions will unleash a torrent of donations. Yet, the 5 percent rule has hardly been a severe obstacle. While some corporations may have felt restricted by the ceiling, the average level of corporate donations in recent years has been closer to 1 percent than 5 percent. The increased limit thus is not going to facilitate any constrained desire to give. Moreover, the new depreciation schedules and other business tax relief will reduce taxable income of most companies, especially in the short term. This can only reduce the tax incentives for corporate philanthropy.

The corporate world does seem to be coming under strong pressure, however, to increase donations. There have always been those who see corporations as a convenient source of money to finance any number of causes, without regard to the function of corporations or the economic consequences of such a strategy. These people are now arguing that an increase in corporate philanthropy is the price that business is obligated to pay for its tax relief.

While this kind of sentiment is expected from the usual critics of American business, similar notions are now coming from officials in the White House. Thinly-veiled threats and arm-twisting seem to be a part of the Administration's approach to corporate "voluntarism." James Rosebush, the White House aide responsible for voluntary sector liaison, remarked in a National Journal interview, "I don't think that the Administration will hold the corporate sector accountable. I think the American people will. . . . We won't point out the good and bad [corporate] performances, but the American people will." [10] And if they don't, Rosebush might have added, Ralph Nader and his associates will be delighted to do so.

Yet even if corporations responded to this kind of pressure and greatly expanded their giving, they could not cover the reduction in federal support without severe cuts in their investment programs. Corporations account for only 5 percent of charitable contributions. If the Administration continues to jawbone corporations, and to tell the public that business will come to the rescue, it will achieve little more than providing its own critics with a very effective stick.

But is it correct to suppose that corporations should try to fill the gap, even if they could? Individuals give money to charity for various personal reasons, and they allocate their funds accordingly. Corporations, on the other hand, can hardly be said to have charitable instincts, in any meaningful sense. They are operated by managers of other people's money, and the proper goal of the managers is to achieve the best return for the shareholders. In so doing, they also efficiently provide services and goods to the public. When corporations in a free society engage in charitable activities, the motivation is and should be a function of normal business goals.

Within this framework, charitable activities can have very tangible economic returns in certain circumstances, and donations should be seen strictly in that way. Support to colleges and training programs, or for research, can be a sensible way for a corporation to develop new techniques and a skilled workforce. Similarly, there are often good reasons of mutual self-interest behind corporate support for local community development groups. A stable, improving urban environment benefits the businesses as well as the residents of the city. But the argument that business should blindly support charity out of some notion of corporate "conscience" is irrational. At worse, an increase in contributions would be little more than a begrudged and wasteful payoff to avoid harassment, and at best it would be inefficient, since the allocation decisions would be devoid of any element of individual obligation or charitable instinct. Moreover, the corporations would be simply controlling charitable dollars that should be allocated by shareholders. Surely it is better to have a situation in which the distribution of funds to charity reflects the cumulative decisions of individuals rather than the boards of corporate America.

The best way that a corporation can "contribute" is through its owners, the shareholders who are the corporation. The duty of corporate managers is to provide revenue to the shareholders. It is the duty of shareholders to give to charity.

This is not to say that corporations cannot play an important role in providing services to the public, but rather that this should be done in the context of normal business activities. Many private firms deliver services under contract, and they are often much more efficient than either government or non-profit organizations. The for-profit hospitals, for example, have an excellent record of providing value for money. Similarly, subsidized job-training programs in the private sector have a far better track record than the wasteful CETA public jobs program cut by the Administration. It would be more sensible to view corporations as a partner in the provision of necessary public services than to see them as a convenient source of "guilt" money.

Mobilizing the voluntary sector

The President's Task Force on Private Sector Initiatives will explore methods of expanding voluntarism, and examine mechanisms to increase support for non-profit organizations. But while the "gap" is narrower than many suppose, and there is great potential in the sector, there are nevertheless laws and regulations that needlessly impede the voluntary sector in its efforts to respond to the challenge before it. The Task Force must address these. In addition, it should be recognized that money is not the only issue. There are some remarkable examples of innovative uses of voluntary sector resources. The Task Force should identify these and encourage other organizations to learn from them.

Some of these problems and possibilities are summarized below.

(a) The Regulation of Fundraising:

Fundraising activities will have to increase considerably if the voluntary sector is to obtain the finance necessary to expand its role in providing services. But the recent growth of government restrictions on fundraising poses a serious obstacle. In his book Charity Under Siege, Bruce Hopkins, a charity law expert, described the nature of this "onslaught" of regulation:

"Fundraising regulation has not come upon the voluntary sector by means of a single law, but is, instead, an amalgam of slowly building and encompassing local, state and federal administrative regulation.

"It is an unfortunate fact that the charitable world is now wholly exposed to creeping regulation by federal, state and local agencies. While this regulation intensifies, the charities seem immobilized." [11]

The greatest problem of all, according to Hopkins, confronts organizations which seek to raise money by direct mail in several states. These groups face: "a bewildering array of differing requirements, forms, due dates, exemptions, and accounting principles. All too frequently the organization "solves" this problem by registering in only a few states—or, perhaps, in none at all."

Regulation is not confined to mail fundraising however. Complex rules apply to virtually all aspects of funding activities by all non-profit organizations. These regulations discourage the growth of most groups and cause others to cease their activities completely. For those groups which try to understand and comply with the law the effect is to increase fundraising costs and to provide employment for lawyers and accountants.

The Task Force should review the debilitating federal burden on the voluntary sector and suggest ways in which state and local rules could be simplified. By doing so, obstacles in the path of existing organizations would be reduced, and the formation of new voluntary groups would be encouraged.

(b) Taxes and Restrictions on Contributions: [12]

The Tax Reform Act of 1969 included substantial changes in the tax-deductibility of gifts of appreciated property (including stock) to charitable organizations. The proportion of the appreciation in market value that could be deducted was cut severely, for both individuals and corporations. In the case of gifts to private foundations, even lower deduction limits were imposed. Inflation during the 1970s and 1980s, in conjunction with these changes, has reduced the attractiveness of such gifts. This has been particularly harmful to private foundations, and has accelerated their decline.

The Task Force should examine these effects closely, and suggest a new framework of legislation that will treat gifts of appreciated property in the light of today's rate of inflation. In addition, the distinction between private foundations and other charitable organizations must be ended, if the foundations are to be revived.

The 1981 law contained a little-noticed provision which could prove damaging to many non-profit groups. The tax rates on unrelated business taxable income [13] were reduced in line with the general cut on corporate rates. However, the new 10 percent ceiling on tax-free income that can be contributed will not apply to unrelated business income earned by non-profits. In the latter case, the old 5 percent limit continues.

The tax on unrelated business income was instituted in 1950 to end unfair competition in the market place, by putting businesses operated by charities on the same tax footing as any other business. But the new law will result in a relatively greater tax burden for charity subsidiaries. Not only is this a breach of the principle of equal treatment, but it is particularly regrettable because many of the charitable organizations which once relied heavily on government support are now in the process of creating business ventures to supplement their funding. This process should have been helped, not hindered by the new tax law.

Foundations

In addition to the regulations affecting fundraising, private foundations have been inundated in recent years with restrictions on almost every part of their activities. The extensive reports that must be filed with the federal government, and the close scrutiny that is required in the case of grants to

Footnotes at end of article.

individuals, have discouraged foundations from supporting new ideas. Government policy has forced foundations to become more bureaucratic and conservative. As Marian Edelman of the Children's Defense Fund remarked recently, to obtain foundation support for a thoughtful proposal these days, "the burden of proof is more substantial than it used to be." [14]

These restrictions grew largely out of a perception in the 1950s and 1960s that foundations were merely unaccountable tax havens. Some reforms were clearly necessary, but the pendulum has now swung too far in the other direction. The decline of the private foundation must be reversed, because these organizations play a key role in philanthropy—a role which is now more important than ever in view of the new demands on the voluntary sector. Foundations are sources of finance, but they are much more than that. They are the entrepreneurs and catalysts of the voluntary sector. According to Ford Foundation president Franklin Thomas:

"There is a growing need for foundations to play a connective role in society—to link private-sector resources with the energies of people in the community who are trying to address problems, whether these people are in community groups or social agencies that work for the public's benefit." [15]

This entrepreneurial feature will be vital in the new era of voluntarism. The infusion of organizational skills, combined with modest amounts of seed money, is likely to induce far more activity than simply providing large amounts of cash. Voluntary organizations are seeking ways of delivering new services and stabilizing their financial base. Foundations can aid that process and make it more efficient. But they must be allowed to do so.

Privatization and contracting

In his speech to the National Alliance of Business, President Reagan drew attention to the work of one Philadelphia organization, operated by a married couple. The House of Umoja, on a shoestring budget, has been responsible for turning 500 former gang members into responsible citizens, and has helped to achieve a remarkable reduction in gang warfare.

The House of Umoja is a highly successful example of something that has been happening all over America: small, self-help groups either supplementing public services or providing entirely new ones. Many of these unorthodox groups fail, or at least do not reach their full potential, because they find themselves frustrated by government, rather than being helped by it.

The Task Force should monitor and publicize the achievements of these organizations, and it should identify and press for the removal of barriers to them. Small, inner-city day care centers, for example, are often hampered by absurdly rigid licensing requirements which protect nobody. Self-help housing rehabilitation groups can find their costs soaring because of the Davis-Bacon Act. The list is endless.

Government can also help the finances of community-based and other organizations while alleviating some of its own budget worries. Cities should consider contracting with non-profit organizations to provide services which they can deliver more efficiently. Neighborhood groups, for instance, can often provide cheaper and more effective management services for public housing projects than can professionals. Government should experiment with contracts of this form. They are a source of valuable funding and experience for the non-profit groups and they can result in considerable savings to the city. In addition, cities and states should encourage businesses to bid for contracts when appropriate, such as for job training and educational programs.

CONCLUSION

The budget cuts and tax reductions set in motion by the Reagan Administration constitute a long-overdue attempt to shift both power and responsibility back to the people. The voluntary sector will play a central role in this process, and the Administration must enable and encourage the sector to meet the challenge. In view of the restrictions imposed on the voluntary sector during the last twenty years, it is perhaps not surprising that many of its representatives are pessimistic. But the evidence indicates that the task is much less daunting than is generally supposed, and that Americans will respond to the obligations placed on them.

But government must help the voluntary sector make the transition. Unnecessary obstacles to voluntarism must be identified and removed, and every individual should be given encouragement to increase their giving. Corporations should not be pressured into fulfilling a function which is inappropriate to their role in society. Foundations are in dire straits thanks to perverse tax incentives and regulations, and their revival should be a priority—the entrepreneurial skills of foundations will be desparately needed as non-profit organizations adjust to the new era. Above all, the vast potential offered by the countless voluntary associations engaged in unorthodox solutions to the problems of providing public services must be given full rein.

TIBOR HOLLO, OUTSTANDING FLORIDIAN

● Mrs. HAWKINS. Mr. President, I take this opportunity to share with the world the outstanding accomplishments of a fellow Floridian, Tibor Hollo, a great American, whose visionary developments have dramatically changed Miami's skyline. Few other individuals can match his record as an entrepreneur, businessman, and successful developer. Mr. Hollo has been the driving force responsible for revitalizing the downtown area of Miami. His innovative efforts created the development of Plaza Venetia Omni, a $500 million residential, retail, and commercial complex situated in the center of Greater Miami on Biscayne Bay.

The dramatic influence of Tibor Hollo has also been felt in other cities in Florida including Tampa where he has converted the famous old Bayshore Royal into a spectacular rental apartment building. The Deerfield Boca Raton area will soon experience his creativity and special flare for the unique with the development of a new shopping center.

Tibor Hollo first became nationally recognized in 1956 when Fortune magazine named him the Nation's 10th largest contractor. His company, Florida East Coast Properties, Inc., of which he is chairman and president of the board, is actively engaged in development, management, and investment building. The properties he constructs are uniquely his own. His projects have been constructed without benefit of Government programs or financial aid.

It is only through the vision, the foresight, the "can-do" attitude of people like Tibor Hollo that we can hope to rebuild and maintain the vibrancy of this country's inner cities. Tibor Hollo has demonstrated his ability to meet that challenge.

His involvement in business would seem to leave time for little else, yet he is an outstanding religious leader and public servant. He has served on city and statewide advisory boards for many years and was just recently appointed to the Miami Beach Ad Hoc Committee for Economic Adjustment Strategy.

Tibor Hollo is a gentleman; a man of great energy and great vision. He displays the qualities that have, and will continue to make this great country even greater.

It gives me great pleasure today to recognize achievements of a fellow Floridian, Tibor Holo.●

S. 1701—MISSING CHILDREN ACT

● Mr. MITCHELL. Mr. President, I support the bill offered by the distinguished Senator from Florida (Mrs. HAWKINS), which would greatly aid in the search for missing children throughout our Nation. I am honored to add my name as a cosponsor of S. 1701, the Missing Children Act, and I urge my colleagues to join me in this support.

S. 1701 would require the National Crime Information Center (NCIC) to maintain a current and complete information system pertaining to missing chil-

dren and unidentified dead. In addition, this bill would require the Attorney General to assist State and local law enforcement agencies in collecting and disseminating information on missing children.

Such a Federal information system to aid State and local efforts is long overdue. One only need look to the city of Atlanta to realize the seriousness of the problem. In the past year, more than 30 of Atlanta's young black children were reported missing or dead. Everyone remembers the horror the Nation felt as that number steadily grew.

Mr. President, missing children are not the problem of a particular city or area. Missing children are a national problem. Each year, more than 150,000 children are reported missing. If this bill provides a means of bringing some of them home, then it is time we act.

Recently, in the city of Portland, Maine, police found an 18-year-old male wandering aimlessly. The youth was slightly retarded and as police questioned him to locate his home, he became confused.

When the police had certified he was not from Maine, they began the laborious process of calling State by State to check missing person lists. Each call led to many others as police tracked down information through State and local law enforcement agencies. One by one, States were eliminated from the search. Late in the afternoon, Portland police discovered the youth was from West Virginia and sent him on a bus home to his family. I hope this helps to illustrate what a difficult task it is to locate a missing child.

If the police recover a stolen car, they can program information into a computer system and know within a minute whether the car has been reported missing anywhere in the Nation. Almost any object can be traced nationally using this computer system.

However, if a child is reported missing, it can take days to locate that child. Tragically, some children are never located. S. 1701 may not give law enforcement officials the key to finding missing children, but it should help. We owe the grieving parents of America at least that much.●

HEAD START

● Mr. PRYOR. Mr. President, if I learned one thing from my years in politics, it is that you do not "mess with success." Yet, reports are circulating that the Office of Management and Budget wishes to cut back and phase out one of the most successful and efficient programs this country has seen in recent years.

I was deeply disturbed to read that Budget Director Stockman now has recommended doing away with the Head Start program which now has over 370,000 children enrolled in it. If we do this, I am afraid we are being penny wise but pound foolish. This program has allowed hundreds of thousands of children from low-income homes—some with special handicaps—to develop the skills needed to allow them to begin the first grade on equal footing with every other child. It gives these children the background to keep up with their classmates, stay in school and later find employment. Without Head Start, I am afraid few of them would be able to break the cycle of poverty and lead productive and rewarding lives.

Mr. President, I wish to ask that a copy of a letter I have written to Budget Director Stockman be printed in the RECORD. It further spells out my reasons for supporting this program which has been so important to children in my State. I hope my colleagues will join me in urging the administration to keep this program.

The letter follows:

U.S. SENATE,
Washington, D.C., December 14, 1981.

Hon. DAVID STOCKMAN,
Director, Office of Management and Budget, Executive Office Building, Washington, D.C.

DEAR DAVID: Newspaper reports that the Office of Management and Budget has proposed the phasing out of Head Start disturb me greatly.

While cuts in this program may save dollars today, I fear that in the long run such a move would prove more costly than ever. As one Head Start director in Arkansas summarizes the situation: "(The program) gives many low-income children the only chance they will have to become an integral part of their community and not a burden on taxpayers."

Head Start has been especially successful in allowing children from low-income homes—some with special handicaps—to develop the skills needed to allow them entrance to the first grade on equal footing with every other child. Without these services, it is likely that many children would never catch up and would become dropouts, unable to find jobs and forced to become dependent upon such government programs as welfare, unemployment and food stamps. Head Start, on the other hand, would allow them to break what I call the cycle of poverty and thus lead productive and rewarding lives.

It is important to note that Head Start deals not simply with education but with the total child. In Arkansas, for instance, it coordinates other federal programs from health and nutrition to a wide range of social services. We know the program has been successful because we hear from a large number of parents who have benefitted and who write unsolicited personal notes of gratitude. These include families of children who have had speech deficiencies corrected through Head Start, relatives and guardians of those who have had severe health problems caught and corrected, and parents who realize their children's background would put them at a severe disadvantage upon entering school. One mother wrote a letter of thanks after her three-year old daughter received through Head Start the proper referrals that saved extensive dental work because the family was unable to pay a $1,000 bill.

Two considerations particularly disturb me concerning Head Start:

First, I cannot believe that sufficient attention was given to the success and cost-effectivenes of individual programs, particularly those in rural areas. Some of the criticisms I read refers to "transportation systems," high adult/pupil ratios, and per-pupil costs. My state does not even have a transportation system for these pupils to use, and in most cases the adult/pupil ratio is low and per-pupil costs certainly are below the average figures your office cites.

In addition, while it may appear on paper to a Washington bureaucrat that reducing hours of the program will save money, in many places this simply does not hold up. One director pointed out that since his staff already staggers hours a reduction from eight- to six-hour days would make no difference. Without exception, each director in Arkansas emphasizes that many parents who work would not be able to make the arrangements necessary to pick up a child from school earlier in the day, or to pay for additional child care. Therefore, either the child could not participate in the program or one parent would be forced to give up his or her job and draw other government benefits in order for the child to continue in Head Start.

My second and greatest problem with this decision is that we are now spending less than $1 billion on Head Start, and the recommended cutbacks for FY '83 would be less than $200 million. Yet even the Inspector General in the Department of Health and Human Services testified recently to $6 or $7 billion waste in this Department. It is a shame and a crime to allow this careless waste to go on at the expense of our nation's children.

If this program is phased out, I would see it as one of the greatest examples of a government that is penny-wise and pound-foolish. I have every hope that something can be done to keep it.

Sincerely,

DAVID PRYOR.●

MORTGAGE DELINQUENCIES

● Mr. RIEGLE. Mr. President, the Washington Post recently noted in a front page story that mortgage delinquency rates reached the highest level ever recorded during the third quarter of 1981. The data, which come from the National Delinquency Survey of the Mortgage Bankers' Association, reveals clearly the hardship that the current recession has brought to families all across the country.

Particularly hard hit by mortgage delinquencies are the Northeast and Midwest, where unemployment has soared well beyond the national level. The east north central region of the country, which includes my home State of Michigan, experienced a 7.78-percent delinquency rate, the highest in the country. The introduction to the survey contains the alarming prediction that the "current recession, with its high unemployment, could exacerbate the delinquency problem in the next few months, especially in those regions with large numbers of laid-off workers."

In other words, the survey expects that mortgage delinquencies will climb above their already historically high levels. Given the fact that the period of the survey, June–September 1981, does not take into account the dramatic increases in unemployment in October and November, almost a full percentage point, we can readily expect that prediction to come true.

Mr. President, over many months the administration's economic policies have taken an increasingly heavy toll on the housing sector, dashing the home-buying hopes of millions of families, throwing millions of construction workers into unemployment lines, and pushing thousands of small businessmen over the brink to financial ruin. Now, as the recession deepens, thousands of those already victimized by the recession through loss of their job will suffer the loss of their homes. This is a tragedy

for which this administration must bear major responsibility.

Mr. President, I have obtained a copy of the National Delinquency Survey. So that my colleagues may learn the level of mortgage delinquencies in their States and regions, I ask that this survey be printed in the RECORD at this point.

The survey follows:

NATIONAL DELINQUENCY SURVEY

The delinquency rate for all 1- to 4-unit residential loans reached a new high of 5.33 percent in the quarter ending September 30, 1981, an increase of seven basis points from the previous quarter. This marks the highest level for this indicator since the National Delinquency Survey began in 1953. A 26 basis point climb in the past due rate for conventional loans accounted for two-thirds of the overall rise.

Breaking down the "All Loans" category into component parts reveals some interesting patterns. The number of loans 30 days past due rose six basis points while those 60 days past due increased one basis point. These increases in the short-to-medium term delinquency rates however, ran counter to the trend in long-term delinquencies and foreclosures. Loans with installments 90 days or-more past due were unchanged in the third quarter and the rate of foreclosures started actually declined two basis points. This is a welcome change from the past few quarters, but it may not be a continuing trend.

Because delinquencies typically lag adverse economic conditions by several months the current improvement in long-term delinquencies and foreclosures may reflect only last summer's slight improvement in unemployment and interest rates. As unemployment rises during this quarter and into the next, the delinquency rate could also climb in the early part of 1982. If mortgage servicers can again move quickly in the initial stage of the delinquency they may prevent these cases from turning into long-term problems. However welcome, it is important to realize that the current levelling off in the 90 days-or-more and foreclosures started categories may be only a temporary phenomenon.

The majority of the delinquencies among conventional loans occurred in the 30-days past due category, which rose 21 basis points between the second and third quarters. This was the biggest quarter to quarter jump since 1979. Increased delinquency rates for conventional loans are often viewed as bellwethers for the general economy. This is not surprising since the larger downpayments of conventional loans mean that those mortgagors have more of an equity stake in their property than other mortgage holders. The across-the-board increases in conventional delinquency rates are convincing evidence of the severity of the current recession, the second in as many years.

As conventional delinquency rates moved sharply upward, FHA and VA delinquencies seemed more stable. The FHA total past due rate rose only 11 basis points in the third quarter, a much smaller increase than the 20 to 30 basis point swings of the past two years. The VA total past due rate actually declined one basis point during the third quarter. Foreclosures started in the quarter declined sharply for both loan groups to the lowest levels in more than a year. This improvement does not reflect any turnaround in the economic situation.

The current recession, with its high unemployment, could exacerbate the delinquency problem in the next few months, especially in those regions with large numbers of laid-off workers. The nationwide scope of the economic downturn is apparent in the substantial increases in short term delinquenciees shown in all regions. Although foreclosure rates have moderated, it will take a stronger economy and improved family incomes to bring down delinquency rates substantially.

SURVEY INFORMATION AND NOTES

1. This survey includes over 7.5 million mortgage loans on 1- to 4-unit residential properties totalling an estimated $208.6 billion of debt. These loans are serviced by more than 550 reporters, including mortgage bankers, commercial banks, savings banks, savings and loan associations, and life insurance companies.

2. A loan is considered 30 days delinquent if the September 1 installment has not been paid as of September 30. A loan is 60 days delinquent if the August 1 installment is unpaid as of September 30, etc.

3. "Foreclosure started during quarter" includes loans placed in the process of foreclosure during third quarter, deeds in lieu of foreclosure, and loans assigned to FHA, VA, other insurers or investors. "Foreclosure inventory end of quarter" includes all loans in process of foreclosure on September 30. Both foreclosure categories are excluded from "total installments past due."

4. Not all reporters provide data on FHA loans by section, thus, the sum of the two types of MHA loan breakdowns will not necessarily equal the number of all FHA loans reported.

5. National totals include Puerto Rico loans and loans of firms not providing state-by-state data.

6. s.a.—seasonally adjusted data

7. nc—not calculated

8. Series does not exhibit stable seasonal patterns.

ADDITIONAL COSPONSORS

S. 1498

At the request of Mrs. KASSEBAUM, the Senator from Minnesota (Mr. BOSCHWITZ) was added as a cosponsor of S. 1498, a bill to establish an office in the National Institutes of Health to assist in the development of drugs for diseases and conditions of low incidence.

S. 1595

At the request of Mr. INOUYE, the Senator from Montana (Mr. MELCHER), and the Senator from Indiana (Mr. LUGAR) were added as cosponsors of S. 1595, a bill to provide for the designation of income tax payments to the United States Olympic Development Fund.

S. 1634

At the request of Mr. COCHRAN, the Senator from Minnesota (Mr. BOSCHWITZ), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of S. 1634, a bill to incorporate the National Federation of Music Clubs.

S. 1637

At the request of Mr. D'AMATO, the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of S. 1637, a bill to establish a Federal annuity program to compensate participants in private pension plans which terminated before July 1, 1974, for nonforfeitable pensions benefits which were lost by reason of the termination, and for other purposes.

S. 1656

At the request of Mr. DURENBERGER, the Senator from Massachusetts (Mr. TSONGAS) was added as a cosponsor of S. 1656, a bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds, and for other purposes.

S. 1693

At the request of Mr. KASTEN, the Senator from Alabama (Mr. HEFLIN), the Senator from Washington (Mr. JACKSON), and the Senator from Tennessee (Mr. SASSER) were added as cosponsors of S. 1693, a bill to provide for the issuance of a special stamp to commemorate the 200th anniversary of the presence of the bald eagle on the official seal of the United States of America.

S. 1833

At the request of Mr. BENTSEN, the Senator from Iowa (Mr. GRASSLEY), the Senator from North Dakota (Mr. BURDICK), and the Senator from Kentucky (Mr. HUDDLESTON) were added as cosponsors of S. 1833, a bill to reduce the regulatory burden.

S. 1835

At the request of Mr. LEVIN, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 1835, a bill to allow for the termination of certain single-employer pension plans maintained by enterprises which have been created pursuant to an order by the Federal Trade Commission.

S. 1839

At the request of Mr. DURENBERGER, the Senator from Minnesota (Mr. BOSCHWITZ) was added as a cosponsor of S. 1839, a bill to amend the effective date provision of section 403(b)(3) of the Windfall Profit Tax Act of 1980 (Public Law 96-223) to further defer the effective date of certain provisions providing for the recognition as income of LIFO inventory amounts.

S. 1848

At the request of Mr. GORTON, the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of S. 1848, a bill to amend the Congressional Budget Act of 1974 to impose limits on the amount of total budget outlays contained in concurrent resolutions on the budget, and for other purposes.

S. 1865

At the request of Mr. DANFORTH, the Senator from New Jersey (Mr. BRADLEY) was added as a cosponsor of S. 1865, a bill to delay the effective date of amendments relating to group eligibility requirements for trade adjustment assistance.

S. 1881

At the request of Mr. SASSER, the Senator from Hawaii (Mr. INOUYE), the Senator from Nebraska (Mr. EXON), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Kentucky (Mr. HUDDLESTON) were added as cosponsors of S. 1881, a bill to provide for the issuance of a commemorative stamp to honor the dedication of the Vietnam Veterans Memorial.

S. 1887

At the request of Mr. DANFORTH, the Senator from Washington (Mr. GORTON) was added as a cosponsor of S. 1887, a bill to amend the Internal Revenue Code of 1954 to expedite the installation of automatic safety airbags.

S. 1903

At the request of Mr. BENTSEN, the Senator from Iowa (Mr. GRASSLEY), and the Senator from Indiana (Mr. LUGAR) were added as cosponsors of S. 1903, a bill to require the President to determine what activities now performed by the Federal Government could more efficiently be conducted by small business, and to prepare a schedule for transferring those activities to the private sector.

S. 1936

At the request of Mrs. KASSEBAUM, the Senator from South Dakota (Mr. PRESSLER) was added as a cosponsor of S. 1936, a bill to require members of the National Transportation Safety Board to be chosen from individuals with expertise in the fields of accident reconstruction, safety engineering, transportation safety, or transportation regulation.

S. 1944

At the request of Mr. LEVIN, the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of S. 1944, a bill to amend title II of the Social Security Act to provide that disability benefits shall not be terminated prior to an exhaustion of administrative remedies unless current medical evidence substantiates such termination.

SENATE JOINT RESOLUTION 117

At the request of Mr. THURMOND, the Senator from Alabama (Mr. DENTON) was added as a cosponsor of Senate Joint Resolution 117, a joint resolution to authorize and request the President to designate the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week."

SENATE JOINT RESOLUTION 121

At the request of Mr. ROBERT C. BYRD, his name was added as a cosponsor of Senate Joint Resolution 121, a joint resolution to provide for the designation of the year 1982 as the "Bicentennial Year of the American Bald Eagle" and the designation of June 20, 1982, as "National Bald Eagle Day".

At the request of Mr. MITCHELL, the Senator from Oregon (Mr. PACKWOOD) was added as a cosponsor of Senate Joint Resolution 121, supra.

SENATE JOINT RESOLUTION 123

At the request of Mr. HAYAKAWA, the Senator from Wyoming (Mr. SIMPSON), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Arizona (Mr. DECONCINI), the Senator from Maine (Mr. MITCHELL), and the Senator from California (Mr. CRANSTON) were added as cosponsors of Senate Joint Resolution 123, a joint resolution authorizing the President to proclaim "National Disabled Veterans Week."

SENATE JOINT RESOLUTION 133

At the request of Mr. DECONCINI, the Senator from Nebraska (Mr. EXON) and the Senator from Massachusetts (Mr. TSONGAS) were added as cosponsors of Senate Joint Resolution 133, a joint resolution to authorize and request the President to designate August 14, 1982, as "National Navajo Code Talkers Day."

SENATE JOINT RESOLUTION 134

At the request of Mr. THURMOND, his name was added as a cosponsor of Senate Joint Resolution 134, a joint resolution to designate 1982 as the "Year of Disabled Persons."

SENATE CONCURRENT RESOLUTION 47

At the request of Mr. TSONGAS, the Senator from Montana (Mr. BAUCUS), the Senator from Oklahoma (Mr. BOREN), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from New Jersey (Mr. BRADLEY), the Senator from North Dakota (Mr. BURDICK), the Senator from Maine (Mr. COHEN), the Senator from New York (Mr. D'AMATO), the Senator from Missouri (Mr. DANFORTH), the Senator from Arizona (Mr. DECONCINI), the Senator from Illinois (Mr. DIXON), the Senator from Connecticut (Mr. DODD), the Senator from New Mexico (Mr. DOMENICI), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Missouri (Mr. EAGLETON), the Senator from North Carolina (Mr. EAST), the Senator from Washington (Mr. GORTON), the Senator from Nebraska (Mr. EXON), the Senator from Iowa (Mr. GRASSLEY), the Senator from Colorado (Mr. HART), the Senator from California (Mr. HAYAKAWA), the Senator from Pennsylvania (Mr. HEINZ), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Michigan (Mr. LEVIN), the Senator from Indiana (Mr. LUGAR), the Senator from New York (Mr. MOYNIHAN), the Senator from Rhode Island (Mr. PELL), the Senator from Illinois (Mr. PERCY), the Senator from South Dakota (Mr. PRESSLER), the Senator from Wisconsin (Mr. PROXMIRE), the Senator from Michigan (Mr. RIEGLE), the Senator from New Hampshire (Mr.

RUDMAN), the Senator from Maryland (Mr. SARBANES), the Senator from Pennsylvania (Mr. SPECTER), the Senator from Idaho (Mr. SYMMS), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Nebraska (Mr. ZORINSKY), and the Senator from Colorado (Mr. ARMSTRONG) were added as cosponsors of Senate Concurrent Resolution 47, a concurrent resolution expressing the sense of the Congress with respect to the imprisonment and treatment by the Government of the Soviet Union of Alexander Paritsky and his family.

SENATE RESOLUTION 260

At the request of Mr. SPECTER, the Senator from Washington (Mr. GORTON) was added as a cosponsor of Senate Resolution 260, a resolution to disapprove Deferral D82–193.

SENATE RESOLUTION 262—RESOLUTION EXPRESSING SUPPORT FOR ENERGY CONSERVATION PROGRAMS

Mr. LEAHY (for himself, Mr. HATFIELD, Mr. HUDDLESTON, Mr. JACKSON, Mr. STAFFORD, Mr. PERCY, Mr. COHEN, Mr. DURENBERGER, Mr. BUMPERS, Mr. RUDMAN, Mr. TSONGAS, Mr. CHAFEE, Mr. BRADLEY, Mr. D'AMATO, Mr. LEVIN, Mr. GORTON, Mr. DODD, Mr. HEINZ, Mr. KENNEDY, Mr. MITCHELL, Mr. PELL, Mr. BAUCUS, Mr. FORD, Mr. MELCHER, Mr. STENNIS, Mr. INOUYE, Mr. CRANSTON, Mr. SARBANES, Mr. BIDEN, Mr. PRYOR, Mr. WEICKER, Mr. WALLOP, Mr. HART, Mr. RIEGLE, and Mr. MOYNIHAN) submitted the following resolution; which was referred to the Committee on Energy and Natural Resources:

S. RES. 262

Whereas, international energy stability is dependent on the preservation of peace in the Middle East;

Whereas, the conservation of energy has substantially improved our energy security;

Whereas, programs which weatherize the homes of lower-income citizens are essential for the protection of the health of these citizens and reduce federal outlays for energy assistance;

Whereas, conservation is a potential energy resource which market forces will not fully utilize without adequate information or research and development;

Whereas, the cost of energy to the U.S. economy will be approximately $400 billion in 1981;

Whereas, the Congress has mandated in the Department of Energy Organization Act, the Energy Policy and Conservation Act, the Energy Conservation and Production Act, the National Energy Conservation Policy Act of 1978, the Energy Security Act of 1980 and authorizations of the Department of Energy that a strong, effective energy conservation program exist at the Department of Energy;

Whereas, through the First Budget Resolution, the Congress provided for a program of over $500 million, and, through the 1982 appropriation, provided funding of over $380 million;

Whereas, the Department of Energy is expected to request less than $25 million for its entire energy conservation efforts in 1983: Now therefore, be it

Resolved, That the Congress strongly reaffirms that the Federal Government should promote the conservation of energy by:

(1) Assisting the weatherization of homes of our lower-income citizens;

(2) Providing information to citizens and businesses which enables them to increase the efficiency of energy use; and

(3) Funding research and development which increases the efficiency of energy use.

Mr. LEAHY. Mr. President, energy conservation is the one policy that has developed a broad consensus of political support in the United States. It was not always so. In the past, some have attacked energy conservation as being antibusiness, antimarket, and antigrowth. There are still many who either misunderstand or misinterpret energy conservation as a negative policy of cutbacks, inconvenience, and discomfort. Despite past misunderstandings, a new consensus has developed as study after study has concluded that conservation, understood as energy efficiency, is the soundest path and the soundest foundation for energy policy.

Energy conservation has achieved this unique consensus because of its special attributes. Energy conservation is the one energy policy that:

Is already succeeding in a major way;

Is the most cost effective, least inflationary alternative to insecure oil imports;

Has significant potential, especially over the next decade;

Involves the least uncertainty about its energy benefits;

Is regionally and socially equitable; and

Has little or no political opposition.

Conservation is the only energy policy which—for all practical purposes—is working. Since 1973, oil drilling has increased by 123 percent but oil production is the same as it was in 1973.

In contrast, conservation has been very successful. Oil imports are 30 percent lower than they were in 1978. Almost all this saving comes from energy conservation.

In the future, the Exxon Corp. has estimated that energy conservation will save the equivalent of 13 million barrels of oil per day.

The benefits of conservation affect all Americans. Energy conservation has allowed our economy to grow without proportionally increasing the amount of energy we consume. Americans have not had to lower their standard of living in order to conserve. In fact, money saved from conservation can be spent in other areas.

Vermonters and New Englanders have proven that conservation can work by reducing energy consumption by twice as much as other regions between 1978 and 1980. During this period real personal income in New England has increased 4.6 percent while energy consumption has dropped 6.5 percent. High energy prices, uncertain supplies, and conservation incentives have all contributed to New England's success in reducing energy consumption.

In spite of the fact that energy conservation has been our most successful energy policy in the past and has the greatest potential for the future, the new administration has proposed drastic changes in both Federal energy conservation programs and Federal energy conservation tax incentives.

President Carter's budget for 1982 proposed a $922 million energy conservation budget for such activities as weatherization and research. President Reagan reduced this budget to $195 million—a 78-percent cut. Not all energy budgets were cut. For instance, the nuclear energy budget increased by 30 percent.

Congress has not accepted such drastic cuts in the energy conservation budget. Although final action on the appropriations bills is not complete, it now appears that about $380 million will be appropriated for energy conservation activities. This is a 100-percent increase over the Reagan administration's request, but still represents more than a 55-percent cut in Federal support for energy conservation. The increase by Congress—in a period of very tight budgets—does demonstrate strong congressional support for energy conservation programs.

In spite of the strong commitment to energy conservation represented by these appropriations, the administration will propose an energy conservation budget for 1983 that is so low it effectively abolishes the energy conservation program at the Department of Energy.

Department of Energy documents show that only $20 million will be requested for the entire DOE energy conservation effort. This means that the weatherization, schools and hospitals, industrial energy conservation, and many other programs will be abolished.

I was especially disturbed that the Department of Energy did not appeal these OMB-mandated budget cuts, but did strongly appeal for more increases in nuclear energy funding. This is a completely imbalanced, unsound energy policy. If the free market were in fact a sufficient incentive for conservation and renewable resource investments, then it would be good enough for nuclear power as well.

Mr. President, this is completely unacceptable. When Congress funds these programs, as it should and will, other programs which are part of the Interior appropriations bill will have to be cut. Federal laws mandate the existence of both fossil energy and energy conservation programs. If the administration wants to abolish these programs, it should do so by sending legislation to the Congress. Without those changes, the administration should request the necessary funds.

It was for these reasons that I asked the chairman of the Appropriations Committee to join me in submitting this resolution. Mr. HATFIELD has been a leading proponent of energy conservation in the Senate. In recognition of his efforts, he was recently awarded the Energy Conservation Coalition's award as Energy Conservation Advocate of the Year.

I am proud to be joined in this resolution by the ranking minority member of the Energy Committee, Mr. JACKSON, and the minority whip, Mr. CRANSTON. This resolution is cosponsored by a bipartisan group of Senators including the senior Senator from Vermont, Mr. STAFFORD. I hope this resolution sends a clear and unmistakable signal to the administration that its efforts to abolish these important energy conservation programs by administrative fiat are not acceptable to the Senate.

As part of its effort to reduce the deficit by increasing taxes, this September

the Reagan administration also proposed ending energy conservation and renewable energy tax credits. Over 3,000 Vermonters took advantage of this credit last year. Abolishing these credits will raise taxes in Vermont by more than $3 million per year.

The ingenuity of American families and businesses has made energy conservation our Nation's most effective energy program. Therefore, on November 3, I introduced legislation to preserve this energy conservation tax credit and to increase the limits to reflect inflation and to make the credit more available to small businesses. Energy conservation efforts should be rewarded—by continuing the energy conservation and renewable energy tax credit—and expanding it to include wood stoves.

● Mr. HATFIELD. Mr. President, I join my colleague, Senator LEAHY, and the other cosponsors, in submitting this Senate resolution to promote continued activities in energy conservation and renewable energy research and development.

The purpose of the resolution, Mr. President, is to draw attention, once again, to the importance of energy investments to this Nation's economic stability and national security. Much of this year's debate about national energy policy has focused on budget cuts and excessive Federal regulations. Too little attention has been given the long-term economic and national security implications of issues such as low-income weatherization, research and development and high-efficiency consumer products such as light bulbs and automobiles, and energy education about more efficient use of this valuable natural resource. These programs have proven to have substantial and cost effective impacts on national energy consumption.

Mr. President, to illustrate our shortsightedness in the area of alternative energy programs we need only look at activities in other countries, Japan, for example, has recently doubled its conservation commitment. France's investment has increased 221 percent, and Germany has increased investments by 66 percent to a total of $1 billion. What do these countries know that we do not? Simply, Mr. President, that investments in energy pay important and immediate dividends to the economy by reducing expensive and unnecessary dependence on foreign petroleum.

I urge the support of my colleagues, Mr. President, and ask for its timely consideration.●

● Mr. HUDDLESTON. Mr. President, I join my colleagues in submitting this resolution which reaffirms the commitment of the Senate to support Federal programs for energy conservation.

It is truly astounding to me that the Office of Management and Budget could be recommending the kinds of cuts in vital energy programs which reportedly they are recommending.

For energy conservation programs, the OMB recommendation reportedly is in the range of only $20 million—a staggering cut when you consider that the fiscal year 1981 appropriation was $711.7 million.

For fossil energy programs, the OMB recommendation reportedly is only slightly over $100 million—compared to $660 million in fiscal year 1981.

There is no way that viable programs can be funded at these budget levels. These are clearly program phaseout levels, leaving DOE as essentially a nuclear research agency. Considering the unrealized potential for energy conservation in this country, and considering that fossil energy will continue to provide 60 to 70 percent of our energy over the next 20 years, these recommendations simply do not make sense. More than that, they are dangerous.

The absence of long gasoline lines notwithstanding, this Nation's energy problems are not over and will not be over until we no longer have to import 5.5 million barrels of oil a day to meet our energy needs. Our 5.5 million barrel-a-day habit seriously jeopardizes our national security and costs us billions of dollars that our shaky economy can ill afford.

The basic circumstances which led the three previous Presidents and the Congress to commit our Nation to an aggressive energy policy have not changed, and these programs which the OMB proposes to abandon are needed just as much now as they ever have been.

I urge my colleagues to send a strong message downtown that the funding levels under consideration for conservation and fossil programs are totally unacceptable.

I further ask unanimous consent that the text of a telegram which I have sent to President Reagan be included in the RECORD at this point.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

DEAR MR. PRESIDENT: I am deeply disturbed by reports that the Office of Management and Budget is recommending cutting funding for fossil energy and conservation programs to program phaseout levels in Fiscal Year 1983. I strongly urge that our nation's commitment to an aggressive energy policy not be diminished, and that these vital programs be funded at viable levels.●

SENATE RESOLUTION 266—DESIGNATING THE "NATIONAL DAY OF THE SEAL"

Mr. WEICKER (for himself, Mr. MOYNIHAN, Mr. LEVIN, Mr. DURENBERGER, Mr. TSONGAS, and Mr. CRANSTON) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 266

Whereas the seal is an essential and inseparable part of the marine ecosystem; and

Whereas the seal, of which there are some thirty-three species, is a land mammal that returned to the oceans twenty to thirty million years ago; and

Whereas the presence of the seal helps maintain the health and balance of this environment; and

Whereas the presence of the seal is an indication of a whole and healthy ecosystem; and

Whereas the seal is a social creature with a highly evolved nervous system and physiology especially adapted to its marine environment; and

Whereas the seal epitomizes the freedom and the mystique of the oceans and in many cultures is revered as a spiritual embodiment of the mind in the waters; and

Whereas March is the month of the year when the Harp seal renew their eternal cycle; and

Whereas the growing worldwide awareness of the ecological and esthetic value of the seal has led to a desire to designate a special day of recognition; now, therefore be it resolved by the Senate (the House of Representatives concurring), that the Congress proclaims March 1, 1982, as the "National Day of the Seal" and urges all citizens join in this celebration of life with appropriate activity.

Resolved, that March 1, 1982 is declared "National Day of the Seal."

NATIONAL DAY OF THE SEAL

● Mr. WEICKER. Mr. President, today I am pleased to introduce, along with my distinguished colleagues, Senators MOYNIHAN, LEVIN, DURENBERGER, TSONGAS, and CRANSTON, a resolution to declare March 1, 1982 as "National Day of the Seal."

The seal and other members of the suborder Pennipedia are an essential part of the ocean environment. They are warm blooded fur bearing predators that inhabit coastal areas all over the world. Seals are predominantly fish eaters, but they occasionally feed on squid, decapods, crustaceans, krill, and other invertebrates. The leopard seal in the Antarctic is the only known seal to feed on warm blooded animals, occasionally taking penguin for food. Seals, of which there are 33 species, are predominantly cold and temperate water dwellers. In one season an individual seal may migrate thousands of miles.

The seal has been hunted for food and its fine fur for centuries. Some species have been depleted so badly by hunters that a number of nations, including the United States, now protect seals along with other marine mammals. Presently, the only exemption for the hunting of seals in this country is by Alaskan Natives on the Pribilof Islands. An average annual harvest of 26,507 of the North Pacific fur seal has been taken in recent years. The Pribilof seals are clubbed to death in the same manner that the harp seal pups are harvested in northern Canada.

For more than two centuries, the Newfoundland fishermen have hunted the harp seal for cash income during the spring when income is normally low. The annual landed value of the harp seal catch is estimated at about $4 to $5 million. Much of the impetus for passage of the Marine Mammal Protection Act of 1972 came from public outrage over the Canadian clubbing of the baby harp seal. The act has thus far had a great impact on the protection and revitalization of several species of marine mammals.

One of the few tropical seals, the Hawaiian monk seal is the most endangered marine mammal within the jurisdiction of the United States. Only the awareness by a concerned citizenry of the special role these mammals play in the world's web of life has prevented their total disappearance. The Hawaiian monk seal thus stands as a symbol of man's attempts to conserve and live in harmony with the natural realm.

As you know from previous statements that I have made on this floor, I believe that the oceans are becoming increasingly important to this Nation and the

rest of the world in terms of food, energy, minerals, transportation and recreation. The very survival of mankind in the future may very well depend on a healthy marine environment to provide us with many of the essentials of life.

Mr. President, not only is the seal an essential part of the marine ecosystem, it is, to many of us, an esthetic symbol of a free-spirited animal in complete accord with its environment. Left to their own devices, without the interference of man, the seals' highly adaptive behavior flows with the rhythm of the sea, assuring its health and survival.

Man has much to learn in this regard and I trust that this resolution will bring a greater awareness to us all of the essential place of the seal in the global ecosystem in which man also plays an integral role.●

SENATE RESOLUTION 267—RESOLUTION TO REFER THE BILL S. 1970 TO THE COURT OF CLAIMS

Mr. JACKSON submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 267

Resolved, That S. 1970 entitled "A Bill for the Relief of James P. Purvis", together with all accompanying papers, is hereby referred to the Chief Commissioner of the Court of Claims pursuant to section 1492 of title 28, United States Code, for further proceedings in accordance with applicable law.

NOTICES OF HEARINGS

SUBCOMMITTEE ON WATER RESOURCES

Mr. ABDNOR. Mr. President, the Subcommittee on Water Resources will conduct hearings on Wednesday, January 27, 1982, and Friday, January 29, 1982, on issues relating to our Nation's waterways.

Specifically, the subcommittee intends to hold hearings on the impacts study that was undertaken pursuant to section 205 of Public Law 95–502, which is expected to be released soon. In addition, the subcommittee intends to review the Upper Mississippi River master plan study, which was authorized by section 101 of that same act. As part of this review, the subcommittee will evaluate the study's expected recommendation favoring construction of a second lock at locks and dam 26 on the Mississippi River.

Because these hearings should prove most interesting and important, I would urge anyone wishing to testify to notify the subcommittee as soon as possible, in order that we may provide as balanced an analysis of these proposals as possible, recognizing that it may be impossible to accommodate everyone who may wish to testify.

AUTHORITY FOR COMMITTEE TO MEET

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition and Forestry be authorized to meet during the session of the Senate on Tuesday, December 15, to consider the nomination of Kalo Hineman to be Commissioner of the Commodity Futures Trading Commission.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, if I could invite the attention of the distinguished minority leader at the moment, I am advised that roads outside are really bad now and although he and I have a good deal of work yet to do in our folders, I am prepared to do that in the morning.

Mr. ROBERT C. BYRD. I am in agreement with that.

ORDER REDUCING LEADERS' TIME TO 5 MINUTES

Mr. BAKER. Mr. President, I wonder if the minority leader would be agreeable to cutting our time down to 5 minutes each tomorrow?

Mr. ROBERT C. BYRD. Yes, Mr. President, I am agreeable.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask unanimous consent that the time for the two leaders under the standing order be reduced to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Following the recognition of the two leaders, I ask unanimous consent that there be a period of 5 minutes for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE CONSIDERATION OF H.R. 5159, THE BLACK LUNG BILL

Mr. BAKER. Mr. President, at the conclusion of that time or after all the time is yielded back for the transaction of routine morning business, I ask unanimous consent that the Senate turn to the consideration of H.R. 5159, the black lung bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, before the Senator adjourns the Senate in order to clear the air, I understand that on the black lung bill an amendment may be offered that would provide for a $15,000 standard deduction for Members of Congress from their income tax in lieu of itemizing their deductions away from home in their State. There are lots of pros and cons to be said about that, but I want to make it very clear that I am going to ask for a rollcall on that and I think we should have it.

Mr. BAKER. I am sure there will be a rollcall. It is my understanding that the amendment to be offered to the black lung bill is not precisely that. Members would have either the option of itemizing the deduction or claiming a fixed sum, in which case there would not be a requirement for itemization. But I believe the amendment to be offered will be in the alternative rather than a flat sum.

I can assure the Senator, however, that there will be no effort to deal with this other than fully and fairly, and that there will be adequate time for debate, and I am sure there will be a rollcall vote on the amendment, and I am sure there will be as well on the bill because the Senator from West Virginia and I are determined to see the bill indeed does pass and it survives any challenge.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I expect the Senate, the Congress, will be able to adjourn sine die tomorrow. It is not certain, of course, but I see no reason to expect otherwise. I hope we can do so by the middle of the afternoon, and I hope all Senators will take account of that as we schedule our activities for the morning and proceed to dispatch the business on tomorrow.

RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, if there is no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 10 o'clock tomorrow morning.

The motion was agreed to; and the Senate, at 8:17 p.m. recessed until Wednesday, December 16, 1981, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate December 15, 1981:

FEDERAL HOME LOAN BANK BOARD

James Jay Jackson, of Texas, to be a Member of the Federal Home Loan Bank Board for the remainder of the term expiring June 30, 1982, vice John H. Dalton, resigned.

U.S. INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

John R. Bolton, of Virginia, to be an Assistant Administrator of the Agency for International Development, vice Alexander Shakow, resigned.

Otto J. Reich, of Virginia, to be an Assistant Administrator of the Agency for International Development, vice Abelardo Lopez Valdez.

SENIOR FOREIGN SERVICE

The following-named Career Members of the Senior Foreign Service of the Agency for International Development for promotion in the Senior Foreign Service to the classes indicated:

Career Members of the Senior Foreign Service of the United States of America, class of Career Minister:

Donald S. Brown, of Maryland.
Joseph C. Wheeler, of Virginia.

Career Members of the Senior Foreign Service of the United States of America, class of Minister-Counselor:

Julius Earl Coles, of Georgia.
Owen Cylke, of Maryland.
Edgar C. Harrell, of Maryland.
Lane Ellis Holdcroft, of Washington.
Clark Joel, of Florida.
Calvin Lee Martin, of North Dakota.
Irving Rosenthal, of Florida.
Roy Addison Stacy, of California.
H. Peters Strong, of Virginia.

The following-named Career Members of the Foreign Service of the Agency for International Development for promotion into the Senior Foreign Service to the class indicated,

and for the other appointments also indicated:

Career Members of the Senior Foreign Service of the United States of America, class of Counselor, and Consular Officers and Secretaries in the Diplomatic Service of the United States of America:

Henry H. Bassford, of Connecticut.
Timothy J. Bork, of Virginia.
Robert W. Beckman, of Virginia.
Peter J. Bloom, of the District of Columbia.
Daniel A. Chaij, of California.
Dennis M. Chandler, of Virginia.
Eugene R. Chiavaroli, of Ohio.
Harold W. Collamer, of Michigan.
Ann A. Fitzcharles, of California.
Robin L. Gomez, of Virginia.
Hasan A. Hasan, of Virginia.
George A. Hill, of New York.
Robert D. Hinderliter, of Virginia.
Albert D. Hulliung, of Florida.
Richard L. Hughes, of Virginia.
Charles W. Johnson, of California.
William H. McCluskey, of Oregon.
David N. Merrill, of Maryland.
William F. Mulcahy, of Massachusetts.
John B. O'Donnell, of Ohio.
Robert G. Pratt, of Maryland.
Thomas H. Reese III, of New Jersey.
Jimmie M. Stone, of California.
Ronald F. Venezia, of South Carolina.
Gerald R. Wein, of California.

IN THE COAST GUARD

The following-named commanders of the Coast Guard Reserve to be permanent commissioned officers in the Coast Guard Reserve in the grade of captain:

Richard Fremont-Smith
Paul K. Hinkley
Gregory L. Crane
Max J. Forbes
James G. Moore
Richard J. Flynn

HOUSE OF REPRESENTATIVES—*Tuesday, December 15, 1981*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Gracious Spirit, Lord of Life, may Your blessing be upon this assembly and upon all those who turn to You for grace. Give us the gift of understanding as we contemplate the tasks before us; give us the gift of wisdom as we try to discern the road of justice; give us the gift of patience as we seek to discover solutions to immediate needs; give us the gift of kindness in a world of stridency and anger, and give us the gift of peace on Earth, good will toward all people. We pray in Your name. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills of the House of the following titles:

On October 20, 1981:

H.R. 4612. An act to temporarily delay the October 1, 1981, increase in the price support level of milk and to extend the time for conducting the referendum with respect to the national marketing quota for wheat for the marketing year beginning June 1, 1982.

On October 26, 1981:

H.J. Res. 268, Joint resolution to designate October 23, 1981, as "Hungarian Freedom Fighters Day."

On November 3, 1981:

H.R. 3499, An act to amend title 38, United States Code, to extend the period for Vietnam-era veterans to request counseling under the veterans' readjustment counseling program, to provide medical care eligibility for veterans exposed to herbicides or defoliants (including agent orange), or to nuclear radiation, to establish a minimum total number of operating beds in Veterans' Administration hospital and nursing home facilities, to extend for certain Vietnam-era veterans the period of time in which GI bill educational assistance benefits may be used for the pursuit of certain training, to provide a small business loan program for Vietnam-era and disabled veterans, and to extend the authority for veterans readjustment appointments in the civil service; and for other purposes.

On November 5, 1981:

H.R. 4608. An act to continue in effect any authority provided under the Department of Justice Appropriation Authorization Act, Fiscal Year 1980, for a certain period, and for other purposes.

On November 13, 1981:

H.R. 661. An act for the relief of Blanca Rosa Luna de Frei;

H.R. 688. An act for the relief of Junior Edmund Moncrieffe;

H.R. 783. An act for the relief of Roland Karl Heinz Vogel;

H.R. 1469. An act for the relief of Madeleine Mesnager;

H.R. 1480. An act for the relief of Omar Marach;

H.R. 1550. An act for the relief of Aurora Isidra Rullan Diaz;

H.R. 1785. An act for the relief of Gladys Belleville Schultz;

H.R. 2010. An act for the relief of Kai-Mee Chen;

H.R. 2185. An act for the relief of Hanife Frantz;

H.R. 2573. An act for the relief of Moses Bank; and

H.R. 2975. An act for the relief of Yuk Yee Li.

On November 16, 1981:

H.R. 3975, An act to facilitate and encourage the production of oil from tar sand and other hydrocarbon deposits.

On November 20, 1981:

H.R. 4734, An act to recognize the organization known as the Italian American War Veterans of the United States; and

H.R. 4792, An act to amend title 10, United States Code, to improve the military justice system.

On November 23, 1981

H.J. Res. 368, Joint resolution making further continuing appropriations for the fiscal year 1982.

On December 4, 1981

H.R. 3413, An act to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982, and for other purposes; and

H.R. 3454, An act to authorize appropriations for fiscal year 1982 for the intelligence and intelligence-related activities of the United States Government, for the Intelligence Community Staff, and for the Central Intelligence Agency Retirement and Disability System, to authorize supplemental appropriations for fiscal year 1981 for the intelligence and intelligence-related activities of the United States Government, and for other purposes.

H.R. 4144, An act making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes.

H.R. 4522, An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4209) entitled "An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House of Representatives to the amendments of the Senate numbered 5, 7, 8, 24, 25, 30, 46, 50, 54, 55, 58, 64, 66, 77, 78, 84, 90, 93, 99, 100, 101, 102, 103, and 104 to the above-entitled bill.

PRIVATE CALENDAR

The SPEAKER. This is Private Calendar day. The Clerk will call the first individual bill on the Private Calendar.

REMEDIOS R. ALCUDIA, CHRISTOPHER, EZRA, VERMILLION, AND PERISTELLO ALCUDIA

The Clerk called the bill (H.R. 1547) for the relief of Remedios R. Alcudia, Christopher, Ezra, Vermillion, and Peristello Alcudia.

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

LASZLO REVESZ

The Clerk called the bill (H.R. 1352) for the relief of Laszlo Revesz.

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

RESTORATION OF COASTWISE TRADING PRIVILEGES TO THE VESSEL "SKY LARK"

The Clerk called the bill (H.R. 3126) to direct the Secretary of the Department in which the U.S. Coast Guard is operating to cause the vessel *Sky Lark* to be documented as a vessel of the United States so as to be entitled to engage in the coastwise trade.

There being no objection, the Clerk read the bill as follows:

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

H.R. 3126

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provisions of section 27 of the Merchant Marine Act of 1920 (46 U.S.C. 883), the provisions of section 4132 of the Revised Statutes of the United States (46 U.S.C. 11), and any other provision of law, the Secretary of the department in which the United States Coast Guard is operating shall cause the vessel Sky Lark (official Coast Guard number 617395), owned by Edwin E. Corwin, of Costa Mesa, California, to be documented as a vessel of the United States, upon compliance with the usual requirements, with the privilege of engaging in the coastwise trade so long as such vessel is owned by a citizen of the United States.

With the following committee amendments:

On page 2, line 1, insert a comma after the word "That".

On page 2, lines 2, 3, and 4, strike the words "the provisions of section 4132 of the Revised Statutes of the United States (46 U.S.C. 11), and any other provision of law," and insert in lieu thereof "or any other provisions of law to the contrary,".

On page 2, lines 7 and 8, strike the words "(official Coast Guard number 617395)," and insert in lieu thereof "(Official Number 617395),".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

YICK BONG AU YEUNG

The Clerk called the bill (H.R. 825) for the relief of Yick Bong Au Yeung.

There being no objection, the Clerk read the bill as follows:

H.R. 825

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Yick Bong Au Yeung shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct one number from the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act or, if applicable, from the total number of such visas and entries which are made available to such natives under section 202(e) of such Act.

With the following committee amendments:

Page 2, line 6, delete the words "and conditional entries".

Page 2, line 9, delete the words "and entries".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read a third time, and passed, and a motion to reconsider was laid on the table.

FELIPE B. MANALO AND MARIA MONITA A. MANALO

The Clerk called the bill (H.R. 1783) for the relief of Felipe B. Manalo and Maria Monita A. Manalo.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Felipe B. Manalo and Maria Monita A. Manalo shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of enactment of this Act, upon payment of the required visa fees. Upon granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct two numbers from the total number of immigrant visas and conditional entries which are made available to natives of the country of the aliens' birth under paragraphs (1) through (8) of section 203(a) of the Immigration and Nationality Act.

With the following committee amendment:

Page 2, delete lines 6 through 9 and insert in lieu thereof:

Of immigrant visas which are made available to natives of the country of the aliens' birth under section 203(a) of the Immigration and Nationality Act or, if applicable, from the total number of such visas which are made available to such natives under section 202(e) of such Act.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ISABELITA CLIMA PORTILLA

The Clerk called the bill (H.R. 1841) for the relief of Isabelita Clima Portilla.

There being no objection, the Clerk read the bill, as follows:

H.R. 1841

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Isabelita Clima Portilla may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Gilberto Portilla and Constancia Portilla, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege or status under the Immigration and Nationality Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MARIA CECILIA GABELLA-OSSA

The Clerk called the bill (H.R. 2342) for the relief of Maria Cecilia Gabella-Ossa.

There being no objection, the Clerk read the bill as follows:

H.R. 2342

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Maria Cecilia Gabella-Ossa shall be held and considered to have satisfied the requirements of section 316 of the Immigration and Nationality Act relating to required periods of residence and physical presence within the United States and, notwithstanding the provisons of section 310(d) of that Act, may be naturalized at any time after the date of enactment of this Act if otherwise eligible for naturalization under the Immigration and Nationality Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GRANTING THE STATUS OF PERMANENT RESIDENCE TO CERTAIN ALIENS

The Clerk called the Senate concurrent resolution (S. Con. Res. 43) granting the status of permanent residence to certain aliens.

There being no objection, the Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 43

Resolved by the Senate (the House of Representatives concurring), That the Congress favors the suspension of deportation in the case of alien hereinafter named, in which the Attorney General has suspended deportation pursuant to the provisions of section 244(a)(2) of the Immigration and Nationality Act (8 U.S.C. 1254):

A5 916 562, Bluestein, Nathan; and
A7 899 438, Cemlier, Ivan.

With the following committee amendments:

On page 1, strike out all of line 7.

On page 1, line 3, strike "each" and insert in lieu thereof "the".

The committee amendments were agreed to.

The Senate concurrent resolution was concurred in.

The title of the Senate concurrent resolution was amended so as to read: "Concurrent resolution granting the status of permanent residence to Ivan Cemlier."

A motion to reconsider was laid on the table.

OPPOSING THE GRANTING OF PERMANENT RESIDENCE IN THE UNITED STATES OF CERTAIN ALIENS

The Clerk called the resolution (H. Res. 282) opposing the granting of permanent residence in the United States to certain aliens.

There being no objection, the Clerk read the resolution, as follows:

H. RES. 282

Resolved, That the House of Representatives does not approve the granting of permanent residence in the United States to the aliens hereinafter named in which cases the Attorney General has submitted reports to Congress pursuant to section 13(c) of the Act of September 11, 1957 (71 Stat. 642-643):

Adnan Mahboob, A22-638-263; and
Ijaz Mahboob, A22-638-251.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the Private Calendar.

AMERICAN JUSTICE

(Mr. LONG of Louisiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LONG of Louisiana. Mr. Speaker, when police apprehend a man who has just shot the President of the United States, at the scene of the crime with the gun still in his hand, and with television cameras recording the shooting for all to see, the American people have the right to expect that the man expeditiously will be brought to trial and punished. In a case of this importance prosecutors should be able to proceed without delay so that other would-be assailants will know that swift and certain punishment awaits them should they assault America's political leaders. Why then has it taken more than 8 months already to bring John W. Hinckley to trial, with the prospect of many more months of delay and appeals to come?

The delay in the Hinckley case, however, is even more troubling when compared to the prosecutions in Italy and Egypt of the assailants of Pope John Paul II and President Anwar Sadat. In both cases the assailants were brought to trial within 10 weeks of the incident. The Pope's attacker already has been sentenced to life imprisonment and President Sadat's assassins already are on trial even though a widespread conspiracy apparently was involved. The facts of these two cases are strikingly similar to those in the attempt on President Reagan's life; what is different is the ability of the American criminal justice system to respond.

The delay in the Hinckley prosecution undermines the confidence of the American people in our criminal justice system. Apparently there are no disputes over the facts in the case. What is in doubt is the ability of the prosecutors and the courts to focus on these facts, rather than become snared in legal maneuvering. In this case, where the whole world is watching, justice that is imposed too late is inherently too little. The message we are communicating to the world is not that the American system is more just, but rather that it is more ineffectual.

OPPOSING THE GRANTING OF PERMANENT RESIDENCE IN UNITED STATES TO CERTAIN ALIENS

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the resolution (H. Res. 293) opposing the granting of permanent residence in the United States to certain aliens, and ask for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

Mr. SENSENBRENNER. Reserving the right to object, Mr. Speaker, I am wondering if the gentleman from Kentucky (Mr. MAZZOLI) can explain this resolution and why it is necessary to be passed this week.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. SENSENBRENNER. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding and I would very much like to answer the gentleman.

Mr. Speaker, House Resolution 293 relates to cases in which the Attorney General has suspended deportation under section 244(a)(1) of the Immigration and Nationality Act.

The criteria for relief under the law is that the person—first, have 7 years continuous residence in the United States; second, be of good moral character during the 7 years; and third, demonstrate "extreme hardship" to the alien, a spouse, parent, or child who is a U.S. citizen or permanent resident alien.

The cases in which the Attorney General has recommended relief are submitted to the Congress for action. There were 279 cases in which the Attorney General granted relief during 1980.

The committee has reviewed these cases and has found that the six listed on House Resolution 293 do not meet the statutory criteria I have mentioned. In particular, the committee did not find that deportation would result in extreme hardship in any of the cases.

The committee also notes that the applicants for suspension of deportation listed on House Resolution 293 have no close relatives in the United States.

Disapproval by means of this resolution is required in order to oppose the Attorney General's recommendation that permanent residence be granted to these individuals.

In fact, under the immigration law, this resolution must be acted upon in the current session of Congress in order to be effective. This is the reason for the unusual manner in which the committee has brought this resolution to the floor.

Mr. SENSENBRENNER. Mr. Speaker, further reserving the right to object, is it not true that House Resolution 293 is similar in nature to House Resolution 282 passed by the House that further disapproved the granting of permanent residence of aliens in the United States?

Mr. MAZZOLI. The gentleman is correct.

Mr. SENSENBRENNER. Mr. Speaker, I withdraw my reserving of objection.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky (Mr. MAZZOLI)?

Mr. FISH. Reserving the right to object, Mr. Speaker, I shall not object. I simply want to commend the chairman of the Subcommittee on Immigration, Refugees, and International Law. We had 279 of these cases referred to us. The gentleman did a commendable job in reviewing them. The subcommittee decided unanimously that it did not favor suspension of deportation for the six individuals covered by this resolution.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for those statements. I would like to commend the gentleman and his counsel, Mr. Levinson, for the work that has been done really not just on these cases, but all year long. We have a hard working subcommittee. The minority and majority staff have done yeoman work and I appreciate the help that the gentleman has exhibited right from the very start.

Mr. FISH. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky (Mr. MAZZOLI)?

There was no objection.

The Clerk read the resolution as follows:

H. RES. 293

Resolved, That the House of Representative does not approve the granting of permanent residence in the United States to the aliens hereinafter named in which cases the Attorney General has submitted reports to the Congress pursuant to section 244(a)(1) of the Immigration and Nationality Act, as amended:

Clarence Nathaniel Grant, A22-160-038.
Manuel Martinez-Manrigguez, A21-524-849.
Antonio Mamerto Mercado, A14-831-863.
Gracia Antonia Mercado, A14-831-686.
Gayomard Meherji Mistry, A12-628-329.
Joseph Wong, A14-138-540.

The resolution was agreed to.

A motion to reconsider was laid on the table.

TEMPORARY VISAS SHOULD BE EXTENDED ON POLISH CITIZENS IN THE UNITED STATES

(Ms. MIKULSKI asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. MIKULSKI. Mr. Speaker, I think the whole world is watching the events in Poland. We are tense about the situation and I think the whole world also grieves for the safety and well being of Poland.

Right now the free world has stepped forward and offered assistance in a variety of ways. Austria has reopened its border and will allow refugees in. Australia has stepped forward and said that it will take unlimited numbers of refugees.

Our administration currently is considering what contingency plan it needs to have in the event of refugees, but right now we have Polish people in this country who are here under bona fide visas that are running out.

The gentleman from Pennsylvania (Mr. NELLIGAN) and myself fear for the health and safety of those people if they are forced to be deported at this time.

Therefore, later in this session today, the gentleman from Pennsylvania (Mr. NELLIGAN) and I will be bringing before the House of Representatives a resolution on the sense of Congress that all Polish citizens who are currently in the United States on a temporary visa be allowed to remain in the United States until such time as the President of the United States would certify their safety upon their return.

When the resolution comes up, we will have more ample debate on that, but I want to bring to the attention of my colleagues this particular issue. It is a responsible humanitarian way that those people who are here under legal visas not be forced to return because of the untimely termination of them.

OUR GRATITUDE AND THANKS TO DR. SOLOMON GARB

(Mr. BRINKLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRINKLEY. Mr. Speaker, I wish to call to the attention of the House of Representatives the illness of Dr. Solomon Garb of Denver, Colorado, who was cochairman of the Citizens Committee for the Conquest of Cancer and who worked with many of us for many years in his efforts at preventative treatment, the control and containment of the ravages of the disease of cancer.

As I say, he is ill. He is in Houston, Tex., being treated at this very moment, and today I am introducing a House joint resolution to extend deepest gratitude and heartfelt thanks to Dr. Solomon Garb for his national leadership in the war against cancer.

□ 1215

DOWNEY COMMENCES CAREER IN NEBRASKA NAVY

(Mr. DOWNEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DOWNEY. Mr. Speaker, some time ago an Army general of White House position and absurd twist of mind delivered himself of some spectacularly bizarre remarks on the state of the U.S. military posture. I then took the well of the House and remarked, among other things, that this gentleman could, even in this administration, expect transfer to command of all submarines in the Nebraska National Guard.

As it turns out, I was speaking from abysmal ignorance, for which I hereby apologize with all due abjectness. The appropriate agency was not the Nebraska National Guard but the Great Navy of the State of Nebraska.

Upon reading of my interest in the subject, and of my passionate dedication to the security of the Nebraska sea lanes, the citizens of that great State have responded in a most heart warming and spine-tingling fashion.

To wit, they have appointed me an admiral in their great navy. For the benefit of any doubters and scoffers, I hold here in my hand the official commission and appointment, signed by the Governor himself.

While there may be some question as to the appropriateness of the rank involved, on the whole I believe it is the proper way to go. By not providing me with five-star rank immediately, the good citizens of Nebraska have permitted me room for growth.

Mr. Speaker, henceforth I will be honored to regard Nebraska as my second home. If I am to command anybody's navy, it is certainly best that it be that of the people of Nebraska, and I humbly hope I will continue to merit their confidence.

THE GREAT NAVY OF THE STATE OF NEBRASKA

TO ALL WHO SHALL SEE THESE PRESENTS—GREETINGS

Know ye, that reposing special trust and confidence in the Patriotism valor, fidelity and abilities of Thomas Downey and knowing him to be a good fellow and a loyal friend and counselor I have nominated and do appoint him an Admiral in the Great Navy of the State of Nebraska. He is therefore called to diligently discharge the duties of Admiral by doing and performing all manner of things thereto belonging. And I do strictly charge and require all officers, seamen, tadpoles and goldfish under his command to be obedient to his orders as Admiral—and he is to observe and follow, from time to time, such directions as he shall receive, according to the rules and discipline of the Great Navy of the State of Nebraska. This commission to continue in force during the period of his good behavior, and the pleasure of the Chief Admiral of the Great Navy of the State of Nebraska.

Given under my hand in the City of Lincoln, State of Nebraska this 4 day of November 1981 in the year of our Lord.

CHARLES THONE,
Governor.

TIME HAS RUN OUT FOR MILLIONS OF WORKERS

(Mr. MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MILLER of California. Mr. Speaker, the unemployment rate for last month was an astounding 8.4 percent, and still, the Reagan administration has no plans to deal with unemployment or the enormous human misery that unemployment causes.

Since July of this year—that is just 4 short months—940,000 people have become unemployed. That is enough additional unemployed people to equal the entire populations of Fort Wayne, Ind., and Spokane, Wash., and Salt Lake City, Utah, and Kansas City, Kans., and Hartford, Conn., and Orlando, Fla.

In November of this year, alone, some 190,000 people were thrown out of work dispite the fiscal policies of the Reagan administration. That is enough people to populate the city of Des Moines, Iowa.

The administration tells us that it needs time for its economic program to take hold—that is, it needs time for its economic program to trickle down to the poorest of our society.

But for millions of workers, time has run out, and they find themselves without jobs. And, the President's economic advisers tell us that the unemployment situation will only get worse.

Already, there are more people unemployed than at any time since the Great Depression. And still, we wait for the Reagan administration to tell us how they will put an end to this suffering.

THE OMINOUS IMPLICATIONS OF MARTIAL LAW IN POLAND

(Mr. MINISH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MINISH. Mr. Speaker, I rise today to call attention to the serious and rapidly deteriorating situation in Poland.

The imposition of martial law by Polish authorities reverses the pattern of resolution of differences through negotiation which has characterized the attitude of the Polish Government. It appears that Prime Minister Jaruzelski and other party authorities have decided that confrontation with the Polish people and the Solidarity trade union is the only means to assure stability in the country.

Mr. Speaker, this decision could not be more ill advised or counterproductive. Solidarity leader Lech Walesa, while so far exercising laudable restraint, may be forced by his rank and file to take provocative steps of his own.

A head-on, violent confrontation with possible Soviet intervention would have the gravest of consequences for the United States, the Soviet Union, and of course the Polish people themselves. The imposition of martial law, therefore, may be the first step in a tragic course of events.

I urge that Polish authorities seriously reconsider the consequences of their action. Negotiation and compromise between the Polish people and their Government in the past year and a half have kept Poland from plunging into chaos with far-reaching implications for international security. The Polish authorities must continue to follow this course and reverse their decision to impose martial law, a decision from which nothing productive can come.

TIME FOR AMNESTY TO PATCO

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKLE. Mr. Speaker, as wintertime bears down on us, we still have thousands of air traffic controllers out of work in this country.

From the beginning, Mr. Speaker, I did not agree with PATCO's decision to strike against the Government. I was one of those who advised against it. From a practical standpoint, I did not see how they could win, and from a philosophical standpoint, I thought then and believe now that what they did was not best.

But the fact remains that this is a group of very talented people, a national resource of professional men and women in highly skilled positions. Many have children and mortgages and tuition bills to take care of. They have been out of work for a long time now, and the toll in suffering has been great.

The PATCO members knew the odds and they took their chances. But they misread the administration and they misread the public. And now, after almost 5 months of no job and no income, they sincerely want to go back to work.

The administration has taken a good first step by agreeing to hire the controllers in other Government jobs. But as the holiday season approaches, we see more cutbacks in airline traffic, more delays for passengers, and a greater potential for a tragic accident.

Since the administration has recognized the controllers as potential Government employees, I think we could do a service to the country and the former controllers by extending this offer of amnesty to include air control duties on a case-by-case basis for those individuals willing to reaffirm the oath of office, in writing. Their skills are unique and much needed.

Back at work, I feel sure the administration would see a new attitude and a new willingness on the part of these professionals to do the job for which they were trained, and to work out differences in a calm and reasoned manner.

The Federal Government, Mr. Speaker, gains nothing from this point on by allowing the wounds to go deeper. These were not young radicals out on a whim; PATCO endorsed President Reagan, and its members risked their jobs because they genuinely believed working conditions and terms needed to be improved.

The administration has done an admirable job of keeping the airlanes open despite the strike. But there are reports that military flight training is suffering. FAA supervisors and military air controllers are working "time and a half" and "double time" and have been for weeks. We are spending millions to train new workers, and our patchwork system has yet to be tested by snow and ice and winter fog.

The President has proved his point, and it was a valid one. Surely, we could go on without the strikers. We have proven we can. But the union which led the illegal strike has been discredited and decertified. Now we should recall that for all things there is a season. This is a time when the administration has the chance to show its true strength, and its compassion. There is a time to cast out, and a time to take in, Mr. Speaker; and also there is a time to bust strikes and a time to end them.

The SPEAKER pro tempore (Mr. MURTHA). The Chair recognizes the gentleman from Maryland (Mr. DYSON).

FOREIGN ASSISTANCE SHOULD NOT BE IMMUNE TO CUTS

(Mr. DYSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DYSON. Mr. Speaker, while I appreciate the perspective of those who would like to supply enough foreign assistance to eliminate the ills of our allies, unfortunately in these times of spiralling inflation the means are just not available.

The United States will continue to be the world's largest donor with aid to over 100 countries. But fiscal restraint can no longer be confined to campaign rhetoric. It has to become a national commitment. At a time when important domestic programs have been reduced or even eliminated, the hard-working taxpayers in my district and across the Nation will not tolerate, nor should they be asked to, a tightening of belts when we are not asking as much of our foreign allies.

Recognition of these budgetary limitations is vital if our Government is to reestablish its priorities. To be strong overseas, we must first be sound at home. First and foremost, our national commitment must be dedicated to the restoration of our economy's strength, the maintenance of a strong defense, and assistance to those Americans who truly need it. When, and only when, these national priorities are fulfilled can we truly devote our full attention overseas.

Foreign assistance should not be immune to cuts. Because it is meant to be humanitarian or to further our Nation's strategic position does not mean that waste does not abound within. Much of the foreign assistance we provide never reaches those who so desperately need it. If we can eliminate waste, fraud, and inefficiency in our foreign assistance programs, less money will go farther, do more, and go farther to enhancing our image

79-059 O-85-13 (Pt. 24)

abroad. We cannot afford to undermine the financial strength of our Nation by using a shotgun approach to foreign assistance, but must target our goals specifically and spend our funds wisely.

A STORY WORTHY OF DICKENS

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, it is a story worthy of Dickens. As thousands of American children and their working mothers endure cold and hunger this holiday season, many well-fed corporations will be enjoying the delectable pleasure of paying little or no income taxes.

A new study, based on reports made by companies to the SEC, says that such well-known firms as Chase Manhattan, Squibb, and Monsanto paid no taxes on income in 1980 despite domestic earnings between $75 and $200 million; 1981 will bring these and other companies even larger tax breaks as the new tax law goes into effect. Yet, the administration continues to pursue its offensive against domestic programs and to countenance tax loopholes while it creates even more.

Enter Scrooge: Secretary Schweiker says that Federal assistance to working poor families will be reduced $1 for every dollar they receive from local governments that attempt to cushion the effect of the new AFDC rule which eliminated incentives for recipients to work.

The plight of Tiny Tim probably brings tears to Ronald Reagan's eyes. Would not it be nice if he and his administration were as moved by the plight of a million and a half children whose mothers are trying desperately to pull them out of poverty?

A VIABLE ALTERNATIVE TO ADMINISTRATION'S PROPOSALS ON SOCIAL SECURITY

(Ms. FERRARO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. FERRARO. Mr. Speaker, on September 24, the President went on national TV to divorce himself from his own proposed social security cuts. The President said his proposals were "a starting point for a bipartisan solution to the problem."

Mr. Speaker, today I am introducing legislation which I consider to be a viable alternative to the administration's proposals. My bill would compensate the medicare trust fund with general revenues for payroll tax receipts lost when unemployment rises above 6 percent. Medicare is the most logical part of social security to be funded out of general revenues. Ninety percent of the social security deficit over the next 50 years is in medicare, and health care for the elderly is not a social security problem, it is a hospital cost problem that must concern us all.

For supporters of the President's economic program, my bill offers insurance. If the economic recovery does not happen, at least medicare will be protected.

On the other hand, if there really is a Santa Claus, and universal prosperity occurs, the bill will not change anything.

SAVING OUR NATION'S THRIFTS

(Mr. HOYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOYER. Mr. Speaker, as you know, the activities of the housing industry in our country are at a virtual standstill. Continued high interest rates and the administration's monetary policies leave little hope for improvement in the near future.

In addition, thrift institutions, the Nation's primary housing lenders, have been greatly affected by continued unfavorable economic conditions. Further aggravating the earnings problems of the thrifts are the recent actions taken by the Depository Institutions Deregulation Committee (DIDC). The DIDC was created by Congress to oversee the orderly phaseout of the deposit interest rate ceiling now set for financial institutions, while insuring the continued stability of these institutions.

Mr. Speaker, I feel that the safety and soundness of financial institutions have not been fully considered by the DIDC. Recent actions taken by the committee include: Removal of the 12-percent cap on the Small Saver Certificate; increase of the passbook rate ceilings by 50 basis points; a new IRA/Keogh "wild card" account; and plans to accelerate the financial deregulation process at a time when a great majority of thrifts are already running in the red. Fortunately, the increase in the passbook rate was subsequently rescinded. If this had gone into effect, it is estimated that it would have cost the depositories at least $1 billion in earnings.

At its next meeting, which is scheduled for tomorrow, December 16, the DIDC will decide on additional measures which would cause a further negative impact on thrift earnings and credit for housing.

I urge my colleagues to join me in calling upon the DIDC to defer these and other proposals which would lead to increasing the cost of money to financial institutions, until such time as economic conditions improve and thrift institutions are in a more stable position.

A CHRISTMAS PRESENT FOR HAITIAN REFUGEES

(Mr. GARCIA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GARCIA. Mr. Speaker, I just returned from the Fort Allen refugee camp near Ponce, Puerto Rico. The Fort Allen camp has 800 Haitian refugees; most of them have been there since August. These men, women, and children sit and wait for news of their release, for news of their fate. There is nothing to do at the camp. The refugees are treated like prisoners in a concentration camp, isolated, depressed, their spirits broken.

Now that Christmas is approaching, the depression from which these forgotten people are suffering is intensified. Christmas is a time of joy for most of us, but for these Haitians, incarcerated in refugee camps both in the United States and Puerto Rico, there is little reason to celebrate. Instead of gazing on Christmas decorations, they will only see barbed wire, guards, and rows of canvas tents.

The Haitian refugees are not violent. They have no ax to grind. Haitians are traditionally hard working and spirited. Now, they are demoralized and desperate. Their lives are regimented. Everything they do, every move they make, must be approved in writing by the camp administration. The administration, through INS, is waging psychological warfare against these people.

The racism evident in the treatment of Haitian refugees may be subtle, but it is clear. A week ago, a refugee died in Fort Allen. One of his fellow inmates said his death was a result of "thinking too much." Depression certainly played a part in the man's death.

There is nothing for the Haitians to do but sit and wait. Not only that, but because Fort Allen is in an out of the way spot in Puerto Rico, it is more regimented than the camps in the United States. The treatment of the refugees is much worse. There is one happy note. The Puerto Rican people have offered to help the Haitians. There was a march in Puerto Rico last weekend in support of the refugees. Also, many Puerto Rican families, church groups, and civic organizations have offered to take in the Haitians while their fate is being decided.

There are no easy answers to this problem. But there are immediate remedies which can alleviate the suffering of the refugees. The conditions in the camp could be greatly improved. Those refugees who have sponsors should be released while their cases are being decided. We are dealing with human beings in Fort Allen, men and women like you and I. They only want to be treated with dig-

nity, not like stray dogs. Consider how we might feel had an accident of fate made us part of this suffering mass. Our attitude would certainly be different, our perspective more enlightened.

THE PLIGHT OF OUR THRIFT INSTITUTIONS

(Mr. PATTERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PATTERSON. Mr. Speaker, this past Sunday the Washington Post started a series of articles on the plight of the thrift institutions across this great land.

For those of you who may not be members of the Banking Committee, as I am, the thrift institutions are those institutions like savings and loans, small commercial banks and mutual savings banks, that finance housing for America.

I urge my colleagues to read these articles on just showing how serious the plight of the thrift financial institutions is, as opposed to the commercial banks at this time.

Part of the problem that they have had is with the DIDC, the Depository Institutions Deregulation Committee. They have issued regulations since September 22 of this year that have damaged and hurt the housing financial institutions across our country.

Tomorrow the DIDC meets in the afternoon to consider some more regulations to hurt the thrift institutions. Before it does, in the morning the subcommittee on Oversight and Renegotiations and Banking will have a chance to ask some very interesting questions of Secretary Regan, the Chairman of the DIDC.

□ 1230

SPEAKER PROVIDES FREE OFFICE SPACE

(Mr. SAWYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SAWYER. Mr. Speaker, perhaps some other colleagues here noticed the article in this morning's Washington Post entitled "O'Neill Gives Free Office Space to Maker of Flattering Film," alleging that the Speaker has provided free space in the House side here to one Jerry Colbert of an independent television station in Pennsylvania. The spokesman for the Speaker says he has the right to allocate space under his control to anyone he chooses.

I do not for 1 minute endorse the motives attributed to the Speaker in that article, but I do say that if the Speaker has extra space, it is a shame that he is appropriating to the Rules Committee the ladies and children's lounge here that has been here for 70 years on the third floor and leaving the entire House side without any such facility because of alleged lack of space available for House functions.

FAILURE OF COMMUNISM IN POLAND

(Mr. WEBER of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEBER of Ohio. Mr. Speaker, we are all aware of the state of emergency that exists today in Poland. The Communist government has jailed many of the leaders of the Free Solidarity Union and has threatened the people of Poland with execution if they protest this violent abuse of freedom with strikes or public gatherings.

I have joined over 200,000 citizens of this country by signing a petition circulated by the College Republican National Committee, which expresses their complete support for the people of Poland in their effort to retain their fundamental right of freedom.

The demonstrations in France, Britain, and in communities throughout the United States which have protested the Communist Party's attempt to stifle freedom of expression in Poland by the banning of all public gatherings, should serve as a reminder of the precious freedom that we enjoy under our Constitution in the United States.

Mr. Speaker, the economic and political crisis in Poland marks another failure of communism and dramatizes the importance of the free political processes that are the blessings of liberty in a democracy.

SOLICITING CAMPAIGN FUNDS ON FEDERAL PROPERTY

(Mr. PARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PARRIS. Mr. Speaker, title 18, United States Code, section 607, makes it unlawful to solicit campaign funds on Federal property. This morning, I received this letter from the National Democratic Senatorial Committee addressed to me in my office in the House of Representatives, which everyone knows is Federal property. In the last 6 months, my office and all of the rest of the Members of this House have been barraged by Democratic fundraising letters. I have personally received 51 solicitation letters signed by, among others, Senator KENNEDY, Senator CRANSTON, former Senator Birch Bayh, the chairman of the National Democratic Committee, et cetera, et cetera, ad nauseum.

I can understand the desire of the Democratic Party to regain the majority in the U.S. Senate, but I cannot condone unlawful conduct.

Mr. Speaker, I fail to understand why the appropriate authorities of the House of Representatives do not take action to stop this clearly illegal activity and to stop it right now.

HALT DEPORTATION OF POLISH CITIZENS

(Mr. NELLIGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NELLIGAN. Mr. Speaker, yesterday I introduced a resolution with the gentlelady from Maryland, Representative MIKULSKI, that would request a halt to all deportation proceedings against Polish citizens whose visas have, or will soon, expire.

Our resolution (H. Res. 304) asks for a halt in deportation proceedings until such time as the President determines that the political situation in Poland is stable and that Poles will encounter no undue risk in returning to their country.

At present, any Polish citizen facing deportation is being asked to "walk the plank." Several of my constituents have contacted me, expressing serious fears about Polish citizens being forced to return to Poland. They are concerned over the volatile situation in Poland—a situation which could jeopardize the lives or personal safety of these Polish people.

In only a few hours' time, we have obtained the bipartisan support of 34 Members for this resolution.

Mr. Speaker, at the appropriate time today, I will ask unanimous consent for the immediate consideration of House Resolution 304.

SOCIAL SECURITY MINIMUM BENEFIT

(Mr. MARLENEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MARLENEE. Mr. Speaker, finally, the conference committee on social security has finished its report. And while it is far more complicated than the bill passed by the House on July 31, it does accomplish what we have been urging—the restoration of the minimum benefit for all of those people whoe are currently receiving benefits.

In addition, the conference report would authorize interfund borrowing among the trust funds which will give Congress time to find equitable and long lasting solutions to the long- and short-term financing problems with the system. And the report makes other changes to the program which will aid the Social Security Administration in reducing fraud and error which robs rightful recipients of their benefits.

I urge the House to pass this conference report immediately, so that the

social security minimum benefit recipients can rest easy knowing their benefits will be intact.

HOUSE SUBCOMMITTEE ON ACCOUNTS HOLDS THE LINE ON COMMITTEE STAFF FUNDING

(Mr. COLLINS of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLLINS of Texas. Mr. Speaker, as I came in the Hall I visited with the chairman of the Accounts Subcommittee of the Committee on House Administration, the gentleman from Illinois (Mr. ANNUNZIO) and he told me something that is most commendable. It is something the entire House can be proud of that we accomplished during this past year.

In the House Accounts Subcommittee, they did not increase—they did not increase—one single committee staff funding. There were no supplemental appropriations approved this year. Now, this committee showed a lot of courage and it showed an example that we should follow in future years.

What I am saying is, there was not one single supplemental appropriation approved for committee staffing. It showed financial restraint. It is what I hope we can see more of in 1982.

MAKING IN ORDER CONSIDERATION OF CONFERENCE REPORT ON S. 1196, INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT OF 1981, ANY TIME AFTER REPORT IS FILED IN THE HOUSE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that it be in order to consider the conference report on the Senate bill S. 1196, the International Security and Development Cooperation Act of 1981, at any time after the report is filed in the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

MAKING IN ORDER CONSIDERATION OF CONFERENCE REPORT ON H.R. 3567, EXPORT ADMINISTRATION AMENDMENTS ACT FOR 1981, AT ANY TIME AFTER REPORT IS FILED IN THE HOUSE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that it be in order to consider the conference report on the bill (H.R. 3567) to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes, at any time after the report is filed in the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

CONSENT CALENDAR

The SPEAKER pro tempore. pursuant to the order of the House of December 15, 1981, this is the day for the call of the Consent Calendar. The Clerk will call the first bill on the Consent Calendar.

AUTHORIZING EXCHANGE OF CERTAIN LAND HELD IN TRUST BY THE UNITED STATES FOR THE NAVAJO TRIBE

The Clerk called the bill (H.R. 4001) to authorize the exchange of certain land held in trust by the United States for the Navajo Tribe, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

H.R. 4001

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subject to the approval of the Secretary of the Interior, the Navajo Tribe may exchange all of its interests in any land held in trust by the United States for the tribe in sections 4, 5, 8, and 9 of township 12 north, range 18 west, New Mexico principal meridian for the land located in section 14, township 13 north, range 18 west, New Mexico principal meridian which is owned by Bernard J. VanderWagen or Linda VanderWagen Ortega or both of them. The land so acquired by the Navajo Tribe shall be held in trust by the United States for the tribe and shall have the same status as the land exchanged.

With the following committee amendments:

Page 2, line 5, change "VanderWagen" to "Vanderwagon".

Page 2, line 6, change "VanderWagen" to "Vanderwagon".

The committee amendments were agreed to.

● Mr. SKEEN. Mr. Speaker, I rise in support of H.R. 4001, to authorize the exchange of certain land held in trust by the United States for the Navajo Tribe, and for other purposes.

The purpose of this legislation is to allow an exchange of land between the Navajo Tribe and Mr. Bernard J. Vanderwagon and his daughter. The property is located in McKinley County, north of Gallup, N. Mex. Although Mr. Vanderwagon and the Navajo families who are directly affected have mutually agreed that such an exchange would be beneficial to all parties, at present there is no general statutory or legal authority for the Navajo Tribe to conduct land exchanges.

For over a quarter of a century, Mr. Speaker, eight Navajo families have lived on land owned by Mr. Vanderwagon. These families have built their homes and grazed their sheep on this land. Throughout the period, there has been an understanding that this land in use by the Navajo families would be exchanged for an equal amount of tribal land which adjoins another portion of the Vanderwagon ranch. This oral agreement cannot be formalized without the formal passage of this special legislation. All parties have agreed that formal acquisition of the properties will enable them to make certain improvements to the land without the uncertainties which currently exist. Enactment of this special legislation will result in the creation of two viable ranches. The Navajo families will receive approximately a section of excellent grazing land in a developing area. The Vanderwagon family will acquire an equal amount of land between their existing ranch and a nearby highway.

Mr. Speaker, the Senate Committee on Indian Affairs has favorably considered a companion bill, S. 1779, by Senator SCHMITT. I urge the passage of this noncontroversial bill, Mr. Speaker, so that this measure may also proceed to final action by the Senate. Thank you, Mr. Speaker.●

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WALKER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include therein extraneous matter, on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

DECLARING THAT THE UNITED STATES HOLDS IN TRUST FOR THE PASCUA YAQUI TRIBE OF ARIZONA CERTAIN LAND IN PIMA COUNTY, ARIZ.

The Clerk called the bill (H.R. 4364) to declare that the United States holds in trust for the Pascua Yaqui Tribe of Arizona certain land in Pima County, Ariz.

There being no objection, the Clerk read the bill, as follows:

H.R. 4364

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subject to all valid existing rights, all right, title, and interest of the United States in the following described tracts of lands shall be held by the United States in trust for the Pascua Yaqui Tribe of Arizona and shall be a part of the reservation of such tribe:

(1) the southeast quarter northeast quarter northwest quarter of section 24;

(2) the southwest quarter northwest quarter of section 24;

(3) the northeast quarter northeast quarter south half northeast quarter north half

southeast quarter south half northwest quarter and southwest quarter of section 23; and

(4) the east half southeast quarter of section 22; all in township 15 south, range 12 east, Gila and Salt River meridian.

SEC. 2. The State of Arizona shall exercise criminal and civil jurisdiction over such lands as if it had assumed jurisdiction pursuant to the Act of August 15, 1953 (67 Stat. 588), as amended by the Act of April 11, 1968 (82 Stat. 79).

With the following committee amendment:

On page 2, strike all of lines 5 through 13 and insert, in lieu thereof, the following:

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING THE SECRETARY OF THE INTERIOR TO DISBURSE TRUST FUNDS OF THE LAC COURTE OREILLES BAND OF LAKE SUPERIOR CHIPPEWA INDIANS OF WISCONSIN, AND FOR OTHER PURPOSES

The Clerk called the bill (H.R. 4894) to authorize the Secretary of the Interior to disburse certain trust funds of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

H.R. 4894

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior shall, at the request of the governing body of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, pay to the State Bank of Drummond, Drummond, Wisconsin, not to exceed 20 per centum of the funds of such tribe derived from awards of the Indian Claims Commission in dockets numbered 18-C and 18-T which are deposited in the United States Treasury to the credit of such tribe in trust accounts numbered 14x9228 and 14x9278. Such payments shall be used for the sole purpose of covering or reducing an overdraft incurred by the tribe in support of administration of Federal contracts on an account maintained by the tribe in such bank which is designated "general fund".

SEC. 2. In the event that the United States acts to adjust the accounts of Indian tribes or organizations administering Federal contracts for the underrecovery of contract support money, the Secretary of the Interior, at his discretion, may reimburse the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, in whole or in part, for this disbursement.

With the following committee amendments:

Page 2, line 8, change "14 x 9278." to "14 x 9728".

Page 2, in lines 15 and 16, strike the phrase, "underrecovery of contract support money" and insert, in lieu thereof, the phrase, "overrecovery or underrecovery of indirect costs".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AMENDING ACT RELATING TO THE USE OR DISTRIBUTION OF CERTAIN JUDGMENT FUNDS AWARDED BY THE INDIAN CLAIMS COMMISSION OR THE COURT OF CLAIMS

The Clerk called the bill (H.R. 3731) to amend the act of October 19, 1973 (87 Stat. 466), relating to the use or distribution of certain judgment funds awarded by the Indian Claims Commission or the Court of Claims.

There being no objection, the Clerk read the bill, as follows:

H.R. 3731

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2 of the Act of October 19, 1973 (87 Stat. 466), is amended to read as follows:

"(a) Within one year after the appropriation of funds (including appropriation pursuant to section 1302 of the Supplemental Appropriation Act, 1957, as amended (31 U.S.C. 724a)) to pay a judgment of the Indian Claims Commission or the Court of Claims to any Indian tribe, the Secretary shall prepare and submit to the Congress a plan for the use and distribution of the funds: *Provided,* That with respect to judgments for which funds have been appropriated prior to the enactment of the amended section, but for which use or distribution has not been authorized by enactment of legislation or by an effective plan under this Act, the Secretary shall prepare and submit such plans within one year of the enactment of this amended section. Such plan shall include identification of the present-day beneficiaries, a formula for the division of the funds among two or more beneficiary entities if such is warranted, and a proposal for the use and distribution of the funds. The Secretary shall simultaneously submit a copy of such plan to the governing body or official representative of each affected tribe or group.

"(b) If the Secretary determines that an appropriate plan cannot be submitted to the Congress within the period specified in subsection (a) of this section, the Secretary shall submit to the Congress a schedule specifying a date by when such plan will be submitted to the Congress and such schedule shall replace that prescribed in said subsection (a) unless disapproved by enactment of a joint resolution.".

With the following committee amendment:

Strike all after the enacting clause and insert the following:

That Section 2 of the Act of October 19, 1973 (87 Stat. 446; 25 U.S.C. 1401 et seq.) is amended to read as follows:

"SEC. 2(a) Within one year after appropriation of funds to pay a judgment of the Indian Claims Commission or the Court of Claims to any Indian tribe, the Secretary of the Interior shall prepare and submit to Congress a plan for the use and distribution of the funds. Such plan shall include identification of the present day beneficiaries, a formula for the division of the funds among two or more beneficiary entities if such is warranted, and a proposal for the use and distribution of the funds. The Secretary shall simultaneously submit a copy of such plan to each affected tribe or group.

"(b) With respect to judgments, for which funds have been appropriated prior to the enactment of this amended section, but for which use or distribution has not been authorized by enactment of legislation or by an effective plan under this Act, the Secretary shall prepare and submit such plans within one year of the enactment of this amended section.

"(c) In any case where the Secretary determines that the circumstances do not permit the preparation and submission of a plan as provided in this Act, he shall submit to the Congress within the one year period proposed legislation to authorize use or distribution of such funds, together with a report thereon.

"(d) In cases where the Secretary has to submit a plan dividing judgment funds between two or more beneficiary entities, he shall obtain the consent of the tribal governments involved to the proposed division. If the Secretary cannot obtain such consent within 180 days after appropriation of the funds for the award or within 180 days of the enactment of this amended section, he shall submit proposed legislation to the Congress as provided in section 2(c).

"(e) An extension of the one year period, not to exceed 18 days, may be requested by the Secretary or by the affected Indian tribe, submitting such request to the Committees through the Secretary, and any such request will be subject to the approval of both the Senate Select Committee on Indian Affairs and the U.S. House of Representatives Committee on Interior and Insular Affairs."

SEC. 2. Section 3(b)(3) of said Act is hereby amended by adding at the end thereof, the following proviso:

"*Provided,* That such funds may be disbursed to the parents or legal guardian of such minors or legal incompetents in such amounts as may be necessary for the minor or legal incompetent's health, education, welfare or emergencies under a plan or plans approved by the Secretary and the tribal governing body of the Indian tribe involved."

SEC. 3. Section 5 of said Act is amended by adding the following subsections:

(c) Within the sixty-day period and before the adoption of any resolution disapproving a plan, the Secretary may withdraw or amend such plan; *Provided,* That any amendments affecting the division of an award between two or more beneficiary entities shall be subjected to the consent of these entities as provided in section 2(d) of this Act. Any such amended plan shall become valid at the end of a sixty-day period beginning on the day such amendment is submitted to the Congress, unless during such sixty-day period, either House adopts a resolution disapproving such plan as amended.

(d) Once a plan is withdrawn before the end of a sixty-day period, the Secretary has until the expiration of the original one-year deadline to resubmit a plan to the Congress. Such plan shall become valid at the end of a sixty-day period beginning on the day such new plan is submitted to the Congress, unless during such sixty-day period, either House adopts a resolution disapproving such plan."

SEC. 4. Section 7 of said Act is amended to read as follows:

"SEC. 7. None of the funds distributed per capita or held in trust under the provisions of this Act shall be subject to Federal or State income taxes, nor shall such funds nor their availability be considered as income or resources or otherwise utilized as the basis for denying or reducing the financial assistance or other benefits to which such household or member would otherwise be entitled under the Social Security Act or, except for per capita shares in excess of $2,000, any Federal or federally-assisted program."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR PARTITIONING OF CERTAIN RESTRICTED INDIAN LAND IN THE STATE OF KANSAS

The Clerk called the Senate bill (S. 478) to provide for the partitioning of certain restricted Indian land in the State of Kansas.

There being no objection, the Clerk read the Senate bill, as follows:

S. 478

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That any owner of an interest in lands derived from a patent under the Act of March 3, 1859 (11 Stat. 430) may commence an action in the United States District Court for Kansas to partition the same in kind or for the sale of such land in accordance with the laws of the State of Kansas. Moneys resulting from a sale in lieu of partition shall be distributed and administered through trust accounts of the Bureau of Indian Affairs in the case of Indian heirs. Moneys of non-Indian heirs shall be turned over to the appropriate State court in Kansas for distribution and administration in accordance with the laws of Kansas. For the purpose of such action, the Indian owners shall be regarded as vested with an unrestricted fee simple title to their interests in the land and the United States shall be a necessary party to the proceedings. Any conveyance ordered by the court in such proceedings will be made in unrestricted fee simple to non-Indian grantees and in a restricted fee to Indian grantees.

With the following committee amendment:

Strike all after the enacting clause and insert:

That any owner of an interest in the following lands:

(1) the north half southeast quarter of section 25, 14 acres on the south side of southeast quarter northeast quarter of section 25 township 11 south, range 22 east, sixth principal meridian, Kansas, containing 94 acres and also known as the Newton McNeer Shawnee Reserve Numbered 206;

(2) the southeast quarter northwest quarter of section 12, township 12 south, range 23 east, 6th principal meridian, Kansas, containing 20 acres and also known as the Black Snake Shawnee Allotment Number 69;

(3) the east half, southwest quarter, section 13, township 19 south, range 24 east, sixth principal meridian, Kansas, containing 80 acres and known as the Maria Christiana Miami Allotment, lands derived from a patent under the Act of March 3, 1859 (11 Stat. 430) may commence an action in the United States District Court for Kansas to partition the same in kind or for the sale of such land in accordance with the laws of the State of Kansas. Moneys resulting from a sale in lieu of partition shall be distributed and administered through trust accounts of the Bureau of Indian Affairs in the case of Indian heirs. Moneys of non-Indian heirs shall be turned over to the appropriate State court in Kansas for distribution and administration in accordance with the laws of Kansas. For the purpose of such action, the Indian owners shall be regarded as vested with an unrestricted fee simple title to their interests in the land and the United States shall be a necessary party to the proceedings. Any conveyance ordered by the court in such proceedings will be made in unrestricted fee simple to non-Indian grantees and in a restricted fee to Indian grantees.

The committee amendment was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR CONVEYANCE OF CERTAIN LANDS IN ALASKA WITHOUT REGARD TO THE 80-ROD LIMITATION PROVIDED BY EXISTING LAW

The Clerk called the bill (H.R. 1281) to provide for the conveyance of certain lands in Alaska comprising trade and trade manufacturing site A-056802 without regard to the 80-rod limitation provided by existing law.

There being no objection, the Clerk read the bill, as follows:

H.R. 1281

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subject to the requirements provided in section 2 of this Act, the Secretary of the Interior is authorized to reconsider and act upon trade and manufacturing site application A-056802, comprising approximately 16.33 acres in the State of Alaska, under section 10 of the Act of May 14, 1898 (30 Stat. 409, 43 U.S.C. 687a), without regard to the eighty-rod limitation contained in the first proviso of that Act. The land comprising trade and manufacturing site A-056802 is located between Nuyakuk and Tikchik Lakes in protraction section 36, T.S.S., range 24 west, Seward meridian (USS 4699).

SEC. 2. Notwithstanding the payment provisions in section 10 of the Act of May 14, 1898, the Secretary of the Interior shall require payment of fair market value for any acreage conveyed under this Act in excess of the acreage to which the Secretary determines the applicant would have been entitled under section 10, had the eighty-rods limitation therein been applicable.

With the following committee amendments:

Page 2, line 3, strike "site" and in lieu thereof insert "claim."

Page 2, line 6, after "409," insert "413, as amended and supplemented,".

Page 2, line 8, strike "Act." and in lieu thereof insert "section.".

Page 2, line 9, strike "site" and in lieu thereof insert "claim".

Page 2, lines 10 through 12, strike "protraction section 36, T.S.S., range 24 west, Seward meridian (USS 4699)." and in lieu thereof insert the following: "protracted section 36, T. 2 S., R. 54 W., Seward meridian.".

Page 2, strike lines 14 through 20 and in lieu thereof insert the following:

SEC. 2. Notwithstanding the payment provisions in section 10 of the Act of May 14, 1898, the Secretary of the Interior shall require payment of fair market value for the approximately 6.27 acres authorized to be conveyed under this act in excess of the approximately 10.06 acres to which the Secretary has determined the applicant would have been entitled under section 10, had the eighty-rod limitation therein been applicable. Fair market value shall be determined by the Secretary as of the date of filing of such trade and manufacturing claim application A—056802, and shall not include the value of any enhancement of the land.

SEC. 3. The Secretary of the Interior shall not convey any land under this Act unless and until the State of Alaska conveys to the United States all right, title, and interest that it has in that portion of the land included in trade and manufacturing claim application A—056802 that has been selected under the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, as amended), and tentatively approved, and warrants that it has not alienated or conveyed any interests in these lands to a third party. The State of Alaska is hereby authorized to make such a conveyance regarding such portion of such lands, notwithstanding any other provision of law.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WITHDRAWING CERTAIN LANDS IN MONO COUNTY, CALIF., FROM SETTLEMENT, SALE, LOCATION, OR ENTRY FOR THE PURPOSE OF PROTECTING THE WATERSHED SUPPLYING WATER TO THE CITY OF LOS ANGELES, AND TO RESCIND SUCH WITHDRAWAL FOR CERTAIN OTHER LANDS IN MONO COUNTY, CALIF.

The Clerk called the bill (H.R. 2475) to withdraw certain lands in Mono County, Calif., from settlement, sale, location, or entry for the purpose of protecting the watershed supplying water to the city of Los Angeles, and to rescind such withdrawal for certain other lands in Mono County, Calif.

There being no objection, the Clerk read the bill, as follows:

H.R. 2475

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Section 1. Notwithstanding the Act of March 4, 1931 (46 Stat. 1530-1548), or any other provision of law, the following described lands, located in Mono County, California, and comprising 202.167 acres, are

withdrawn from settlement, sale, location, or entry, under all of the general land laws, for the purpose of protecting the watershed supplying water to the city of Los Angeles: The southeast quarter of the southeast quarter of section 23, the west half of the northwest quarter of section 25, and the north half of the northeast quarter of section 26, all in township 5 south, range 32 east, Mount Diablo meridian, California.

SEC. 2. Nothwithstanding the first section of the Act of March 4, 1931 (46 Stat. 1530, 1532), the following described lands, located in Mono County, California, and comprising 160 acres, shall no longer be withdrawn from settlement, location, filing, entry, or disposal under the land laws of the United States: The southwest quarter of section 34, township 5 south, range 33 east, Mount Diablo meridian, California.

With the following committee amendment:

Strike out all after the enacting clause and insert the following:

That notwithstanding the Act of March 4, 1931, (46 Stat. 1530-1548), or any other provision of law, the following described lands, situated in Mono County, California, and comprising approximately 202.167 acres, are withdrawn from settlement, sale, location, or entry under all of the general land laws: The southeast quarter of the southeast quarter of section 23, the west half of the northwest quarter of section 25, and the north half of the northeast quarter of section 26, all in township 5 south, range 32 east, Mount Diablo meridian, California.

SEC. 2. Notwithstanding the first section of the Act of March 4, 1931, (46 Stat. 1530, 1532), the withdrawal accomplished by said Act of March 4, 1931, of the lands described as the southwest quarter of section 34, township 5 south, range 33 east, Mount Diablo meridian, comprising approximately 160 acres, situated in Mono County, California, is hereby modified to the extent that the lands described in this section may be exchanged by the Secretary of the Interior in accordance with the directive contained in section 3 of this Act.

SEC. 3. Notwithstanding any other provision of law, the Secretary of the Interior is hereby authorized to exchange the Federal lands described in section 2 of this Act for the lands described in section 1 of this Act, the title to the lands to be acquired by the United States to be satisfactory in all respects to the Secretary and to be conveyed by a good and sufficient deed, in recordable form, that is satisfactory to the Secretary.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title of the bill was amended so as to read: "A bill to modify a withdrawal of certain lands in Mono County, California, to facilitate an exchange for certain other lands in Mono County, California, and for other purposes."

A motion to reconsider was laid on the table.

AUTHORIZING THE SECRETARY OF AGRICULTURE TO SELL THE PORTION OF THE TAHOE NATIONAL FOREST KNOWN AS BLYTH ARENA

The Clerk called the bill (H.R. 2863) to authorize the Secretary of Agriculture to sell the portion of the Tahoe National Forest known as Blyth Arena.

There being no objection, the Clerk read the bill, as follows:

H.R. 2863

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Agriculture may sell at public auction, for not less than fair market value, all right, title, and interest in the approximately 5.22 acres of land which is known as Blythe Arena and located in the Tahoe National Forest, and which is depicted on a map entitled "Blythe Arena Sale or Exchange Proposal", dated February 1981, on file in the office of the Chief, Forest Service, Department of Agriculture.

SEC. 2. There is authorized to be appropriated for the acquisition, by the Secretary of Agriculture, of lands in the State of California an amount equal to the amount of any proceeds received from the sale of Blythe Arena under the first section of this Act. Lands acquired with funds appropriated under the preceding sentence shall be permanently reserved, held, and administered as part of the national forest system.

With the following committee amendments:

Page 1, line 3, strike "That the Secretary of Agriculture may sell" and in lieu thereof insert the following:

That notwithstanding any other provision of law, the Secretary of Agriculture may dispose of by exchange pursuant to the General Exchange Act of March 20, 1922, as amended (16 U.S.C. 485, 486) and the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716, 1717) or by sale.

Page 2, line 6, strike "5.22" and in lieu thereof insert "5.2"

Page 2, lines 8 and 9, after "Tahoe National Forest," insert "which is an exception to Land Patent Number 04-70-0146,"

Page 2, strike lines 13 through 20 and in lieu thereof insert the following:

SEC. 2. If the Secretary of Agriculture disposes of the land described in section one of this Act by sale, the proceeds shall be retained by the Secretary and shall be used for acquisition by the Secretary of lands in the State of California which shall be included within the national forest system and shall be permanently reserved, held, and administered as part of such system.

The committee amendments were agreed to.

AMENDMENTS OFFERED BY MR. UDALL

Mr. UDALL. Mr. Speaker, I offer amendments making two technical corrections, and I ask unanimous consent that these amendments be considered en bloc, and that they be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The amendments are as follows:

Amendments offered by Mr. UDALL: Page 1, line 6 change "Blythe" to "Blyth".

Page 1, line 7, change "Blythe" to "Blyth".

The SPEAKER pro tempore. The question is on the amendments offered by the gentleman from Arizona (Mr. UDALL).

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title of the bill was amended so as to read: "A bill to authorize the Secretary of Agriculture to sell the portion of the Tahoe National Forest known as Blyth Arena."

A motion to reconsider was laid on the table.

MODIFYING BOUNDARIES OF THE SAN JUAN AND SAN ISABEL NATIONAL FORESTS IN THE STATE OF COLORADO

The Clerk called the bill (H.R. 3433) to modify the boundaries of the San Juan and San Isabel National Forests in the State of Colorado, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

H.R. 3433

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That to provide for consolidation of lands in the San Juan and San Isabel National Forests, and lands administered by the Bureau of Land Management, Montrose District, all in Colorado, to accommodate the transfer of lands acquired by the Water and Power Resources Service as a part of the McPhee Dam and Reservoir, and provide for more efficient administration of those lands, the exterior boundaries of the San Juan and San Isabel National Forests in the State of Colorado are hereby modified as shown on United States Department of Agriculture, Forest Service maps entitled "Boundary Modification, San Juan National Forest," and "Boundary Modification, San Isabel National Forest," dated February 1981. The maps and legal description of the boundaries of such lands shall be on file and available for public inspection in the appropriate offices of the Chief of the Forest Service, Department of Agriculture, the Director of the Bureau of Land Management, Department of the Interior, and appropriate field offices of those agencies.

SEC. 2. Subject to valid existing rights and privileges, all Bureau of Land Management administered lands comprising about twenty-five thousand five hundred and fifty-nine acres depicted as areas 1 through 8 on the maps referred to in section 1 of this Act, falling within the boundaries of the San Juan and San Isabel National Forests, as modified by section 1 of this Act, are hereby added to the respective national forests and shall be administered in accordance with the laws, rules, and regulations applicable thereto.

SEC. 3. Subject to valid existing rights and privileges, all national forest lands comprising about thirty-one thousand six hundred and seven acres depicted as areas 9 through 11 on the maps referred to in section 1 of

this Act that are outside the San Juan National Forest boundary, as modified by section 1 of this Act, and hereby returned to the Secretary of the Interior and shall be administered in accordance with the laws, rules, and regulations applicable to the public lands as defined in section 103(e) of the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1702(c)).

SEC. 4. For the purpose of section 6 (renumbered section 7 by the Act of July 11, 1972 (86 Stat. 459)) of the Land and Water Conservation Fund Act of 1965 (78 Stat. 903, as amended; 16 U.S.C. 4601.9 (1976)) the boundaries of the San Juan and San Isabel National Forests, as modified by section 1 of this Act, shall be treated as if they were the boundaries of those forests on January 1, 1965.

SEC. 5. Nothing in this Act shall affect the validity or the terms and conditions of any existing right-of-way, easement, lease, license, or permit on lands transferred by this Act, except that they shall be administered by the agency having jurisdiction of the land after the enactment of this Act in accordance with sections 2 and 3 herein. Reissuance of any authorization shall be in accordance with the regulations of the agency having jurisdiction provided that the change of jurisdiction shall not constitute a ground to deny the renewal or reissuance of any such authorization.

SEC. 6. The provisions of this Act shall take effect on the date of enactment of this Act.

With the following committee amendment:

Strike all after the enacting clause and insert the following:

That to provide for consolidation of lands in the San Juan and San Isabel National Forests, lands administered by the Bureau of Land Management, Montrose District, and lands acquired by Bureau of Reclamation as a part of the McPhee Dam and Reservoir, all in Colorado, and to provide for more efficient administration of those lands, the exterior boundaries of the San Juan and San Isabel Naional Forests in the State of Colorado are hereby modified as shown on United States Department of Agriculture, Forest Service maps entitled "Boundary Modification, San Juan National Forest," and "Boundary Modification, San Isabel National Forest" dated August 1981. The maps and legal description of the boundaries of such lands shall be be on file and available for public inspection in the offices of the Chief of the Forest Service, Department of Agriculture; the Director of the Bureau of Land Management, and the Commissioner of the Bureau of Reclamation, Department of the Interior and appropriate field offices of those agencies.

SEC. 2. All Bureau of Land Management-administered lands that, by reason of the boundary modification described in the first section of this Act, fall within the boundaries of the San Juan or San Isabel National Forests, comprising about 25,559 acres and depicted as Areas 1-8 on the maps referred to in such section, are hereby added to the respective national forests and shall be administered in accordance with the laws, rules, and regulations applicable to the National Forest System.

SEC. 3. All National Forest System lands that, by reason of the boundary modification described in the first section of this Act, no longer fall within the boundaries of the San Juan National Forest, comprising about 31,607 acres and depicted as Areas 9-11 on the maps referred to in such section, are hereby removed from the National Forest System and transferred to the Secretary of the Interior to be administered in accordance with the laws, rules, and regulations applicable to the public lands as defined in section 103(e) of the Federal Land Policy and Management Act of 1976, as amended (90 Stat. 2746; 43 U.S.C. 1702(e)).

SEC. 4. Notwithstanding the first section of this Act or any other law, the Secretary of the Interior shall retain jurisdiction over all lands administered by the Bureau of Reclamation that, by reason of the boundary modification described in the first section of this Act, fall within the boundary of the San Juan National Forest, until such time as the Secretary of the Interior, by agreement with the Secretary of Agriculture, transfers such jurisdiction to the Secretary of Agriculture. Upon such transfer, the land involved shall be added to the San Juan National Forest and shall be administered in accordance with the laws, rules, and regulations applicable to the National Forest System.

SEC. 5. For the purpose of section 6 (renumbered section 7 by the Act of July 11, 1972 (86 Stat. 459)) of the Land and Water Conservation Fund Act of 1965 (78 Stat. 903, as amended; 16 U.S.C. 460 l-9) the boundaries of the San Juan and San Isabel National Forests, as modified by the first section of this Act, shall be treated as if they were the boundaries of those Forests on January 1, 1965.

SEC. 6. Nothing in this Act shall affect valid existing rights, or interest in existing land use authorizations, except that any such right or authorization shall be administered by the agency having jurisdiction of the land after the enactment of this Act in accordance with sections 2 and 3 of this Act and other applicable law. Reissuance of any such authorization shall be in accordance with applicable law and the regulations of the agency having jurisdiction, *Provided*, That the change of administrative jurisdiction shall not in itself constitute a ground to deny the renewal of reissuance of any such authorization.

SEC. 7. Those parts of Bureau of Land Management Wilderness Study Areas (Needle Creek, CO-030-229B; West Needles Contiguous, CO-30-229A; Whitehead Gulch, CO-030-230B; and Weminuche Contiguous, CO-030-238B) contained within Area 3 and that are made a part of the National Forest System by this Act shall be studied in conjunction with the West Needle Wilderness Study Area in accordance with the provisions of section 105 of the Colorado Wilderness Act of 1980, including the requirement that the Secretary of Agriculture review the suitability or unsuitability of such lands for inclusion in the National Wilderness Preservation System and report to Congress by December 31, 1983. Inclusion of such parts of such wilderness study areas in the National Forest System by this Act shall not affect the status of the parts of such areas not so included, which shall continue to be reviewed pursuant to section 603 of the Federal Land Management and Policy Act of 1976.

SEC. 8. The provisions of this Act shall take effect on the date of enactment of this Act.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FEDERAL-AID HIGHWAY ACT OF 1981

Mr. ANDERSON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3210) to amend the Surface Transportation Assistance Act of 1978, to establish obligation limitations for fiscal year 1982, and for related purposes with a Senate amendment, and concur in the Senate amendment with an amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause, and insert:

SEC. 101. This Act may be cited as the "Federal-Aid Highway Improvement Act of 1981".

REVISION OF AUTHORIZATION FOR APPROPRIATIONS FOR THE INTERSTATE SYSTEM

SEC. 102. (a) Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,200,000,000 for the fiscal year ending September 30, 1983", and all that follows through the period at the end of the sentence and by inserting in lieu thereof the following: "the additional sum of $3,100,000,000 for the fiscal year ending September 30, 1983, the additional sum of $3,500,000,000 for the fiscal year ending September 30, 1984, the additional sum of $3,400,000,000 for the fiscal year ending September 30, 1985, the additional sum of $3,400,000,000 for the fiscal year ending September 30, 1986, the additional sum of $3,500,000,000 for the fiscal year ending September 30, 1987, the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1988, the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1989, and the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1990.".

(b) Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is further amended by adding at the end thereof the following: Section 103 of title 23, United States Code, is amended by adding the following new subsection:

"(g) The obligation of funds authorized by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, after the date of enactment of this subsection, except for advance construction interstate projects approved prior to enactment of this subsection, shall be limited to essential construction necessary to complete routes and portions on the Interstate System. Essential construction consists of (1) full access control; (2) a pavement design to accommodate the types and volumes of traffic anticipated for the twenty-year period from date of authorization of the initial basic construction contract; (3) essential environmental requirements; and (4) a design of not more than six lanes in rural areas and all urbanized areas under four hundred thousand population, and up to eight lanes in urbanized areas of four hundred thousand population or more as shown in the 1980 Federal census. The obligation of funds authorized by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956 shall be further limited to the design concepts, locations, geometrics, and other construction features included in the 1981 Interstate Cost Estimate.".

(c) Section 104(b)(5)(A) of title 23, United States Code, is amended by adding at the end thereof the following new sentence:

"Notwithstanding any other provisions of this subparagraph, the Secretary in making the revised estimate of the cost of completing the then designated Interstate System for the purpose of transmitting it to the Senate and House of Representatives within ten days subsequent to January 2, 1983, or thereafter, shall include only those costs eligible for funds authorized by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, and as further amended by section 102(b) of the Federal-Aid Highway Improvement Act of 1981.".

AUTHORIZATION OF USE OF COST ESTIMATES FOR APPORTIONMENT OF INTERSTATE FUNDS

SEC. 103. The Secretary of Transportation shall apportion for the fiscal years ending September 30, 1983, and September 30, 1984, the sums authorized to be appropriated for such periods by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, for expenditures on the National System of Interstate and Defense Highways, using the apportionment factors contained in table of Committee Print of the Committee on Public Works and Transportation of the House of Representatives.

HIGHWAY AUTHORIZATIONS

SEC. 104. (a) Each of the authorizations for the fiscal year ending September 30, 1982, contained in section 104 of the Federal-Aid Highway Act of 1978 is hereby repealed. For the purpose of carrying out the following provisions of title 23, United States Code, the following sums are authorized to be appropriated out of the Highway Trust Fund:

(1) For the Federal-aid primary program, $1,500,000,000 for the fiscal year ending September 30, 1982, $1,500,000,000 for the fiscal year ending September 30, 1983, $1,600,000,000 for the fiscal year ending September 30, 1984, $1,600,000,000 for the fiscal year ending September 30, 1985, and $1,600,000,000 for the fiscal year ending September 30, 1986.

(2) For the Federal-aid rural program, $525,000,000 for the fiscal year ending September 30, 1982, $500,000,000 for the fiscal year ending September 30, 1983, $500,000,000 for the fiscal year ending September 30, 1984, $500,000,000 for the fiscal year ending September 30, 1985, and $400,000,000 for the fiscal year ending September 30, 1986.

(3) For the Federal-aid urban program, $725,000,000 for the fiscal year ending September 30, 1982, $700,000,000 for the fiscal year ending September 30, 1983, $700,000,000 for the fiscal year ending September 30, 1984, $700,000,000 for the fiscal year ending September 30, 1985, and $600,000,000 for the fiscal year ending September 30, 1986.

(4) For forest highways, $34,000,000 for the fiscal year ending September 30, 1982, $34,000,000 for the fiscal year ending September 30, 1983, $34,000,000 for the fiscal year ending September 30, 1984, $34,000,000 for the fiscal year ending September 30, 1985, and $34,000,000 for the fiscal year ending September 30, 1986.

(5) For public lands highways, $16,000,000 for the fiscal year ending September 30, 1982, $16,000,000 for the fiscal year ending September 30, 1983, $16,000,000 for the fiscal year ending September 30, 1984, $16,000,000 for the fiscal year ending September 30, 1985, and $16,000,000 for the fiscal year ending September 30, 1986.

(6) For bridge replacement and rehabilitation under section 144 of title 23, United States Code, $725,000,000 for the fiscal year ending September 30, 1982, $1,100,000,000 for the fiscal year ending September 30, 1983, $1,300,000,000 for the fiscal year ending September 30, 1984, $1,300,000,000 for the fiscal year ending September 30, 1985, and $1,300,000,000 for the fiscal year ending September 30, 1986.

(7) For the highway safety improvement program, $100,000,000 for the fiscal year ending September 30, 1982, $100,000,000 for the fiscal year ending September 30, 1983, $50,000,000 for the fiscal year ending September 30, 1984, $50,000,000 for the fiscal year ending September 30, 1985, and $50,000,000 for the fiscal year ending September 30, 1986.

(8) For carrying out section 215(a) of title 23, United States Code—

(A) for the Virgin Islands, not to exceed $5,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

(B) for Guam, not to exceed $5,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

(C) for American Samoa, not to exceed $1,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

Sums authorized by this paragraph shall be available for obligation at the beginning of the period for which authorized in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

(9) For the Commonwealth of the Northern Mariana Islands, not to exceed $1,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986. Sums authorized by this paragraph shall be expended in the same manner as sums authorized to carry out section 215 of title 23, United States Code. Sums authorized by this paragraph shall be available for obligation at the beginning of the period for which authorized in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

(b)(1) For each of the fiscal years 1983, 1984, 1985, 1986, and 1987, no State, including the State of Alaska, shall receive less than one-half of 1 per centum of the total apportionment for the Interstate System under section 104(b)(5)(A) of title 23, United States Code. Whenever amounts made available under this subsection for the Interstate System in any State exceed the estimated cost of completing that State's portion of the Interstate System, and exceed the estimated cost of necessary resurfacing, restoration, rehabilitation, and reconstruction of the Interstate System within such State, the excess amount shall be eligible for expenditure for those purposes for which funds apportioned under paragraphs (1), (2), and (6) of such section 104(b) may be expended.

(2) Subsection (g) of section 144 of title 23, United States Code, is amended as follows:

"(g) Of the amount authorized per fiscal year, for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986, all but $200,000,000 for fiscal years 1982, 1983, 1984, 1985, and 1986 shall be apportioned as provided in subsection (e) of this section; $200,000,000 for fiscal years 1982, 1983, 1984, 1985, and 1986 of the amount authorized shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date except that the obligation of such sums shall be at the discretion of the Secretary and shall be only for projects for those highway bridges the replacement and rehabilitation cost of each of which is more than $10,000,000 and for any project for a highway bridge replacement or rehabilitation cost of which is less than $10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) of this section for the fiscal year in which application is made for a grant for such bridge. Not less than 15 per centum of the amount apportioned to each State in a fiscal year shall be expended for projects to replace or rehabilitate bridges located on public roads other than those on public roads functionally classified as arterials or major collectors. The Secretary after consultation with State and local officials may, with respect to a State, reduce the requirement for expenditure for bridges not on public roads functionally classified as arterials or major collectors when he determines that such State has inadequate needs to justify such expenditure.".

(3) Paragraph (3) of section 202 of the Highway Safety Act of 1978 is amended by striking out "September 30, 1981, and September 30, 1982." and inserting in lieu thereof the following: "and September 30, 1981.".

(4) Paragraph (6) of section 202 of the Highway Safety Act of 1978 is amended by striking out "$1,300,000,000 for the fiscal year ending September 30, 1981, and $900,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof the following: "and $1,300,000,000 for the fiscal year ending September 30, 1981.".

(5) Paragraph (8) of section 202 of the Highway Safety Act of 1978 is amended by striking out "$150,000,000 for the fiscal year ending September 30, 1981, and $200,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof the following: "and $150,000,000 for the fiscal year ending September 30, 1982.".

(c) The unobligated balance of contract authority established in paragraph (15) of section 104(a) of the Federal-Aid Highway Act of 1978 shall lapse September 30, 1981.

(d) Section 203(b) of the Highway Safety Act of 1973, as amended by section 203(a) of the Highway Safety Act of 1978, is amended by striking out "September 30, 1981, and September 30, 1982." and inserting in lieu thereof "and September 30, 1981.".

(e) Section 163 of the Federal-Aid Highway Act of 1973, as amended by section 134(c) of the Federal-Aid Highway Act of 1978, is further amended by striking out "$100,000,000 for the fiscal year ending September 30, 1981, and $100,000,000 for the fiscal year ending September 30, 1982, except that" and inserting in lieu thereof "and $100,000,000 for the fiscal year ending September 30, 1981, except that".

(f) Section 141(i) of the Federal-Aid Highway Act of 1978 is amended by striking out "September 30, 1981, and September 30, 1982," and inserting in lieu thereof "and September 30, 1981,".

INTERSTATE SYSTEM RESURFACING APPORTIONMENT

SEC. 105. Section 104(b)(5)(B) of title 23, United States Code, is amended to read as follows:

"(B) For resurfacing, restoring, rehabilitating, and reconstructing the Interstate System:

"60 per centum in the ratio that lane miles on the Interstate routes designated under sections 103 and 139(c) of this title (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such lane miles in all States; and 40 per centum in the ratio that vehicle miles traveled on lanes on the Interstate routes designated under sections 103 and 139(c) of this title (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such vehicle miles in all States. Notwithstanding the preceding sentence, no State excluding any State that has no interstate lane miles shall receive less than one-half of 1 per centum of the total apportionment made by this subparagraph for any fiscal year.".

INTERSTATE SYSTEM RESURFACING AUTHORIZATION

SEC. 106. Section 105 of the Federal-Aid Highway Act of 1978 is amended to read as follows: "In addition to any funds authorized to be appropriated, there is authorized to be appropriated out of the Highway Trust Fund, not to exceed $175,000,000 per fiscal year for each of the fiscal years ending September 30, 1980, and September 30, 1981, not to exceed $275,000,000 for the fiscal year ending September 30, 1982, not to exceed $875,000,000 for the fiscal year ending September 30, 1983, not to exceed $1,300,000,000 for the fiscal year ending September 30, 1984, not to exceed $1,700,000,000 for the fiscal year ending September 30, 1985, not to exceed $1,700,000,000 for the fiscal year ending September 30, 1986, and not to exceed $2,200,000,000 for the fiscal year ending September 30, 1987. Such sums shall be obligated for projects for resurfacing, restoring, rehabilitating, and reconstructing routes of the Interstate System designated under sections 103 and 139(c) of title 23, United States Code (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978), except that where a State certifies to the Secretary that any part of such sums are in excess of the needs of such State for resurfacing, restoring, rehabilitating, and reconstructing the Interstate System and the Secretary accepts such certification, such State may transfer sums apportioned to it under section 104(b)(5)(B) to its apportionment under section 104(b)(1) of title 23, United States Code. Such sums may also be obligated for projects for resurfacing, restoring, rehabilitating and reconstructing a toll road which has been designated as a part of the Interstate System if an agreement satisfactory to the Secretary of Transportation has been reached with the State highway department and any public authority with jurisdiction over such toll road prior to the approval of such project that the toll road will become free to the public upon the collection of tolls sufficient to liquidate the cost of the toll road or any bonds outstanding at the time constituting a valid lien against it, and the cost of maintenance and operation and debt service during the period of toll collections. The agreement referred to in the preceding sentence shall contain a provision requiring that if, for any reason, a toll road receiving Federal assistance under this section does not become free to the public upon collection of sufficient tolls, as specified in the preceding sentence, Federal funds used for projects on such toll road pursuant to this section shall be repaid to the Federal Treasury.".

INTERSTATE SYSTEM RESURFACING

SEC. 107. (a) Section 119(a) of title 23, United States Code, is amended by striking out the words "and rehabilitating" and by inserting in lieu thereof the words "rehabilitating, and reconstructing" and by striking out the words "those lanes in use for more than five years on the Interstate System" and inserting in lieu thereof the words "routes of the Interstate System designated under sections 103 and 139(c) of this title.".

(b) Section 119 of title 23, United States Code, is further amended by adding the following new subsection:

"(b) Reconstructing as authorized in subsection (a) of this section may include, but is not limited to, the addition of travel lanes and the reconstruction of interchanges and overcrossings along existing completed interstate routes, including the acquisition of right-of-way where necessary.".

HOLD HARMLESS—INTERSTATE RESURFACING

SEC. 108. (a) The amount a State, excluding any State that has no interstate mileage, receives by apportionment on October 1, 1981, under section 104(b)(5)(B) of title 23, United States Code, shall be sufficient to assure that its total apportionments under section 104(b)(5) of title 23, United States Code, are not less than that which would have been made on October 1, 1981, to such State under section 104(b)(5) of title 23, United States Code, prior to the enactment of this Act.

(b) There is hereby authorized to be appropriated out of the Highway Trust Fund, $100,000,000 for the fiscal year ending September 30, 1983 to carry out this section. Funds authorized to be appropriated by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code.

INTERSTATE SUBSTITUTION AUTHORIZATION

SEC. 109. (a) In addition to any funds authorized to be appropriated out of the general fund, there is authorized to be appropriated, out of the Highway Trust Fund, for substitute highway projects under section 103(e)(4) of title 23, United States Code, $225,000,000 for the fiscal year ending September 30, 1983, $250,000,000 for the fiscal year ending September 30, 1984, $250,000,000 for the fiscal year ending September 30, 1985, and $300,000,000 for the fiscal year ending September 30, 1986. Funds authorized to carry out this section shall be available for obligation in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

(b)(1) The first sentence of section 103(e)(4) of title 23, United States Code is amended by striking "which is within an urbanized area or which passes through and connects urbanized areas within a State and".

(2) The second sentence of section 103(e)(4) of title 23, United States Code is amended by striking "which will serve the urbanized area and the connecting nonurbanized area corridor from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the urbanized area or area to be served, and which are submitted by the Governor of the State in which the withdrawn route was located." and inserting in lieu thereof, "which will serve the area or areas from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the urbanized area or areas to be served if the withdrawn interstate route or portion thereof was within an urbanized area or passed through and connected urbanized areas, which are selected by the Governors of the States in which the withdrawn route was located if the withdrawn route was not within an urbanized area or did not pass through and connect urbanized areas, and which are submitted by the Governors of the States in which the withdrawn route was located.".

(c) Section 103(e)(4) of title 23, United States Code, is amended by adding at the end of such subsection the following: "Any route or segment thereof added to the Interstate System after March 7, 1978, pursuant to specific legislation will not be eligible for withdrawal and substitution under this subsection.".

(d) The first sentence of section 120(d) of title 23, United States Code, is amended by inserting after the words "traffic control signalization," the following: "including traffic control signalization projects under section 103(e)(4) of this title, notwithstanding the provisions of the fifth sentence of section 103(e)(4),".

PRIMARY PROGRAM

SEC. 110. (a) The first sentence of subsection (b)(1) of section 104 of title 23, United States Code, is amended by striking out "and priority primary routes".

(b) The first sentence of subsection (c) of section 104 of the Federal-Aid Highway Act of 1978 is amended by striking out "September 30, 1981 and September 30, 1982," and inserting in lieu thereof the following: "and September 30, 1981,".

(c) Section 147 of title 23, United States Code, is repealed.

(d) The analysis of chapter 1 of title 23 is amended by deleting

"147. Priority Primary Routes."

and inserting in lieu thereof

"147. Repealed.".

FEDERAL-AID URBAN PROGRAM

SEC. 111. Section 103 of title 23, United States Code, is amended by deleting subsection (d) and inserting in lieu thereof the following:

"(d) The Secretary may approve Federal-aid urban programs in urban areas which programs shall be selected by the appropriate local officials so as to serve the goals and objectives of the community, with the concurrence of the State highway department, as provided in section 105 of this title. The programs shall facilitate transportation in the urban area and include projects to: reduce congestion and improve the flow of traffic on arterial and collector routes, aid integration of different transportation modes to and from airports and other terminals and business districts, support clean air and energy conservation objectives, make highway capital improvements, improve highway safety, eliminate safety hazards and roadside obstacles, implement transportation systems management activities and serve other national goals and objectives. All public roads in urban areas are eligible except those on the primary system and the Interstate System. The applicable provisions of chapters 1 and 3 of this title, including provisions applicable to Federal-aid systems, shall apply to urban programs, except those provisions determined by the Secretary to be inconsistent with this subsection. The Secretary shall not waive the

applicability of the planning requirements of section 134 of this title.".

FEDERAL-AID RURAL PROGRAM

SEC. 112. Section 103 of title 23, United States Code, is amended by deleting subsection (c) and inserting in lieu thereof:

"(c) The Federal-aid rural program shall be selected by the State highway agencies and the appropriate local road officials in cooperation with each other, subject to approval by the Secretary as provided in subsection (f) of this section and section 105 of this title. In making such selections, the needs of agriculture roads, rural mail routes, public school bus routes, local rural roads, airport and water port access roads, and goods movement shall be considered. All public roads, except those on the primary system, the Interstate System, and those in urban areas are eligible. Projects to improve highway safety and nonurbanized public transportation projects, including facilities and technical assistance, are also eligible for assistance under this section. The applicable provisions of chapters 1 and 3 of this title, including provisions applicable to Federal-aid systems, shall apply to rural programs, except those provisions determined by the Secretary to be inconsistent with this subsection.".

TRANSFERABILITY

SEC. 113. Paragraphs (1) and (2) of subsection (d) of section 104 of title 23, United States Code, are amended by striking out "50" each place it appears and inserting in lieu thereof at each such place "100".

HIGHWAY SAFETY IMPROVEMENT PROGRAM

SEC. 114. (a) Section 151 of title 23, United States Code, is amended to read as follows:

"§151. Highway safety improvement program

"(a) The Secretary shall establish a highway safety improvement program for projects on any public road or street in rural or urban areas. Assistance shall be available under this program for highway safety improvement projects, as defined in subsection (a) of section 101 of this title; for railway-highway crossing projects as provided for in section 130 of this title; for the implementation of highway-related safety requirements and guidelines issued by the Secretary under section 402 of this title; and for the development, implementation, and evaluation of the highway safety improvement program required under subsection (b) of this section.

"(b) Each State shall develop and implement on a continuing basis a highway safety improvement program including procedures for the planning, implementation, and evaluation of highway safety improvement projects on all highways, with the specific objective of reducing the number and severity of highway traffic accidents. Each State shall have a process for collecting, maintaining, and analyzing accident, traffic, and highway data; for conducting engineering studies of hazardous locations, sections and elements, for assigning priorities to the various types of hazards identified; for implementing safety improvement projects in accordance with the priorities developed; and for the evaluation of the safety benefits obtained.

"(c) Of the funds authorized to carry out this section each State shall expend 35 per centum of the sums apportioned for projects under section 203 of the Highway Safety Act of 1973 unless the State requests the Secretary to waive this minimum and the Secretary finds other safety projects are of a higher priority.

"(d)(1) Funds authorized to carry out this section shall be available for expenditure for projects on any public road (other than the Interstate System).

"(2) The Federal share payable on any project under this section shall not exceed 90 per centum of the cost thereof except that the Federal share of safety improvement projects for the elimination of hazards of rail-highway crossings shall not exceed that as provided in section 120(d) of this title.

"(3) The unobligated balance of contract authority established prior to enactment of this section for carrying out section 402 by the Federal Highway Administration shall remain available for obligation as provided prior to enactment of this section and shall lapse not later than September 30, 1984.

"(e) Funds authorized to be appropriated to carry out this section shall be apportioned to the States as follows: 60 per centum in the ratio which the population of each State bears to the total population of all States, and 40 per centum in the ratio which the public road mileage in each State bears to the total public road mileage in all States. The annual apportionment for each State shall not be less than one-half of 1 per centum of the total apportionment. Such sums shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under section 104(b)(1), except that the Secretary is authorized to waive such provisions of this title that he deems inconsistent with the purposes of this section.

"(f) In any State wherein the State is without legal authority to construct or maintain a project under this section, such State shall enter into a formal agreement for such construction or maintenance with the appropriate local officials of the county or municipality in which such project is located.

"(g) One-half of 1 per centum of funds authorized for carrying out this section shall be made available to the Secretary of the Interior, who shall exercise the responsibilities assigned to States under subsection (b) of this section in carrying out this section on Indian reservations. Such funds shall be subject to a deduction of not to exceed 5 per centum for the necessary costs of administering the provisions of this section.

"(h) Each State shall report to the Secretary of Transportation not later than December 30 of each year, on the progress being made to implement the highway safety improvement program and the effectiveness of safety improvements in reducing the number and severity of accidents. The Secretary of Transportation shall submit a report to the Congress not later than April 1 of each year on the progress being made by the States in implementing the highway safety improvement program.".

(b) Section 152 of title 23, United States Code, is repealed.

(c) The analysis of chapter 1 of title 23, United States Code, is amended by deleting

"151. Pavement marking demonstration program.", and

"152. Hazard elimination program.",

and inserting in lieu thereof

"151. Highway safety improvement program.", and

"152. Repealed.".

(d) Section 203(e) of the Highway Safety Act of 1973 (Public Law 93-87), as amended by the Congressional Reports Elimination Act of 1980 (Public Law 96-470), is repealed.

HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION PROGRAM APPORTIONED FUNDS

SEC. 115. (a) Subsection (e) of section 144 of title 23, United States Code, is amended to read as follows:

"(e) Funds authorized to carry out this section shall be apportioned among the several States on October 1 of the fiscal year for which authorized according to the following formula: All deficient bridges will be divided into four categories: (1) Federal-aid system bridges, and bridges on public roads functionally classified as major collectors, eligible for replacement, (2) Federal-aid system bridges, and bridges on public roads functionally classified as major collectors, eligible for rehabilitation, (3) off-system bridges eligible for replacement, and (4) off-system bridges eligible for rehabilitation. The square footage of deficient Federal-aid system bridges, or bridges on public roads functionally classified as major collectors, both those eligible for replacement and those eligible for rehabilitation, shall be multiplied by a factor of two. The square footage of deficient bridges in each category shall be multiplied by the average national unit cost, on a State-by-State basis, as determined by the Secretary; and the total cost of each State divided by the total cost of the Nation's deficient bridges shall yield the apportionment factors. No State shall receive more 9 per centum or less than 0.25 per centum of the total apportionment for any one fiscal year. The Secretary shall make these determinations based upon the latest available data, which shall be updated annually. Funds authorized to carry out this section which are apportioned under this section shall be available for expenditure for three years after the close of the fiscal year for which they are authorized.".

(b) Notwithstanding any other provision of law or Federal regulation, any new bridge which is to be constructed pursuant to section 144 of title 23, United States Code, in tandem with any existing major structure built after June 28, 1969, with no more than 2.7 miles of highway between them need not carry a roadway width in excess of 69 feet.

FEDERAL LANDS HIGHWAYS

SEC. 116. Section 101 of title 23, United States Code, is amended by adding the following subsection:

"(f) It is the sense of Congress that Federal roads which are public roads receive the same uniform policies as roads which are on the Federal-aid systems or under the Federal-aid programs. The Congress therefore finds that in order to accomplish this objective there shall be a coordinated Federal lands highway program which shall consist of the forest highways, park roads, parkways, Indian reservation roads, and public lands highways. Appropriations for the construction and improvement of such Federal roads shall be administered by the Secretary in conformity with regulations jointly approved by him and the Secretaries of the appropriate Federal land managing agencies.".

CARPOOL AND VANPOOL PROJECTS

SEC. 117. (a) Section 120(d) of title 23, United States Code, is amended by inserting before the words "may amount to 100 per centum" the words "or commuter carpooling or vanpooling".

(b) Section 142 of title 23, United States Code, is amended as follows:

(1) In subsection (a)(1) delete in the first sentence the words "bus lanes" and inserting in lieu thereof the following: "high occupancy vehicle lanes" and by deleting the words "bus and other" and inserting in lieu thereof the following: "high occupancy vehicle and".

(2) In subsection (b) delete the word "bus" and in lieu thereof insert "high occupancy vehicle".

(3) In subsection (f) delete the words "public mass transportation systems" and in lieu thereof insert "high occupancy vehicles".

(c) The Secretary of Transportation is authorized and directed to expend such sums as are necessary out of the administrative funds authorized by subsection (a), section 104, title 23, United States Code to carry out the provisions of subsection (d), section 126 of the Federal-Aid Highway Act of 1978.

(d) Section 146 of title 23, United States Code, is amended by redesignating existing subsection (b) as subsection (c) and by inserting the following new subsection (b):

"(b)(1) The Secretary may approve for Federal financial assistance from funds apportioned under section 104(b)(5)(B) of this title, projects for designating existing facilities, or for acquisition of rights of way or construction of new facilities, for use as preferential parking for carpools, provided that such facilities (1) are located outside of a central business district and within an interstate highway corridor, and (2) have as their primary purpose the reduction of vehicular traffic on the interstate highway.

"(2) Nothing in this subsection, or in any rule or regulation issued under this subsection, or in any agreement required by this subsection, shall prohibit (1) any State, political subdivision, or agency or instrumentality thereof, from contracting with any person to operate any parking facility designated or constructed under this subsection, or (2) any such person from so operating such facility. Any fees charged for the use of any such facility in connection with the purpose of this subsection shall not be in excess of the amount required for operation and maintenance, including compensation to any person for operating the facility.

"(3) For the purposes of this subsection, the terms "facilities" and "parking facilities" are synonymous and shall have the same meaning given "parking facilities" in section 137 of this title.".

EMERGENCY RELIEF

SEC. 118. (a)(1) The first sentence of subsection (a) of section 125 of title 23, United States Code, is amended by striking the first sentence thereof and inserting in lieu thereof the following: "An emergency fund is authorized for expenditure by the Secretary, subject to the provisions of this section and section 119 of this title, for the repair or reconstruction of highways, roads, and trails which the Secretary shall find have suffered serious damage as the result of (1) natural disaster over a wide area such as by floods, hurricanes, tidal waves, earthquakes, severe storms, or landslides, or (2) catastrophic failures from any external cause, in any part of the United States. In no event shall funds be used pursuant to this section for the repair or reconstruction of bridges which have been permanently closed to all vehicular traffic by the State because of imminent danger of collapse due to structural deficiencies or physical deterioration.".

(2) Subsection (a) of section 125 of title 23, United States Code, is further amended by inserting in the second sentence, as that sentence read prior to the amendments made by paragraph (1) of this subsection, after the word "appropriated" the words "from the Highway Trust Fund"; by striking the colon in the second sentence and inserting in lieu thereof a period; by deleting "(1)" after the colon in the second sentence; by inserting a period after the words "in such years" and by striking the remainder of the sentence following "in such years".

(b) Notwithstanding any other provision of law, all expenditures made under section 125 of title 23, United States Code, prior to the fiscal year ending September 30, 1978, are authorized to be appropriated from the Highway Trust Fund.

(c) Subsection (a) of section 125 of title 23, United States Code, is amended by inserting in the second sentence after the words "after September 30, 1976," the words "and not more than $150,000,000 is authorized to be expended in any one fiscal year commencing after September 30, 1980.".

(d) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the period at the end of the first sentence, inserting a colon in lieu thereof, and by adding the following: "Provided, That obligations for projects under this section, including those on highways, roads, and trails mentioned in subsection (c) of this section, resulting from a single natural disaster or a single catastrophic failure shall not exceed $30,000,000 in any State.".

(e) The amendments made by subsection (d) of this section shall apply to natural disasters or catastrophic failures which the Secretary finds eligible for emergency relief subsequent to the date of enactment of this section.

(f) Subsection (f) of section 120 of title 23, United States Code, is amended to read as follows:

"(f) The Federal share payable on account of any repair or reconstruction provided for by funds made available under section 125 of this title shall not exceed 75 per centum of the cost thereof: Provided, That the Federal share payable on account of any repair or reconstruction of forest highways, forest development roads and trails, park roads and trails, parkways, public lands highways, public lands development roads and trails, and Indian reservation roads may amount to 100 per centum of the cost thereof. The total cost of a project may not exceed the cost of repair or reconstruction of a comparable facility. As used in this section with respect to bridges and in section 144 of this title, "a comparable facility" shall mean a facility which meets the current geometric and construction standards required for the types and volume of traffic which such facility will carry over its design life.".

(g) All obligations for projects resulting from a natural disaster or catastrophic failure which the Secretary finds to be eligible for emergency relief subsequent to the date of enactment of this subsection shall provide for the Federal share required by subsection (f) of section 120 of title 23, United States Code, as amended by this section.

(h)(1) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the words "the Federal-aid highway systems, including the Interstate System" and by inserting in lieu thereof the words "the Interstate System, the Primary System, and on any routes functionally classified as arterials or major collectors," in the two places the stricken words appear.

(2) Subsection (c) of section 125 of title 23, United States Code, is amended by striking the words "on any of the Federal-aid highway systems" and inserting in lieu thereof the words "routes functionally classified as arterials or major collectors".

ACCESS TO LAKES

SEC. 119. (a) Section 155 of title 23, United States Code, is amended by deleting subsection (e) and inserting in lieu thereof:

"(e) Sums apportioned in accordance with paragraph (2) of section 104(b) of this title shall be available for projects under this section.".

(b) Sums authorized under section 155 of title 23, United States Code, prior to enactment of the section shall continue to be available for the fiscal year authorized and for the three succeeding fiscal years.

(c) Section 104(a)(18) of the Surface Transportation Assistance Act of 1978 is amended by deleting "September 30, 1981, and September 30, 1982" and inserting in lieu thereof "and September 30, 1981".

BICYCLE TRANSPORTATION PROGRAM

SEC. 120. Section 217 of title 23, United States Code is amended—

(1) by striking in the first sentence of subsection (a), the words "and the multiple use of highway rights-of-way" and "on or in conjunction with highway rights-of-way";

(2) by inserting after the first sentence in subsection (a) the following: "Federal-aid highway projects may include nonconstruction programs or projects which can reasonably be expected to enhance the safety and use of bicycles.";

(3) by striking out in subsection (b) the words "that provided in section 120 of this title" and inserting in lieu thereof "100 per centum"; and

(4) by striking out subsection (e).

HIGHLAND SCENIC HIGHWAY

SEC. 121. Section 161(f) of the Federal-Aid Highway Act of 1973, as amended by section 21 of Public Law 96-106, is further amended to read as follows:

"(f) The Highland Scenic Highway as authorized by subsection (a) of this section and all associated lands and rights-of-way shall be managed as part of the Monongahela National Forest for scenic and recreational purposes. Vehicle use shall be confined to passenger cars, recreational vehicles and limited truck traffic to the extent such use is compatible with the purpose for which the highway was constructed. Commercial use by trucks may be limited and controlled by permit.".

ALLOCATION OF URBAN FUNDS

SEC. 122. Section 150 of title 23, United States Code, is amended by adding the following sentence at the end thereof: "Funds allocated to an urbanized area under the provisions of this section may, at the request of the Governor and upon approval of the appropriate local officials of the area and the Secretary, be transferred to the allocation of another such area in the State or to the State for use in any urban area.".

CERTIFICATION DEMONSTRATION

SEC. 123. The Secretary of Transportation is directed to conduct a demonstration program in not more than four States of geographic and population diversity to study the impacts of expanding the availability of the procedures under the Certification Acceptance and Secondary Road Plan programs to other Federal-aid systems or programs as now provided by section 117 of title 23, United States Code. The demonstration program should study the impacts of allowing the Secretary of Transportation to discharge his responsibilities under any Federal law relative to a Federal-aid highway project provided certification is made by the States pursuant to section 117 of title 23, United States Code, and other requirements of Federal law.

DEFENSE ACCESS ROAD

SEC. 124. Section 210(c) of title 23, United States Code, is amended by striking "Not exceeding $5,000,000 of any funds appropriated under the Act approved October 16, 1951 (65 Stat. 422)", and inserting in lieu thereof "Funds appropriated for defense maneuvers and exercises".

MAINTENANCE

SEC. 125. (a) Subsection (a) of section 116 of title 23, United States Code, is amended by striking the second sentence.

(b) Subsection (b) of section 116 of title 23, United States Code, is amended by striking "constructed on the Federal-aid secondary system or within a municipality,".

(c) The second sentence of subsection (c) of section 116 of title 23, United States Code, is amended to read as follows: "If, within ninety days after receipt of such notice, such project has not been put in proper condition of maintenance, the Secretary shall withhold approval of further projects of all types in the State highway district, municipality, county, other political or administrative subdivision of the State, or the entire State, in which such project shall be located, as he deems most appropriate until such project shall have been put in proper condition of maintenance.".

(d) Section 109 of title 23, United States Code, is amended by striking subsection (m) and by relettering subsection (n) as (m).

(e) Section 116 of title 23, United States Code, is amended by adding subsection (f) as follows:

"(f) The Secretary shall issue guidelines describing the criteria applicable to the Interstate System in order to insure that the condition of these routes is maintained at the level required by the purposes for which they were designed. The initial guidelines shall be issued no later than July 1, 1982.".

(f) Section 119 of title 23, United States Code, is amended by striking subsection (b).

(g) Section 116 of title 23, United States Code, is amended by adding subsection (g) as follows:

"(g) Not later than one year after the date of issuance of initial guidelines under subsection (f) of this section each State shall have a program for the Interstate System in accordance with such guidelines. Each State shall certify on January 1 of each year that it has such a program and the Interstate System is maintained in accordance with the program. If a State fails to certify as required or if the Secretary determines a State is not adequately maintaining the Interstate System in accordance with such program, the next apportionment of funds to such State for the Interstate System shall be reduced by amounts equal to 10 per centum of the amount which would otherwise be apportioned to such State under section 104 of this title. If, within one year from the date the apportionment for a State is reduced under this subsection, the Secretary determines that such State is maintaining the Interstate System in accordance with the guidelines the apportionment of such State shall be increased by an amount equal to the reduction. If the Secretary does not make such a determination within such one year period, the amount withheld shall be reapportioned to all other eligible States.".

CONSTRUCTION

SEC. 126. (a) Subsection (a) of section 114 of title 23, United States Code is amended to read as follows:

"(a) The construction of any highways or portions of highways located on a Federal-aid system or under a Federal-aid program shall be undertaken by the respective State highway departments or under their direct supervision. The construction work and labor in each State shall be in accordance with the laws of that State and applicable Federal laws. Except as provided in section 117 of this title, the Secretary shall establish procedures for the inspection and approval of such construction. Construction may begin as soon as funds are available pursuant to subsection (a) of section 118 of this title. The State highway department shall not erect any informational signs other than official traffic control devices conforming with standards developed by the Secretary on any project where actual construction is in progress and visible to highway users.".

(b) Subsection (c) of section 121 of title 23, United States Code is amended by striking the words "following inspections".

RESEARCH AND PLANNING

SEC. 127. (a) Subsection (c) of section 307, title 23, United States Code, is amended by adding paragraph (5) as follows:

"(5) The sums provided pursuant to paragraph (2) of this subsection shall be combined and administered by the Secretary as a single fund which shall be available for obligation for the same period as funds apportioned under section 104(b)(1) of this title.".

(b) Section 120 of title 23, United States Code, is amended by adding a subsection (i) as follows:

(i) The Federal share payable on account of any project financed under section 307(c) of this title shall be 85 per centum, except that in the case of any State containing nontaxable Indian lands, individual and tribal, and public domain lands (both reserved and unreserved) exclusive of national forests and national parks and monuments, exceeding 5 per centum of the total area of all lands therein, the Federal share shall be increased by a percentage of the remaining cost equal to the percentage that the area of all such lands in such State is of its total area, except that such Federal share payable on any project in any State shall not exceed 95 per centum of the total cost of any such project.".

BRIDGE RECONSTRUCTION

SEC. 128. (a) The Secretary of Transportation may approve any project for the reconstruction, resurfacing, restoration, or rehabilitation of any bridge on the Interstate System which is both owned by the United States Government and located in two States and the District of Columbia, whenever both such States and the District shall submit to the Secretary for approval appropriate plans, specifications, and estimates for any such project.

(b) The Secretary of Transportation shall prior to approval of such project enter into an agreement with such States and the District for future maintenance and rehabilitation of the bridge.

(c) There is hereby authorized to be appropriated $60,000,000, out of the Highway Trust Fund, to be available until expended, to carry out the provisions of this section. Such sums shall be available for obligation in the same manner and to the same extent as if such funds were apportioned for the Interstate System under chapter 1 of title 23, United States Code. The Federal share of the project cost shall be 100 per centum.

(d) In making any revised estimate of the cost completing the Interstate System, which estimate is required by section 104(b)(5)(A) of title 23, United States Code, to be transmitted to the Congress after the date of enactment of this Act, the Secretary of Transportation shall not include any costs for any bridge eligible for approval under subsection (a). The Secretary shall reduce apportionments made under section 104(b)(5) of title 23, United States Code, to such States or District by an amount, if any, equal to amounts apportioned under such section to any such State or District with respect to any such bridge for any fiscal year ending before October 1, 1981. The reduction, if any, made by the preceding sentence for each State or the District shall be made out of apportionments under such section to such State or the District, beginning with the apportionment for the fiscal year ending September 30, 1983, and shall be made, in equal shares, over the number of fiscal years in which apportionments described in the preceding sentence were made.

NONDISCRIMINATION

SEC. 129. (a) The first and third sentences of subsection (a) of section 140 of title 23, United States Code, are amended by striking the words "or national origin" and inserting in lieu thereof the words "national origin or sex".

(b) Section 140 of title 23, United States Code, is amended by adding new subsection (c) as follows:

"(c) The Secretary, in cooperation with any other department or agency of the Government, State agency, authority, association, institution, corporation (profit or nonprofit), or any other organization or person, is authorized to develop, conduct, and administer training programs and assistance programs in connection with any program under this title in order that minority businesses may achieve proficiency to compete, on an equal basis, for contracts and subcontracts. Whenever apportionments are made under subsection 104(b) of this title, the Secretary shall deduct such sums as he may deem necessary, not to exceed $10,000,000 per fiscal year, for the administration of this subsection. The provisions of section 3709 of the Revised Statute, as amended (41 U.S.C. 5), shall not be applicable to contracts and agreements made under the authority herein granted to the Secretary notwithstanding the provisions of 41 U.S.C. 252(e).".

(c) The title of section 140 of title 23, United States Code, is amended to read:

"§140. Nondiscrimination"

and the analysis of chapter 1 of title 23, United States Code, is amended by striking out

"140. Equal employment opportunity."

and inserting in lieu thereof

"140. Nondiscrimination.".

INTERAGENCY AGREEMENTS

SEC. 130. (a) Chapter 1 of title 23, United States Code, is amended by adding after section 156 the following new section:

"§157. Interagency agreements

"Not later than one hundred and eighty days after the date of enactment of this section, the Secretary shall enter into agreements with the Secretaries of the Departments of Interior and Defense, the Administrator of the Environmental Protection Agency, and the heads of such other Federal departments, agencies, and instrumentalities as the Secretary determines, to minimize, to the greatest extent possible, duplication, paperwork, and delays in the development and approval of projects under this title and any other provision of law relating to the Federal highway programs. Notwithstanding any other provision of law, such agreements shall provide that actions on applications or requests for permits, licenses, findings, and other approvals and determinations required for such projects will be fully coordinated by the Department of Transportation with the review process established under the National Environmental Policy Act of 1969, as amended, and, to the greatest extent practicable, that a deci-

sion with respect to each such application or request will be made contemporaneously with approval of the environmental impact statement, finding of no significant impact, or categorical exclusion required for such project, but in no event later than ninety days after the date of approval of such environmental review document.".

(b) The analysis of chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following:

"157. Interagency agreements.".

FEDERAL SHARE—FEDERAL-AID RURAL AND URBAN PROGRAMS

SEC. 131. Section 120(a) of title 23, United States Code, is amended (1) by adding after "75 per centum of the cost of construction" wherever it occurs the following: "for projects on the Federal-aid primary system and for projects to resurface, restore, rehabilitate, and reconstruct the Federal-aid Interstate System and 50 per centum of the cost of construction for projects under the Federal-aid rural program and the Federal-aid urban program," and (2) by adding the following new sentence at the end thereof: "The Federal share payable on account of any project under the Federal-aid rural program or the Federal-aid urban program which the Secretary has approved prior to enactment of the Federal-Aid Highway Improvement Act of 1981 shall not exceed 75 per centum of the cost of construction subject to the conditions set forth in this subsection or at the option of the State the Federal share may be revised to 50 per centum of such cost, but the Federal share payable for any such project which the Secretary approves after enactment of such Act shall not exceed 50 per centum of the cost of construction subject to the conditions set forth in this subsection.".

OBLIGATION LIMITATION AND ALLOCATION FORMULA

SEC. 132. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year 1982 shall not exceed $7,700,000,000. This limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, or projects covered under section 320 of title 23, United States Code, section 147 of the Surface Transportation Assistance Act of 1978, sections 109 and 129 of the Federal-Aid Highway Improvement Act of 1981, and the third sentence of subsection 218(a) of title 23, United States Code, as added by this Act. No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code, or section 147 of the Surface Transportation Assistance Act of 1978.

(b) For the fiscal year 1982, the Secretary shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.

(c) During the period October 1 through December 31, 1981, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, 1982, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

NATIONAL MAXIMUM SPEED LIMIT

SEC. 133. Section 154(f) of title 23, United States Code, is amended to read as follows:

"(f) If the data submitted by a State pursuant to subsection (e) of this section show that the percentage of motor vehicles exceeding fifty-five miles per hour is greater than 50 per centum, the Secretary shall reduce the State's apportionment of Federal-aid highway funds under each of sections 104(b)(1), 104(b)(2), and 104(b)(6) of this title in an aggregate amount of up to 5 per centum of the amount to be apportioned for the following fiscal year.".

MARYLAND TRANSPORTATION AUTHORITY

SEC. 134. (a) The Act entitled "An Act authorizing the State of Maryland, by and through its State Roads Commission of the successors of said Commission, to construct, maintain, and operate certain bridges across streams, rivers, and navigable waters which are wholly or partly within the State", approved April 7, 1938, and the Act of June 16, 1948 (62 Stat. 463, Public Law 654, 80th Congress), as amended by the Act of November 17, 1967 (81 Stat. 466, Public Law 144, 90th Congress), are hereby repealed.

(b) The State of Maryland, by and through the Maryland Transportation Authority or the successors of such Authority, is authorized, subject to all applicable Federal laws, (1) to continue to collect tolls after the date of enactment of this Act from its existing transportation facilities projects, as defined on the date of enactment of this Act in the laws of the State of Maryland, and (2) to use the revenues from such tolls for transportation projects of the type which the State or the Maryland Transportation Authority is authorized to construct, operate, or maintain under the laws of the State of Maryland as such laws exist on the date of enactment of this Act.

INTERSTATE SYSTEM ADDITIONS

SEC. 135. Section 139 of title 23, United States Code, is amended by adding a new subsection (c) as follows:

"(c) The Secretary shall designate those portions of highway segments on the Federal-aid primary system in States which have no Interstate System that are logical components to a system serving the State's principal cities, national defense needs and military installations, and traffic generated by rail, water, and air transportation modes. The designated segments shall have been constructed to the geometric and construction standards adequate for current and probable future traffic demands and the needs of the locality of the segment. The mileage of any highway designated as part of the Interstate System under this subsection shall not be charged against the limitation established by the first sentence of section 103(e)(1) of this title. The designation of a highway under this subsection shall create no Federal financial responsibility with respect to such highway, except that the State involved may use Federal-aid highway funds available to it under sections 104(b)(1) and 104(b)(5)(B) of this title, for the resurfacing, rehabilitation, restoration, and reconstruction of a highway designated as a route on the Interstate System under this subsection.".

ALASKA HIGHWAY

SEC. 136. (a) Subsection (a) of section 218 of title 23, United States Code, is amended by adding after the second sentence the following: "In addition to such funds, the State of Alaska is authorized to expend on such highway any Federal-aid highway funds apportioned to the State of Alaska under this title as its Federal share. Notwithstanding any other provision of law any obligation limitation enacted for fiscal year 1982 or for any fiscal year thereafter shall not apply to projects authorized by the previous sentence.".

(b) This amendment shall be effective upon the date of the enactment of this Act.

THE MAINE TURNPIKE

SEC. 137. Section 145 of the Federal-Aid Highway Act of 1978 is amended to read as follows:

"SEC. 145. (a) Upon satisfaction by the State of Maine or the Maine Turnpike Authority of the following conditions, the State of Maine and the Maine Turnpike Authority shall be free of all restrictions with respect to the imposition and collection of tolls or other charges on the Maine Turnpike or for the use thereof contained in title 23, United States Code, or in any regulation or agreement thereunder:

"(1) repayment by the State of Maine or the Maine Turnpike Authority to the Treasurer of the United States of the sum of $8,577,900 which is the amount of Federal-aid highway funds received for construction of interchanges or connections with the Maine Turnpike at West Gardiner, Kennebec County, Maine, at York, York County, Maine, and at Scarborough-South Portland, Cumberland County, Maine. The amount to be repaid shall be deposited to the credit of the appropriation for 'Federal-Aid Highway (Trust Fund)'. Such repayment shall be credited to the unprogramed balance of the Federal-aid highway funds of the classes determined by the Secretary to and in cooperation with the State of Maine. The amount so credited shall be in addition to all other funds then apportioned to such State and shall be available for expenditure in accordance with the provisions of title 23, United States Code.

"(b) The State of Maine and the Maine Turnpike Authority are deemed to be in compliance with section 129(c) of title 23, United States Code: Provided, That the conditions of subsection (a) are satisfied.".

REDWOOD BYPASS HIGHWAY

SEC. 138. Section 152 of the Federal-Aid Highway Act of 1978 is amended by adding after "fiscal year 1981" the following "and $55,000,000 for fiscal year 1983".

VENDING MACHINE DEMONSTRATION PROJECT EXTENSION

SEC. 139. The vending machine demonstration project authorized by section 153 of the Surface Transportation Assistance Act of 1978 shall be extended for a period not later

than two years after the date of enactment of this section.

REIMBURSEMENT

SEC. 140. In any case in which the city of Santa Rosa, California, has incurred costs on behalf of the State of California for the acquisition, between the date of enactment of Public Law 94-154 and the date of enactment of the Federal-Aid Highway Act of 1976 (Public Law 94-280), of land which was utilized in a Federal-aid urban system project at an intersection with a segment of the Federal-aid primary system, the Secretary of Transportation is authorized, notwithstanding any other provision of law, to reimburse the State of California from funds apportioned to the State of California under section 104(b)(6) of title 23, United States Code, 75 per centum of such costs.

INTERSTATE WITHDRAWAL STUDY

SEC. 141. The Secretary of Transportation is directed to study problems relating to sections of the Interstate System which do not provide correctivity and could be withdrawn for a substitute highway project. Such study shall include alternative funding methods available if such section is withdrawn under section 103(e)(4) of title 23, United States Code. The study together with recommendations shall be transmitted to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives not later than March 31, 1982.

TECHNICAL AMENDMENTS

SEC. 142. (a) Section 101(a) is amended as follows:

(1) In the tenth sentence, by inserting the words "or under one of the Federal-aid programs" immediately after the words "Federal-aid systems";

(2) In the nineteenth sentence, by striking the period at the end thereof and adding the words "or under the Federal-aid programs.";

(3) In the thirtieth sentence, by deleting the words "secondary system" and inserting in lieu thereof the words "rural program", and by deleting the word "system" and inserting in lieu thereof the word "program";

(4) In the thirty-first sentence, by deleting the word "system" each time it appears and inserting in lieu thereof the word "program"; and

(5) By adding after the twenty-eighth sentence the following sentence: "The term "Federal-aid program" means any one of the Federal-aid highway programs described in section 103 of this title.".

(b)(1) Section 103 is amended by adding to the title the words "and programs" after the words "Federal-aid systems";

(2) Section 103(a) is amended to read as follows: "For the purpose of this title, the Federal-aid systems, which consist of the primary system and the Interstate System, along with the Federal-aid programs, which consist of the Federal-aid rural program and the Federal-aid urban program, are established and continued pursuant to the provisions of this section.";

(3) Section 103(f) is amended to read as follows: "The Secretary shall have authority to approve in whole or in part the Federal-aid primary system, the Federal-aid rural program, the Federal-aid urban program, and the Interstate System, as and when such systems and programs or portions thereof are designated, or to require modifications or revisions thereof. No Federal-aid system or program or portion thereof shall be eligible for projects in which Federal funds participate until approved by the Secretary.";

(4) Subsection (g) and (h) of section 103 are repealed; and

(5) The analysis of chapter 1 of title 23 is amended by deleting

"103. Federal-aid systems."

and inserting in lieu thereof

"103. Federal-aid systems and programs.".

(c) Section 104 is amended as follows:

(1) In subsection (a) and (b)(1), by inserting the words "and programs" immediately after the words "Federal-aid systems" each time they appear;

(2) In paragraph (2) of section 104(b), by deleting the words "secondary system" and inserting in lieu thereof the words "rural program";

(3) By deleting paragraph (4) of section 104(b);

(4) By redesignating paragraph "(5)" as paragraph "(4)", and by deleting therein the first full sentence and the fifth sentence through the twenty-first sentence;

(5) By redesignating paragraph "(6)" as paragraph "(5)", and by deleting the word "system" and inserting in lieu thereof the word "program";

(6) In subsection (c)(1), by deleting the phrase ", commencing with the apportionment of funds authorized to be appropriated under subsection (a) of section 102 of the Federal-aid Highway Act of 1956 (70 Stat. 374),"; and

(7) In subsection (f)(1), by inserting the words "and programs" immediately after the words "Federal-aid systems".

(d) Section 105 is amended as follows:

(1) In the first sentence of subsection (a) by inserting the words "and programs" after the words "Federal-aid systems", and by deleting in the third sentence the comma and all that follows and inserting a period after the word "part"; and

(2) In subsection (d) by deleting the words "programs for", and by deleting the words "on the Federal-aid urban system" and inserting in lieu thereof the words "under the Federal-aid urban program".

(e) Section 106(d) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(f)(1) Section 108(a) is amended by inserting the words "or under any of the Federal-aid highway programs," immediately after the words "Interstate System," the first time they appear, and by inserting the words "and programs" immediately after the words "Federal-aid highway systems" the second time they appear;

(2) Section 108(c)(2) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system"; and

(3) The last sentence of section 108(c)(3) is amended by inserting the words "or under the Federal-aid program" immediately after the words "Federal-aid system".

(g)(1) Section 109(a) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system";

(2) Section 109(c) is amended by deleting the words "Projects on the Federal-aid secondary system" and inserting in lieu thereof the words "Federal-aid rural program projects";

(3) Section 109(e) is amended by deleting the phrase "No funds shall be approved for expenditure on any Federal-aid highway," and inserting in lieu thereof the following phrase: "No funds shall be approved for expenditure on any highway on the Federal-aid highway system or under the Federal-aid highway program,";

(4) Section 109(h) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system";

(5) Section 109(i) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system" each time they appear in the first and second sentences, by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system" in the third sentence, by inserting the words "or program" immediately after the words "Federal-aid system" in the fifth sentence, and by inserting the words "or under" immediately after the word "on" in such sentence; and

(6) Section 109(l)(1) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(h)(1) Section 113(a) is amended by deleting the words "the primary and secondary, as well as their extensions in urban areas, and the Interstate System, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems," and inserting in lieu thereof the words "the primary as well as its extensions in urban areas, and the Interstate System, or under the Federal-aid programs, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems and programs,"; and

(2) Section 113(b) is amended by inserting the words "or under any of the Federal-aid programs" immediately after the words "Federal-aid systems".

(i) Section 115(a) is amended to read as follows: "(a) When a State has obligated all funds for the primary system or for any of the Federal-aid programs apportioned to it under section 104 of this title, and proceeds to construct any projects without the aid of Federal funds, including one or more parts of any project, on the primary system or under any of the Federal-aid programs in such State, as that system may be designated or any of those programs may be comprised at that time, in accordance with all procedures and all requirements applicable to projects on the primary system or under any such program, except insofar as such procedures and requirements limit a State to the construction of projects with the aid of Federal funds previously apportioned to it, the Secretary, upon application by such State and his approval of such application, is authorized to pay to such State the Federal share of the costs of construction of such project when additional funds are apportioned to such State under section 104 of this title if—

(1) prior to the construction of the project the Secretary approves the plans and specifications therefor in the same manner as other projects on the primary system or under the Federal-aid program involved, and

(2) the project conforms to the applicable standards adopted under section 109 of this title.

The Secretary may not approve an application under this section unless an authorization is in effect for the fiscal year for which the application is sought beyond the currently authorized funds for such State and that no application may be approved which will exceed the State's expected apportionment of such authorization.".

(j) Section 118(d) is amended by inserting the words "or under a Federal-aid program"

immediately after the words "Federal-aid system".

(k)(1) Section 120(a) is amended by deleting in the first sentence all of the words between "(a)" and "(A)" and inserting in lieu thereof the words "Subject to the provisions of subsection (d) of this section, the Federal share payable on account of any project, financed with primary, rural, or urban funds, on the Federal-aid primary system, under the Federal-aid rural program, and under the Federal-aid urban program shall either"; and

(2) Section 120(g) is amended by deleting the words "Federal-aid highways" and inserting in lieu thereof the words "Federal-aid projects".

(l) Section 121(c) is amended by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system".

(m) Section 123(a) is amended by deleting the words "the Federal-aid primary or secondary systems or on the Interstate System, including extensions thereof within urban areas," and inserting in lieu thereof the words "a Federal-aid system or under a Federal-aid program,".

(n) Section 124(a) is amended by inserting the words "or under any of the Federal-aid programs," immediately after the phrase "including the Interstate System,".

(o) Section 129 is amended as follows:

(1) In subsection (c), by inserting the words "and programs" immediately after the words "Federal-aid highway systems";

(2) In subsections (f) and (g)(2), by inserting the words "or programs" immediately after the words "Federal-aid systems" each time they appear; and

(3) In subsection (i), by deleting the words "Federal-aid system, other than the Interstate System," and inserting in lieu thereof the words "Federal-aid project other than one of the Interstate System,".

(p) Section 135(b) is amended by placing a period after the word "flow" and deleting the remainder of the sentence.

(q) Section 137(a) is amended by deleting the words "project on the Federal-aid urban system" and inserting in lieu thereof the words "project under the Federal-aid urban program".

(r) Section 140(a) is amended by inserting the words "or under any of the Federal-aid programs" immediately after the words "Federal-aid systems".

(s) Section 141(b) of title 23, United States Code, is amended to read as follows:

"(b) Each State shall certify to the Secretary before January 1 of each year that it is enforcing in accordance with section 127 of this title all State laws respecting maximum vehicle size and weights permitted on all roads receiving funds under the Federal-aid program, including the primary system, the Interstate System, and is a route functionally classified as an arterial or major collector.".

(t) Section 142 is amended as follows:

(1) In subsection (a)(1) by inserting the words "and highways under the Federal-aid programs" immediately after the words "Federal-aid systems", and by deleting the words "as a project on any Federal-aid system";

(2) In subsection (a)(2) by deleting the words "project on the Federal-aid urban system" each place it appears and inserting in lieu thereof "project under the Federal-aid urban program", ; and

(3) In subsection (e)(2) by deleting the words "projects on the Federal-aid urban system" and inserting in lieu thereof "projects under the urban program".

(u) Section 143 is amended as follows:

(1) In subsection (a), (b), and (c) by inserting the words "or under a Federal-aid program" immediately after the words "a Federal-aid system (other than the Interstate System)" each place they appear, and

(2) In subsection (d) and (e) by deleting the words "Federal-aid system on" each time they appear and inserting in lieu thereof the words "Federal-aid system or program on or under".

(v) Section 149 is amended as follows—

(1) by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(2) by amending the analysis of chapter 1 of title 23, United States Code, by deleting:

"150. Allocation of urban system funds.".

and inserting in lieu thereof:

"150. Allocation of urban program funds.".

(w) Section 150 is amended by deleting the word "system" in the title and inserting the word "program" in lieu thereof.

(x) Section 302(b) is amended by deleting the words "on the Federal-aid secondary system," and inserting in lieu thereof the words "under the Federal-aid rural program", and by deleting the words "secondary funds," and inserting in lieu thereof the words "rural funds,".

(y) Section 304 is amended by inserting the words "and highways under the Federal-aid programs" between the word "systems" and the comma.

(z) Section 317(d) is amended by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system".

(aa) Section 320(a) is amended by inserting the words "or programs" immediately after the words "highway systems" in the second sentence.

(bb) Section 322 is amended as follows:

(1) In subsection (c)(1) by deleting the words "any Federal-aid system," and inserting in lieu thereof the words "the Interstate System, the Primary System, or is a route functionally classified as an arterial or major collector,"; and

(2) In subsection (c)(2) by deleting the words "any Federal-aid system," and inserting in lieu thereof the words "the Interstate System, the Primary System, or is not a route functionally classified as an arterial or major collector,".

(cc) Section 402(d) is amended by inserting the words "and programs" immediately after the words "Federal-aid systems".

(dd) Section 117 is amended as follows:

(1) By inserting in subsection (a) the words "or under any Federal-aid programs" immediately after the words "Federal-aid systems".

(2) By deleting in subsection (f)(1) the words "secondary system" where they appear and inserting in lieu thereof the words "rural program".

The Clerk read the House amendment to the Senate amendment, as follows:

Strike out the matter proposed to be stricken and in lieu of the matter proposed to be inserted, insert the following:

That the first sentence of section 105 of the Surface Transportation Assistance Act of 1978 is amended by striking out "per fiscal year for each of the fiscal years ending September 30, 1982 and September 30, 1983," and inserting in lieu thereof "for the fiscal year ending September 30, 1982, not to exceed $800,000,000 for the fiscal year ending September 30, 1983, and not to exceed $800,000,000 for the fiscal year year ending September 30, 1984.".

SEC. 2. The Secretary of Transportation shall apportion for the fiscal year ending September 30, 1983, the sums authorized to be apportioned for such year by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, for expenditures on the National System of Interstate and Defense Highways, using the apportionment factors contained in revised table 5 of the committee print numbered 97-28 of the Committee on Public Works and Transportation of the House of Representatives.

SEC. 3. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year 1982 shall not exceed $8,000,000,000. This limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, or projects covered under section 320 of title 23, United States Code, section 147 of the Surface Transportation Assistance Act of 1978, or section 9 of the Federal-Aid Highway Act of 1981. No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code, or section 147 of the Surface Transportation Assistance Act of 1978.

(b) For the fiscal year 1982, the Secretary shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.

(c) During the period October 1 through December 31, 1981, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, 1982, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

SEC. 4. (a) Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,200,000,000 for the fiscal year ending September 30, 1983," and inserting in lieu thereof the following: "the additional sum of $3,100,000,000 for the fiscal year ending September 30, 1983,".

(b) Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is further amended by adding at the end thereof the following: "Effective on and after the date of enactment of this sentence, the obligation of funds authorized by this subsection, except for advance construction interstate projects approved before the date of enactment of this sentence, shall be limited to the construction necessary to provide a minimum level of acceptable service on the Interstate System which shall consist of (1) full access control; (2) a pavement design to accommodate the types and volumes of traffic anticipated for the twenty-year period from date of authorization of the initial basic construction contract; (3) essential environmental requirements; (4) a design of not more than six lanes (exclusive of high occupancy vehicle lanes) in rural areas and all urbanized areas under four hundred thousand population, and up to eight lanes (exclusive of high occupancy vehicle lanes) in urbanized areas of four hundred thousand population or more as shown in the 1980 Federal census; and (5) those high occupancy vehicle lanes (including approaches and all directly related facilities) included in the interstate cost estimate for fiscal year 1981. The obligation of funds authorized by this subsection shall be further limited to the actual costs of only those design concepts, locations, geometrics, and other construction features included in the 1981 interstate cost estimate, except in any case where the Secretary of Transportation determines that a provision of Federal law requires a different design, location, geometric, or other construction feature of a type authorized by this subsection. For purposes of this subsection, construction necessary to provide a minimum level of acceptable service on the Interstate System shall include, but not be limited to, any construction on the Interstate System which is required under a court order issued before the date of enactment of this sentence.

(c) Section 104(b)(5)(A) of title 23, United States Code, is amended by adding at the end thereof the following new sentence: "Notwithstanding any other provisions of this subparagraph, the Secretary in making the revised estimate of the cost of completing the then designated Interstate System for the purpose of transmitting it to the Senate and House of Representatives within ten days subsequent to Januray 2, 1983, or thereafter, shall include only those costs eligible for funds authorized by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, including the amendments made by section 4 of the Federal-Aid Highway Act of 1981.".

SEC. 5. Section 104(b)(5)(B) of title 23, United States Code, is amended to read as follows:

"(B) For resurfacing, restoring, rehabilitating, and reconstructing the Interstate System:

"55 per centum in the ratio that lane miles on the Interstate routes designated under section 103 and 139(c) of this title (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such lane miles in all States; and 45 per centum in the ratio that vehicle miles traveled on lanes on the Interstate routes designated under sections 103 and 139(c) of this title (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such vehicle miles in all States. Notwithstanding the preceding sentence, no State excluding any State that has no interstate lane miles shall receive less than one-half of 1 per centum of the total apportionment made by this subparagraph for any fiscal year.".

SEC. 6. (a) Section 119(a) of title 23, United States Code, is amended by striking out the words "and rehabilitating" and by inserting in lieu thereof the words "rehabilitating, and reconstructing" and by striking out the words "those lanes in use for more than five years on the Interstate System" and inserting in lieu thereof the words "routes of the Interstate System designated under sections 103 and 139(c) of this title.".

(b) Section 119 of title 23, United States Code, is further amended by adding the following new subsection:

"(b) Reconstructing as authorized in subsection (a) of this section may include, but is not limited to, the addition of travel lanes and the construction and reconstruction of interchanges and overcrossings along existing completed interstate routes, including the acquisition of right-of-way where necessary.".

SEC. 7. Subsection (a) of section 119 of title 23, United States Code, is amended by adding at the end thereof the following: "Effective on and after the date of enactment of this sentence, the Federal share for projects financed by funds apportioned under section 104(b)(5)(B) of title 23, United States Code, for resurfacing, restoring, rehabilitating, and reconstructing routes of the Interstate System designated under sections 103 and 139(c) of this title shall be that set forth in section 120(c) of this title.".

SEC. 8. In any case in which the city of Santa Rosa, California, has incurred costs on behalf of the State of California for the acquisition, between the date of enactment of Public Law 94-154 and the date of enactment of the Federal-Aid Highway Act of 1976 (Public Law 94-280), of land which was utilized in a Federal-aid urban system project at an intersection with a segment of the Federal-aid primary system, the Secretary of Transportation is authorized, notwithstanding any other provision of law, to reimburse the State of California from funds apportioned to the State of California under section 104(b)(6) of title 23, United States Code, 75 per centum of such costs.

SEC. 9. (a) The Secretary of Transportation may approve any project for the reconstruction, resurfacing, restoration, or rehabilitation of any bridge on the Interstate System which is both owned by the United States Government and located in two States and the District of Columbia, whenever both such States and the District shall submit to the Secretary for approval appropriate plans, specifications, and estimates for any such project.

(b) The Secretary of Transportation shall prior to approval of such project into an agreement with such States and the District for future maintenance and rehabilitation of the bridge.

(c) There is hereby authorized to be appropriated $60,000,000, out of the Highway Trust Fund, to be available until expended, to carry out the provisions of this section. Such sums shall be available for obligation in the same manner and to the same extent as if such funds were apportioned for the Interstate System under chapter 1 of title 23, United States Code. The Federal share of the project cost shall be 100 per centum.

(d) In making any revised estimate of the cost completing the Interstate System, which estimate is required by section 104(b)(5)(A) of title 23, United States Code, to be transmitted to the Congress after the date of enactment of this Act, the Secretary of Transportation shall not include any costs for any bridge eligible for approval under subsection (a). The Secretary shall reduce apportionments made under section 104(b)(5) of title 23, United States Code, to such States or District by an amount, if any, equal to amounts apportioned under such section to any such State or District with respect to any such bridge for any fiscal year ending before October 1, 1982. The reduction, if any, made by the preceding sentence for each State or the District shall be made out of apportionments under such section to such State or the District, beginning with the apportionment for the fiscal year ending September 30, 1983, and shall be made, in equal shares, over the number of fiscal years in which apportionments described in the preceding sentence were made.

SEC. 10. Section 139 of title 23, United States Code, is amended by adding a new subsection (c) as follows:

"(c) The Secretary shall designate those portions of highway segments on the Federal-aid primary system in States which have no Interstate System that are logical components to a system serving the State's principal cities, national defense needs and military installations, and traffic generated by rail, water, and air transportation modes. The designated segments shall have been constructed to the geometric and construction standards adequate for current and probable future traffic demands a..d the needs of the locality of the segment. The mileage of any highway designated as part of the Interstate System under this subsection shall not be charged against the limitation established by the first sentence of section 103(e)(1) of this title. The designation of a highway under this subsection shall create no Federal financial responsibility with respect to such highway, except that the State involved may use Federal-aid highway funds available to it under sections 104(b)(1) and 104(b)(5)(B) of this title, for the resurfacing, rehabilitation, restoration, and reconstruction of a highway designated as a route on the Interstate System under this subsection.".

SEC. 11. Section 145 of the Federal-Aid Highway Act of 1978 is amended to read as follows:

"SEC. 145. (a) Upon satisfaction by the State of Maine or the Maine Turnpike Authority of the following conditions, the State of Maine and the Maine Turnpike Authority shall be free of all restrictions with respect to the imposition and collection of tolls or other charges on the Maine Turnpike or for the use thereof contained in title 23, United States Code, or in any regulation

or agreement thereunder: repayment by the State of Maine or the Maine Turnpike Authority to the Treasurer of the United States of the sum of $8,577,900 which is the amount of Federal-aid highway funds received for construction of interchanges or connections with the Maine Turnpike at West Gardiner, Kennebec County, Maine, at York, York County, Maine, and at Scarborough-South Portland, Cumberland County, Maine. The amount to be repaid shall be deposited to the credit of the appropriation for 'Federal-Aid Highway (Trust Fund)'. Such repayment shall be credited to the unprogramed balance of the Federal-aid highway funds of the classes determined by the Secretary to and in cooperation with the State of Maine. The amount so credited shall be in addition to all other funds then apportioned to such State and shall be available for expenditure in accordance with the provisions of title 23, United States Code.

"(b) The State of Maine and the Maine Turnpike Authority are deemed to be in compliance with section 129(c) of title 23, United States Code: Provided, That the conditions of subsection (a) are satisfied.".

SEC. 12 (a) Section 152 of the Federal-Aid Highway Act of 1978 is amended by adding after "fiscal year 1981" the following "and $55,000,000 for fiscal year 1983".

(b) Such section 152 is further amended by adding at the end thereof the following new sentence: "Sums authorized to be appropriated under this section shall not be subject to any State or local law relating to apportionment of funds available for the construction or improvement of highways.".

SEC. 13. This Act may be cited as the "Federal-Aid Highway Act 1981".

Mr. ANDERSON (during the reading). Mr. Speaker, I ask unanimous consent that the House amendment to the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from California?

Mr. SHUSTER. Mr. Speaker, reserving the right to object, I reserve the right to object not because I intend to do so but, rather, to clarify the legislation on the floor.

Mr. Speaker, I yield to the distinguished chairman of the full committee.

□ 1245

Mr. HOWARD. Mr. Speaker, I rise in strong support of the substitute that has been offered by the distinguished chairman of the Subcommittee on Surface Transportation and associate myself totally with his characterization of, and remarks on, this bill. This is the culmination of a year's work, not only among that subcommittee and the full Public Works and Transportation Committee, but among all the Members of the House and, more recently, the other body as well.

The subcommittee chairman from California and the ranking member of the full committee (Mr. CLAUSEN) and of the subcommittee (Mr. SHUSTER) are to be commended not only for their outstanding individual efforts, but for their ability to cooperate and work together to produce a document which is certainly in the public interest, and one which preserves many of the provisions of H.R. 3210, the Federal-Aid Highway Act of 1981, which first passed the House nearly 3 months ago.

This substitute, if enacted, will reduce the cost of completing the Interstate System, from about $53 billion to a level just below $39 billion—a savings of over $14 billion.

At the same time, it allows the country to move, in a meaningful way toward the reconstruction of the Interstate System. We are expanding the present 3-R program to 4-R and increasing that program's funding from $275 million to $800 million. The foresight demonstrated by this Congress in making this significant move will be appreciated by generations of users of our Nation's Interstate System.

Mr. Speaker, the other body adopted a significantly different approach from the House in addressing highway legislation this year. I think the other body has come to recognize, in the past few weeks, that the approach we adopted in H.R. 3210 was, if not the better approach, the one that we could mutually agree on.

Of course, as is the nature of the legislative process, both sides had to give. And we did give on some points. As a result, we have before us a badly needed piece of legislation which significantly improves the face and the structure of the interstate program.

I urge its adoption.

Mr. SHUSTER. Mr. Speaker, I yield to the distinguished ranking minority member of the full committee, the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Speaker, I rise in strong support of the amendment to H.R. 3210 offered by the gentleman from California, our distinguished chairman of the Subcommittee on Surface Transportation, Mr. ANDERSON, and I would like to associate myself with his able description of the amendment being offered and to compliment him for his leadership, patience, and cooperation in bringing about the compromise legislative product we are presenting here today.

I would also like to commend our distinguished colleague from New Jersey, the chairman of the full Committee on Public Works and Transportation, Mr. HOWARD. Were it not for his diligence and initiative, it is highly unlikely that we would have the opportunity to make what I believe are significant contributions to the Federal-aid highway system during the 1st session of the 97th Congress.

On September 24, the Committee on Public Works and Transportation brought before this body H.R. 3210, a 1-year highway bill intended to reconcile the authorizations for fiscal year 1982 with those contained in the Reagan administration budget, and also to make significant changes in the interstate highway program. The interstate changes were intended to redefine interstate completion in terms more realistically achievable, by shifting the emphasis on our interstate program from the new construction mode to one of maintaining our investment in a 42,500-mile network.

I am sure I do not have to remind anyone in this Chamber that because of our economic crisis, it has been necessary to further reduce spending for fiscal year 1982. The amendment we have before us will achieve our highway objectives toward those highway budget reductions. The obligation limitation for the Federal-aid highway system for fiscal year 1982 is set at $8 billion, $200 million below the level set in the original House passed H.R. 3210, as well as in the Budget Reconciliation Act.

While I know a number of you would have preferred to be rising in support of a multiyear highway bill, a position taken by our Senate colleagues, I believe a consensus has been reached supportive of at least immediate needs of our Nation's highway program by reducing costs to complete the Interstate System to a more achievable objective and by expanding our interstate restoration efforts to help begin the task of insuring that our Nation's most costly transportation investment is adequately protected. Even the staunchest supporters of multiyear legislation agree that it is better to make the changes in the definition of interstate completion and begin the interstate 4R program than to allow projects to be obligated during fiscal year 1982 that would be ineligible under the new definition. This amendment to H.R. 3210 satisfies those objectives.

This amendment represents a true compromise with regard to the Interstate Highway System components. Both this Chamber and the Senate redefine interstate completion to reduce the cost-to-complete estimate by some $15 to $17 billion. While both the Senate and House versions were similar, certain elements of the interstate program would have been eligible under one version but not the other. In an effort to resolve these differences, the two redefinitions have been merged to insure that any project eligible under one of the redefinitions would still be eligible under the redefinition contained in this amendment. This merging has been completed and the result is a cost estimate reduced from more than $53 billion to one in the range of $38 billion.

The new interstate completion definition would permit up to six lanes per designated interstate highway in rural areas and urban areas up to 400,000 population and up to eight lanes per designated interstate highways in areas of 400,000 population and above. Those lane limitations would not include high occupancy vehicle lanes. The thrust behind the new definition would be to make interstate construction funds available only to construct interstate segments to a minimum level of acceptable service consisting of full access control and a pavement assigned to accommodate traffic anticipated for the next 20 years. Work no longer fundable under the redefinition of interstate completion would be eligible under the expanded interstate 3R–4R program.

The reduction in the interstate completion category corresponds directly with the expanded interstate 3R–4R program. This newly defined category will fund projects for interstate resurfacing, restoring, rehabilitation, and reconstruction work. Items no longer eligible for funding under the interstate completion category will be eligible for funding under the interstate 4R category. The Federal share for both interstate construction and interstate 4R will be 90 percent.

The redefinition of interstate completion and the new 4R program closely parallel the amendment offered by the distinguished gentleman from Pennsylvania (Mr. SHUSTER) during the markup of H.R. 3210, before the Subcommittee on Surface Transportation last May. The ranking minority member of the subcommittee deserves our recognition and commendation for the lead role he exercised in promoting a redefinition of the interstate program this year.

His efforts are chiefly responsible for transforming a simple 1-year authorization bill into a significant piece of legislation.

The combined funding level for the interstate programs has been increased for fiscal year 1982 from $3.6 billion to $4.025 billion. In addition, the interstate 4R category has been authorized for a second year at a level of $800 million.

During the floor debate on H.R. 3210 this past September, several Members expressed concern about the proposed elimination of the half percent minimum set-aside for smaller States. The amendment under consideration retains the provision guaranteeing that every State will receive at least one-half of 1 percent of the interstate of the interstate construction funds. As was pointed out by our colleagues from Delaware, Vermont, New Hampshire, North Dakota, South Dakota, Maine, Nebraska, and Wyoming, the elimination of the half percent minimum would have denied these States more than half of the interstate money they had been receiving and for which they were planning for fiscal years 1982 and 1983. And these reductions in interstate construction funds would not have been offset by increases and interstate 4R funds under our original bill. In several instances, these States have completed their interstate systems and have major interstate restoration needs. The amendment under consideration cures that defect.

Also included in our amendment is a provision which will provide full Federal funding for rebuilding the Woodrow Wilson Bridge that carries Interstate 95 over the Potomac River. During the floor debate on H.R. 3210, our colleagues, Mrs. HOLT of Maryland and Mr. WOLF and Mr. PARRIS of Virginia, ably described the exigent circumstances that existed on this federally owned bridge on the Interstate Highway System. The provision in this amendment would permit Federal interstate funds to be expended to rehabilitate the bridge at its current lane capacity by the Federal Government. However, to insure that appropriate agreements are reached between the three jurisdictions that most significantly benefit from the Woodrow Wilson Bridge; namely, the Commonwealth of Virginia, the District of Columbia, and the State of Maryland, no moneys may be obligated until the Secretary of Transportation is assured that the three jurisdictions have executed agreements to insure the bridge's continued viability. We would strongly urge the Secretary to encourage the three jurisdictions to expeditiously reach an agreement for the transfer of ownership away from the Federal Government.

I would like to take this opportunity to commend Governor Dalton from the Commonwealth of Virginia and Governor Hughes from the State of Maryland for calling this serious problem to the attention of the Congress, and for their outstanding leadership in the area of transportation.

In addition to the interstate changes, the amendment to H.R. 3210 contains a few other significant provisions, a section has been included which gives the Secretary of Transportation the needed authority to waive technical compliance with Federal requirements in the acquisition of certain real property in connection with the highway project in Santa Rosa, Calif. Under this provision, the State of California would be permitted to use a portion of its Federal-aid apportionment to reimburse the city of Santa Rosa for costs already incurred by the city in connection with the Federal-aid project which meets Federal standards.

Mr. Speaker, this provision rights a misunderstanding that has existed for several years and does not involve any additional money to be expended from the Federal-aid highway system.

I have had conversations with the distinguished ranking member of the Subcommittee on Surface Transportation, the gentleman from Pennsylvania, Mr. SHUSTER, and agree with him that the interstate redefinition changes and projects of national significance are too important not to resolve immediately and, therefore, cannot be delayed until we take up multiyear highway legislation during the next session. However, I want the gentleman from Pennsylvania to know that I share his concern that funds may not currently be distributed in a way to direct dollars to where they are most needed or could be most effectively used in maintaining a national highway network. I know the gentleman is examining new bases for distributing interstate 4R funds. I will be most supportive of considering formula changes next year to achieve a more equitable distribution.

I am also aware of Mr. SHUSTER's concerns about U.S. Route 522 in Huntingdon County, Pa. This situation sounds to me like the type of project that priority primary funds was intended to address. I believe the designation of this project as a priority primary route should be given favorable consideration during our deliberations next session on multiyear highway legislation.

Finally, Mr. Speaker, the amendment to H.R. 3210 contains a provision of national significance not related to the Interstate Highway System. In the Surface Transportation Act of 1978 we included a provision for the construction of a bypass highway that would reroute traffic around the Redwood National Park. We thought at that time that we had provided both the necessary funds and authority to construct the project.

Mr. Speaker, I would like to direct my colleagues attention to section 12 of the compromise bill. This section deals with a matter which has been, and continues to be, of major importance to the Congress.

Briefly stated, section 12 does two things. First, subsection (a) of section 12 provides an additional authorization of $55 million for the Redwood bypass highway project, bringing the total amount authorized to $105 million. And second, subsection (b) of section 12 assures that the Redwood bypass highway project will provide the economic stimulus and the infrastructure improvement which Congress intended to help offset, at least partially, the loss of employment and economic activity associated with expansion of the Redwood National Park.

As I am sure my colleagues remember, in enacting section 152 of the Federal-Aid Highway Act of 1978 and sec-

tion 101(a)(5) of the Redwood National Park Expansion Act of 1978, Congress provided for the construction of a bypass highway around the Redwood National Park in order to divert motor vehicle traffic around the park so as to best serve the needs of the traveling public while preserving the natural beauty of the park.

The Congress regarded this project as unique, a fact clearly reflected in the priority treatment accorded the project in the Federal-Aid Highway Act of 1978 and the Redwood National Park Expansion Act of 1978. This priority reflects the need for the project, long recognized by the Congress, in terms of mobility and safety for the traveling public, access to the park, preservation of its environmental values, and both economic stimulus and infrastructure improvement to help offset partially the loss of employment and economic activity associated with expansion of the Redwood National Park.

Section 12 of the compromise bill before us today addresses two problems which have arisen since the project was authorized in 1978.

The first problem deals with the cost of the project. The California Department of Transportation has estimated that the construction costs of the preferred alternative, taking into account inflation, would be $102 million in 1986 costs. Since Congress authorized only $50 million in the Federal-Aid Highway Act of 1978, an additional authorization is necessary. In order to remedy this situation, subsection (a) of section 12 of the compromise bill authorizes an additional $55 million in contract authority for the Redwood bypass highway project, bringing the total amount authorized to $105 million. This amount should be sufficient to cover the Federal share of the entire cost of the project.

The second problem relates to the decision of the California Department of Transportation that the Federal funds available for the Redwood bypass highway project are subject to California Streets and Highways Code Section 825 which requires 60 percent of all Federal highway funds received by California to be allocated to the southern portion of the State and the remaining 40 percent to be spent in the northern counties. As a result of California's determination that Federal funding for the project is not exempt from this allocation, the four-county transportation district—Humboldt, Del Norte, Lake and Mendocino—would have to postpone many other highway projects in order to fund the Redwood bypass highway.

This is completely contrary to the original intent of Congress. At the time section 152 of the Federal-Aid Highway Act of 1978 was enacted, Congress was acutely aware of the commitments which State, regional, and local governments had made to other highway projects that were already in the pipeline. We did not want to upset or unbalance those priorities in any way. Therefore, the $50 million in funding which we provided for the Redwood bypass highway project was over and above California's normal apportionment of highway funds. Moreover, these funds could only be used for the purpose of building the Redwood bypass highway; they could not be spent on, or allocated to, any other segment of the California highway system. This legislative history clearly demonstrates that Congress was responding to a unique problem in a unique manner, authorizing a priority provision separate from and over and above the assistance provided by the regular Federal-aid programs.

Not only is the decision of the California Department of Transportation contrary to the intent of Congress, but it also totally undermines one of the primary purposes of the project. As I mentioned previously, one of the major purposes of the project was to provide both economic stimulus and infrastructure improvement to help offset, at least partially, the loss of employment and economic activity associated with expansion of the Redwood National Park. This economic stimulus would only occur if the Redwood bypass highway project was in addition to those projects which were already in the pipeline. Therefore, the State's decision, which would result in many other highway projects being postponed in order to fund the bypass, completely negates a primary purpose of the project.

Subsection (b) of section 12, which was added to the compromise bill at my urging, resolves this problem by, in effect, exempting the Redwood bypass highway project from California Streets and Highways Code Section 825. It provides that all of the funds authorized for the bypass highway shall not be subject to any State or local law relating to apportionment of funds available for the construction and improvement of highways. Therefore, subsection (b) of section 12 will have the effect of overturning the decision of the California Department of Transportation that Federal funds for the bypass highway are not exempt from the 40-60 allocation.

Frankly, I am disappointed that we have to resolve this matter at the Federal level. I have felt all along that California had sufficient discretion, in light of the legislative history of the project, to rule that it was not subject to the 40-60 split. Had this been done, we would not have to act today.

However, since California continues to take the position that the legislative history of section 152 of the Federal-aid Highway Act of 1981 does not clearly indicate that the project is to be exempt from California Streets and Highways Code Section 825—40-60 allocation—it is necessary for us to clarify this matter in the legislation before us today.

In carrying out the provisions of section 12 of this act, and section 152 of the Federal Aid Highway Act of 1978, the Secretary of Transportation should work with the Secretary of the Interior or provide for the donation and delivery, to the greatest degree practicable, of raw wood materials to Redwoods United, Inc., a nonprofit corporation located in Manila, Calif.

The raw materials would be obtained during the clearing of the right-of-way for the Redwood bypass highway project and delivered to the Redwoods United site in Manila. The raw materials would include logs, stumps, and chunks which could be used by the corporation in connection with the community services and employment opportunities they provide.

Public Law 95-250, section 101(4) and section 107 originally provided for the continued operation of the Redwoods United workshop by providing for the supply of raw materials from Redwood National Park. Continued supply of raw materials obtained from the right-of-way clearance would be a logical extension of this effort inasmuch as the highway is an extension of the job loss mitigation effort begun after expansion of the park in 1978.

As the park rehabilitation effort winds down it will become more difficult to supply raw materials to Redwoods United. The right-of-way clearance is an excellent opportunity for us to provide several large deliveries of materials to the workshop.

I want to assure my colleagues that the amendments we make today will carry out the original intent of Congress. Since none of the funds authorized for the Redwood bypass highway project will be subject to 40-60 split, funding the project will not result in any other highway projects being postponed, thereby providing the maximum economic stimulus to the region. This is critical in light of loss of employment and economic activity that has resulted from the park expansion.

Mr. Speaker, the amendment to H.R. 3210 achieves changes in the Interstate System which all parties agree are necessary and beneficial to the program. A consensus has now been reached that the issues that will face Congress during the second session during the consideration of comprehensive multiyear surface transportation legislation need not be further complicated by the inclusion of these vital interstate changes. In short, necessary changes can be achieved now without compromising the objectives of the competing interests for surface transportation legislation in 1982. We have received assurances that the

Senate will accept the provisions in this amendment. I urge its adoption.

Mr. SHUSTER. Mr. Speaker, I yield to the gentleman from California (Mr. ANDERSON), chairman of the Subcommittee on Surface Transportation.

Mr. ANDERSON. Mr. Speaker, on April 10 of this year, the chairman, the ranking minority members of the Committee on Public Works and Transportation and the Subcommittee on Surface Transportation and I introduced H.R. 3210, the Federal-Aid Highway Act of 1981. This legislation, essentially, was a 1-year bill which contained increased budget authority in certain of our contract authority Federal-aid highway programs to bring the total authorizations up to the level recommended by the new administration.

To be certain, the administration did propose and send to Congress a bill significantly restructuring these programs and did suggest the adoption of multiyear legislation. Because of the relatively late submission of these proposals, because the Congress spent so much of its time fashioning our Omnibus Budget Reconciliation Act, and because of our May 15 deadline for reporting authorizing legislation from the committee, as mandated in the 1974 Budget Act, it was felt that there was not sufficient time to carefully consider a comprehensive restructuring of our highway program which would certainly have a long lasting impact on the Nation's transportation infrastructure.

Since May 15, the Surface Transportation Subcommittee has held 8 days of hearings, in Washington and in the field, on the country's future transportation needs. It is only now, in the closing days of the 1st session of the 97th Congress, that I feel comfortable drafting legislation which will play such a significant role in shaping the future of our country's transportation policy. I am convinced it would have been a grave error to undertake such an effort before we had increased our knowledge and enhanced our awareness of the problems and challenges facing us to the extent that we have today.

This is not to say that we failed to respond, in drafting H.R. 3210, to the initiatives put forward by the administration. As I have previously stated, the authorization levels contained therein did conform to those recommended by the White House. And perhaps more significantly, with the leadership of the gentleman from Pennsylvania (Mr. SHUSTER) and the gentleman from California (Mr. CLAUSEN), we embraced and adopted the concept posited by the administration to redefine the Nation's Interstate System.

As some of my colleagues may be aware, 1981 marks the 25th anniversary of the Interstate System. Fewer, perhaps, are cognizant of the fact that most of the system is constructed with a design life of 20 to 25 years. We have now reached the point, then, when 95 percent of the total system is open to traffic, but when, also, an increasing proportion of these miles are in need of reconstruction. Indeed, one study has reported that the amount of interstate miles rated in "poor" condition more than doubled between 1975 and 1978, with another doubling anticipated by 1985. Clearly, this is a problem which must be addressed.

As passed in this Chamber on September 24, H.R. 3210 added reconstruction to the interstate 3-R program—resurfacing, restoration, and rehabilitation—to create a new 4-R program. Funding for this program was increased from $275 million to $800 million. Additionally, a more equitable formula was devised for distributing these funds among the States.

In passing H.R. 3210, this body was by no means neglectful of the very important job of completing the Interstate System. Indeed, the meeting of this challenge was facilitated by that bill and will be brought closer to fruition by the amendment that is before us today. Mindful of the increased costs of freeway construction and our present budgetary constraints, that bill and this amendment will allow us to focus the Nation's precious financial resources on the most crucial work that remains to be done. Certain nonessential projects on the Interstate System are being dropped from the interstate cost estimate. Any project previously eligible under the ICE, but now dropped, will be eligible under the expanded 4-R program.

There were certain differences between items maintained under the ICE in the House and Senate bills. This Chamber, for example, maintained in the construction program all high occupancy vehicle lanes contained in the 1981 ICE. The Senate bill failed to include this important provision, but it is included in the amendment that is brought to the floor today.

By redefining eligibility for the interstate construction program, we are able to reduce the interstate cost estimate from about $53 billion to about $38.9 billion. This constitutes a savings, not even accounting for future inflation, of about $14 billion.

Let me repeat that, by voting for this amendment, we can save the American taxpayer $14 billion in the cost of completing the Interstate System.

And by trimming these costs, we will be expediting system completion by funneling available funds to those projects which are most crucial.

This amendment is vitally needed for the long-range implications it will have on the interstate program. Its enactment is also of very great short-term significance.

The Department of Transportation's authority to apportion interstate construction funds among the States expired at the end of fiscal year 1981. When our colleagues passed H.R. 3210 earlier this year, we extended that authority and revised the apportionment factors to reflect the redefinition of the system.

When it became apparent that H.R. 3210 would not be enacted by October 1, House Concurrent Resolution 179 was brought to the floor, and passed, allowing the Secretary to apportion interstate construction funds using our old factors. That legislation was never adopted by our colleagues in the other body. So, these funds have been frozen in Washington for over 10 weeks. Passage of this amendment will relieve that situation and relieve it in a most favorable manner by not only allowing these funds to be apportioned, but by allowing them to be apportioned utilizing our redefined factors.

H.R. 3210, as passed by the House, was significantly amended in the other body on November 16 and sent back to us. The other body would have us hastily consider many of the same program revisions we chose to more thoroughly and thoughtfully examine next year.

Since November 16, led by my good friend, the gentleman from New Jersey, we have been working with Senate leaders to fashion a compromise approach.

I feel that the substitute being considered today is that compromise. It preserves the integrity of the legislation previously passed in general approach and in substantial detail. I would urge that it be passed here today and sent back to the other Chamber so that it may be expeditiously approved there, according to assurances that have been given to us, and sent to the White House for enactment.

SECTION 1—INTERSTATE 4R AUTHORIZATIONS

Section 1 of my amendment parallels section 2 of H.R. 3210 as passed by the House. The interstate resurfacing, restoration, and rehabilitation program authorization in section 2 of the House-passed bill was raised from the current level of $275 million to $800 million for fiscal year 1983. My amendment is identical, except that an additional $800 million is authorized for fiscal year 1984.

SECTION 2—AUTHORIZATION OF USE OF COST ESTIMATES FOR APPORTIONMENT OF THE INTERSTATE FUNDS

Section 2 of my amendment deals with the same subject matter covered in section 4 of H.R. 3210 as passed by the House. Section 4 approved the use of apportionment factors contained in revised table 5 of the committee report accompanying H.R. 3210 for fiscal years 1983 and 1984 interstate fund

apportionments. This table was based upon the proposed redefinition of remaining Interstate System costs as contained in the committee reported bill.

Section 2 of my amendment approves the use of apportionment factors contained in revised table 5 of committee print numbered 97-28 of the Committee on Public Works and Transportation of the House of Representatives for the apportionment of funds authorized for fiscal year 1983 only. Additional action by the Congress will be necessary to authorize the apportionment of funds for fiscal year 1984 and subsequent years.

The revised table 5 of committee print numbered 97-28 is based upon the proposed redefinition of remaining Interstate System costs and contained in section 4 of my amendment.

SECTION 3—OBLIGATION LIMITATION

Section 3 of my amendment is similar to section 5 of H.R. 3210 as passed by the House. Section 5 provides a limitation on funding obligations of $8.2 billion for Federal-aid highways for fiscal year 1982. Section 3 of my amendment is identical except the obligation limitation is reduced to $8 billion, a level which is identical to the level provided by the continuing resolution for fiscal year 1982 appropriations, and further, the obligation limitation shall not apply to obligations for reconstruction of the Woodrow Wilson Bridge and bridges on Federal dams authorized by section 320 of title 23, United States Code.

SECTION 4—INTERSTATE SYSTEM CONSTRUCTION

Section 4 of my amendment parallels section 7 of H.R. 3210, as passed by the House.

Section 7 reduced the authorization for fiscal year 1983 for interstate construction, from $3.2 to $3.1 billion, and limited the obligation of interstate construction funds, except for advance construction interstate projects approved before October 1, 1981, to construction necessary to provide a minimum level of acceptable service on the Interstate System which shall consist of first, full access control; second, a pavement design to accommodate the types and volumes of traffic anticipated for the 20-year period from date of authorization of the initial basic construction contract; third, a design of four lanes—exclusive of high-occupancy vehicle lanes—in rural areas and all urban and urbanized areas under 400,000 population, up to six lanes—exclusive of high-occupancy vehicle lanes—in urbanized areas of 400,000 to 1 million population, and up to eight lanes—exclusive of high-occupancy vehicle lanes—in urbanized areas of 1 million or more population, as shown in the 1980 Federal census; and fourth, those high-occupancy vehicle lanes included in the interstate cost estimate for fiscal year 1981.

Section 4 of my amendment is the same as the House-passed bill, except that any items which S. 1024, as passed by the Senate, continues to make eligible for interstate construction funding would continue to be eligible under my amendment. Items contained only in the Senate bill include certain gap sections, certain stage construction sections, and certain sections built without interstate construction funds and incorporated into the Interstate System which have a design of up to six lanes in rural areas and all urbanized areas under 400,000 population and up to eight lanes in urbanized areas of 400,000 population or more; and certain required environmental features for gap sections, stage construction sections, and sections built without interstate construction funds and incorporated into the Interstate System. Also included would be certain added lanes up to the six- and eight-lane maximum for sections previously built with interstate construction funds.

SECTION 5—INTERSTATE 4-R FORMULA

Section 5 of my amendment parallels section 8 of H.R. 3210, as passed by the House.

Section 8 established a new interstate 4-R apportionment formula under which funds would be apportioned; 50 percent based upon the total number of interstate lane-miles in each State—other than on toll roads—and 50 percent based upon vehicle-miles traveled on the Interstate System in each State—other than on toll roads. No State, excluding any State without Interstate System mileage, would receive less than one-half of 1 percent of the total amounts apportioned.

Section 5 of my amendment is identical, except that funds would be apportioned: 55 percent based upon the total number of interstate lane miles in each State and 45 percent based upon vehicle miles traveled on the Interstate System in each State. Further, interstate toll roads which are subject to a Secretarial agreement, as provided for in section 105 of the Federal-Aid Highway Act of 1978, would be included in the formula and would be eligible for interstate 4-R funding.

The committee believes the interstate 4-R formula change in this amendment is a step in the right direction. It does not go as far as the committee or the administration would have preferred, but in the spirit of compromise with the other body, we have had to move away from this House's original position. However, we do have an understanding with the other body that the formula will be reviewed during consideration of major highway legislation next year and that factors other than lane miles and vehicle miles traveled will also be examined.

SECTION 6—INTERSTATE RECONSTRUCTION

Section 6 of my amendment is similar to section 9 of the House-passed bill.

Section 9 of the House-passed bill did three things: First, it expanded the types of projects eligible for interstate 3-R funding to include reconstruction projects. The effect of this provision is to convert the program from a "3-R" program to a "4-R" program. Second, it eliminated the restriction that interstate 4-R projects could only be on lanes in use for more than 5 years. And third, it made some technical changes to reflect the fact that toll roads subject to Secretarial agreements would no longer be eligible for interstate 4-R funding.

Section 6 of my amendment is similar to section 9 of the House-passed bill. There are three basic differences. First, section 6 does not make the technical change concerning toll roads since toll roads subject to Secretarial agreements would still be eligible for interstate 4-R funding. Second, section 6 includes language reflecting the fact that interstate 4-R funding can be used on Alaskan routes designated as part of the Interstate System under section 139(c) of title 23, United States Code. Third, clarifying language is included as to what Congress means by reconstruction. More specifically, reconstruction would include, but would not be limited to, the addition of travel lanes and the construction and reconstruction of interchanges and overcrossings along existing completed interstate routes, including the acquisition of rights-of-way where necessary.

I would emphasize that many improvements under the interstate 4-R program will not be subject to the same eligibility criteria as improvements if they were to be funded under the interstate construction program. For example, States will be able to construct new interchanges under the interstate 4-R program subject only to the normal requirements. The very rigid justifications presently required to add new interchanges to the interstate cost estimate for open-traffic routes previously financed with interstate funds will no longer be required under the interstate 4-R program. The States will have greater flexibility in the use of interstate 4-R funds.

In removing many safety improvement projects from interstate cost eligibility and making them eligible under the interstate 4-R program, the committee wants to emphasize that this change should not be viewed as a deemphasis of highway safety. In our discussions with the other body, we were successful in maintaining a 90-percent Federal share for the interstate 4-R program. The committee wishes to make clear that the purchase of safety devices, such as energy

absorption barriers and impact attenuators, would be eligible under the interstate 4-R program. Recent evaluations by the Federal Highway Administration show these devices to be among the most cost-effective safety countermeasures to be implemented on the highways.

SECTION 7—FEDERAL SHARE

Section 7 of my amendment is very similar to section 10 of the House-passed bill.

Section 10 of the House-passed bill increased the Federal share for interstate 4-R projects from 75 percent to 90 percent, effective October 1, 1981. Section 7 of my amendment is identical to section 10 of the House-passed bill, with two exceptions. First, the increased Federal share would take effect on the date of enactment instead of October 1, 1981. And second, the increased Federal share would also apply to interstate 4-R projects on routes designated in Alaska as part of the Interstate System under section 139(c) of title 23, United States Code.

SECTION 8—REIMBURSEMENT

Section 8 of my amendment is identical to section 12 of the House-passed bill and section 140 of the Senate-passed bill.

Section 8 of my amendment gives the Secretary of Transportation the needed authority to waive technical compliance with Federal requirements in the acquisition of certain real property in connection with a highway project in Santa Rosa, Calif. The State of California would be permitted to use a portion of its Federal-aid apportionment to reimburse the city of Santa Rosa for costs already incurred by the city in connection with a Federal-aid project wihich meets the Federal standards.

SECTION 9—BRIDGE RECONSTRUCTION

Section 9 of my amendment deals with the reconstruction of the Woodrow Wilson Bridge, a subject which was not addressed in the House-passed bill. Section 9 is virtually identical to section 128 of the Senate-passed bill.

Section 9 of my amendment authorizes $60 million from the highway trust fund to rehabilitate the Woodrow Wilson Bridge on Interstate Route 95. This bridge is on the Interstate System and is located in three jurisdictions: Maryland, Virginia, and the District of Columbia. The bridge is owned by the Federal Government, and this provision provides 100-percent Federal funding for the rehabilitation of the bridge, provided the three jurisdictions enter into an agreement with the Secretary of Transportation providing for taking responsibility for all future maintenance and rehabilitation of the bridge.

Although the Public Works Committee had planned to address this issue in next year's multiyear highway bill, I feel that it is particularly appropriate that we deal with it in this bill in light of the pressing need to rehabilitate the bridge.

SECTION 10—INTERSTATE SYSTEM ADDITIONS

Section 10 of my amendment provides for the designation of certain primary system highways in Alaska as part of the Interstate System. This issue was not addressed in the House-passed bill. Section 10 is identical to section 135 of the Senate-passed bill.

Alaska was the only State which did not receive interstate mileage when the Interstate System was designated. Section 10 of my amendment would direct the Secretary of Transportation to work with the State of Alaska in designating certain portions of the primary system as completed interstate. This mileage would be designated as completed with no interstate construction funds available. The mileage would not be upgraded to full interstate standards. Alaska would be eligible, as all other States are, for interstate 4-R funds.

SECTION 11—MAINE TURNPIKE

Section 11 of my amendment deals with a matter which was not addressed in the House-passed bill but was addressed in section 137 of the Senate-passed bill.

The Federal-Aid Highway Act of 1978 authorized the repayment of funds obligated by the State of Maine for two interchanges on the Maine Turnpike. Section 11 of my amendment authorizes the State of Maine to repay additional funds for the third interchange on the Maine Turnpike for which interstate funds were used. Total Federal funds repaid to the Treasury under the two provisions will be $8,577,900. By removing the requirement for repayment for the South Portland interchange, the State of Maine will be permitted to retain tolls on the Maine Turnpike and not make it toll free as required when it received interstate funds for the interchanges.

SECTION 12—REDWOOD BYPASS HIGHWAY

Section 12 of my amendment is similar to section 138 of the Senate-passed bill.

Section 152 of the Surface Transportation Assistance Act of 1978 directed the Secretary of Transportation to carry out a demonstration project to construct a bypass highway around the Redwood National Park. The Congress regards this project as unique, a fact clearly reflected in the priority treatment accorded the project in the Surface Transportation Assistance Act and in the Redwood National Park Expansion Act. This priority reflects the need for the project, long recognized by the Congress, in terms of mobility and safety for the traveling public, access to the park, preservation of its environmental values, and both economic stimulus and infrastructure to help offset partially the loss of employment and economic activity associated with expansion of the Redwood National Park.

Section 12 of my amendment provides an additional $55 million in contract authority for construction of the Redwood Bypass Highway, bringing the total Federal funding to $105 million. The additional $55 million will become available in fiscal year 1983 and will remain available until expended.

Section 12 of my amendment also provides that the sums authorized to be appropriated under section 152 of the Surface Transportation Assistance Act, as amended, shall not be subject to any State or local law relating to apportionment of funds available for the construction or improvement of highways.

The funds authorized for the bypass highway project cannot be spent on, or allocated to, any other segment of the California highway system and are in addition to California's normal apportionment of highway funds. Congress did not intend that any highway projects, either at the State or local level, be deferred or delayed in any way. This reflects the fact that one of the major purposes of the project is to provide economic stimulus and infrastructure to help offset the loss of employment and economic activity associated with expansion of the park. Thus, section 12 of my amendment will assure that the Redwood Bypass Highway project does not result in any other highway project being deferred or terminated. It accomplishes this by exempting the Redwood project from the provisions of the California Streets and Highways Code requiring an apportionment of highway funds—40-60 North-South split.

SECTION 13—SHORT TITLE

Section 13 of my amendment provides that this act may be cited as the "Federal-Aid Highway Act of 1981."

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. SHUSTER. I yield to the gentleman from Indiana.

Mr. MYERS. Mr. Speaker, I thank my colleague for yielding.

I rise to ask a question about the Wilson Bridge.

There is no question that the bridge needs to be repaired, but we have one of the major bridges already semi-closed, the Chain Bridge. Will this Wilson Bridge be closed for repairs while this other bridge is partially closed?

Mr. SHUSTER. I am informed that the answer is "No."

Mr. MYERS. That is good, because I do not think Congress ought to decide these issues, but nevertheless it certainly does present a congestion problem for those of us who live on that side and who have to commute in if

they are going to close all the bridges coming from Virginia.

Mr. SHUSTER. The gentleman has an excellent point.

Mr. Speaker, it is a pleasure today to join with my colleagues in presenting and supporting this compromise 1-year highway bill. This is essentially the bill passed overwhelmingly 377 to 25 on September 24, with minor modifications negotiated with the Senate and supported by them.

This legislation is needed badly to continue the Federal highway program until next year when the Surface Transportation Subcommittee will be considering a multiyear bill. I favored the multiyear approach this year in order to give the States a long leadtime to know the rules of the game and plan accordingly. Unfortunately, circumstances did not allow that to happen this year but the Members of the House can be assured this bill will be an adequate stopgap until next year.

There are a few provisions which I feel the Members should note specifically. First, there is a major redefinition of the interstate cost to complete. This redefinition should reduce the cost-to-complete of our Interstate Highway System from an unrealistic $54 billion down to a more attainable $39 billion. However, I am very concerned about several high priority projects in Pennsylvania. Those projects are 12 miles of the Schuylkill Expressway—Interstate 76—in Philadelphia, one-half mile of the Parkway East—Interstate 376—in Pittsburgh and the East Street Valley Expressway in Pittsburgh. To the extent possible, I would strongly urge the Secretary to interpret the definition to include these projects to the maximum degree due to their high priority in maintaining an efficient highway system.

A new category of reconstruction was added to the current 3-R program and the authorization was increased from $275 million to $800 million. This amendment, which I sponsored, is a clear signal to the States that the interstate must be completed on time and our multibillion national highway system maintained and preserved.

The committee was also able to negotiate with the Senate a 90-10 Federal match for the new interstate 4-R program. A lower match would not have made any sense with current interstate construction funds at the same 90-10.

It is also my understanding that those States that use primary funds for interstate maintenance and reconstruction would like to be able to convert those 75-25 funds to 90-10. It is logical for the States to be able to use the same match for primary funds if the States so choose to utilize these funds in that manner. I urge the Secretary of Transportation to permit the States to convert these funds within the discretion of the law. If such a commitment cannot be made, I would place this as a top agenda item to be considered next year. Furthermore, the House and Senate both agreed next year to take a hard look at the interstate 4-R allocation formula which could use better criteria to determine those States that need more funds for 4-R.

In addition, a section on the Woodrow Wilson Bridge was included particularly because of the hard work and counsel of Congressman WOLF, Congressman PARRIS and Congresswoman HOLT. There efforts were invaluable in insuring that this difficult problem was addressed and addressed this year.

Finally, the priority primary program was retained for this year with possible revisions in our multiyear bill next year. This category was meant to handle high-priced items the States could not handle on their own, such as Route 522 in Huntingdon County, Pa. This route from Mount Union, Pa., to Interstate 76 at Burnt Cabins is the only access to the Interstate System for this particular area. The designation of a route such as this would be the intent of the Congress.

In conclusion, this is a good compromise which should be accepted by the Senate and sent on its way to the President. This legislation is badly needed and many States would suffer from decreased interstate allocations if this measure were not accepted. I urge my colleagues to support H.R. 3210.

● Mrs. HOLT. Mr. Speaker, I rise in strong support of the bill, H.R. 3210, the Federal Highway Act of 1981, which is an amendment to the Senate bill, S. 1024. In this connection, I want to commend and thank the majority and minority leadership for their bipartisan and statesmanlike efforts in providing full Federal funding for the badly needed major rebuilding of the Woodrow Wilson Bridge—a key interstate link serving the entire eastern seaboard.

I am especially grateful to the gentleman from New Jersey (Mr. HOWARD), the committee chairman; the gentleman from California (Mr. CLAUSEN), the ranking minority member; the gentleman from California (Mr. ANDERSON), and the gentleman from Pennsylvania (Mr. SHUSTER)—the subcommittee chairman and ranking minority member, respectively—who have all played an important part in bringing this important bill to the floor today.

Mr. Speaker, I remind my colleagues that the full funding for the bridge is the same as provided for in an amendment which I offered to last year's Federal highway bill and which was accepted by the House. Now that the Senate too has included this amendment in their bill, the urgently needed repair of the Woodrow Wilson Bridge can begin soon.

I also wish to thank my colleagues, the gentlemen from Virginia (Mr. PARRIS and Mr. WOLF) who have worked diligently to gain this funding.●

● Mr. HAGEDORN. Mr. Speaker, I am happy to rise in support of this important legislation, which represents a fair compromise between previously passed House and Senate bills.

Even though I still believe the multiyear approach is the best way to go with high-cost, long-term highway and bridge construction projects, it is critically important to pass this bill now despite its imperfections. Failure of the Congress to take action now might not have a profound effect on the regular Federal-aid highway program, but it would have a devastating and irreconcilable effect on the interstate program, which has ground to a halt in many States in the absence of new apportionments.

My home State of Minnesota has urged adoption of this compromise, as has the National Governor's Association, and I believe it represents a fair and reasonable way to introduce some vitality into the program until a multiyear bill can be worked out.

I would like to emphasize my own strong and personal support for one of the major features of this compromise, and that is the manner in which the interstate reconstruction program was treated. The compromise expands the program by definition and makes reconstruction an eligible item in the new 4-R program, curing what I always felt was a major weakness in the program.

This simple step will probably do more to fashion the future of the interstate program than any in recent memory, and will help to insure that the massive investment of Federal interstate dollars over the last 25 years will be preserved and protected.

I also applaud the conference managers for agreeing to the redefinition of interstate completion to include essential construction only, and for approving a reduced interstate cost estimate, both of which will give the States a clear indication of congressional intent with regard to the future of the program.

Mr. Speaker, this is one of those rare occasions when a Republican who believes in and is committed to Reaganomics can stand on the floor of the House and enthusiastically support a bill that is going to cost some money. It is a rather strange feeling at that.

But we can do it today because this is also one of those rare moments when we are voting to spend money that we already have. The highway program, as we all know, is supported by the user-generated highway trust fund, which by its nature is neither in-

flationary, nor contributes to the deficit. This is the fairest form of taxation known to man, and reflects the way Federal money ought to be spent.

Mr. Speaker, I would like to take a moment to congratulate my colleagues on the committee who worked so hard not only to hammer out this compromise, but also to draft the original legislation months ago. The bipartisan team of full committee Chairman HOWARD and his Republican counterpart Mr. CLAUSEN, and Subcommittee Chairman ANDERSON and his able counterpart Mr. SHUSTER, deserve the thanks of this House for a job well done.

Mr. Speaker, I urge adoption of this measure.●

Mr. ALBOSTA. Will the distinguished chairman of the Subcommittee on Surface Transportation, the gentleman from California, yield for a minute.

Mr. ANDERSON. I yield to my colleague, the gentleman from Michigan.

Mr. ALBOSTA. The bill that the House is considering now, H.R. 3210, the Federal Highway Act of 1981, is very important to my own State of Michigan. I am particularly concerned about the third item in section 4b of the bill as it pertains to environmental requirements and the construction of essential parts of the interstate highway project called I-696. The environmental impact statement that sets out the environmental requirements has been agreed to by local, State, and Federal officials and signed by the Secretary of Transportation. Is it not the intent of section 4b that the environmental requirements that are presently eligible for interstate construction funding will continue to be paid for out of the interstate construction fund and not out of the 4-R fund and that this money will be included in the interstate cost estimate and apportionment at the necessary time?

Mr. ANDERSON. Yes, that is the intent of section 4b and Michigan will receive interstate construction funds for the environmental requirements that are contained in the approved EIS for the I-696 project in Michigan, and which are presently eligible for interstate funds.

Mr. ALBOSTA. I want to thank the gentlemen from California for his comments and express my appreciation for the leadership he has shown on this important piece of legislation.

Mr. SHUSTER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SHUSTER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on this matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

CONFERENCE REPORT ON H.R. 4241, MILITARY CONSTRUCTION APPROPRIATIONS, 1982

Mr. GINN. Mr. Speaker, pursuant to the order of the House of Friday, December 11, 1981, I call up the conference report on the bill (H.R. 4241) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of December 11, 1981.)

Mr. GINN (during the reading). Mr. Speaker, I ask unanimous consent to dispense with further reading of the statement.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The SPEAKER pro tempore. The gentleman from Georgia (Mr. GINN) will be recognized for 30 minutes, and the gentleman from Ohio (Mr. REGULA) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Georgia (Mr. GINN).

GENERAL LEAVE

Mr. GINN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and to include extraneous matter on the conference report and the amendments in disagreement.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. GINN. Mr. Speaker, I yield myself such time as I may consume.

We are presenting today the conference report on H.R. 4241, providing for military construction for the fiscal year 1982. The conference agreement provided $7.059 billion, which is $241 million below the President's request and $257 million below the Senate. Additionally, the agreement is approximately $53 million below the fiscal year 1982 section 302 budget allocation.

Although I have just noted various reductions, the military construction conference agreement provides for the largest expenditure for defense construction ever recommended by Congress. The fiscal year 1982 program will be an increase of $1.7 billion, or more than a 30 percent increase over fiscal year 1981. If we compare the bill to fiscal year 1980, the military construction appropriations has doubled in 2 years. Military construction is the backbone of a majority of Defense programs, and an increase in spending represents a confirmation of the need to address our military construction needs.

The conference agreement reflects a series of changes to the House bill, but we have been able to bring the bill back to the House below the President's budget request and still keep intact the majority of the initiatives and concerns of the House. I will highlight some of the major proposals included in the conference agreement:

MX PLANNING AND DESIGN

The conferees agreed to the release of $92 million in MX planning and design funds, which we deferred last July. However, as outlined in the report, the Department cannot obligate funds for site-specific design until a series of reports and studies have been submitted to both the House and Senate Appropriations Committees.

PERSIAN GULF PROGRAM

In the Persian Gulf construction program, the conference agreement calls for an expenditure of $441 million compared to the $546 million requested. The conferees recommend funding for projects in Oman, Somalia, Kenya, and Diego Garcia. Projects totaling $46.6 million for Lajes Field, Portugal, were approved but placed on hold until the committees are satisfied that the Portuguese Government will permit the full use of the planned facilities. Construction funding for a proposed base in Ras Banas, Egypt, has been deferred because of the preliminary nature of the construction program. The conferees did support the continuation of $14 million in design funds for Ras Banas.

Finally, the conference agreement reinforces both the House and Senate feeling that a new system of burden sharing in the Middle East should be developed that provides increased financial support from our allies.

EUROPE

The conferees have endorsed funding for European construction at a record level of approximately $1 billion. This action represents a feeling on the part of both sides that it is time to move forward to improve facilities for our military personnel in Europe. The conferees also agreed to support the proposed master restationing plan in Germany, but called on the executive branch to accelerate efforts to obtain funding from the Federal Republic of Germany for the program.

DOMESTIC PROJECTS

The conferees have agreed to fund more than 700 projects and family housing in the United States totaling in excess of $3.5 billion. In the matter of acquiring property for Fort Carson, Colo., the conferees agreed to provide $28 million of the $29 million requested and to require the Department to supply additional information prior to proceeding with the obligation of funds.

The conferees did not recommend additional funding for the cost overrun at the Arnold Engineering Development Center in Tennessee. However, the conferees did indicate there was a need to complete a usable facility and directed the Department to request funding through reprograming as additional requirements become known. This method was chosen to allow both the House and Senate to further review the funding requirements.

Agreement was reached on proceeding with the Rapid Deployment Joint Task Force Headquarters at MacDill Air Force Base, Fla. However, further assurances on the manning levels and need for new facilities are to be provided.

Other projects approved or deferred are listed in the conference report.

QUALITY OF LIFE IN THE MILITARY

The conference agreement supports efforts made by the House to provide facilities that will improve the quality of life for personnel in the military. Funding has been included for 15,500 new or improved barracks spaces, substantial increases for family housing, child care centers, family services centers, and medical facilities. Additionally, the conference agreement supports the House position to accelerate design funding in order to reduce the 300,000 substandard barracks spaces now in the inventory. In all, the military construction program for quality of life projects has been recognized as an essential priority to improve on-duty and off-duty life in the military.

Mr. Speaker, the conference agreement before us provides for the highest priority military construction projects in a well-balanced program. This program reflects the requirements of the Department of Defense on the priorities and initiatives of the Congress. The agreement is both within the 302 budget act allocations and the President's request. I recommend, therefore, approval of the conference report.

I would like to thank the Subcommittee on Installations and Facilities of the Armed Services Committee, chaired by the distinguished gentleman from Georgia (Mr. BRINKLEY), for the very fine authorization bill which it sent us from which to work. I would like to thank the distinguished ranking minority member of the subcommittee, the gentleman from Ohio (Mr. REGULA) for his strict attention to duty and thank him profoundly for a job well done.

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

[In dollars]

	New budget authority					Conference compared with—			
	Enacted	Estimates	House	Senate	Conference	Enacted	Estimates	House bill	Senate bill
Military construction, Army	886,234,000	900,100,000	1,029,519,000	942,081,000	943,701,000	+57,467,000	+43,601,000	−85,818,000	+1,620,000

Mr. REGULA. Mr. Speaker, after reviewing the request of the Department of Defense for the largest military construction budget in our history, the conference committee has agreed to a level of funding over $240 million under the administration's request. Budget outlays of $4,480,000,000 are $60 million below the 302 allocations.

This conference report reflects the accomplishments of our committee, which earlier this year brought you a bill totaling $6.9 billion. Since then, we have carefully considered revisions made by the administration, particularly in our strategic programs. After serious deliberation and conference with our colleagues from the Senate, we are bringing a conference agreement of just a little over $7 billion.

I believe this agreement achieves a balance between our national defense needs throughout the world and the need to control Federal spending. The conference report reflects the current economic conditions of the country and balances those conditions against this country's highest priority military requirements.

The chairman has pointed out several issues that have been addressed in the conference report.

I would like to add my strong support for funding construction of new facilities in West Germany. The living and working conditions for our men and women stationed in West Germany are woefully obsolete and inadequate. Time magazine has described the situation as "conditions that could cause riots in U.S. prisons."

While this construction is a top priority with our committee, the conferees have again urged the administration to seek increased host nation funding.

In addition to increased support from West European allies, the conferees again urge the administration to develop a new system of burden sharing among all our allies—especially Japan.

I believe this conference agreement strikes a balance between our serious national defense needs worldwide and the equally serious need to control Federal spending.

● Mr. NELLIGAN. Mr. Speaker, I rise in support of the conference report on

military construction appropriations for fiscal year 1982.

However, my support of this bill is tempered by the existence of money for planning and design of Rapid Deployment Force facilities at Ras Banas, Egypt.

The conference report contains $14.3 million in planning and design funds for Ras Banas and further indicates that the Appropriations Committees will be receptive to supplemental requests if progress is made on the project.

While I am glad that the House conferees prevailed on the issue of construction funds for Ras Banas—deferring the $106 million requested for this purpose—I believe the inclusion of design funds with the intent to proceed with Ras Banas construction is unwise.

I visited Ras Banas in June. What I found were very primitive facilities in a very harsh climate. In testimony before the House Appropriations Committee, the runways at Ras Banas were described as "an asphalt road in the desert." I think this is a very apt description. The runways I saw at Ras Banas were built for light tactical aircraft and will require massive improvements to be utilized for heavy cargo aircraft.

In addition, Ras Banas is a very small facility. It stretches only about three-quarters of a mile around a bay. Not only will the runways have to be improved but substantial alterations will have to be made to existing port facilities, which are totally inadequate for RDF needs.

I should also note that fresh water is a serious problem in utilizing Ras Banas. Water will either have to be obtained from desalinization or from a $100 million pipeline from the Aswan Lake.

What this all boils down to is a large expenditure of the taxpayers' money for something which is described as an "austere" facility. Preliminary estimates made earlier this year placed the cost of improving Ras Banas at $400 to $500 million. However, when I visited Ras Banas and examined the decrepit facilities which now exist, I thought that this estimate was extremely optimistic at best. I would place the total cost of the contemplated improvements in the range of $750 million to $1 billion.

One billion dollars is a tremendous amount of money for improving a base which the chairman of the Appropriations Committee referred to as "a wasteland."

One billion dollars is also a tremendous amount of money for a facility where the United States does not even have a formal agreement with the host Government. As I understand the current situation, the United States has only informal assurances over the future use of Ras Banas. It does not have a signed, enforceable agreement, but instead only an understanding reached with President Sadat before his tragic assassination.

Therefore—although I intend to vote for this bill—I believe the Congress should seriously consider viable alternatives to Ras Banas.

At the present time, there are two excellent facilities in the Sinai—in particular, a superb air base at Etzion. While these bases are subject to the implementation of the Camp David agreements, it seems incredible that we are about to destroy much of the support facilities which are at these bases, blowing up aircraft shelters and the like, when we are simultaneously embarking on a $1 billion plan for a remote and limited facility at Ras Banas.

While I support the objectives of the Rapid Deployment Force, I believe the RAS Banas situation needs immediate reevaluation. I hope that the Appropriations Committee will reconsider its decision to favorably treat future requests for Ras Banas. I also plan to raise this issue from my position on the House Armed Services Committee.

Since we are dealing today with an important appropriations bill, one which should not be delayed, I will not seek to offer an amendment on Ras Banas. However, I hope that my comments have made other Members aware of this unwise use of funds. I am convinced that it would be a serious mistake to proceed with the construction phase of Ras Banas.●

● Mr. RAHALL. Mr. Speaker, I rise today in support of the conference report on H.R. 4221 making appropriations for the Military Construction Act for fiscal year 1982. I want to express my appreciation to the members of the conference committee who agreed to an amendment the Senate added to its bill. That amendment called for a land conveyance between the city of South Charleston, W. Va., and the Department of Defense along with the construction of a Joint U.S. Armed Forces Reserve Center.

This amendment is necessary because it will allow the local Volkswagen of America plant to expand, creating an estimated 500 new jobs, and provide the Army, Navy, and Marine Corps with the more modern and efficient facilities.

Again, I want to thank all of those who have worked to see that this legislation is included in the Military Construction Act for fiscal year 1982. I might also add that this project has the support of the entire West Virginia delegation.●

□ 1300

Mr. GINN. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 11: Page 6, line 6, strike out "$59,277,000" and insert "$59,665,000".

MOTION OFFERED BY MR. GINN

Mr. GINN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. GINN moves that the House recede from its disagreement to the amendment of the Senate numbered 11 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert the following: "64,703,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 13: Page 6, after line 21, insert:

MILITARY CONSTRUCTION, RESERVE COMPONENTS GENERALLY

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Reserve components of the Armed Forces, $470,000, to be allocated by the Secretary of Defense for the Army Reserve, and to remain available until September 30, 1985.

MOTION OFFERED BY MR. GINN

Mr. GINN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. GINN moves that the House recede from its disagreement to the amendment of the Senate numbered 13, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 15: Page 7, line 8, strike out "$260,635,000" and insert "$261,344,000".

MOTION OFFERED BY MR. GINN

Mr. GINN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. GINN moves that the House recede from its disagreement to amendment of the Senate numbered 15 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert the following: "280,235,000"

The motion was agreed to.

The SPEAKER. pro tempore. The Clerk will report the last amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 24: Page 14, after line 13, insert:

SEC. 120. It is the sense of the Congress that the administration should call on the pertinent member nations of the North Atlantic Treaty Orgainzation and on Japan to meet or exceed their pledges for at least a 3

per centum real increase in defense spending in furtherance of increased unity, equitable sharing of our common defense burden, and international stability.

MOTION OFFERED BY MR. GINN

Mr. GINN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. GINN moves that the House recede from its disagreement to the amendment of the Senate numbered 24 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

SEC. 122. It is the sense of the Congress that the administration should call on the pertinent member nations of the North Atlantic Treaty Organization and on Japan to meet or exceed their pledges for at least a 3 per centum real increase in defense spending in furtherance of increased unity, equitable sharing of our common defense burden, and international stability."

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the several motions was laid on the table.

CONFERENCE REPORT ON H.R. 4995, DEPARTMENT OF DEFENSE APPROPRIATIONS, 1982

Mr. ADDABBO submitted the following conference report and statement on the bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 97-410)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4995) "making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 19, 25, 29, 35, 37, 45, 46, 47, 49, 50, 52, 53, 56, 58, 59, 60, 63, 74, 83, 86, 88, 90, 91, 92, 99, 104, 105, 106, 114, and 119.

That the House recede from its disagreement to the amendments of the Senate numbered 17, 18, 33, 48, 70, 81, 82, 94, 100, 103, 108, and 111, and agree to the same.

Amendment numbered 1:

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert $12,447,827,000; and the Senate agree to the same.

Amendment numbered 2:

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$9,117,956,000*; and the Senate agree to the same.

Amendment numbered 3:

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$2,766,966,000*; and the Senate agree to the same.

Amendment numbered 4:

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$10,305,414,000*; and the Senate agree to the same.

Amendment numbered 5:

That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$964,400,000*; and the Senate agree to the same.

Amendment numbered 6:

That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$346,770,000;* and the Senate agree to the same.

Amendment numbered 7:

That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$138,720,000;* and the Senate agree to the same.

Amendment numbered 8:

That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$292,073,000*; and the Senate agree to the same.

Amendment numbered 9:

That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,294,100,000*; and the Senate agree to the same.

Amendment numbered 10:

That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$423,867,000*; and the Senate agree to the same.

Amendment numbered 11:

That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$14,938,315,000*; and the Senate agree to the same.

Amendment numbered 12:

That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$15,037,897,000*; and the Senate agree to the same.

Amendment numbered 13:

That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$944,600,000*; and the Senate agree to the same.

Amendment numbered 14:

That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$176,300,000*; and the Senate agree to the same.

Amendment numbered 15:

That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$19,385,889,000*; and the Senate agree to the same.

Amendment numbered 16:

That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$685,000,000*; and the Senate agree to the same.

Amendment numbered 20:

That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$9,435,000*; and the Senate agree to the same.

Amendment numbered 21:

That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,185,540,000*; and the Senate agree to the same.

Amendment numbered 22:

That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert: *$16,079,719,000, of which not less than $29,000,000 shall be available only for the installation of modification kits into KC-135 aircraft*; and the Senate agree to the same.

Amendment numbered 23:

That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert: *$78,800,000*; and the Senate agree to the same.

Amendment numbered 26:

That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$69,000,000*; and the Senate agree to the same.

Amendment numbered 27:

That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$658,150,000*; and the Senate agree to the same.

Amendment numbered 28:

That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$570,940,000*; and the Senate agree to the same.

Amendment numbered 30:

That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$669,154,000*; and the Senate agree to the same.

Amendment numbered 32:

That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,646,418,000*; and the Senate agree to the same.

Amendment numbered 38:

That the House recede from its disagreement to the amendment of the Senate numbered 38, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert: *$3,825,200,000, of which $1,900,000 shall be available only for the continued testing and evaluation of 9 mm handguns without delay*; and the Senate agree to the same.

Amendment numbered 42:

That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$9,115,800,000*; and the Senate agree to the same.

Amendment numbered 43:

That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$3,207,100,000*; and the Senate agree to the same.

Amendment numbered 44:

That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$315,600,000*; and the Senate agree to the same.

Amendment numbered 51:

That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$307,600,000*; and the Senate agree to the same.

Amendment numbered 61:

That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$8,821,400,000*; and the Senate agree to the same.

Amendment numbered 65:

That the House recede from its disagreement to the amendment of the Senate numbered 65, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$3,708,777,000*; and the Senate agree to the same.

Amendment numbered 66:

That the House recede from its disagreement to the amendment of the Senate numbered 66, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,711,456,000*; and the Senate agree to the same.

Amendment numbered 69:

That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

In lieu of the sum named in said amendment insert *$56,000,000*; and the Senate agree to the same.

Amendment numbered 73:

That the House recede from its disagreement to the amendment of the Senate numbered 73, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$5,365,633,000*; and the Senate agree to the same.

Amendment numbered 75:

That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$3,609,535,000*; and the Senate agree to the same.

Amendment numbered 76:

That the House recede from its disagreement to the amendment of the Senate numbered 76, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$5,844,357,000*; and the Senate agree to the same.

Amendment numbered 77:

That the House recede from its disagreement to the amendment of the Senate numbered 77, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$8,659,610,000*; and the Senate agree to the same.

Amendment numbered 79:

That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,692,646,000*; and the Senate agree to the same.

Amendment numbered 80:

That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows: *; (m) for payment of unusual cost overruns incident to ship overhaul, maintenance, and repair for ships inducted into industrial fund activities or contracted for in prior fiscal years: Provided, That the Secretary of Defense shall notify the Congress promptly prior to obligation of any such payments; and (n) for payments from annual appropriations to industrial fund activities and/or under contract for changes in scope of ship overhaul, maintenance, and repair after expiration of such appropriations, for such work either inducted into the industrial fund activity or contracted for in that fiscal year; and the Senate agree to the same.*

Amendment numbered 95:

That the House recede from its disagreement to the amendment of the Senate numbered 95, and agree to the same with an amendment, as follows:

In lieu of the section number named in said amendment, insert *774*; and the Senate agree to the same.

Amendment numbered 97:

That the House recede from its disagreement to the amendment of the Senate numbered 97, and agree to the same with an amendment, as follows:

In lieu of the section number 775 named in said amendment, insert *776*; and the Senate agree to the same.

Amendment numbered 98:

That the House recede from its disagreement to the amendment of the Senate numbered 98, and agree to the same with an amendment, as follows:

In lieu of the section number named in said amendment, insert *777*; and the Senate agree to the same.

Amendment numbered 102:

That the House recede from its disagreement to the amendment of the Senate numbered 102, and agree to the same with an amendment, as follows:

In lieu of the section number named in said amendment, insert *779*; and the Senate agree to the same.

Amendment numbered 112:

That the House recede from its disagreement to the amendment of the Senate numbered 112, and agree to the same with an amendment, as follows:

In lieu of the section number named in said amendment, insert *785*; and the Senate agree to the same.

Amendment numbered 113:

That the House recede from its disagreement to the amendment of the Senate numbered 113, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

Sec. 786. None of the funds appropriated by this Act may be used to appoint or compensate more than 35 individuals in the Department of Defense in positions in the Executive Schedule (as provided in sections 5312-5316 of title 5, United States Code).

And the Senate agree to the same.

Amendment numbered 121:

That the House recede from its disagreement to the amendment of the Senate numbered 121, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert $13,063,000; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 24, 31, 34, 36, 39, 40, 41, 54, 55, 57, 62, 64, 67, 68, 71, 72, 78, 84, 85, 87, 89, 93, 96, 101, 107, 109, 110, 115, 116, 117, 118, and 120.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The Managers on the Part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4995), making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the Managers and recommended in the accompanying conference report:

TITLE I—MILITARY PERSONNEL

The following language items represent the agreement of the conferees. Specific dollar amounts by military service are reflected under each summary table. Language contained in the report of only one body and not addressed below should be considered the agreement of the conferees.

New Bonus and Benefit Authorizations.—The Uniformed Services Pay Act of 1981 included authorization for several new bonuses and benefits. Since some of these new payments are entitlements for which costs are already being incurred, the conferees have included funds for hazardous duty pay, aviation career incentive pay, submarine incentive pay, transportation of vehicles, and shipboard BAQ and VHA. Except as provided elsewhere in this report, no funds have been included for these several new non-entitlement bonuses and benefits which may be paid at the discretion of the Secretary of Defense. The conferees agree that the Department should submit a reprogramming or supplemental request to the Appropriations Committees for those discretionary authorities the Department wishes to exercise.

Installment Reenlistment Bonus.—The conferees agree reenlistment bonuses should be paid on a modified lump-sum installment basis. Up to 50 percent of the total bonus may be paid as the first installment with the remaining portion being paid in equal annual amounts over the rest of the reenlistment contract period.

Compensation Drag-alongs.—The long-standing link between basic pay and bonuses was established so that various ranks would be equally "drawn" to bonus awards. Because of this linkage, however, bonuses automatically increase with a pay raise, a promotion, or increased longevity. The Conferees are concerned that such discretionary pay increases are not actually necessary to meet program objectives. Although the Department reviews bonus multiplier levels so that retention requirements are met, these reviews do not always coincide with or even consider pay increases. Accordingly, the Conferees direct that the Department of Defense schedule reviews of bonus amounts to ensure that any downward revisions of bonus amounts which can be made as a result of pay raises become effective on the date of the pay raise. With regard to the October 1, 1981, pay raise, it will be applied to only those bonuses which justifiably require an increase.

The Conferees likewise direct the Department of Defense to submit a report no later than May 1, 1982 which provides a thorough evaluation of possible modifications or alternatives to the present system for determining bonus awards. Possibilities such as the eliminate of the direct link to basic pay, fixed sum amounts, and the use of fractional bonus multipliers should be considered to assure that bonus amounts reflect specific skill retention requirements rather than basic pay levels.

Per Diem, Travel, and Transportation Allowance Committee.—The Conferees agree that the current method of administering travel and transportation allowances permits decisions that are not fiscally sound. The Conferees also agree that the Department may continue to operate the Per Diem, Travel, and Transportation Allowance Committee, but must comply with the quarterly reporting requirement addressed by the House.

Foreign Duty Pay.—While acknowledging that foreign duty pay is an important element in compensating enlisted personnel for foreign assignments, the conferees agree that the Department of Defense should conduct a thorough review so that only truly arduous assignments will be eligible for such payments. The conferees also agree that any individual who is receiving foreign duty pay on January 1, 1982 shall continue to be eligible for such pay until reassigned out of that geographic area.

MILITARY PERSONNEL, ARMY

Amendment No. 1: Appropriates $12,447,827,000 instead of $12,288,300,000 as proposed by the House and $14,095,781,000 as proposed by the Senate.

Summary.—Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Basic pay:	8,121,707	8,097,407	8,119,307	8,110,657
Mil pay acctg waste, fraud, and abuse		(−16,500)		(−8,250)
Military bands		(−400)		(−400)
Duplicate leadership training		(−7,200)		
Medical intell and info agency		(−200)		
Air traffic controllers			(−2,400)	(−2,400)
Subsistence:	979,854	924,454	968,854	944,454
Subsistence waste, fraud, and abuse		(−40,000)		(−10,000)
New rations		(−1,000)		
Career basic allowance for subsistence		(−14,400)		(−14,400)
Subsistence-in-kind			(−11,000)	(−11,000)
Special pays and allowances	968,938	825,238	957,138	899,838
Installment reenlistment bonus		(−93,500)		(−46,750)
New enlistment bonus ceiling		(10,000)	(−15,000)	(−15,000)
Barracks cost-of-living allowance		(−6,000)		
Foreign duty pay		(−9,300)		(−4,650)
Proficiency pay		(−32,700)	(−26,800)	(−32,700)
Medical pay		(−2,300)		
Variable housing allowance		(−9,900)		
Permanent change of station (PCS) travel	1,108,100	1,054,700	1,098,200	1,078,800
PCS waste, and fraud, and abuse		(−5,500)		(−5,500)
PCS mileage		(−13,900)		(−13,900)
Reduced number of PCS moves		(−20,000)		
Temporary lodging allowance		(−14,000)	(−9,000)	(−9,000)
Trailer allowances			(−900)	(−900)
Other adjustments:		−17,700	1,548,081	9,877
Army Guard and Reserve equipment		(−17,700)		(−8,850)
Fiscal year 1982 pay raise			(1,491,069)	
New bonus and benefit authorizations			(57,012)	(18,727)

MILITARY PERSONNEL, NAVY

Amendment No. 2: Appropriates $9,117,956,000 instead of $8,807,520,000 as proposed by the House and $10,453,767,000 as proposed by the Senate.

Summary.—Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Basic pay and basic allowance for quarters (BAQ)	6,576,926	6,426,656	6,575,326	6,530,634
Mil. pay acctg. waste, fraud, abuse		(−13,500)		(−6,750)
Military bands		(−100)		(−100)
Duplicate leadership training		(−1,100)		
Bogus ROTC program		(−4,000)		
Recruiting and advertising		(−11,000)		
Ship retirement		(−6,000)		(−3,000)
Exchange military personnel		(−3,800)		(−722)
Overbudgeting		(−58,500)		(−29,250)
CINCUSNAVEUR (Navy London Headquarters)		(−2,000)		(−2,000)
Overeaters anonymous		(−100)		(−100)
Tencap office		(−70)	(−70)	
Air traffic controllers			(−1,600)	(−1,600)
Basic allowance for quarters mismanagement		(−47,400)		
Audiovisual		(−2,700)		(−2,700)
Subsistence	724,599	684,899	714,799	697,599
Subsistence waste, fraud, abuse		(−30,000)		(−7,500)
Career basic allowance for subsistence		(−9,700)		(−9,700)
Subsistence—in-kind			(−9,800)	(−9,800)
Special pays and allowances	960,749	715,049	949,949	845,099
Installment reenlistment bonus		(−205,600)		(−102,800)
Barracks cost of living allowance		(−2,700)		
Foreign duty pay		(−4,100)		(−2,050)
Navy sea pay			(−5,400)	(−5,400)
Aviation bonus		(−20,000)		
Variable housing allowance		(−13,300)		
Lump-sum leave and Sep pmts			(−5,400)	(−5,400)
Permanent change of station (PCS) travel	669,257	617,757	668,157	649,157
PCS waste, fraud, abuse		(−3,500)		(−3,500)
PCS mileage		(−15,500)		(−15,500)
Reduce number of PCS moves		(−32,500)		
Trailer allowances			(−1,100)	(−1,100)
Other adjustments		13,300	1,169,077	19,008
Army Guard and Reserve equipment		(−13,300)		(−6,650)
Fiscal year 1982 pay raise			(1,076,194)	
New bonus and benefit authorizations			(92,883)	(25,658)

MILITARY PERSONNEL MARINE CORPS

Amendment No. 3: Appropriates $2,766,966,000 instead of $2,703,970,000 as proposed by the House and $3,151,526,000 as proposed by the Senate.

Summary.—Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Basic pay and basic allowance for quarters (BAQ)	2,051,261	2,036,861	2,051,061	2,047,011
Mil pay acctg. waste, fraud, abuse		(−6,500)		(−3,250)
Military bands		(−100)		(−100)
Recruiting and advertising		(−2,000)		
Basic allowance for quarters mismanagement		(−5,100)		
Audiovisual		(−700)		(−700)
Air traffic controllers			(−200)	(−200)
Subsistence	223,412	208,012	219,212	213,812
Subsistence waste, fraud, abuse		(−10,000)		(−2,500)

	Budget	House	Senate	Conference
Career basic allowance for subsistence		(−2,900)		(−2,900)
Subsistence-in-kind			(−2,700)	(−2,700)
New rations		(−2,500)		
Leave rations			(−1,500)	(−1,500)
Special pays and allowances	186,752	132,552	199,198	174,148
Installment reenlistment bonus		(−36,800)		(−18,400)
Additional reenlistment bonus		(5,000)	(15,000)	(10,000)
Barracks cost of living allowance		(−9,300)		
Foreign duty pay		(−3,300)		(−1,650)
Variable housing allowance		(−3,400)		
Aviation bonus		(−6,000)		
Flight and sea pay rates		(−400)	(−654)	(−654)
Lump sum leave and sep. pmts.			(−1,900)	(−1,900)
Permanent change of station (PCS) travel	205,105	192,105	204,605	195,605
PCS waste, fraud, abuse		(−1,100)		1,100)
PCS mileage		(−7,900)		(−7,900)
Reduced number of PCS moves		(−4,000)		
Trailer allowances			(−500)	(−500)
Other adjustments		−3,900	339,110	−1,950
Army Guard and Reserve equipment		(−3,900)		(−1,950)
Fiscal year 1982 pay raise			(327,521)	
New bonus and benefit authorizations			(11,589)	

MILITARY PERSONNEL, AIR FORCE

Amendment numbered 4: Appropriates $10,305,414,000 instead of $10,209,920,000 as proposed by the House and $11,688,381,000 as proposed by the Senate.

Summary.—Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Basic pay and basic allowance for quarters (BAQ)	7,817,375	7,787,275	7,807,375	7,795,025
Mil pay acctg waste, fraud, abuse		(−10,500)		(−5,250)
Military bands		(−100)		(−100)
Training sites		(−2,500)		(−2,500)
Air traffic controllers			(−10,000)	(−10,000)
Audiovisual		(−4,500)		(−4,500)
PARCS		(−500)		
Recruiting and advertising		(−12,000)		
Subsistence	769,087	746,287	765,287	753,737
Subsistence waste, fraud, abuse		(−15,000)		(−3,750)
Career basic allowance for subsistence		(−7,800)		(−7,800)
Subsistence-in-kind			(−3,800)	(−3,800)
Special pays and allowances	627,058	536,258	627,002	591,852
Installment reenlistment bonus		(−62,000)		(−31,000)
Barracks cost-of-living allowance		(−8,000)		
Proficiency pay			(−56)	(−56)
Foreign duty pay		(−8,300)		(−4,150)
Variable housing allowance		(−12,500)		
Permanent change of station (PCS) travel	908,943	877,043	908,343	894,443
PCS waste, fraud, abuse		(−4,900)		(−4,900)
PCS mileage		(−9,000)		(−9,000)
Reduced number of PCS moves		(−18,000)		
Trailer allowances			(−600)	(−600)
Other adjustments		−14,600	1,302,717	−7,300
Army Guard and Reserve equipment		(−14,600)		(−7,300)
Fiscal year 1982 pay raise			(1,260,252)	
New bonus and benefit authorizations			(42,465)	

Amendment No. 5: Appropriates $964,400,000 instead of $962,500,000 as proposed by the House and $1,054,750,000 as proposed by the Senate.

Summary.—Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Pay and benefits:	807,255	813,755	800,783	815,655
Subsistence waste, fraud, abuse		(−1,600)		(−400)
Drill attendance		(−9,600)		(−4,800)
FEMA transfer		(−700)		
Strength improvements		(18,400)		(18,400)
Individual Ready Reserve bonus			(−6,472)	(−4,800)
Other adjustments:			(105,222)	
FY 1982 pay raise			(104,822)	
New bonus and benefit authorizations			(400)	

RESERVE PERSONNEL, NAVY

Amendment No. 6: Appropriates $346,770,000 instead of $346,420,000 as proposed by the House and $361,643,000 as proposed by the Senate.

Summary.—Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Pay and benefits	261,774	278,074	259,474	278,424
Subsistence waste, fraud, abuse		(−400)		(−100)
Drill attendance		(−3,300)		(−1,650)
94,000 strength level		(20,000)		(20,000)
Individual ready reserve bonus			(−2,300)	(−1,600)
Other adjustments			33,823	
Fiscal year 1982 pay raise			(33,566)	
New bonus and benefit authorizations			(257)	

RESERVE PERSONNEL, MARINE CORPS

Amendment No. 7: Appropriates $138,720,000 instead of $138,120,000 as proposed by the House and $152,212,000 as proposed by the Senate.

Summary.—Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Pay and benefits:	102,475	100,875	102,075	101,475
Subsistence waste, fraud, and abuse		(−200)		(−50)
Drill attendance		(−1,400)		(−700)
Individual Ready Reserve bonus			(−400)	(−250)
Other adjustments:			12,892	
FY 1982 pay raise			(12,831)	
New bonus and benefit authorizations			(61)	

RESERVE PERSONNEL, AIR FORCE

Amendment No. 8: Appropriates $292,073,000 instead of $291,548,000 as proposed by the House and $326,399,000 as proposed by the Senate.

Summary.—Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Pay and benefits	255,592	251,392	253,092	251,917
Subsistence waste, fraud, abuse		(−300)		(−75)
Drill attendance		(−3,000)		(−1,500)
FEMA transfer		(−900)		
Individual ready reserve bonus			(−2,500)	(−2,100)
Other adjustments			33,151	
Fiscal year 1982 pay raise			(32,622)	
New bonus and benefit authorizations			(529)	

NATIONAL GUARD PERSONNEL, ARMY

Amendment No. 9: Appropriates $1,294,100,000 instead of $1,287,600,000 as proposed by the House and $1,468,136,000 as proposed by the Senate.

Summary.—Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Pay and benefits	1,138,516	1,126,516	1,138,516	1,133,016
Subsistence waste, fraud, abuse		(−2,000)		(−2,000)
Drill attendance		(−13,000)		(−6,500)
Key personnel upgrade program		(3,000)		(3,000)
Other adjustments			168,536	
Fiscal year 1982 pay raise			(168,289)	
New bonus and benefit authorizations			(247)	

NATIONAL GUARD PERSONNEL, AIR FORCE

Amendment No. 10: Appropriates $423,867,000 instead of $421,392,000 as proposed by the House and $475,078,000 as proposed by the Senate.

Summary.—Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Pay and benefits:	377,320	378,220	377,320	380,695
Subsistance waste, fraud, abuse		(−500)		(−125)
Drill attendance		(−4,200)		(−2,100)
Skill retraining		(2,000		(2,000)
Strength improvements		(3,600)		(3,600)
Other adjustments:				
FY 1982 pay raise			(53,981)	
New bonus and benefit authorizations			(605)	

TITLE II—RETIRED PAY, DEFENSE

Amendment numbered 11: Appropriates $14,938,315,000 instead of $14,931,815,000 as proposed by the House and $14,944,815,000 as proposed by the Senate.

Summary.—The agreement on items in conference is as follows:

[In thousands dollars]

	Budget	House	Senate	Conference
Accounting waste, fraud, and abuse		(−13,000)		(−6,500)
Other adjustments		(−37,000)	(−37,000)	(−37,000)

TITLE III—OPERATION AND MAINTENANCE

The following items addressed by the conferees apply to all operation and maintenance appropriations of the Department of Defense:

OPERATING APPROPRIATION REPROGRAMING REQUIREMENTS

The conferees agree to accept the House Report language on non-programmatic reductions and reprogramming procedures. The appeals informally provided by the Military Departments indicate that there is some misunderstanding as to what is expected in complying with the House guidance. The conferees expect that each military service will provide the Committees, through Comptroller/budget channels a quarterly listing along with a short explanation of all transfers in excess of $5.0 million to the aggregate program element listing contained in this report. This listing need not reflect actual accounting records, but only report budgetary changes made by or known to personnel in the various Military Service budget offices.

The first such report is due in conjunction with the submission of the fiscal year 1983 (March 1, 1982) budget and the next report three months later (June 1, September 1, and December 1) the reports will list changes in excess of $5.0 million to both the fiscal year 1982 and fiscal year 1983 budgets. The usual reprogramming procedures for items of special interest and changes in budget activity levels remain in effect. This report of transfers and budget level changes will be of great assistance to the Committees in determining the most recent status of the programs prior to funding the next year's requirement and in insuring compliance with Congressional funding decisions.

CIVILIAN PERSONNEL CEILING

The conferees agree with the views expressed by the House Committee that the continued application of civilian personnel ceilings below the authorized level and 2 percent latitude serves as a deterrent to the effective and economical execution of Defense programs. If the civilian personnel levels were raised to the full authorized level, the Department of Defense could continue its programs with no increase in funding, yet decrease consulting contracts. Removal of the artificial ceiling constraints on civilian personnel hiring will help assure the orderly execution of the expanded program funded in fiscal year 1982. The conferees fully endorse the direction to eliminate personnel ceilings below the authorization. The conferees also support the House direction to exclude from all personnel ceilings, employees engaged in foreign military sales related activities.

FOREIGN MILITARY SALES

The conferees adopted the House position with respect to the need for (1) centralized accounting for foreign military sales, (2) the need to exclude from personnel ceilings employees who spend more than 50 percent of their time performing foreign military sales functions for which DOD is reimbursed by a foreign customer, (3) assign sufficient staff to the Security Assistance Accounting Center to insure that stock fund and secondary items are sold at prices high enough to recover their replacement cost as required by law, and (4) report to the Appropriations Committees the reasons for and amounts waived for nonrecurring production or R.D.T. & E. costs on an FMS sale when DOD believes it is in the national interest to do so.

The conferees did agree to restore $60 million of the House reduction because there is some concern that DOD may not be able to recover the entire reduction from foreign customers before the fiscal year ends due to already negotiated commitments.

WORLDWIDE MILITARY COMMAND AND CONTROL SYSTEM—AUTOMATIC DATA PROCESSING (WWMCCS-ADP)

The WWMCCS-ADP system currently consists of 35 medium-to-large computer systems and remote processors and/or terminals. The role of this system includes providing information necessary for planning, decisionmaking, and force deployment and employment. A total of $196,393,000 is requested in fiscal year 1982 for this program.

The conferees note that O. & M. costs for this system are projected to grow from a level of $66,873,000 in fiscal year 1980 to $120,062,000 in fiscal year 1983. This large cost growth is occurring despite only marginal operating improvements and few significant equipment changes during this period. The General Accounting Office has raised serious reservations about many aspects of the WWMCCS-ADP system in various reports over the years. In the most recent GAO report (MASAD-82-2) the GAO questioned DOD's entire approach for improving and updating the current ADP system.

The conferees note that recently, a new Joint Program Manager (JPM) office has been set up in the Air Force for the WWMCCS information system program. The Joint Project Manager has been designated to be the central focal point for coordination and control of all WWMCCS-ADP upgrading and modernization.

The House report directed that a number of issues be addressed in a study of this program and the report be submitted to the committee in 3 months. In light of the fact that a new Joint Project Manager (JPM) has been set up for this program, the conferees direct that the report referred to in the House report be written by the JPM rather than the Defense Communications Agency and be submitted in 6 months rather than 3.

The conferees also agree that the JPM have apropriate management authority over all funds programed for the WWMCCS-ADP system. Any funds requested to support this system which are not under the management responsibility of the JPM will be considered not to be a part of the WWMCCS-ADP program.

The House report included language prohibiting proceeding with any major initiatives in certain subprograms of WWMCCS-ADP until a report, addressing various issues, was submitted to the committee. In view of the above direction such efforts can proceed if the JPM determines that they are essential to updating and improving the WWMCCS-ADP. Efforts which will not assist in this work, or which will have to be redone under one or more of the various updating programs will be terminated.

STANDARD LEVEL USER CHARGE

The conferees agree to delete the general provision proposed by the House which would have limited reimbursement to the General Services Administration to only 50 percent of the standard level user charge. The conferees did agree, however, that to the extent permitted by existing law: (a) space improvements paid for by DOD that are properly the responsibility of GSA should not be included in determining the standard level user charge; (b) any unilateral decrease in the support provided by GSA (such as cleaning and guard service) should be offset by a decrease in the standard level user charge; and (c) the qualilty of service provided by GSA for routine maintenance, painting, and other building services should be comparable to that in the private sector for similar type space being leased at comparable rates.

NATIONAL CAPITAL REGION TRANSPORTATION CONSOLIDATION

The conferees direct that the consolidation of the military services motor pool should be planned by the Department of Defense as the senior agency involved. The Department should implement these recommendations with the objective of maximizing efficiencies and economies that may be realized by consolidation or other actions as deemed appropriate. The Department of Defense shall be responsible for the management of such a consolidation and determine the guidelines for operations.

OPERATION AND MAINTENANCE, ARMY

Amendment No. 12: Appropriates $15,037,897,000 instead of $15,019,062,000 as proposed by the House and $15,354,400,000 as proposed by the Senate.

Amendment No. 13: Provides $944,600,000 only for the maintenance of real property in lieu of $898,600,000 as proposed by the House and $998,600,000 as proposed by the Senate.

SKILL QUALIFICATION TEST

The House deleted all funds for the Skill Qualification Test (SQT) based upon adverse reports by the General Accounting Office and the Army itself. The conferees endorse the concept of using an objective test to support personnel decisions and recognize that a portion of the development completed for the SQT could be retained in any follow-on test. The conferees have therefore restored half of the House reduction. The Army is directed that any additional funding will be provided via a reprogramming or a supplemental request only upon proper justification by the Army that a thorough analysis has been performed and a clear plan has been prepared as a basis for any follow-on test.

MEDICAL INTELLIGENCE AND INFORMATION AGENCY (MIIA)

The conferees agree to the continuance of the MIIA in FY 1982 at the budgeted funding and manpower levels. Additionally, the conferees agree to include MIIA in the FY 1982 General Defense intelligence Program (GDIP). This action was taken reluctantly and the conferees expect that in FY 1983 the MIIA will be strictly an intelligence activity funded in the Defense Agencies (DIA) account. It should report to the Director, DIA, and not the Army Surgeon General, unless the Secretary of Defense furnishes the Appropriations Committees, by June 30, 1982, compelling justification as to why the existing organizational structure should not be altered.

The Department of Defense made a strong appeal that the MIIA is a valuable intelligence production agency, and the conferees expect it to be exactly that and nothing more. Other non-intelligence activities performed by the MIIA, as well as the funding and manpower billets related to them, are to be abolished. Additionally, the medical intelligence activities of all other DOD components are to be taken over by the MIIA. The conferees expect that the MIIA will be the only medical intelligence agency in DOD.

NEW CUMBERLAND ARMY DEPOT

The conferees agree that the Army shall continue the maintenance of CH-47 helicopters at the New Cumberland Army Depot as specified in the House report.

Summary.— Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement of items in conference is as follows:

[In thousands of dollars]

ARMY STOCK FUND

Amendment No. 14: Appropriates $176,300,000 instead of $163,300,000 as proposed by the House and $211,300,000 as proposed by the Senate.

OPERATION AND MAINTENANCE, NAVY

Amendment No. 15: Appropriates $19,385,889,000 instead of $19,345,000,000 as proposed by the House and $19,944,389,000 as proposed by the Senate.

SHIP OVERHAUL CHANGE ORDERS AND ADVANCE FUNDING

In view of the lateness of the appropriation, the conferees agree that it would be impractical to implement the ship overhaul change orders and advance funding procedures in this fiscal year as directed by the House Committee. However, the conferees fully endorse the implementation of this procedure in fiscal year 1983 as expressed by the Senate Committee. Although the funding required to begin this practice in fiscal year 1982 has been deleted in accordance with this agreement, the general provisions retain Section 708 (m) and (n) to reaffirm the conferees' resolve that this procedure shall be implemented in fiscal year 1983. It is expected that the fiscal year 1983 budget submission will include the necessary funding request to achieve this objective.

SHIP LEASES

The conferees direct that ships to be leased with the $60.0 million added to the operation and maintenance appropriation in conjunction with the October budget amendments must be used to lease ships with an option to purchase. Also, none of the funds provided are for overhaul or major configuration changes to such ships while they remain in private ownership. The Navy will inform the appropriate congressional committees by March 30, 1982 of the status of plans to lease and/or purchase appropriate seaborne transportation for the Rapid Deployment Force.

It is the intent of the conferees that no ships may be offered for charter to the United States under any program specifically including but not limited to the T-AKX program, unless the rebuilding, conversion, or reconstruction necessary to meet U.S. Navy performance requirements is accomplished in a shipyard or shipyards located in the United States.

Amendment No. 16: Provides $685,000,000 instead of $646,500,000 as proposed by the House and $736,800,000 as proposed by the Senate for the maintenance of real property.

Amendment No. 17: The conferees agree to the Senate proposal deleting the provision in the House bill which made available $3,699,700,000 only for regularly scheduled ship overhauls, restricted availabilities, and ship modifications. The conferees also agreed to the Senate amendment deleting the set aside of not less than $24,000,000 for work at the Ship Repair facility, Guam.

Amendment No. 18: The conferees agrees to the Senate proposal deleting the set aside of not less than $24,000,000 for work at the Ship Repair Facility, Guam. Also deleted was the House provision that made available funds for work at other shipyards in amounts equal to the amount of work placed at the Ship Repair Facility, Guam.

Amendment No. 19: Restores House provision which makes not less than $59,000,000 of the Navy Operation and Maintenance appropriation available only for payment in support of the LEASAT program.

Summary.—Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement on items in conference is as follows:

[In thousands of dollars]

NAVY STOCK FUND

Amendment No. 20: Appropriates $9,435,000 instead of $5,435,000 as proposed by the House and $17,435,000 as proposed by the Senate.

OPERATION AND MAINTENANCE, MARINE CORPS

Amendment No. 21: Appropriates $1,185,540,000 instead of $1,184,540,000 as proposed by the House and $1,186,440,000 as proposed by the Senate.

Summary.—Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Land forces	216,903	225,403	216,903	225,403
(Camouflage uniforms)		(8,500)		(8,500)

Supply activities		−1,500		−1,500
OSHA/EPA		−800		−800
Alcohol and soft drinks		−1,000		
Efficiency review program		−1,000		−1,000

OPERATION AND MAINTENANCE, AIR FORCE

Amendment numbered 22: Appropriates $16,079,719,000 instead of $15,978,376,000 as proposed by the House and $16,906,069,000 as proposed by the Senate. The conferees also agree to make $29,000,000 available only for the installation of modification kits into KC-135 aircraft in lieu of $46,800,000 as provided by the House and no funds as provided by the Senate.

DEPOT MAINTENANCE INDUSTRIAL FUND

The conferees agree that the Air Force should discontinue the award of depot maintenance contracts in advance of appropriations and direct the Air Force to award only those contracts for which appropriations are currently available. The Air Force may seek the legislative authority to change this procedure, but in the absence of such legislation, the Air Force should seek to achieve the objectives outlined by the Senate Committee to assure a full transition to this procedure in fiscal year 1983.

B-52D'S

The conferees agree that the B-52D's should be continued in operation until such time as the B-1 or other new strategic bomber becomes available. At that time existing B-52G and H model aircraft currently devoted to SIOP missions can be freed and programmed for the conventional warfare role. The B-52D's are to be retained and supported as planned in the original President's budget submission.

KC-135 REENGINING PROGRAM

A total of $29 million is provided in the operating account and $56 million in the procurement account for the reengining of KC-135 aircraft with JT3D engines. This funding is adequate to reengine the KC-135's in overhaul until the first delivery of the new CFM-56 engines. In that regard, no funds are to be diverted from the CFM-56 program in order to insure current delivery schedules of these engines as planned.

CADIN-PINE TREE

The conferees agree to restore the $3.8 million reduction made by the House to the Cadin-Pine Tree system of Air Defense radars. The restoration of these funds was made with the understanding that the Air Force and other appropriate Federal entities will undertake negotiations with the Canadian Government with a view toward sharing overall costs in a manner that is closer to the sharing arrangements prior to expanded contracting of facility operations.

CONTRACTOR OPERATED SUPPLY STORES

The Air Force has for a number of years used contractor operated stores for base supply purposes. These stores are referred to as Contractor Operated Civil Engineer Supply Stores (COCESS) and Contractor Operated Parts Stores (COPARS). The conferees agree to delete the $3 million added by the House to return these activities to direct Government operation. Accordingly, the Air Force need not begin the conversion of these stores to in-house operations in fiscal year 1982 as directed by the House.

However, the conferees expect the Secretary of Defense to make an independent assessment of the operation of these stores to include addressing the repeated allegations of contract abuse, product fraud, and other irregularities. If the Secretary of Defense determines that the continued operation of these stores results in economies and efficiencies as the Air Force claims, and that the allegations of fraud are unfounded, then the Appropriations Committees expect to be informed why such stores should not also be established at Army and Navy installations. The conferees expect a full report on this matter from the Secretary of Defense by June 1, 1982.

Summary.—Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement on items in conference is as follows:

[In thousands of dollars]

AIR FORCE STOCK FUND

Amendment No. 23: Appropriates $78,800,000 instead of $67,800,000 as proposed by the House and $107,800,000 as proposed by the Senate.

OPERATION AND MAINTENANCE, DEFENSE AGENCIES

Amendment No. 24: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment appropriating $4,985,400,000 instead of $4,949,470,000 as proposed by the House and $4,768,000,000 as proposed by the Senate. The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 25: The conferees agree to appropriate $5,812,000 for emergencies and extraordinary expenses as proposed by the House, instead of $8,500,000 as proposed by the Senate. This matter is discussed in the classified annex of the statement of the managers.

CIVILIAN HEALTH AND MEDICAL PROGRAMS OF THE UNIFORMED SERVICES

The conferees reached the following agreements with respect to various items in the reports which impact the Civilian Health and Medical Program of the Uniformed Services.

Biofeedback.—The conferees agree that CHAMPUS should continue to develop guidelines under which payments for biofeedback services could be reimbursed. Actual payments for such services in FY 1982 has not been authorized.

Child and Spouse Abuse.—The conferees agree that the Department of Defense should continue to address the problem of child and spouse abuse. An additional $5.0 million has been provided for this by the conferees. The conferees also agree to accept the Senate amendment which makes funds available to establish a program of child advocacy and family counseling services to deal with problems of child and spouse abuse.

Residential Treatment Centers.—The FY 1982 budget proposed that Residential Treatment Centers no longer be recognized as authorized providers for new admissions after October 1, 1981. The Senate report directed that DoD continue the RTC program as a recognized benefit. The conferees accept the Senate position and interpose no objection to the continued use of RTC's. Senate report language directing CHAMPUS to eliminate continued fraud and abuse is to be strictly observed.

Health Maintenance Organizations.—The conferees agree with the Senate report on the need for CHAMPUS to guarantee a return to regular CHAMPUS coverage for those beneficiaries who select to participate in the HMO test and find it unsatisfactory. The conferees further agree that the office of CHAMPUS or other appropriate activities of the Department of Defense will examine other types of health insurance, including existing government employee plans for possible use by military beneficiaries.

Nonphysician Health Care Providers.—The conferees agree to a change in the House version of the bill which will permit a certified nurse practitioner to bill directly for services provided. The conferees also agree to continue to allow certified clinical social workers to bill directly on a test basis only.

Summary.—Items for which the conferees have provided specific guidance have been addressed elsewhere. The agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Intelligence and communications	1,172,144	1,169,614	1,172,144	1,169,944

Camouflage nets		−3,400		−3,400

NATIONAL BOARD FOR THE PROMOTION OF RIFLE PRACTICE

Amendment No. 33: Provides that $680,000 worth of ammunition may be issued for the promotion of rifle practice as provided by the Senate in lieu of $340,000 as provided by the House.

Amendment No. 34: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, as follows:

Provided, That competitors at national matches under title 10, United States Code, section 4312, may be paid subsistence and travel allowances in excess of the amounts provided under title 10, United States Code, section 4313.

CLAIMS, DEFENSE

Amendment No. 35: Appropriates $155,700,000 as proposed by the House in lieu of $198,200,000 as proposed by the Senate.

TITLE IV—PROCUREMENT

AIRCRAFT PROCUREMENT, ARMY

Amendment No. 36: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the sum proposed by said amendment, insert the following: *; $1,911,100,000: Provided, That notwithstanding any other provision of this Act, after the head of the agency concerned gives written notification of a proposed multiyear contract for the purchase of the UH-60A Black Hawk aircraft to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives, such contract may not then be awarded until the end of a period of 45 days beginning on the date of such notification*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The bill language agreed to by the conferees will enable the Army to enter into a multiyear contract for procurement of the Black Hawk helicopter, subject to prior approval of the Committees on Armed Services and Appropriations of the House of Representatives and the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Airplane, UV–18 (Twin Otter)			3,600	3,600
Foreign military sales adjustment		−4,000		
Army Guard and Reserve Equipment transfer		−2,700		−2,700
Reduction, inflation/offsets	−2,000	−2,000	−25,100	−2,000

MISSILE PROCUREMENT, ARMY

Amendment No. 37: Appropriates $2,131,200,000 as proposed by the House instead of $2,177,200,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Stinger	223,900	192,100	203,900	192,100
Spares and repair parts	181,800	181,000	181,800	181,000
Army Guard and Reserve equipment transfer	—	−3,100	—	−3,100
Reduction, offsets/inflation	−3,000	−3,000	27,300	−3,000

PROCUREMENT OF WEAPONS AND TRACKED COMBAT VEHICLES, ARMY

Amendment No. 38: Restores House language earmarking funds for the continued evaluation and testing of 9 mm handguns and appropriates $3,825,200,000 instead of $3,818,200,000 as proposed by the House and $3,962,600,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Field artillery ammunition support vehicle	4,000		4,000	
Tank, combat, ft, 105MM gun, XM1 series	1,348,000	1,348,000	1,424,000	1,348,000
Reduction, offsets/inflation	−5,000	−5,000	47,000	−5,000
Foreign military sales adjustment		−7,000		
Army Guard and Reserve equipment transfer		−5,400		−5,400

PROCUREMENT OF AMMUNITION, ARMY

Amendment No. 39: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating $2,381,900,000 instead of $2,350,900,000 as proposed by the House and $2,338,400,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Cartridge, 5.56mm, blank	19,500	24,400	19,500	24,400

155 MM IMPROVED CONVENTIONAL MUNITION (ICM)

The conferees agree to a total of $116,800,000 for the 155 mm ICM, an increase of $15,000,000 above the budget. The additional funds shall be used only for full-funded procurement of projectile end-items.

OTHER PROCUREMENT, ARMY

Amendment No. 40: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating $3,721,971,000 instead of $3,804,300,000 as proposed by the House and $3,728,071,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Truck, 5T, 6X6, ABT	301,700	296,700	301,700	296,700
Truck, 10T, 8X8, ABT	200,600	195,600	200,600	195,600
Intelligence data handling system (IDHS)	5,300	4,300	4,271	4,271
Position location reporting system (PLRS)	30,500		30,500	
Radar set, artillery locating AN/TPQ–37	95,600	95,600	79,600	79,600
Spares and repair parts	92,400	89,300	92,400	89,300
Detector, chemical agent, M43A1	67,000	67,000	55,000	55,000
Field kitchen, mobile, TRL MTD		3,500		3,500
Air cushion vehicle, 25–30 ton		27,300		27,300
Base level com'l equipment	23,300	23,300	45,700	39,000
Guard and Reserve readiness equipment		139,500		69,500
Reduction, offsets/inflation		−4,000	46,900	−4,000
Army Guard and Reserve equipment transfer		−5,200		−5,200

POSITION LOCATION REPORTING SYSTEM

Because of unresolved developmental problems, the conferees do not believe that

procurement of the Precision Location Reporting System (PLRS) for the Army and Marine Corps would be prudent at this time. The conferees are in agreement, however, that such a system, which would improve the tactical battlefield commander's ability to provide automatic and accurate identification, location and navigation data in all terrain and weather and enhance maneuver control, fire response time and airspace management, is an urgent requirement. Should the Department of Defense find it necessary to request procurement funding for PLRS items in Fiscal Year 1982, the conferees would seriously consider either a supplemental request or a reprogramming action, if data are provided indicating that the aforementioned developmental problems have been satisfactorily resolved.

ARMY NATIONAL GUARD EQUIPMENT

Amendment No. 41: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $50,000,000 for Army National Guard equipment. The House bill contained no appropriation.

The conference agreement will provide the following:

[In thousands of dollars]

	Budget	House	Senate	Conference
155mm Howitzer, M-109			20,700	20,700
Armored vehicle Laumen bridge			18,000	18,000
Mortor carrier M-125 A2			6,900	6,900
Command post vehicle			4,400	4,400

AIRCRAFT PROCUREMENT, NAVY

Amendment No. 42: Appropriates $9,115,800,000 instead of $8,946,800,000 as proposed by the House and $9,431,400,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

Foreign military sales adjustment		−2,000		

KC-130 TANKER

The conferees agree to add $64,000,000 for 4 KC-130's for the Marine Corps Reserve.

AIRCRAFT SPARES AND REPAIR PARTS

The conferees agree to add $27,000,000 over the $1,518,400,000 in the House bill for aircraft, spares and repair parts. This increase includes funds for the spares associated with the F-14, TF-30-414 engine modification program.

WEAPONS PROCUREMENT, NAVY

Amendment No. 43: Appropriates $3,207,100,000 instead of $3,196,100,000 as proposed by the House and $3,327,100,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
AIM/RIM-7 F/M Sparrow	144,700	124,700	144,700	134,700
AIM-54A/C (Phoenix) (AP-CY)	26,200	21,000	26,200	21,000
AGM-84A Harpoon (AP-CY)	18,000		18,000	
Torpedo MK-48	133,500	120,500	133,500	120,500
Torpedo MK-46	65,000	57,600	65,000	57,600
Torpedo MK-46 MODS	113,600	95,700	113,600	95,700
Reduction, offsets/inflation	−3,000	−3,000	40,300	−3,000
Army Guard and reserve equipment transfer		−4,600		−4,600
Consultants, studies, and analyses		−600		−600
Foreign military sales and adjustment		−1,000		

SHIPBUILDING AND CONVERSION, NAVY

Amendment No. 44: Appropriates $315,600,000 for the Trident submarine program instead of $230,700,000 as proposed by the House and $330,700,000 as proposed by the Senate. The conference agreement also provides for the transfer of $15,100,000 of unobligated balances from the "Trident submarine program" of "Shipbuilding and Conversion, Navy 1979/1983" to be used for Trident advance procurement funding.

Amendment No. 45: Appropriates $475,000,000 for the CVN aircraft carrier program as proposed by the House instead of $658,000,000 as proposed by the Senate.

Amendment No. 46: Appropriates $81,000,000 for the aircraft carrier service life extension program as proposed by the House instead of $100,800,000 as proposed by the Senate.

Amendment No. 47: Appropriates $2,929,300,000 for the CG-47 AEGIS Cruiser program as proposed by the House instead of $2,946,300,000 as proposed by the Senate.

Amendment No. 48: Appropriates $45,000,000 for the LHA/LHDX helicopter assault ship program as proposed by the Senate. No funds for the LHA/LHDX were included in the House bill.

Amendment No. 49: Appropriates $926,100,000 for the FFG guided missile frigate program as proposed by the House instead of $971,900,000 as proposed by the Senate.

Amendment No. 50: Appropriates $135,500,000 for the ARS salvage ship program as proposed by the House instead of $160,500,000 as proposed by the Senate.

Amendment No. 51: Appropriates $307,600,000 for the T-AKRX fast logistic ship program instead of $184,00,000 as proposed by the House and $323,000,000 as proposed by the Senate. The conference agreement also provides for the transfer of $102,400,000 of unobligated balances of which $58,000,000 shall be derived from the "maritime prepositioning ship programs" and $44,400,000 shall be derived by transfer from the "fast logistic ship (T-AKRX) program," both of which are from "Shipbuilding and Conversion, Navy, 1981/1985."

Additionally, the conferees direct that the Navy proceed immediately with the acquisition of the remaining two SL-7 ships; minimodification of four SL-7 ships; and the partial RO/RO conversion of four SL-7 ships.

Amendment No. 52: Appropriates $754,700,000 for craft, outfitting, post delivery, cost growth and escalation on prior year programs as proposed by the House instead of $808,500,000 as proposed by the Senate.

Amendment No. 53: Deletes Senate amendment appropriating $105,000,000 for inflation adjustments.

Amendment No. 54: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: *for acquisition, construction and improvement, Coast Guard, $300,000,000, to be allocated to the Coast Guard: "Acquisition, Construction and Improvements";*

The managers on the part of the Senate will move to concur in the amendment of House to the amendment of the Senate.

Amendment No. 55: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment transferring a total of $117,500,000 instead of $73,100,000 as proposed by the House and $102,400,000 as proposed by the Senate.

The managers on the part of the Senate will move to concur in the amendment of House to the amendment of the Senate.

Amendment No. 56: Provides for the transfer of $15,100,000 to be derived from the "Trident submarine program" of "Shipbuilding and Conversion, Navy 1979/1983" as proposed by the House. The Senate amendment deleted this transfer.

Amendment No. 57: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate transferring $44,400,000 from the "fast logistics ship (T-AKRX) program" of "Shipbuilding and Conversion, Navy, 1981/1985". The House bill did not contain this transfer.

Amendment No 58: Provides for the reduction of $12,000,000 for inflation offsets as proposed by the House. The Senate did not provide for this reduction.

Amendment No. 59: Provides for the reduction of $13,700,000 for consultants, studies and analyses as proposed by the House instead of a reduction of $7,000,000 as proposed by the Senate.

Amendment No. 60: Provides for the reduction of $11,900,000 for Army Guard and Reserve equipment transfer as proposed by the House. The Senate did not provide for this reduction.

Amendment No. 61: Provides a total of $8,821,400,000 for Shipbuilding and Conversion, Navy appropriation instead of $8,148,900,000 as proposed by the House and $9,331,900,000 as proposed by the Senate.

Amendment No. 62: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment transferring a total of $117,500,000 instead of $73,100,000 as proposed by the House and $120,400,000 as proposed by the Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 63: Provides that the Shipbuilding funds in the amount of $8,821,400,000 and in addition, $117,500,000 to be derived by transfer, will remain avail-

able until September 30, 1986, as proposed by the House instead of September 30, 1988, as proposed by the Senate.

Amendment No. 64: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that $119,000,000 of the appropriation for "Shipbuilding and Conversion, Navy" which expired for obligation on September 30, 1981 shall remain available for obligation until September 30, 1983, as proposed by the Senate. The House did not provide for this reappropriation.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Trident (nuclear) (AP–CY)	330,700	230,700	330,700	315,600

Consultants, studies, and analyses	−7,000	−13,700	−7,000	−13,700

REACTIVATION OF THE BATTLESHIP IOWA

The conference agreement includes $89 million for long leadtime items for the reactivation of the Battleship Iowa. The conferees direct that the Navy include, as part of the criteria in selecting the shipyard to reactivate the Battleship Iowa, the costs associated with the rescheduling of work previously planned on other ships. The workload adjustments required to accommodate the reactivation, such as rescheduling of such work at a later date, will increase the cost of work on the other ships. Such costs must be included in any cost comparisons made. Additionally, consideration must be given to the cost impact when weapons and long-lead components will be deferred from newer ships to be placed on the Iowa.

CONCERN FOR ADEQUATE SEALIFT

The conferees recognize the importance of providing adequate sealift for mobilization purposes. It is also noted that the Administration has recently announced its intention to place increassed reliance on maritime pre-positioning over land basing in Southwest Asia.

In light of these factors, the conferees are concerned with the impact of elimination of funds for the acquisition of commercially obsolete US flag merchant vessels for the Ready Reserve Fleet and the National Defense Reserve Fleet under Section 510 of the Merchant Marine Act. This elimination of funds comes about as a consequence of the suspension of the Construction Differential Subsidy, but was not fully debated as part of that action. The limited funds deferred to fiscal year 1982 for the program have already been obligated, and it appears that the Government will not be able to take advantage of all desirable offers to the Maritime Administration for such ships.

Therefore, the conferees urge the Department to give prompt attention to this matter and to advise the Appropriations Committees on the availability of ships with potential Rapid Deployment Force, Ready Reserve Fleet or National Defense Reserve Fleet application. In addition, a description of the adequacy of present assets to meet mobilization requirements shall be provided. Should needed ships be identified, the Department shall consider submitting a reprogramming or supplemental request for their acquisition.

OTHER PROCUREMENT, NAVY

Amendment No. 65: Appropriates $3,708,777,000 instead of $3,695,577,000 as proposed by the House and $3,880,268,000 as proposed by the Senate.

The conference agreement on items in conference is a follows:

[In thousands of dollars]

LAMPS MARK III

The House, because of the dramatic increase in cost, directed that the Navy cancel the LAMPS MARK III backfitting program for 31 FFG–7's, 4 DD–993's, and 2 CG–47's and the procurement of LAMPS MARK III shipboard equipment for these ships. The conferees agree that consideration will be given during the fiscal year 1983 budget deliberations to alternative strategies, submitted by the Department, as they relate to the LAMPS MARK III retrofitting program.

PROCUREMENT, MARINE CORPS

Amendment No. 66: Appropriates $1,711,456,000 instead of $1,682,556,000 as proposed by the House and $1,758,716,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Items less than $900,000	8,571	8,071	8,571	8,071
General reduction, first destination transportation		−500		−500

Army Guard and Reserve equipment transfer		−2,400		−2,400

AIRCRAFT PROCUREMENT, AIR FORCE

Amendment No. 67: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed in said amendment, insert: *$13,818,998,000, of which $102,800,000 shall be available only for a classified program, and*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Long range combat aircraft	1,674,000	1,574,000	1,724,200	1,574,000

Army Guard and Reserve equipment transfer		−19,400		−19,400
Foreign military sales adjustment		−8,000		

Amendment No. 68: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: *and $1,801,000,000 shall be available only for purchase of B–1B aircraft when the President certifies to the Congress that it is feasible to accomplish the program for the purchase of 100 B–1B aircraft at a total program cost of not to exceed $20,500,000,000 (in constant fiscal year 1981 dollars), or in such other amount as the President certifies and explains to the Congress, and such funds for the purchase of B–1B aircraft shall remain available during any quarter that the total program cost of 100 B–1B aircraft is included in any Selected Acquisition Report required for the B–1B program for the previous quarter by section 811 of the Department of Defense Appropriation Authorization Act, 1976 (10 U.S.C. 139 note),*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 69: Makes available $56,000,000 only for the procurement of B–707 aircraft to provide for engines and parts to reengine KC–135 aircraft, instead of $103,500,000 as proposed by the House. The Senate amendment deleted the House language.

Amendment No. 70: Earmarks $344,300,000, as proposed by the Senate, for contribution of the U.S. share of the cost of the acquisition by NATO of AWACS aircraft instead of $334,300,000 as proposed by the House.

Amendment No. 71: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which transfers $89,700,000 from aircraft procurement, Air Force, 1981-83.

MISSILE PROCUREMENT, AIR FORCE

Amendment No. 72: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed in said amendment, insert: *$4,559,550,000, of which $624,400,000 shall be available only for a classified program*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Minuteman upgrade and expansion			5,000	5,000
ICBM C3 integration	54,436	54,436	56,136	54,436

Reduction, offsets/inflation	−5,000	−5,000	54,600	−5,000
Army Guard and Reserve equipment transfer		−5,900		−5,900

MK-12A REENTRY VEHICLE

The House included $44,600,000 for continuing procurement of the MK-12A reentry vehicle. The Senate included no funds for this program. The conferees recommend $22,300,000 for the MK-12A program and direct the Air Force to reprogram any funds necessary to maintain production.

NAVSTAR-GPS

The conferees agree the NAVSTAR Global Positioning Satellite (GPS) system is of critical importance for strategic and tactical defense missions. The conferees also are concerned that without procurement appropriations, the Initial Operational Capability (IOC) of NAVSTAR will slip. The conferees, therefore, direct the Air Force to reprogram funds necessary to maintain the current IOC of NAVSTAR.

DEFENSE SUPPORT PROGRAM

The conferees agree that the $242,254,000 for the Defense Support Program is to be used to procure long leadtime items, including the manufacture of components and subsystems to the maximum extent feasible. The Air Force is to submit a budget in fiscal year 1983 based on fully-funding the units for the Defense Support Program in a block buy in order to maximize cost savings.

CLASSIFIED PROGRAM

The conferees agree to the addition of $5,300,000 for a classified program as proposed by the Senate. The conferees further agree that this additional sum is subject to the later concurrence of the authorization committees.

OTHER PROCUREMENT, AIR FORCE

Amendment No. 73: Appropriates $5,365,633,000 instead of $5,379,288,000 as proposed by the House and $5,357,589,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Caliber .38	7,195	5,295	7,195	5,295
30 mm API	232,619	232,619	222,619	222,619

Reduction, offsets/inflation	−6,000	−6,000	65,500	−6,000
Foreign military sales adjustment		−1,000		
Audio visual equipment		−3,280		−3,280
Army Guard and Reserve equipment transfer		−7,200		−7,200
Classified programs			59,000	

SLBM PHASED ARRAY RADAR

The conferees agree to provide no procurement funds for the PAVE PAWS radar, as proposed by the House, instead of $71,000,000 as proposed by the Senate. The conferees further agree that the Appropriations Committees will consider a supplemental budget request to initiate procurement of this rada for the southeastern site if the Air Force deems that it is of sufficient priority to be included in a supplemental budget request.

CLASSIFIED PROGRAM

The conferees agree to the addition of $3,300,000 for a classified program as proposed by the Senate. The conferees further agree that this additional sum is subject to the later concurrence of the authorization committees. The conferees also agree to restore $3,000,000 as proposed by the Senate which will be explained in the classified annex to the Statement of the Managers.

PROCUREMENT, DEFENSE AGENCIES

Amendment No. 74: Appropriates $511,500,000 as proposed by the House instead of $518,700,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Classified programs	447,058	442,058	447,058	442,058
Reduction, offsets/inflation	−1,000	−1,000	5,500	−1,000
Army Guard and Reserve equipment transfer		−1,200		−1,200
Reallocation of WWMCCS resources		5,500		5,500

FIGHTING VEHICLE SYSTEMS (FVS)

The conferees agree that a side by side comparison of FVS alternatives is not necessary but that the Army should consider procuring or leasing such alternatives for testing in conjunction with the 9th Infantry test bed program.

VIPER

The conferees agree with language in the Senate report expressing concern about the cost and technical problems of VIPER and directing testing and evaluation of alternative systems. This testing program is to be carried out within available funds. The testing program shall address the needs of all services and the Office of the Secretary of Defense shall be involved in the evaluation.

SECURE VOICE IMPROVEMENT PROGRAM (SVIP)

The House report directed that the funds requested for upgrading the AUTOSEVOCOM secure voice system be used instead to procure standard telephone unit (STU II) secure telephones. The conferees agree that the DOD may proceed with the planned upgrade of the AUTOSEVOCOM system but direct that $1,000,000 of the funds requested for that upgrade be expended on procurement of standard telephone units.

C-130 AIRCRAFT

The conferees agree that all eight of the C-130 aircraft provided in the aircraft procurement, Air Force account, shall be allocated to the Air National Guard.

TITLE V—RESEARCH, DEVELOPMENT, TEST AND EVALUATION

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, ARMY

Amendment No. 75: Appropriates $3,609,535,000 instead of $3,577,119,000 as proposed by the House and $3,759,409,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senator	Conference
Defense research sciences	161,811	152,405	166,000	157,000

Reduction, inflation/offsets	−5,000	−5,000	28,500	−5,000

AIRCRAFT WEAPONS

The conferees agree to provide $512,000 for Aircraft Weapons as proposed by the House, rather than $10,312,000 as proposed by the Senate. The $9,800,000 reduction was receomended for advanced development of millimeter wave radar and fire control systems for attack helicopters. The action taken by the conferees is taken without prejudice, since the project is asked to be deferred, pending transfer of more mature technology from on-going millimeter wave programs to this program, and the onset of increased stabilization in the Advanced Attack Helicopter (AAH) procurement program.

ADVANCED DEVELOPMENT OF AUTOMATIC TEST EQUIPMENT

The conferees agree to provide $9,655,000 for Advanced Development of Automatic Test Equipment, instead of $14,355,000 as proposed by the House and $5,355,000 as proposed by the Senate. This amount, together with the $4,700,000 unobligated balance remaining in this program from fiscal year 1981, will provide the full authorized amount for fiscal year 1982.

FORCE LEVEL MANEUVER CONTROL—SIGMA

The conferees agree to provide $14,869,000 for Force Level Maneuver Control—SIGMA as proposed by the Senate, rather than $11,000,000 as proposed by the House.

The conferees agree that Army efforts for fiscal year 1982 should go forward as planned, with the clear understanding, however, that TCT and TCS equipment will begin procurement in fiscal year 1983, so that practical operational benefits can be obtained as rapidly as possible.

ROTARY WING AIRCRAFT ESCAPE SYSTEM

HELICOPTER ESCAPE SYSTEMS

The conferees agree to the language in House Report No. 97-333 concerning Rotary Wing Aircraft Escape System, also referred to as Helicopter Escape Systems.

ARMY CALIBRATION EQUIPMENT

The conferees agree that the Army has been slow in assembling an accurate data base on which to support decisions on the future purchase of calibration equipment. Despite testing by the White Sands Missile Range and intensive review by the General Accounting Office and the Inspector General of the Army, the Army states that it is still uncertain as to the cost effectiveness of alternate systems, including those manufactured by Julie Research Laboratories, Inc. The conferees direct the Army to assemble and analyze all of its previous findings, from whatever source, and to submit to Congress no later than March 15, 1982, a final comprehensive report, including a detailed implementation plan for the acquisition of calibration equipment. This does not restrict in any way the Army's authority to purchase calibration equipment during fiscal year 1982.

RESEARCH DEVELOPMENT, TEST AND EVALUATION, NAVY

Amendment No. 76: Appropriates $5,844,357,000 instead of $5,617,671,000 as proposed by the House and $6,113,579,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

S-1 COMPUTER

The conferees agree to provide $900,000 for the Navy S-1 computer. This is one-half the Navy request of $1.8 million. The conferees note that the $7.5 million funding increase for the S-1 computer in FY 1981 was considered sufficient to complete the Lawrence Livermore Laboratory effort during FY 1981. Should the Navy determine that additional funding is required for further testing and development of the S-1 advanced multiprocessor computer in FY 1982, both appropriations committees would be willing to entertain a reprograming action to accommodate such an initiative.

MEDICAL RESEARCH AND DEVELOPMENT

The House designated the Army as lead agency for infectious diseases and combat dental research. The conferees understand that the House language requires neither the closure of any present Navy R&D laboratory nor the cessation of Navy participation in these efforts. The conferees further understand that manpower management practices, as in other consolidated R&D efforts, will provide preservation of Navy identity and maintain Navy career patterns, while continuing the practice of periodic assignments of scientists of one Service to the laboratories of another. With these understandings, the conferees agree to the language of the House.

Because fiscal year 1982 has already begun, the transfer of funds from the Navy to the Army proposed by the House may be disruptive of on-going efforts. The conferees therefore agree to provide the full budgeted amounts for Navy Biomedical Technology and Navy Medical Development.

MK-48 ADCAP

The conferees agree to provide $154,400,000 for MK-48 ADCAP, rather than $117,000,000 as proposed by the House and $167,200,000 as proposed by the Senate. The conferees agree that signficant cost increases in the MK-48 ADCAP program are a matter of deep concern, and that the Navy should provide the results of a "Should Cost" study by March 1, 1982. In order to avoid adverse impact on this important program, the conferees agree that the Navy may use without further restriction up to $91,900,000 for the Validation Phase of the program. The conferees agree that obligation and expenditure of funds for the full scale engineering development phase of the program will remain subject to the conditions stated in House Report No. 97-333.

HXM HELICOPTER

The conferees agree to provide no funds for HXM Helicopter as recommended by the House, instead of $5,229,000 as recommended by the Senate. The conferees are concerned over the potentially very high cost of such a program, as well as the apparent lack of firm plans. The conferees believe that additional CH-53E procurement should provide adequately for Marine Corps needs. The conferees agree the Appropriations Committees will entertain a reprogramming request should the Marine Corps require funds to study the problem.

NAVY UNDERGRADUATE JET FLIGHT TRAINING SYSTEM

The Navy announced on November 19 that the team of McDonnell Douglas/British Aerospace/Sperry had been selected to begin pre-full scale development of the Navy's new undergraduate training system, the VTXTS, thus ending a competition among five contractors for this award. The Navy procurement plan for VTXTS called for retaining two sources in competition through the pre-full scale development phase during which firm specifications and development costs would be generated. By eliminating all but one contactor the Navy has prematurely ended the competition for this award with the result that firm specifications and program costs would be negotiated on a sole source basis with the remaining contactor. The conferees believe that the continuation of this program on a competitive basis through the end of pre-full scale development would result in savings of hundreds of millions of dollars in a program estimated to have a 20-year life cycle cost of at least $5.5 billion. The conferees therefore direct the Navy to continue a competition of two contractors through the end of the pre-full scale development phase using available

funds to sustain a competitive pre-full scale development program.

SURFACE EFFECTS SHIPS

The conferees agree to provide no funds for Surface Effects Ships as proposed by the House, instead of $5,000,000 as proposed by the Senate. The conferees agree that the Navy may use existing funds to maintain the current design office, pending receipt of a supplemental funding request to carry out the program outlined in the December 11, 1981 letter of the Under Secretary of Defense for Research and Engineering, at which time the Committees on Appropriations will afford it full consideration.

MK 92 UPGRADE PROGRAM

The conferees emphasize their strong support for this program which will provide a substantial increase in the antiair warfare capability of the MK 92 fire control system through the addition of a new four-faced, x-band phased array radar to the system for use on the FFG-7 class frigates. The primary aim in this program's development should be the earliest possible introduction of this system into the fleet.

To date, the start of this program has been unacceptably delayed. Therefore, the conferees request that this program be executed without further delay. Special emphasis should be given to the early development of the phased array radar.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, AIR FORCE

Amendment No. 77: Appropriates $8,659,610,000 instead of $8,501,210,000 as proposed by the House and $9,076,906,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Defense research sciences	139,500	133,500	139,500	136,500

VERY HIGH SPEED INTEGRATED CIRCUITS

The conferees agree to provide $55,700,000 for Very High Speed Integrated Circuits (VHSIC), as proposed by the House instead of $40,700,000 as proposed by the Senate. In addition, the conferees are informed that the Air Force has transferred $10,000,000 out of the VHSIC program during fiscal years 1980 and 1981. The Air Force is directed to reprogram these funds back into VHSIC during fiscal year 1982.

AIRBORNE LAUNCH CONTROL SYSTEM

The conferees agree to the House position to provide no funding for the Air Force Airborne Launch Control System (ALCS) Phase III program for 200 Minuteman III ICBM's. The conferees suggest that if this program is of sufficiently high priority, the Air Force may wish to consider a supplemental request for funds.

ENFORCER

The conferees agree to provide $6,000,000 for Enforcer as proposed by the Senate, instead of no funds as proposed by the House. The conferees direct the Air Force to conclude this test of the Enforcer, in a timely manner, during FY 1982. The conferees agree that there should be no need for additional appropriations for this test of the Enforcer.

NIGHT PRECISION ATTACK (LANTIRN)

The conferees agree to provide an appropriation of $87,600,000. This amount is required to prevent schedule slip and cost growth in fabrication of development pods, flight test of navigation targeting pods, and production readiness initiatives. The optimum program avoids inefficient development delays and cost increases. These funds are to be used only for continuation of the ongoing development program as currently structured by the Air Force to preclude further delays and increased costs.

RAPPORT III

The conferees agree that the Rapport III system, currently being tested by the Belgian Air Force with U.S. Air Force assistance, should be viewed as a possible interim capability pending availability of the airborne self-protection jammer (ASPJ), and as a potential backup if ASPJ should encounter significant technical or cost problems. The Air Force is directed to procure RAPPORT III test articles and to conduct necessary testing for a full and fair evaluation of the system for use by the USAF in the F-16 aircraft. The total amount to be spent to carry out this direction shall not exceed $6 million, exclusive of support costs, and shall be derived by reprogramming of available funds within the various electronic warfare programs. All testing and evaluation shall be completed during fiscal year 1982. The conferees are confident that these directions will be carried out promptly and in a spirit of cooperation, and that the subsequent evaluation will be objective.

ALTERNATE FIGHTER ENGINE

ENGINE MODEL DERIVATIVE PROGRAM

The conferees agree to provide $35,000,000 in the Alternate Fighter Engine program to continue development of the F-101 Derivative Fighter Engine. The conferees further agree to add $17,500,000 above the budget to the engine model derivative program for development work on increasing the thrust of the existing F-100 engine.

The conferees strongly support continued competition in the field of fighter engines. Although the Air Force is on record as having no present requirement for higher thrust engines, the conferees are concerned that such a requirement may emerge in the future. In that event, availability of at least two competing engines of the same thrust class will be in the Nation's best interests. For this reason, the conferees have agreed to the stated funding.

ADVANCED BALLISTIC RE-ENTRY SYSTEMS (ABRES)

The Senate and the House increased the ABRES funding from $49 million to $100 million. This additional amount is to be used in part to complete advance development and flight testing for the Advanced Ballistic Reentry Vehicle and fuzing subsystems. This advanced technology will provide payload options for the MX, Trident D5, Minuteman and possibly the small ICBM.

CLASSIFIED PROGRAM

The conferees agree to the addition of $16,400,000 for a classified program as proposed by the Senate. The conferees further agree that this additional sum is subject to the later concurrence of the authorization committees.

Amendment No. 78: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which restricts use of $334,000,000 of MX funds to only research and development related to non-superhardened silos.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, DEFENSE AGENCIES

Amendment No. 79: Appropriates $1,692,646,000 instead of $1,613,204,000 as proposed by the House and $1,843,495,000 as proposed by the Senate.

The conference agreement on items in conference is as follows:

[In thousands of dollars]

	Budget	House	Senate	Conference
Defense research sciences	94,400	89,400	94,400	89,400

STRATEGIC TECHNOLOGY, DARPA

The conferees agree to an appropriation of 151,831,000 for Strategic Technology, DARPA. The Strategic Technology appropriation is allocated accordingly:

	Thousands
Blue-green laser communications	30,200
Space based lasers	64,200
Carbon-carbon	1,000
Strategic technology	28,611

Other programs	33,420
September reduction	−5,600
Total, strategic technology-DARPA	151,831

KOREAN EQUIPMENT UPGRADE

The conferees agree to provide $5,000,000 for program management activities in project SORAK, a Korean equipment upgrade. However, before this major new initiative is undertaken, complete plans, schedules and life cycle costs must be provided, as well as the terms of any host nation funding agreements. In addition, while the demonstration is largely drawn from DARPA developed technology and DARPA therefore should play a major role, this demonstration is more properly a joint Army and Air Force project requiring close coordination with Commander in Chief, Pacific, and the services should be active participants.

TEAL RAIN/RADIUS WHITE

The conferees were informed by the Department of Defense that an addition of $20 million made by the authorization conference for two classified programs (Teal Rain and Radius White) was erroneously authorized in the Strategic Technology account (PE62301E). The Department requested that the additional $20 million be appropriated in the Experimental Evaluation in Major Innovative Technologies (PE62711E) account. The conferees agree to appropriate the $20 million for these two programs in the Experimental Evaluation in Major Innovative Technologies account.

LONG-HAUL COMMUNICATIONS

The conferees agree to an appropriation of $18,200,000 for Long-Haul Communications. This is the figure proposed by the House, together with the addition of $150,000 for EMP hardening of certain White House facilities and DCA's contribution to the development of modulation techniques to facilitate communications propagation through scintillation effects.

TITLE VII—GENERAL PROVISIONS

Amendment No. 80: Deletes House provision allowing for payments for depot maintenance contracts for twelve months beginning at any time during fiscal the year.

The conferees also agree to adopt House subsections (n) and (o) now renumbered as subsections (m) and (n) which provide for new ship overhaul and repair funding procedures.

Amendment No. 81: Deletes House provision which prohibits the use of funds in the bill to facilitate the sale of foreign manufactured optional uniform items by military clothing sales stores or by the Department of Defense operated exchange system stores.

Amendment No. 82: Deletes House provision which permitted the procurement of specialty metals or chemical warfare protective clothing produced outside the United States. This provision provided exceptions to the "buy American" section of the bill (section 723) allowing the purchase of foreign produced items for the purpose of offsetting sales made by the U.S. Government or U.S. firms under approved programs serving defense requirements or where such procurement is necessary in furtherance of the standardization and interoperability of equipment requirements within NATO so long as such agreements with foreign governments comply, where applicable, with requirements of section 36 of the Arms Export Control Act and with section 814 of the Department of Defense Appropriation Authorization Act, 1976.

Amendment No. 83: The Senate receded from its amendment which strikes a portion of section 741 from the bill. The portion restored by the conferees exempts CHAMPUS beneficiaries from the limitation requiring use of a military medical facility for nonemergency in-patient hospital care when residing within 40 miles of a military medical facility and the beneficiary has supplemental primary insurance coverage which will pay for at least 75 percent of the covered medical services.

Amendment No. 84: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which strikes House subsection (e) and inserts in lieu thereof a revised subsection (e) of section 742 so that no cosmetic surgery for any purpose is automatically excluded from coverage if a serious deformity is involved. The amended section reads as follows: *(e) surgery which improves physical appearance but which is not expected to significantly restore functions including, but not limited to, mammary augmentation, face lifts and sex gender changes except that breast reconstructive surgery following mastectomy and reconstructive surgery to correct serious deformities caused by congenital anomalies, accidental injuries and neoplastic surgery are not excluded;*

Amendment No. 85: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which permits direct reimbursement to certified nurse practitioners from funds appropriated for the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS). The Senate provision also continues the test of direct reimbursement to certified clinical social workers as did the House bill.

Amendment No. 86: The Managers on the part of the Senate receded from the amendment striking Section 765 from the bill. The section continues the restriction to prohibit the use of funds for medical care in the United States on an inpatient basis for foreign military and diplomatic personnel and their dependents unless they or their sponsoring government reimburse the United States for costs incurred.

Amendment No. 87: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

Sec. 765A. None of the funds made available by this Act shall be used in any way for the leasing to non-federal agencies in the United States aircraft or vehicles owned or operated by the Department of Defense when suitable aircraft or vehicles are commercially available in the private sector.

The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agree that the Department of Defense should discontinue the leasing out of aircraft or vehicles when suitable aircraft or vehicles are commercially available in the private sector. The House amendment to the Senate amendment specifies that such leasing to non-federal agencies of aircraft or vehicles owned and operated by DoD shall be restricted by this provision.

Amendment No. 88: The conferees agree to the House language, which requires specific provision in this Act for a multiyear procurement contract to be awarded for a major weapons system, instead of the Senate amendment to the House language which would have limited application of the House language to multiyear contracts with cancellation ceilings over $100,000,000. In this connection the conferees also agree to include language in Amendment No. 36, Aircraft Procurement, Army, to permit award of a multiyear procurement contract for the UH-60A Black Hawk aircraft with prior approval of the Committees on Armed Services and on Appropriations of the Senate and House.

Amendment No. 89: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the matter stricken by said amendment, insert the following:

Sec. 770. None of the funds appropriated in this or any other Act shall be available for obligation to reimburse a contractor for the cost of commercial insurance that would protect against the costs of the contractor for correction of the contractor's own defects in materials or workmanship.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 90: Restores the House provision which prohibits paying two subsistence allowances to enlisted personnel when they are in a travel status.

Amendment No. 91: Deletes Senate provision which prohibited use of funds in the Act for evaluation or procurement of 9 mm handguns.

Amendment No. 92: Restores the House provision which rounds military retirement service credit to the nearest month for any portion of a year in excess of six months.

Amendment No. 93: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number named in said amendment insert 773.

The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

This section permits DoD to transfer up to $1,700,000 to the Fedeal Emergency Management Agency for military support to civil defense.

Amendment No. 94: Deletes House provision which would have limited rental reimbursement to the General Services Administration to 50 percent of the Standard Level User Charge.

Amendment No. 95: The conferees agree to include language proposed by the Senate prohibiting implementation of the Competitive Rate Program for the transportation of household goods to or from Alaska or Hawaii and to change the section number to 774. A similar provision has been contained in previous Department of Defense Appropriation Acts. The conferees also agree that the Department of Defense should proceed with the review of industry proposals to develop a competitive rate system and report to the Appropriations Committees as directed in the Senate report.

Amendment No. 96: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Sec. 775. None of the funds appropriated by this Act for the pay of Reserve and National Guard technicians based upon their employment as technicians and their performance of duty as members of the Reserve

components of the Armed Forces shall be available to pay such technicians a combined compensation in excess of the rate payable for level V of the Executive Schedule: Provided, That for purpose of calculating such combined compensation, no military compensation other than basic pay will be included.

The Managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 97: Restores the matter stricken by said amendment pertaining to the reporting of waivers of RDT&E or other costs related to a foreign military sale as proposed by the House and changes the section number from 775 to 776.

Amendment No. 98: Restores the House provision which prohibits an employee who transfers or has been reassigned from Alaska or Hawaii from continuing to receive the higher Alaska or Hawaii pay rate. Current procedure allows an employee transferred or reassigned from Alaska or Hawaii to continue to receive the higher pay rate for up to two years after the reassignment or transfer. This provision does not apply to employees who are transferred or reassigned as a result of a reduction in force or a reorganizational transfer, and changes the section from 776 to 777.

Amendment No. 99: Deletes section proposed by the Senate which authorized $25,000,000 for a dental care test program as part of the Civilian Health and Medical Program of the Uniformed Services.

Amendment No. 100: Deletes the House provision which prohibits the hiring of foreign nationals when qualified United States citizens are available to perform the work. This provision only applied to United States citizens living in the foreign country where the vacant positions occur. The conferees agree that the DoD should take every possible action including renegotiation of existing agreements if necessary in order to enhance the employment opportunities for U.S. citizens living in overseas areas.

Amendment No. 101: Reported in technical disagreement. The Managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of section number 774 named in said amendment, insert 778.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

This section makes funds available for a child advocacy and family counseling services program.

Amendment No. 102: Restores the matter stricken by said amendment pertaining to the Army POMCUS program and changes the section number from 778 to 779.

Amendment No. 103: Deletes House provision prohibiting the operation of the Army Medical Intelligence and Information Agency after September 1, 1982.

Amendment No. 104: Restores House section number (780).

Amendment No. 105: Restores the House provision permitting the Department of Defense to lease no more than six aircraft as suitable replacements for C-140 aircraft.

Amendment No. 106: Restores the House provision which prohibits the transfer of any article of military equipment, data, or technical data package to a foreign country prior to the approval of the Secretary of the military service involved.

Amendment No. 107: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

(b) No funds appropriated by this Act may be used for the transfer of a technical data package from any Government-owned and operated defense plant to any foreign government, nor for assisting any such government in producing any defense item currently being manufactured or developed in a United States Government-owned, Government-operated defense plant manufacturing large caliber cannons.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 108: Deletes House provision relating to implementation of Phase II of the Single Manager for Conventional Ammunition, as proposed by the Senate. The conferees agree that the recently reissued Department of Defense Directive is a step in the right direction toward strengthening the Office of the Single Manager for Conventional Ammunition. Agreeing to delete the House provision, however, should not be interpreted as approval that this directive is fully satisfactory. The Department of Defense should be prepared to explain its plans for further strengthening this Office in next year's hearings. Such plans should fully address the observations and recommendations of the General Accounting Office and the Committees of Congress.

Amendment No. 109: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

SEC. *783. None of the funds available in this Act shall be used by the Secretary of a military department to make a contract for the purchase of administrative motor vehicles that are manufactured outside the United States or Canada unless the contractor was selected through competitive bidding without a differential in favor of foreign manufacturers: Provided, That this section does not apply to contracts for amounts less than $50,000, nor to existing contracts.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 110: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

Sec. 784. None of the funds appropriated in this Act may be made available through transfer, reprogramming, or other means for any intelligence or special activity different from that previously justified to the Congress unless the Director of Central Intelligence or the Secretary of Defense has notified the House and Senate Appropriations Committees of the intent to make such funds available for such activity.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 111: Deletes House provision prohibiting a personal cook, chauffeur, or servant for any DOD employee or officer.

Amendment No. 112: Restores the matter stricken by said amendment pertaining to EPA gas mileage of passenger automobiles procured with funds in the Act and changes the section number from 787 to 785.

Amendment No. 113: Restores the matter stricken by said amendment pertaining to Executive Schedule positions in DOD and changes the section number from 788 to 786 and the number of positions allowed from 33 to 35.

Amendment No. 114: Deletes Senate provision preventing the use of any funds in the Act to pay lobbying costs.

The conferees agree not to include Senate Section 776 since there are existing federal laws which regulate lobbying. The conferees further feel that the inclusion of such a detailed legislative matter in an appropriation bill violates the jurisdiction of the legislative committees involved. The conferees agree that the appropriate legislative committees should hold hearings and give careful consideration to required revisions in the law regulating lobbying activities.

Amendment No. 115: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number named in said amendment, insert 787.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 116: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number named in said amendment, insert 788.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 117: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number named in said amendment, insert 789.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 118: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of section number named in said amendment, insert 790.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 119: Deletes the sense of the Senate provision commending the delegates and observers to the 1981 White House Conference on the Aging.

Amendment No. 120: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of section number 782 named in said amendment, insert *791*.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The Senate amendment pertains to the role, mission, and shipbuilding program of the United States Department of the Navy.

TITLE VIII—RELATED AGENCIES

INTELLIGENCE COMMUNITY STAFF

Amendment No. 121: Appropriates $13,063,000 instead of $12,563,000 as proposed by the House and $13,563,000 as proposed by the Senate. The conferees agree

that the funds appropriated will support a total of 210 personnel for the Intelligence Community Staff during fiscal year 1982.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1982 recommended by the Committee of Conference, with comparisons to the fiscal year 1981 amount, the 1982 budget estimates, and the House and Senate bills for 1982 follow:

[In thousands of dollars]

New budget (obligational) authority, fiscal year 1981	171,350,899
Transfer from other accounts, fiscal year 1981	(303,866)
Total funding available	171,654,765
Budget estimates of new (obligational) authority, fiscal year 1981	200,878,234
Transfer from other accounts	
Total funding available	200,878,234
House bill, fiscal year 1982	197,443,289
Transfer from other accounts	(73,900)
Total funding available	197,517,189
Senate bill, fiscal year 1982	208,675,745
Transfer from other accounts	(192,900)
Total funding available	208,868,645
Conference agreement, fiscal year 1982	199,691,264
Transfer from other accounts	(208,000)
Total funding available	199,899,264
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1981	+28,340,365
Transfer from other accounts	(−95,866)

Mr. ADDABBO. Mr. Speaker, pursuant to order of the House granted on yesterday, December 14, 1981, I call up the conference report on the bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the statement.

Mr. ADDABBO (during the reading). Mr Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER pro tempore (Mr. SIMON). The gentleman from New York (Mr. ADDABBO) will be recognized for 30 minutes, and the gentleman from Alabama (Mr. EDWARDS) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New York (Mr. ADDABBO).

Mr. ADDABBO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the defense appropriations conference report for fiscal 1982 represents the single largest amount of money ever presented to any legislative body in history for national defense. It appropriates nearly $199.9 billion, a sum so large it is certain to have a massive impact on our economy and on our people. It is not the bill I would have chosen, but then it is not the bill that some others would have chosen either. It does represent, I believe, the best possible resolution that reasonable men have been able to make under extremely trying circumstances.

I believe that the managers on the part of the House did a superb job. The Senate was $11 billion over the House figure and in the conference the Senate receded on $8.9 billion and the House receded on $2.4 billion. I believe that it is proper to say that the managers on the part of the Senate acted forthrightly and diligently when faced with very difficult options. I salute all of the conferees who spent many hours working out these matters.

The question that is obviously of prime concern to the Members of the House as it is to the White House is are we getting an adequate defense for the amount of money we are spending and what exactly was it that the Senate gave up when it receded on $8.9 billion?

First of all, let me say that I agree with Senate Majority Leader BAKER who said yesterday he believes Congress could cut $10 billion more from the defense bill without harming any basic defense programs. Obviously, neither the Congress nor the White House was prepared during 1981 to take the time and the effort to cut irrelevant and wasteful programs where we could have. Every effort to make those cuts was overwhelmingly defeated, no matter how valid the arguments. My prediction is that next year and especially in the following years a severe shortage of dollars will force pruning of programs that are not cost effective and absolutely essential. But that remains to be battled on a different day. Let me concentrate for the moment on what the Senate receded to and why the conferees felt no serious harm to national defense came because of it.

The conference agreement is $978.9 million under the revised budget estimate.

The Senate had added a great deal of money to the bill above the budget. The Senate had included some $4.8 billion for the supplemental amounts required for the pay raises enacted this year. It is the custom that such funds are requested and made available in a supplemental appropriation bill in the next year. While the Senate agreed in conference to drop the pay raise funds, they will be considered in the supplemental as is the usual case and as will be the case with the rest of the Government.

The Senate added $1.6 billion to the bill for inflation. It was the position of the Senate that the sums included in the Defense appropriation bill for inflation were inadequate, that inflation would be at a higher rate than the rate projected in the budget, and that the additional funds should be provided. Once again, it is customary for such amounts to be adjusted in a supplemental bill and we persuaded the Senate to delete the additional inflation amounts from the bill.

The bill as passed the House was about $3.3 billion below the budget. The Senate restored basically all of the House reductions without regard to merit, but as a matter of policy. In the conference, we were able to persuade the Senate to agree to the House reductions in a number of cases.

The Defense appropriation bill as reflected in the conference report is in no way a rubberstamped bill. The stamp of the Congress has been firmly placed on the bill. There are a great number of additions and reductions which are made.

The Members may be interested in just where the money goes in major categories. The sum of $38 billion is provided for military personnel costs. For retired pay, $14.9 billion is appro-

priated. For "operation and maintenance," $61.8 billion is appropriated. For "procurement," $64.8 billion are provided and for "research, development, test, and evaluation," $19.9 billion are provided.

By organization, the breakdown is as follows: For the Army, $49.2 billion; for the Navy, $65.9 billion; for the Air Force, $61.9 billion; and for the Defense Agencies, $7.5 billion. So once again, the Navy receives the lion's share of the annual appropriation.

The bill provides for the new B-1B bomber, for the new MX ICBM, and for the advanced technology bomber for the future. These were not matters of great debate in the conference since the amounts proposed by the two Houses were very close together.

One of the major reductions which had been proposed is maintained in the conference agreement. The House had deleted almost one-half of a billion dollars based on the fact that the fuel prices reflected in the budget are higher than actual fuel prices which had been experienced or which are estimated to occur during the fiscal year. So, that money is deleted from the bill without reducing the fuel consumption of the military services.

The Senate had proposed an increase of $76 million for the M-1 tank. The tank has been experiencing production difficulties, and in the view of the House, the additional funds which were unbudgeted were not justified. The Senate agreed to the deletion of these funds.

The Senate had placed a provision in the bill which prohibited the use of funds for the evaluation of procurement of 9 mm handguns for the military services. The House conferees felt strongly that a new modern handgun is needed and persuaded the Senate to drop their prohibition.

The House had deleted funds totaling some $70 million for the Army and the Marine Corps for a new position location reporting system (PLRS). The Senate had restored the funds. In the conference the Senate agreed to the deletion of the funds and the House conferees agreed to give every consideration to the funding of this program at the time at which the research and development had progressed sufficiently to warrant production.

The House had made a reduction of $73 million in the program to modify the engines on the F-14A aircraft. The Senate restored the funds and the conference agreed to the restoration.

The conference agreed to provide $64 million for four KC-130 aircraft for the Marine Corps Reserves. These funds were not budgeted but the aircraft are urgently required by the Marine Corps Reserves. The House had proposed that the aircraft be taken from the airport inventory but in lieu of strong protest on the part of the Air Force, the conference agreed to provide additional funds. The House had made $100 million reduction in the advance procurement request for the Trident nuclear submarine viewing this request as incremental funding and shipbuilding which is something the Appropriations Committee is much opposed to. In the conference the Senate persuaded us to restore $85 million of that amount as urgently needed for the Trident program. In view of the high priority we all place on the Trident which is the most secure leg of our strategic triad, the House agreed to the restoration.

The House did not agree to the restoration of $183 million which had been deleted from the CVN nuclear carrier program. The funds were in excess of the amounts required for a single CVN in fiscal year 1982. The committee strongly opposes the proposal of the Navy to incrementally fund large ships such as aircraft carriers and the Senate agrees.

In my view, one of the most difficult matters before the conference was the inclusion of $300 million for the Coast Guard in the Defense appropriation bill. The Coast Guard, even though in wartime becomes a part of the Navy, is not a Defense agency and is not funded in the Defense appropriation bill. The Coast Guard is funded in the Transportation bill. I have long worked with Coast Guard and with the Coast Guard funding and while I greatly admire the Coast Guard for very fine work which it does, I do not feel that this kind of back door approach to funding through a subcommittee different than the one which has jurisdiction is a wise course to follow. However, the Senate was adamant on this point and many of the House conferees felt that the Coast Guard should be taken care of even though great harm might be done to the appropriation process in the doing. We were able to persuade the Senate to agree to offsetting reductions totaling some $100 million, but regrettably in my opinion there is in the Defense appropriation bill $300 million to be allocated to the Coast Guard. I can think of many other programs which are underfunded and if we want to start the precedent of funding any and everything which is reduced by OMB in the Defense appropriation bill, I think that I can find a number of areas in which I would like to make increases, but I do not feel that this is a wise procedure. I hope it does not happen again. It is difficult enough for Congress to act in an orderly way on appropriations without such end runs. In the area of Air Force aircraft, funds were provided by both Houses for the procurement of A-10 aircraft in fiscal year 1982. The Senate had not provided long leadtime funds for procurement in fiscal year 1983 but agreed to do so in the conference.

The conference fully funded the F-16 multiyear procurement program. However, the conferees directed that 20 of the F-16 aircraft be assigned to the Air National Guard rather than the Active Air Force. One of the more controversial items in the Air Force is the Senate addition of $71 million which had not been included in the budget to establish a strategic warning site called PAVE PAWS in the Southeastern United States. The House conferees were able to persuade the Senate that procurement funding for this program is not essential at this time. There is $38 million included in the bill in R.D.T. & E. There are a number of new general provisions in the conference agreement. The Senate had inserted a lengthy legislative section regarding lobbying. The House Members felt that since there is already law on the books concerning lobbying and since the matter introduced by the Senate was completely legislative in nature and under the jurisdiction of the legislative committees that the section would not be included in an appropriation bill but that the chairman of the two Defense Appropriations Subcommittees—Senator STEVENS and myself—would direct a letter to the appropriate legislative committee pointing out the action of the Senate and urging legislative action in this regard.

The Senate had included a provision requesting certain information with regard to chemical and biological warfare and the House agreed to the Senate language.

One of the most difficult of the general provisions was a Senate provision which proposed to prohibit the sale of silver from the national defense stockpile. After lengthy debate, the House conferees agreed to the Senate amendment.

Mr. Speaker, in the haste to prepare this conference report for expeditious consideration by the House, there was a report item which was inadvertently omitted from the Statement of Managers. The Senate report on the bill proposed certain changes in the thresholds for reprogramings. The conferees agreed to certain changes in the Senate proposal. The conference agreement is for the following new thresholds:

	Millions
Military personnel—program increase	$10
Procurement—program increase	10
R.D.T. & E.—program increase	4

In addition, the conferees agree that any line item may only be reprogramed below threshold once in any fiscal year.

The Senate had included a lengthy sense of the Congress provision with regard to the need for a strong Navy. The House conferees agreed to that position.

Mr. Speaker, I believe the conference report will be satisfactory to most Members. To those who advocate a high level of defense spending, it certainly provides that. The bill is some $28 billion more than the sum provided for the previous fiscal year and we will undoubtedly have a large supplemental request transmitted next month. For those who want to try to hold the line to some extent in defense spending, I would point out that we were able to persuade the Senate to delete almost $9 billion which had been in the Senate bill. Overall, the conference report is a good agreement and I urge its adoption.

Mr. EDWARDS of Alabama. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, first I would like to commend the chairman of our subcommittee and the members who serve on it for their diligent work and for putting in many hours of time and effort to get this conference report finished and bring it to the floor.

I must also say, Mr. Speaker, that we have one of the finest staffs anywhere on the Hill. They have worked hard and long; they have done a great service in aiding us to bring this conference report to the Members today.

I would just like to run briefly across a line of numbers so that we can have in one place here in the RECORD exactly what we have done.

I would first mention that in fiscal year 1981 we enacted finally, after supplementals, a bill that was $171,350 million. The Reagan 1982 budget figure that came in in September was $200,878 million the House appropriation figure was $197,443 million; The Senate appropriation number was $208,675 million. The conference number is $199,691 million.

That is $28,340 million greater than the 1981 number; that is $1,186 million less than the Reagan September budget; that is $2,247 million more than the House-passed bill, and it is $8,984 million less than the Senate bill.

I think, considering all of that, that we did have a good conference. We were instructed on yesterday by the Roukema motion to do our best to stick with the House position, and I think we have the responsibility to account to the Members for our actions in that regard.

On procurement, which was part of the Roukema instruction, after considerable negotiation with the Senate we ended up $881 million over the House bill but $1,285 million; under the Senate bill. On the instruction having to do with research, development, test, and evaluation, we were $496 million over the House bill, but we were $987 million under the Senate bill.

So while we obviously were not able to carry out to the letter the instructions given to us by the House, I think we made a diligent effort and one of which I think we can be proud.

So, Mr. Speaker, I come here urging support for this conference report. I would reserve just one comment for a section of this conference report that gives me considerable trouble.

Amendment No. 54 has to do with $300 million added to this bill in the Senate to provide for ships for the Coast Guard.

Now, Mr. Speaker, the Coast Guard does not receive money under this budget, and in my view it is simply not supposed to be included in this bill. So, when I signed the conference report, I excepted to that amendment No. 54 simply because the Coast Guard should be funded properly in the transportation appropriations bill and not in the Defense Department bill.

Let me say that while I object strongly to providing for the Coast Guard in this bill, it is clear to me that we were led to the position we are in because of the frustrating experience the Coast Guard has been going through in trying to get sufficient funds either through OMB or the administrations, now and in the past, or through the Transportation Subcommittee, to carry out in a proper way the job that it has to do. So my sympathies are with them, and my concerns are with them. My concerns are with them for the many problems they have had and the job that we have asked the Coast Guard to attempt to do without providing them with the ships and the O. & M. money to do it.

□ 1315

So I know why the other body did what they did. I know why the conferees did what they did. But I just simply could not bring myself to vote for $300 million for the Coast Guard in the Defense budget where it simply does not belong.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. EDWARDS of Alabama. I yield to the gentleman from Massachusetts. I must say the gentleman from Massachusetts fought, and has fought for years, long and hard for the benefit of the Coast Guard and probably understands their problems more than any other Member in this House.

Mr. CONTE. I want to thank the gentleman in the well. The gentleman in the well is absolutely right. I did fight in the conference for the $300 million, though I agree that it should not be in the defense bill.

But, unfortunately, the Coast Guard has had its hands tied behind its back.

The U.S. Coast Guard has been the forgotten stepchild of the other military services for too long now. Year after year I have watched the Coast Guard function with hand-me-down equipment from the Navy. I have attempted to turn that trend around as the ranking member of the Transportation Appropriations Subcommittee. The decision to include $300 million in the Department of Defense appropriations bill for the Coast Guard's acquisition, construction, and improvement account must be applauded.

As we all know, the Congress continues to burden this already lean branch of the services with additional responsibilities. While doing so, not only have we failed to fund the applicable accounts at an appropriate rate, but, in fact, have reduced these critical levels of funding. Currently, the Coast Guard has a diverse mix of missions. Those missions include search and rescue missions, aids to navigation functions, and ice-breaking duties. In addition to these more historic missions, they are responsible for enforcing the laws of treaties at sea, which include drug interdiction and the Haitian refugee dilemma now facing this Nation.

The Coast Guard is indeed a military service—one that utilizes ships, aircraft, and boats. It has a military readiness mission to perform. In time of war they are part of the Navy and operate directly under the Chief of Naval Operations. In sum, the Guard is a multimission agency which performs its duties with a lean budget.

I can personally attest to this fact. During the August recess I visited some of the Coast Guard bases in this country. The stories I heard regarding capabilities were appalling. I was informed that the bases, in many cases, do not have sufficient funds now to carry out their normal patrol missions.

Mr. Speaker, in light of the fact that the average age of the Coast Guard's ships are now 27 years, many of them are handed down from the Navy, I welcome this $300 million appropriation for the Guard's acquisition, construction, and improvement account.

We are caught in this temporary crunch and this appears to be the only way out. I hope, as the gentleman says, that we can go back to the normal appropriations process and that we can put the necessary funds in for the Coast Guard so that they can carry out their missions the way they are supposed to.

Mr. EDWARDS of Alabama. I thank the gentleman for his comments and I certainly agree with him up to the point of putting them in this bill.

But if nothing else occurs from this, I would hope that those who run the Office of Management and Budget, those who run the Department of Transportation, would take heed from what is happening here today and start to provide the proper funds and the proper budget to see that the Coast Guard is given the wherewithal to do the job that we have assigned the Coast Guard.

Mr. CONTE. I thank the gentleman.

Mr. EDWARDS of Alabama. Mr. Speaker, I yield back the balance of my time.

Mr. CONTE. Mr. Speaker, during its consideration of H.R. 4995, the fiscal year 1982 Department of Defense appropriations bill, the Senate adopted an amendment which will halt the sale of excess silver from the national defense stockpile until the President redetermines that the silver authorized for disposal at the present time is excess to the requirements of the stockpile. Mr. Speaker, I think that amendment was a mistake.

I have followed the defense stockpile silver issue for a considerable period of time, having first introduced in 1973, legislation to effect disposal of surplus silver. My feeling is and has been that to the extent that the silver in the stockpile has been declared excess by the responsible Government agencies, it simply ought to be sold.

In July of 1976, a National Security Council directed study on the needs of the strategic and critical materials stockpile, and the policy options available in dealing with the stockpile question, prompted the then Federal Preparedness Agency to set the Nation's silver stockpile goal at zero.

In 1979, at the request of the Senate Armed Services Committee, the General Accounting Office issued a report titled "National Defense Requirements for a Silver Stockpile." The conclusion of that report, following a review of the methodology used by the then Federal Preparedness Agency in establishing national stockpile goals, was that a zero stockpile goal for silver was appropriate.

Today, according to the Federal Emergency Management Agency, the silver presently remaining in the stockpile is still considered excess to national security requirements because the annual production of silver in the United States is ample for defense needs, not to mention the imports we obtain from Canada and Mexico. In addition, officials responsible for maintaining the stockpile feel that in national emergencies, there are other silver sources available which could be drawn on such as Defense and Treasury Department stocks, industrial holdings and so forth.

Mr. Speaker, I have never quarreled over the amount of silver necessary for defense purposes. What I have tried to do, and what I have tried to encourage my colleagues to do, is see to it that those materials in the stockpile, considered excess to our needs, are disposed of in a timely fashion in accordance with section 6 of the Strategic and Critical Materials Stockpiling Act. That section of the act directs the President to provide for the timely disposal of materials which are excess to stockpile requirements in a manner which avoids undue disruption of the usual markets for such materials.

In pursuit of that goal, and in view of the fact that the silver stocks in the stockpile have been considered excess, the Congress authorized the sale of the excess silver in the omnibus reconciliation bill just a few short months ago. Both the House and Senate Armed Services Committees heard testimony on this subject before approving those sales.

After all of the consideration which has been given this subject in the past years here in Congress, after all of the various studies done by the agencies responsible for the stockpile, declaring the excess of silver, after finally authorizing the sale of this excess silver in the reconciliation bill, we have turned ourselves around, and started the process over by heaping the same requirements on the administration. No wonder the public wonders sometimes what goes on in Washington.

GENERAL LEAVE

Mr. ADDABBO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report under consideration on the bill H.R. 4995.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. VENTO. Mr. Speaker, one of the criticisms of Congress has been that it lacks discipline in supporting programs. This Congress has, by and large realized the need for fiscal restraint and has even to the point of following the Presidential programs blindly aimed at so-called fiscal responsibility. This has been unthinking and automatic even if second thoughts, occurred showing details of glaring injustices such as the abolition of the minimum social security benefit needed to be corrected, votes have been based on emotion not commonsense.

In the area of defense, however, there have been few attempts at discipline. The Presidential defense budget has, in fact, been shrinking in response to economic realities Yet, there has been no great responsiveness in Congress. Instead of a rational evaluation of defense, there has been a kneejerk willingness to accommodate the pressure groups of the Pentagon.

Last Thursday, Deputy Defense Secretary Carlucci informed senior members of the Defense Resources Board that Pentagon outlay figures must be cut by $3 billion from the September figures. Pentagon greed was exceeding even the President's generosity. Nevertheless, the obligational authority contained in this bill does not show this fiscal restraint. This is not to say that such models about fiscal restraint do not exist. Two months ago, the chairman of the Senate Appropriations Committee proposed over $2 billion in outlay savings. This model was available yet there has been no reaction from the conference committee.

Some in the Defense Department are recognizing this need for austerity. The AH-64, the Army new attack helicopter, has had a cost increase of about 35 percent in the last 10 weeks. Even in the Pentagon, this cost overrun could not be ignored. The Army is reevaluating its need for the AH-64, yet this reevaluation is not reflected in the conference report.

Expenditures for personnel are clearly not evaluated closely. Do we really need to spend over $100 million on military bands?

In the Air Force, we are faced with a situation of premium $600 million cost for buying extra F-15's rather than extra F-16's. Is this a worthwhile outlay in a time of fiscal restraint?

The most outrageous service is, however, the Navy, which if press reports are to be believed, is arguing for unlimited expansion, even if its procurement of glamour systems must be at the expense of such vital systems such as the P3 Orion antisubmarine. Vital naval systems are being sacrificed to pay for expensive toys, expensive toys many of which do not work.

Last July, I introduced an amendment to zero the authorization for the F/A-18. Members of the authorizing committee spoke against my amendment supporting what they called an excellent plane. However, I have recently obtained a report to the Chief of Naval Operations dated June 16 which demonstrates that the authorizing committee had not been well briefed. This report suggests that the F/A-18 is scarcely effective as a fighter. A faulty radar made it ineffective in its attempts to intercept targets. Control problems degraded its dogfight capability. In the attack mode, the strafing runs had to be broken off before coming into effective range of its gun. Ineffective air-to-ground operations also resulted from insufficient roll performance and inadequate air-to-ground radar and from other cockpit displays.

For carrier operations, the effective range is one-half of that claimed for the aircraft. To quote the report, "Power projection beyond these operational ranges may be necessary."

Despite this report, this aircraft, this stuffed, fat $35 billion Christmas turkey for the Pentagon, has sailed through the appropriations process unscathed.

Mr. Speaker, the interests of national security means that we must have large defense budgets. However, the interest of national security also requires a strong economy, which cannot be achieved with waste in defense spending. This bill contains too much waste. I hope this bill will be defeated in order that the committee may

report a more responsible solution to our problems of national defense.

I regret having to persist in this position, but the largest money bill ever to pass Congress must be one with which we can face the American people at a time when we have required great personal sacrifices and hardships from many in the name of fiscal responsibility.

● Mr. LENT. Mr. Speaker, I rise in support of the conference report on H.R. 4995, the fiscal year 1982 Department of Defense appropriation bill. My concern that we need to enhance our national defense stance is well known. What may be less obvious, however, is my concern for the role that the U.S. Coast Guard plays in meeting our national security needs. As a member of the Merchant Marine and Fisheries Coast Guard Subcommittees, I am most gratified to note that the DOD appropriation bill before us today allocates $300 million for Coast Guard acquisition, construction and improvements.

Just yesterday, December 14, 1981, this body approved the fiscal year 1982 Coast Guard authorization, H.R. 2559, providing over $425 million for acquisition, construction, and improvement of aircraft, vessels, shore facilities, and navigational aids. The $300 million incorporated by the other body in its DOD appropriation, S. 1857, is designed to supplement the Coast Guard's capital investment program. Unfortunately, that Transportation appropriation, the traditional source of Coast Guard support, provided only limited funding increases. Consequently, Members concerned with defense funding matters who rightly recognize the Coast Guard as an integral part of our Armed Forces included this much needed support in the fiscal year 1982 DOD appropriation and I commend them for it.

For too long, the Coast Guard has been given short shrift in funding, while its mandate from Congress continues to grow. Not only does the Coast Guard come within the naval command structure during time of war, but the Coast Guard is also involved with the Navy in coastal defense, antisubmarine warfare, convoy escort, and icebreaking. As well, the Coast Guard is charged with immigration patrol on the high seas, drug interdiction, search and rescue missions, protection of the 200-mile fisheries limit, and response to military crises requiring near-shore maritime operations. Yet, the average age of our Coast Guard's vessels is more than 27 years. Maintenance problems diminish vessel availability, reliability, and overall readiness.

I support funding to permit the Coast Guard to keep pace and effectively carry out these wide ranging mandates. I commend the Members of this Congress who see the current deficiences in this unit of our Armed Forces, and did what they could to correct them.●

● Mr. COLEMAN. Mr. Speaker, this fall, when the Air Force sought funding to modernize its fleet of KC-135 aircraft, Congress was faced with an unusual opportunity. We had the option of choosing between two modification proposals to upgrade the KC-135 tanker—one at a cost of $4.5 million per plane, the other at a cost of $23 million per plane.

The first option, which I supported, involved re-engining with JT3D engines from commercial B-707 aircraft. This option offered several advantages besides its much lower cost. The Air Force already has maintenance people trained to handle the engines, and replacement parts are already in stock. The engines can be maintained at existing facilities, and the fleet can be modernized in a short period of time.

There is already a program to retrofit a number of tanker engines at the Trans World Airlines Overhaul Base in Kansas City in my district. Under current fiscal year 1981 appropriations, TWA's program of re-engining special use C/KC-135 aircraft with the JT3D engines is proceeding as scheduled. Eighteen airplanes and seventy-two engines are involved in the program, which has enabled TWA to recall hundreds of workers in the Kansas City area previously furloughed from their jobs.

The second option, supported by the Air Force, involved the purchase of new CFM56 turbofan engines at a cost of $23 million per plane. The CFM56 engine is still being developed, and utilization of this engine on the KC-135 would make it necessary to retrain Air Force personnel, and would require a new stockpile of replacement parts. Also, in addition to the much higher cost, it would take much longer to modernize the fleet.

Mr. Speaker, as you know, the House of Representatives endorsed the first option, and provided for the purchase of B-707 aircraft for parts and engines in H.R. 4995. Unfortunately, efforts to include similar provisions in the Senate version of this bill were not successful, and the re-engining of the KC-135 was one of the issues dealt with during the conference on this bill.

Mr. Speaker, I strongly urge my colleagues to adopt the conference report because of this unique opportunity to save the Federal Government money without sacrifice of quality, and retain funding for the re-engining of KC-135 aircraft with the JT3D engine.●

Mrs. ROUKEMA. Mr. Speaker, I intend to vote against the conference report for the Defense appropriations bill for two reasons:

First, the totals for titles IV and V, procurement and research and development, did not come close to the strong sentiment expressed by the House for reducing the 1-year increase of 20 percent in these areas. Specifically, the House went on record yesterday in favor of my motion to instruct the conferees to insist upon the House-passed figures for procurement and R. & D., yet the increases in the conference report are $1.5 billion higher than the House totals for titles IV and V and $200 million over the administration's request;

Second, the conference report engages in what amounts to budgetary camouflage by not including the military pay raise as part of the final bill. The pay raise amounts to $4.8 billion, and we are all aware that it will eventually have to be appropriated in a supplemental. Therefore, the bill is actually well over the amount requested by the President, although it appears $1 billion under his total. At a time when we should be showing fiscal restraint in the Defense Department and every other department and Federal agency—at a time when the Federal deficit threatens to top $100 billion—we are engaging in a budgetary "sleight-of-hand" by passing a bill that exceeds the President's request for procurement and will ultimately exceed his overall defense request.

Procurement and research and development are the two fastest growing portions of the Defense budget, having increased more than 60 and 25 percent over the past 5 years, respectively, in real dollars. The totals approved by the conferees and now by the House of Representatives are sufficient in keeping growth in these titles under control; they are insufficient in attempting to force efficiencies and better management on the Department of Defense; they are insufficient in holding down the tremendous 1-year increases in the Defense budget—increases that cannot possibly be wisely spent over a 1-year period. While I remain strongly committed to an improved and stronger national defense, this cannot be accomplished by a reckless and haphazard approach to defense spending.

● Mr. FRENZEL. Mr. Speaker, I am going to vote for this conference report. The funds it provides to improve our defense posture are needed. While the United States has been reducing real spending on defense through the decade, the U.S.S.R. has been increasing its military spending. We dare not let this trend continue.

However, I regret that the conferees did not stay with the House spending figures which were several billion less than this bill now calls for. In a period of economic difficulty and budget austerity, increases of this magnitude, nearly 20 percent, ought to be scrutinized much more carefully.

Obviously, we cannot continue such large expenditures, even though we

are committed to real increases. The Department of Defense has genuine needs, but it has not yet demonstrated sufficient discrimination in program priorities, nor sufficient commitment to better procurement procedures. It needs to be told that its available resources are limited.●

Mr. ADDABBO. Mr. Speaker, I have no further requests for time, and I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WEISS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 334, nays 84, not voting 15, as follows:

NOT VOTING—15

AuCoin	Fithian	Mattox
Bevill	Frank	McDonald
Bolling	Goldwater	McKinney
Burton, John	Goodling	Rosenthal
Courter	Hendon	Whitehurst

□ 1330

The Clerk announced the following pairs:

On this vote:

Mr. McDonald for, with Mr. AuCoin against.

Mr. FORD of Michigan changed his vote from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. COURTER. Mr. Speaker, at the last rollcall vote, rollcall No. 363, I inadvertently missed that vote. Ironically, I happened to be with the Secretary of the Army, Mr. Marsh.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore (Mr. SIMON). The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 24: Page 10, line 2, strike out "$4,949,470,000" and insert "$4,768,000,000".

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 24 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$4,985,400".

The motion was agreed to.

Mr. ADDABBO. Mr. Speaker, I ask unanimous consent that the Senate amendments numbered 34, 41, 57, 64, 71, 78, 84, and 85 be considered en bloc, considered as read, and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Senate amendments considered en bloc are as follows:

Senate amendment No. 34: Page 14, line 2, after "4311" insert ": *Provided*, That competitors at national matches under title 10, United States Code, section 4312, may be paid subsistence and travel allowances in excess of the amounts provided under title 10, United States Code, section 4313".

Senate amendment No. 41: Page 18, after line 11, insert:

"ARMY NATIONAL GUARD EQUIPMENT

"For military equipment for Army National Guard units, $50,000,000, to remain available until September 30, 1984."

Senate amendment No. 57: Page 21, line 2, after "1985"" insert ", and $44,400,000 shall be derived by transfer from the "fast logistics ship (T-AKRX) program" of "Shipbuilding and Conversion, Navy, 1981/1985"".

Senate amendment No. 64: Page 21, line 7, after *"Provided,"* insert "That of the appropriation for "Shipbuilding and Conversion, Navy," that expired for obligation on September 30, 1981, $119,000,000 shall remain

available for obligation until September 30, 1983: *Provided further,*".

Senate amendment No. 71: Page 23, line 18, after "Programme," insert "and $89,700,000 shall be derived by transfer from Aircraft Procurement, Air Force, 1981/1983,".

Senate amendment No. 78: Page 26, line 23, after "$8,501,210,000," insert "of which $334,000,000 shall be available only for Research and Development related to initial deployment of the MX missile in nonsuperhardened existing silos in a manner compatible with a permanent basing mode which could include the addition to existing silos of ballistic missile defense, the provision of location uncertainty for offensive missiles and defensive systems, and superhardening and subsequent deployment in a permanent basing mode to be recommended to the Congress by the Secretary of Defense no later than July 1, 1983,".

Senate amendment No. 84: Page 50, line 11, strike out all after "treated;" down to and including "changes;" in line 15 and insert "(e) surgery which improves physical appearance but which is not expected to significantly restore functions including, but not limited changes except that breast reconstructive surgery following mastectomy and reconstructive surgery to correct serious deformities caused by congenital anomalies, accidental injuries and neoplastic surgery are not excluded;".

Senate amendment No. 85: Page 50, line 25, after "nurse-midwife," insert "certified nurse practitioner, or for the purpose of conducting a test during fiscal year 1982, by a certified clinical social worker,".

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendments of the Senate numbered 34, 41, 57, 64, 71, 78, 84, and 85, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 31: Page 12, line 17, strike out "$1,087,250,000" and insert "$1,047,600,000".

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 31 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$1,087,950".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 36: Page 15, line 9, strike out "$1,903,500,000" and insert "$1,940,900,000".

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 36 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert the following: "$1,911,100,000: *Provided,* That notwithstanding any other provision of this Act, after the head of the agency concerned gives written notification of a proposed multiyear contract for the purchase of the UH-60A Black Hawk aircraft to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives, such contract may not then be awarded until the end of a period of 45 days beginning on the date of such notification,".

Mr. ADDABBO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 39: Page 17, line 12, strike out "$2,350,900,000" and insert "$2,338,400,000".

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 39 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$2,381,900,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 40: Page 18, line 10, strike out "$3,804,300,000" and insert "$3,728,071,000".

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 40 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$3,721,971,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 54: Page 20, line 21, after "$754,700,000;" insert "for acquisition, construction and improvement, Coast Guard, $300,000,000, to be transferred to the Coast Guard: "Acquisition, Construction and Improvements";".

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 54 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert "for acquisition, construction and improvement, Coast Guard, $300,000,000, to be allocated to the Coast Guard: "Acquisition, Construction and Improvements";".

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 55: Page 20, line 21, strike out "$73,100,000" and insert "$102,400,000".

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 55 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$117,500,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 62: Page 21, line 6, strike out "$73,100,000" and insert "$102,400,000".

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 62 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$117,500,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 67: Page 23, line 7, strike out "$13,835,898,000" and insert "$14,106,398,000".

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 67 and concur therein with an amendment, as follows: in lieu of the sum proposed in said amendment, insert "$13,818,998,000, of which $102,800,000 shall be available only for a classified program, and".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 68: Page 23, line 9, after "tract," insert "and $1,958,000,000 shall be available only for purchase of B-1B aircraft when the President certifies to the Congress that it is feasible to accomplish the program for the purchase of 100 B-1B aircraft at a total program cost of not to exceed $20,500,000,000 (in constant fiscal year 1981 dollars), or in such other amount

as the President certifies and explains to the Congress, and such funds for the purchase of B-1B aircraft shall remain available during any quarter that the total program cost of 100 B-1B aircraft is included in any Selected Acquisition Report required for the B-1B program for the previous quarter by section 811 of the Department of Defense Appropriation Authorization Act, 1976 (10 U.S.C. 139 note),".

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 68 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert "and $1,801,000,000 shall be available only for purchase of B-1B aircraft when the President certifies to the Congress that it is feasible to accomplish the program for the purchase of 100 B-1B aircraft at a total program cost of not to exceed $20,500,000,000 (in constant fiscal year 1981 dollars), or in such other amount as the President certifies and explains to the Congress, and such funds for the purchase of B-1B aircraft shall remain available during any quarter that the total program cost of 100 B-1B aircraft is included in any Selected Acquisition Report required for the B-1B program for the previous quarter by section 811 of the Department of Defense Appropriation Authorization Act, 1976 (10 U.S.C. 139 note),".

Mr. ADDABBO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

Mr. SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 72: Page 24, line 9, strike out "$4,555,550,000" and insert "$4,217,746,000".

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 72 and concur therein with an amendment, as follows: in lieu of the sum proposed in said amendment, insert "$4,559,550,000, of which $624,400,000 shall be available only for a classified program".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in the disagreement.

The Clerk read as follows:

Senate amendment No. 87: Page 59, after line 17, insert:

SEC. 765. None of the funds made available by this Act shall be used in any way for the leasing in the United States of military aircraft or vehicles when suitable aircraft or vehicles are commercially available in the private sector.

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 87 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert:

SEC. 765A. None of the funds made available by this Act shall be used in any way for the leasing to non-Federal agencies in the United States aircraft or vehicles owned or operated by the Department of Defense when suitable aircraft or vehicles are commercially available in the private sector.

Mr. ADDABBO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 89: Page 61, strike out lines 1 to 6, inclusive.

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 89 and concur therein with an amendment, as follows: In lieu of the matter stricken by said amendment, insert the following:

SEC. 770. None of the funds appropriated in this or any other Act shall be available for obligation to reimburse a contractor for the cost of commercial insurance that would protect against the costs of the contractor for correction of the contractor's own defects in materials or workmanship.

Mr. ADDABBO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 93: Page 62, after line 20, insert:

SEC. 771. Not to exceed $1,700,000 of the funds available to the Department of Defense for Reserve Personnel shall be available for transfer to appropriations available to the Federal Emergency Management Agency.

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 93 and concur therein with an amendment, as follows: In lieu of the section number named in said amendment insert "773".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 96: Page 63, strike out lines 3 to 9, inclusive.

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 96 and concur therein with an amendment, as follows: In lieu of the matter proposed to be stricken, insert:

"SEC. 775. None of the funds appropriated by this Act for the pay of Reserve and National Guard technicians based upon their employment as technicians and their performance of duty as members of the Reserve components of the Armed Forces shall be available to pay such technicians a combined compensation in excess of the rate payable for level V of the Executive Schedule. *Provided*, That for purpose of calculating such combined compensation, no military compensation other than basic pay will be included."

Mr. ADDABBO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The motion was agreed.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 101: Page 64, after line 18, insert:

SEC. 774. Funds available to the Department of Defense during the current fiscal year shall be available to establish a program to provide child advocacy and family counseling services to deal with problems of child and spouse abuse.

MOTION OFFERED BY MR ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 101 and concur therein with an amendment, as follows: In lieu of section number 774 named in said amendment, insert "778".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 107: Page 65, strike out all after line 23 over to and including line 5 on page 66.

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 107 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

(b) No funds appropriated by this Act may be used for the transfer of a technical data package from any Government-owned and operated defense plant to any foreign government, nor for assisting any such government in producing any defense item currently being manufactured or developed in a United States Government-owned, Government-operated defense plant manufacturing large caliber cannons.

Mr. ADDABBO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 109: Page 66, strike out lines 10 to 17, inclusive.

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 109 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

SEC. 783. None of the funds available in this Act shall be used by the Secretary of a military department to make a contract for the purchase of administrative motor vehicles that are manufactured outside the United States or Canada unless the contractor was selected through competitive bidding without a differential in favor of foreign manufacturers: *Provided*, That this section does not apply to contracts for amounts less than $50,000, nor to existing contracts.

Mr. ADDABBO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 110: Page 66, strike out lines 18 to 24, inclusive.

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 110 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

SEC. 784. None of the funds appropriated in this Act may be made available through transfer, reprogramming, or other means for any intelligence or special activity different from that previously justified to the Congress unless the Director of Central Intelligence or the Secretary of Defense has notified the House and Senate Appropriations Committees of the intent to make such funds available for such activity.

Mr. ADDABBO (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 115: Page 67, after line 15, insert:

SEC. 777. Congress remains concerned about the rapidly escalating cost of the chemical and biological warfare programs that have not yet been adequately justified by the Administration.

Congress directed the Administration as part of the Conference Report to the fiscal year 1981 supplemental appropriations bill (H. Rept. No. 97-124) to provide studies of:

the long-range costs of the modernization program;

a country-by-country report from our NATO allies with respect to their official views on that long-range program;

an overview of the mission-oriented requirements for the various binary weapons; and

an arms control impact study of the mission oriented requirements.

This information has yet to be supplied to Congress.

The Congress reaffirms the language of the Supplemental Conference Report as adopted earlier this year by Congress. Funding for binary weapons in this year's appropriation is not production or construction-oriented, but rather limited strictly to research and development. Therefore, these requirements do not apply to funding provided in this Act. The Congress too views such requirements with the utmost concern and seriousness, and fully expects them to be fulfilled prior to any future request for production or construction-oriented binary weapons funding.

Congress also urges the Administration to resume as rapidly as possible negotiations with the Union of Soviet Socialist Republics to prohibit the development, production and stockpiling of chemical weapons. These negotiations are vital to enhance United States national security and achieve budgetary stability.

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 115 and concur therein with an amendment, as follows: In lieu of the section number named in said amendment, insert "787".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 116: Page 67, after line 15, insert:

SEC. 778. After the date of enactment of this Act no sale of silver from the National Defense Stockpile under the authority of Public Law 97-35, or any other Act, shall occur until the President, not later than July 1, 1982, redetermines that the silver authorized for disposal is excess to the requirements of the stockpile, taking into consideration such factors as the President considers relevant, including the following factors:

(1) The findings and recommendations of the report by the General Accounting Office on the sale of silver from the National Defense Stockpile to be completed on or before January 1, 1982.

(2) The demand for silver to meet defense, essential civilian, basic industrial, and monetary requirements, taking into account the most recent "Defense Guidance" used by the Department of Defense in programming general purpose conventional forces as well as historical monetary uses of silver as a medium of payment to foreign workers and troops during times of national emergency.

(3) The projected magnitude of the increase in production as well as the accuracy and reliability of the data used in projecting increases in both domestic and reliable foreign production capacity, taking into account the lead times associated with expanding capacity and obtaining such requirements as the necessary labor, equipment, transportation and energy.

(4) The current reliability of supplies from foreign sources and the economic and security implications resulting from our dependence on these sources of supply in times of national emergency taking into account the probability of a supply disruption or sharp price increase and its impact on the United States economy or a national priority such as defense.

(5) The need for silver in the stockpile during the next ten year period taking into account long-term supply and demand projections of the Bureau of Mines, United States Department of the Interior.

Should the President taking into consideration the factors described above find the silver to be in excess to stockpile needs, he shall report to the Committees on Armed Services of the Senate and House of Representatives that he has made such a determination, and shall include a detailed discussion and analysis of the factors set forth above, and other relevant factors, including alternative methods of disposal for such silver, together with his recommended method of disposal. No action shall be taken to dispose of silver from the National Defense Stockpile, prior to the approval by Congress of the recommended method of disposal.

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 116 and concur therein with an amendment, as follows: In lieu of the section number named in said amendment, insert "788".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 117: Page 67, after line 15, insert:

SEC. 779. So far as may be practicable Indian labor shall be employed, and pur-

chases of the products of Indian industry may be made in open market in the discretion of the Secretary of Defense.

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 117 and concur therein with an amendment, as follows: In lieu of the section number named in said amendment, insert "789".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 118: Page 67, after line 15, insert:

SEC. 780. Of the funds appropriated by this Act for strategic programs, the Secretary of Defense shall provide funds for the Advanced Technology Bomber program at a level at least equal to the amount provided by the committee on conference on this Act in order to maintain priority emphasis on this program.

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 118 and concur therein with an amendment, as follows: In lieu of section number named in said amendment, insert "790".

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate Amendment No. 120: Page 67, after line 15, insert:

SEC. 782. It is the sense of the Congress that—

(1) A larger and stronger American Navy is needed as an essential ingredient of our Armed Forces, in order to fulfill its basic missions of (A) protecting the sea lanes to preserve the safety of the free world's commerce, (B) assuring continued access to raw materials essential to the well-being of the free world, (C) enhancing our capacity to project effective American forces into regions of the world where the vital interests of the United States must be protected, (D) engaging the Navy of the Soviet Union or any other potential adversary successfully, (E) continuing to serve as a viable leg of our strategic triad, and (F) providing visible evidence of American diplomatic, economic and military commitments throughout the world.

(2) In order to conduct the numerous and growing missions of the modern American Navy, a goal of a naval inventory of approximately six hundred active ships of various types by the end of the century at the latest, is highly desirable, the exact figure to be flexible to accommodate new designs as the specific details of our naval missions evolve to meet various contingencies.

(3) The Secretary of Defense comply with section 808 of Public Law 94-106, the Department of Defense Appropriation Authorization Act of 1976, in order that the Congress may more properly appropriate the funds necessary to reach a six hundred-ship goal at least by the end of the present century.

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 120 and concur therein with an amendment, as follows: In lieu of section number named in said amendment, insert "SEC. 791.".

The motion was agreed to.

PERMISSION TO VACATE PROCEEDINGS REGARDING SENATE AMENDMENTS NUMBERED 24 AND 31

Mr. ADDABBO. Mr. Speaker, I ask unanimous consent that the House vacate the proceedings by which Senate amendments numbered 24 and 31, as amended, were agreed to. There was a typographical error.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement to the amendment of the Senate numbered 24 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$4,985,400,000".

The motion was agreed to.

MOTION OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ADDABBO moves that the House recede from its disagreement of the Senate numbered 31 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$1,087,950,000".

Mr. ADDABBO. Mr. Speaker, at this time I yield to the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. I thank the gentleman for yielding.

Mr. Speaker, I would like to engage the chairman of the subcommittee in a discussion dealing with the question of converting civilian positions to full-time military personnel.

I am aware that the Defense Appropriations Committee has closely monitored this issue for a number of years. A test program was directed by the subcommittee with civilian to military conversions to occur only under prescribed circumstances and guidelines.

The subcommittee has continued its oversight of this issue in connection with the 1982 appropriation bill. Page 42 of the committee report contains guidance to the Department of Defense concerning the National Guard and reserve technician conversion programs.

Let me just add that I hope the civilian to military conversions will occur only if cost savings or increased efficiencies have been adequately demonstrated.

□ 1400

Mr. ADDABBO. Mr. Speaker, if the gentleman will yield, we have looked into this matter very carefully. As the gentleman has stated, we have studied the question, and again we have repeated certain guidelines on page 42 of our report, because there had developed during the hearings that there was needed further guidance.

The subcommittee will be monitoring it to make sure that the program is properly managed. The test is over, but there had been certain quidelines put into place. We must insure that any conversions are made in a fair and equitable manner.

Mr. BOLAND. I thank the gentleman from New York and applaud the oversight that this committee has given to this particular program.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. ADDABBO).

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3567) entitled "An act to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes".

EXPRESSING SENSE OF THE HOUSE ON DEPORTATION PROCEEDINGS OF POLISH CITIZENS

Mr. RODINO. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the resolution (H. Res. 304) expressing the sense of the House of Representatives that the President should seek a halt in any deportation proceedings involving Polish citizens until he determines that the political situation in Poland is stable, and ask for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. MAZZOLI. Mr. Speaker, I reserve the right to object.

Mr. Speaker, I shall not object, but I take this time to direct a few comments to the House and to the chairman of our full committee, the distinguished gentleman from New Jersey.

Mr. Speaker, I have reserved this right to object for the purpose of making a few statements so that the House understands what will happen if we pass this resolution and understands what its Subcommittee on Immigration, Refugees, and International Law, has been doing. Lest anyone get the impression that this subcommittee, which I have the honor of chairing, has been somnolent during the crisis in Poland or any of the crises that have taken place recently, I would like to report that just today, in the office of the gentleman from New York (Mr. FISH), we met with the gentleman who now heads the State Department Office of Humanitarian Affairs and Human Rights. We discussed many matters, one of which was preeminent, and that is the situation in Poland and the situation which would face people who might have to return to Poland from the United States or any other nation.

The gentleman from Kentucky had called the State Department yesterday to establish meetings scheduled for later this week with the gentleman who heads the refugee program in the State Department. Under the 1980 Refugee Act there is a process called consultation to handle refugee crises. The gentleman from kentucky had already engaged in that type of action which will have fruit later this week.

To further establish the fact that this subcommittee has not been quiet recently, the gentleman from Kentucky was in Europe 2 weeks ago, including the camp at Traiskirchen where the Polish people are located now in Austria, to give myself background and a deeper understanding of this situation.

I shall not object to this procedure today which takes this resolution away from the normal procedure which would call for it to have hearings and discussions in our committee, because of the nature of the moment. But I would like to yield at this time to the gentleman from New York (Mr. FISH) to amplify on what I have said about what the Subcommittee on Immigration, Refugees, and International Law has been doing in regard to the problem.

Mr. Speaker, I yield to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Speaker, I thank my chairman for yielding.

Mr. Speaker, we all know that the situation in Poland is very delicate at this point. The United States does not have a great deal of leverage.

I think it has been said very properly on this floor that what we are witnessing in Poland today represents a failure of Soviet imperialism.

We have, as a nation, appropriately warned against foreign intervention and, while we are monitoring the crisis and expressing our sympathy for the Polish workers, I think the very least we can do today is respond to the proposal of the gentleman from Pennsylvania (Mr. NELLIGAN), who has before us a sense-of-Congress resolution that is a step we should take.

This would put us on record, as a body, as encouraging the executive branch to grant extended voluntary departure upon Polish Nationals presently in the United States who might be out of status because of their visitors' visas having expired.

I am confident this step will be taken by the administration.

I think it is important that the State Department and the Justice Department and the American people know that this House supports such action.

I thank the gentleman for yielding.

Mr. MAZZOLI. Mr. Speaker, I thank the gentleman.

I yielded to the gentleman not so much to talk about the resolution, but to augment the statements of the gentleman from Kentucky that this subcommittee has not been sitting on its hands, because it recognizes the problem faced by the people in Poland. In the gentleman's office, as recently as this morning, we had meetings with people from the State Department to give us an update.

While I will not object to this procedure, I think it ought to be noted to the House that this is an extraordinary situation and we all recognize it to be that. However, the Subcommittee on Immigration, Refugees, and International Law, which I am privileged to chair, recognizes its responsibilities and is prepared to shoulder them.

Mr. Speaker, I would ask our distinguished chairman, the gentleman from New Jersey, does this procedure today set a precedent in future matters involving the subject of refugees or immigration? Is it the gentleman's understanding that we still have full jurisdiction over all subject matter that we normally would have?

Mr. RODINO. Mr. Speaker, will the gentleman yield?

Mr. MAZZOLI. I would be happy to, yes.

Mr. RODINO. Well, Mr. Speaker, of course, I would like to point out that the chairman of the subcommittee has certainly been very vigilant in these matters. We recognize that there are matters that must be deliberated on. We are not attempting to set or establish any precedent here for circumventing committee action.

We recognize, however, that the Congress at this time must express a certain sentiment on the tragic situation confronting Polish citizens in that country and in the United States. For this reason we bring up this resolution at this time without in any way, of course, depriving the Committee on the Judiciary, and especially its Immigration Subcommittee of the necessary jurisdiction and responsibility for addressing the numerous aspects of the problem.

Mr. MAZZOLI. Further reserving the right to object, Mr. Speaker, I would ask my distinguished chairman of the full committee, the gentleman from New Jersey, to further state in his judgment, will the action of the House today in any way change the consultation process? Does it in any way insert the House as a middle organization in the process between the executive branch and the subcommittee which I have the privilege to chair?

Mr. RODINO. Mr. Speaker, will the gentleman yield?

Mr. MAZZOLI. I would be happy to yield.

Mr. RODINO, Well, as the gentleman knows, we have written into the statute a requirement that there be consultation between the executive branch and the legislative branch and in all refugee matters. As such, approval of this resolution in no way detracts from that authority and responsibility.

Mr. MAZZOLI. One last thing to which I would ask my chairman to respond. Would any legislation which would implement any aspect of the matter that is before us in the sense of Congress resolution still have to come to the committee of the distinguished chairman?

Mr. RODINO. That is absolutely correct.

Mr. MAZZOLI. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey (Mr. RODINO)?

Mr. FISH. Further reserving the right to object, Mr. Speaker, of course, I am not going to object; but I would like simply to elaborate on the discussion we have had.

What we have before us is solely a sense of Congress resolution, as I have indicated. As the chairman of the subcommittee said, he recently visited Vienna, and a number of us in the subcommittee visited Vienna last August. Historically ever since the end of World War II, Austria has been the country of first asylum for refugees in that part of Europe and they continue in this magnificent tradition.

I think it is important that we recognize that and do all we can to help that country to continue its policy.

As the chairman said, your committee has been in constant consultation with members of the executive branch. There are well over 200,000

Poles presently outside their country in Western European countries.

We reaffirmed this morning that the consultation process with the Congress of the United States would apply should there be any need in the intervening period before the second session of this Congress for consideration of any increase in refugee admission from Poland.

We are aware of the fact that there are and have been for some time contingency plans by our Government and in concert with other governments.

So I leave for this Christmas break confident that we have touched the bases that are necessary to touch, exchanged phone numbers and we will be monitoring the situation over the holidays.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield under his reservation?

Mr. FISH. I would be pleased to yield.

Mr. MAZZOLI. Mr. Speaker, I thank the gentleman for yielding.

Does the gentleman share the view of the gentleman from Kentucky that we are establishing no precedent here, and should there be any legislation to implement anything that is done here by way of a sense of Congress resolution and should there be any further activities regarding refugee numbers, that those matters would come to the Immigration Subcommittee, of which the gentleman is a ranking member?

Mr. FISH. Absolutely. I do not see that this establishes any precedent at all. It merely puts the Congress on the side of the action I believe the administration would take administratively, anyway, in putting a hold on a situation which otherwise could not be dealt with. It really has nothing to do with the jurisdiction of the committee with respect to refugees.

Mr. MAZZOLI. I thank the gentleman.

Mr. FISH. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey (Mr. RODINO)?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 304

Whereas the declaration of martial law in Poland has forced a political crisis in such country;

Whereas there are many Poles in the United States who may be required to leave this country in the coming days and months pursuant to proceedings initiated by the Attorney General under the Immigration and Nationality Act;

Whereas these Poles may face an unfavorable and uncertain political situation on their return; and

Whereas this political situation could be a threat to their lives and personal safety: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that the President should immediately seek a halt in any proceedings initiated by the Attorney General which could result in the deportation of any Polish citizen to Poland until such time as the President determines that the political situation is stable and that such Poles will encounter no undue risk in returning to their country.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. RODINO) is recognized for 1 hour.

Mr. RODINO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I shall not take more than a minute. The matter which we are considering today is certainly one that is in keeping again with the great tradition of this country to express and reaffirm once again its commitment to freedom and to human rights and its concern for Polish citizens everywhere. The climate that exists in Poland at this time certainly is unstable and, in my judgment, it would be inappropriate for deportation proceedings to be carried out against Polish aliens who are here now on a temporary status.

In short, Mr. Speaker, favorable action on this resolution would be a clear expression of our humanitarian commitment to these individuals and a recognition of our obligation not to return them, at this time, to Poland.

This resolution is indeed timely for many reasons.

What little news we are getting out of Poland is not encouraging. Today's dispatches tell of severe food shortages and mounting protests against the martial law imposed there over the weekend. There are reports that Solidarity movement leader Lech Walesa has not been seen in public since the military takeover, and that Solidarity labor members are resisting the Polish Government's occupation of their factories and mines. The exact number of arrests made by the Government remains a mystery.

There are no Telex's or telephone communications emanating from Poland—we have to rely primarily on the news coming from the Government's radio programs and a few eyewitness accounts. Now is certainly not the time to deport the thousands of Polish citizens living in America on a temporary status. As long as the stability and political future remain in doubt, it could be disastrous for these people to be sent back. Our sense of compassion, our commitment to freedom, and our humanitarian traditions demand that we swiftly pass this resolution and urge President Reagan to halt the deportation of Polish nationals from this country.

At this time, Mr. Speaker, I yield to the gentlewoman from Maryland (Ms. MIKULSKI).

Ms. MIKULSKI. Mr. Chairman, I rise in support of this resolution.

I am the only woman of Polish extraction ever elected to the Congress of the United States. I rise to speak not on the geopolitical issues confronting Poland today but for humanitarian reasons.

My great-grandmother came to this country about 90 years ago looking for the American dream of economic opportunity and physical safety that no king, kaiser, or czar could take from her or the family she hoped to have. Her dream, and that of other Polish Americans, was fulfilled.

We are grateful to America, fiercely American, but with strong ties to the old country. And we find ourselves today troubled and fearful of the events in Poland. We are troubled that our aunts and uncles, cousins and other relatives in Poland are facing military rule, possible imprisonment, the lack of freedom, the lack of food, and the lack of fuel. And we hope some humanitarian efforts will be taken.

While we condemn the military rule in Poland, we thank Austria for opening its borders to refugees, we thank Australia for accepting refugees. And while our Government is considering contingency plans in the area of immigration visas and so on, as the gentleman from Kentucky said, with careful deliberation and prudence, we urge now that this very modest, humanitarian gesture be taken that would allow our Government to extend the visas for people who are currently here under such bona fide visas until such time as the President of the United States would determine it would be safe for them to return.

I ask that because of the situation I find Poles visiting this country in, both in my own district and throughout the country. The people that I am talking about are students who came here to study medicine, nursing, skills that will be needed in Poland; elderly who have come to visit relatives; nuns and priests who are concerned about returning.

Therefore, I would hope that we would adopt this resolution and show the world that we are concerned about the safety of Poles in terms of their own country.

Mr. Chairman, I yield back the balance of the time that the gentleman so graciously yielded to me.

Mr. RODINO. Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania (Mr. NELLIGAN).

Mr. NELLIGAN. Thank you, Mr. Chairman.

I thank the distinguished chairman of the Judiciary Committee (Mr. RODINO) and the members of the Judiciary Committee for permitting this resolution to come to the floor at this time. I also thank the distinguished gentleman from Kentucky (Mr. MAZZOLI) and the distinguished gentleman from New York (Mr. FISH) for not objecting to this resolution and permitting its consideration by the House of

Representatives. Let me applaud them for their efforts, which address the issues we are discussing today.

I would also like to say what a pleasure it has been working with the gentlewoman from Maryland (Ms. MIKULSKI) in formulating this resolution and also obtaining the support of so many enthusiastic Members and cosponsors.

I will be very brief, Mr. Speaker. I merely want to state that the motivation behind my thinking on this resolution was this: In the last 2 or 3 months, there have been several Polish immigrants in my district who have come to me, asking if it would be at all possible to remain in the United States until the situation in Poland became more secure. It has been a very volatile situation, as we all know, with the threat of internal strife or Soviet intervention constantly in the background. And it was heartbreaking and frustrating for me to have to tell these constituents that there was nothing I could do after pleading with the immigration officials in my area and finding out that it was virtually impossible to extend their visas any longer.

It was a very distressing situation. I felt we were asking people from Poland in the United States, as I said this morning, to walk the plank. I felt we were asking people from Poland to return to an unfavorable and uncertain political situation in which their lives or personal safety could be endangered.

Today, we are asking the President to put a freeze on deporting any Polish citizens at this particular time, pending a time when the situation is not so critical.

House Resolution 304 would request that the President immediately seek a halt to all proceedings which could result in the deportation of Polish citizens whose visas have, or will soon, expire. We are requesting that the President take this action until he determines that the political situation in Poland is stable and that any Polish people returning to their homeland would encounter no undue risk.

Mr. Speaker, within hours of introducing this resolution, Representative MIKULSKI and I gathered bipartisan support from over 55 Members of Congress. I believe the level of support for this measure—from both sides of the aisle—is a tribute to congressional concern over recent events in Poland. I would therefore like to enter a list of the original cosponsors of House Resolution 304 into the RECORD at this time:

LIST OF COSPONSORS

Representative Donald Joseph Albosta.
Representative Gerald B. H. Solomon.
Representative William E. Dannemeyer.
Representative David Michael Staton.
Representative John LeBoutellier.
Representative Bobbi Fiedler.
Representative Jerry Lewis.
Representative Lawrence J. DeNardis.
Representative Margaret Heckler.
Representative Trent Lott.
Representative Bob Edgar.
Representative Thomas M. Foglietta.
Representative Joseph M. McDade.
Representative Patricia Schroeder.
Representative Jim Leach.
Representative Eugene V. Atkinson.
Representative Edward P. Boland.
Representative Frederick W. Richmond.
Representative Robert A. Roe.
Representative Gus Yatron.
Representative Tom Corcoran.
Representative Edwin B. Forsythe.
Representative Hal Daub.
Representative Robert H. Michel.
Representative Dick Cheney.
Representative Tom Railsback.
Representative Henry J. Hyde.
Representative Paul Findley.
Representative Don Bailey.
Representative Parren J. Mitchell.
Representative Nicholas Mavroules.
Representative John Hiler.
Representative Dan Coats.
Representative Christopher H. Smith.
Representative Gregory W. Carman.
Representative Guy V. Molinari.
Representative John L. Napier.
Representative William C. Wampler.
Representative Ed Bethune.
Representative Thomas J. Tauke.
Representative John Edward Porter.
Representative Bernard J. Dwyer.
Representative Bob Traxler.
Representative Bill Lowery.
Representative Sam Gejdenson.
Representative Duncan Hunter.
Representative John G. Fary.
Representative Wayne Grisham.
Representative Tom Lantos.
Representative John Conyers, Jr.
Representative Carlos J. Moorhead.
Representative Jim Santini.
Representative James L. Oberstar.
Representative William M. Brodhead.
Representative Brian J. Donnelly.

Mr. DAUB. Will the gentleman yield?

Mr. NELLIGAN. I would be glad to yield to the gentleman from Nebraska.

Mr. DAUB. I thank the gentleman for yielding. I wish to commend him for his leadership.

I rise in strong support of the gentleman's sense of the House resolution and find it most appropriate that this step be taken now, at this time of year.

The gentleman's leadership is appreciated. I hope that the House will indeed dispatch this and let the rest of the world know that we are watching the very serious circumstances of Poland and those nationals who may be in this country and feel somewhat stranded.

Mr. NELLIGAN. I thank the gentleman from Nebraska. I appreciate the gentleman's concern and support.

Mr. RICHMOND. Will the gentleman yield?

Mr. NELLIGAN. I yield to the gentleman from New York.

Mr. RICHMOND. I thank the gentleman for yielding.

I want to congratulate the gentleman and the gentlewoman from Maryland (Ms. MIKULSKI) for this wonderful resolution.

Mr. Speaker, I rise in strong support of House Resolution 304, a resolution requesting that the administration immediately halt all proceedings which could result in the deportation of Polish citizens, until such time as the President determines that the political situation in Poland is stable and that those individuals would encounter no undue risk in returning to their country.

I would like to commend the gentleman from Pennsylvania (Mr. NELLIGAN) and the gentlewoman from Maryland (Ms. MIKULSKI) for their prompt actions in introducing this critical resolution and expediting its consideration before the full House.

Obviously, the current political crisis in Poland may create grave risks to the lives and safety of Polish citizens in the United States if they are forced to return to their homeland at the present time. Our Nation's humanitarian tradition demands that we not expel those whose lives would be threatened by deportation and it is, therefore, imperative that we permit Polish citizens to remain here until they can safely return home.

Passage of House Resolution 304 would send a clear message around the world of this Congress compassion and concern for people of Polish ancestry, here in the United States, as well as in the beleaguered nation of Poland.

As a cosponsor of House Resolution 304, I strongly urge my colleagues to approve this resolution urging the administration to help guarantee the safety of Polish citizens currently in this country.

Mr. BROOMFIELD. Will the gentleman yield?

Mr. NELLIGAN. I yield to the gentleman from Michigan.

Mr. BROOMFIELD. I rise in support of the resolution. I endorse House Resolution 304, introduced by Congresswoman MIKULSKI and Congressman NELLIGAN. At this moment of great uncertainty in Poland, when lives and personal safety are in jeopardy, I believe that it is appropriate to express the sense of the House of Representatives that the President should halt proceedings regarding the deportation of Polish citizens to Poland. The President can evaluate the situation at a later date, once the Polish political scene has stabilized, to ascertain if it is safe for Poles to return to their homeland.

Until such time, it is the humanitarian obligation of the United States to insure that Poles visiting or working in the United States are not thrust back into Poland now. Although the Polish Government is showing a harsh disregard for the liberty and well-being of its own citizens, the United States must exercise even greater prudence to insure the safety of Polish citizens presently on our soil.

Mr. NELLIGAN. Mr. Speaker, I would merely ask that the resolution be passed by this body today, if for no other reason than humanitarian reasons. The imposition of martial law in Poland has forced a political crisis which the United States must address. We should not force Polish citizens to return to a volatile and dangerous situation.

Thank you, Mr. Speaker.

I thank the gentleman for yielding.

Mr. RODINO. I yield to the gentleman from Pennsylvania (Mr. MARKS).

Mr. MARKS. Thank you, Mr. Speaker, for yielding to me at this time.

I congratulate you for bringing forth this resolution as I also congratulate the gentlewoman from Maryland (Ms. MIKULSKI) and the gentleman from Pennsylvania (Mr. NELLIGAN).

I have the privilege of representing the 24th District of Pennsylvania. The 24th District comprises a very large number of people of Polish extraction and ancestry. I wish to join with them in their grave concern with the events taking place in Poland today.

Polish-Americans in my district, and throughout the entire United States, are proud to be Americans but, justifiably, take great pride in the experiment in freedom being conducted by their brethren in Poland. Polish-Americans are patriotic, hard-working people and are thankful for the freedoms we enjoy here in America. They wish to see their family, friends, and relatives still in Poland enjoy like personal and political freedoms.

Many of my Polish friends and constituents have particular concerns about what is going on in Poland. They worry about friends, family, and relatives still there.

Right now I wish to speak not only for them, but for the many people in my district who have contacted me by telephone, letter, or post card—urging me, even though they are not of Polish extraction, to express to the President, his close advisers and my colleagues in the Congress, their high regard for the Polish people and the hope that we will do whatever is necessary to support the people of Poland. God knows, we wish we could do more.

Again, I congratulate my colleagues and ask all Members of the House to join with me in voting for this resolution.

Mr. RODINO. Mr. Speaker, I yield 5 minutes to the chairman of the Subcommittee on Immigration of the Committee on the Judiciary, the gentleman from Kentucky (Mr. MAZZOLI).

Mr. MAZZOLI. I thank the chairman. I hope I will not take the full 5 minutes.

Mr. Speaker, let me preface my remarks today by saying that I commend the people of Poland. I think that we should exhibit our solidarity with them at this particularly dangerous and delicate point in their history.

I commend the gentlewoman from Maryland (Ms. MIKULSKI) and the gentleman from Pennsylvania (Mr. NELLIGAN) for having cosponsored this resolution, and the gentleman from New Jersey, our chairman, for having devised the parliamentary procedure to bring it up today.

Mr. Speaker, I think that there is probably no country in the world that more often has had to be called upon to express its own national honor and its sense of zeal for ideals than the nation of Poland. And I guess that the Lord is calling upon it once again. I think anything the United States can do to help is certainly in order.

In making my statements today, it is in the spirit of the parliamentary process by which we have established certain rulings in the House. Unless a unique situation occurs, and this is one today, those rules ought to be followed.

I would like to remind the House that the gentleman from Kentucky, along with other members of his subcommittee, labored very long and hard this year to bring some sense of proportion and harmony and coherence to the Refugee Act of 1980, which does set up definitions of refugees, and sets up a mechanism of consultations by which people are admitted into the Nation under the rubric of refugee. We have had hearings to the point that I cannot count. We have worked with members of the executive branch and Congress to try to be sure that we know what this act means and that it will be able to accommodate situations in the future in which people become displaced.

Mr. Speaker, I am afraid that the move taken today could have, though I think it will not have, the effect of creating a piecemeal approach to a problem which our subcommittee has been trying to deal with in an overall fashion. Just the other day we passed in the House a sense-of-Congress resolution concerning El Salvador, and the people from that tortured nation. There are people who feel strongly that the ones who have left the country of Haiti have reason not to return because of fear of their life and because of fear of persecution.

Mr. Speaker, what I am saying is that the subcommittee believes it is on track through the process of consultations under the 1980 act to handle all matters within that act coherently rather than separately by sense-of-Congress resolutions and by separate legislation. While today we have a special situation, I would ask the House to have caution about proceeding in this way in the future, simply because it diminishes our ability to coherently handle the refugee problem.

If we deal with refugees a little bit, a little bit, a little bit, we never see the full nature of the problem. Accordingly, this resolution today could have the effect—and I hope it will not, and I think it shall not—of putting a roadblock in the path of the subcommittee in working within the 1980 act.

The gentleman from New Jersey, our distinguished chairman, has, in the process of consultations, asked for State Department and Justice Department assistance in defining what a refugee is under the 1980 act. We are looking for uniformity. We are looking for coherence.

While this resolution is eminently supportable, and everyone should support it, I hope this will not lead to a piecemeal approach to what is a global problem which I think our committee is working hard to solve in a global way.

Mr. RODINO. Mr. Speaker, again I want to commend the gentleman from Kentucky, the chairman of the subcommittee, for supporting this resolution and recognizing the importance of taking it up in this manner. The gentleman has been very diligent, and certainly he and his subcommittee have performed admirably in an area that is fraught with complexity. I think the gentleman has spelled out for the House just what the problems are in the area of immigration and refugee policy and why sometimes we are confronted with situations such as this.

But I want to assure the gentleman that again, this in no way establishes a precedent. What we are doing now is taking timely action to respond to a critical situation. This Congress could do no less than express its very strong commitment and affirmation of support for these Polish citizens.

Mr. Speaker, I yield 2 minutes, for purposes of debate, to the gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. I thank the chairman for yielding.

Mr. Speaker, I rise in support of the resolution, and think it is not only appropriate but essential that this type of action be taken, recognizing the concerns that the gentleman from Kentucky has expressed. But I think we need to let the world know our feelings on this matter, and this is a perfect opportunity and an ideal time to do so.

Mr. Speaker, I have a question on a related subject which comes up in this same context that I would like to ask the gentleman from Kentucky, the chairman of the subcommittee, to respond to. That relates to the fact that it has come to my attention in recent months that Iranians who are Christians or Jews are now being processed for deportation, or their status in this country is being threatened, to be sent back to Iran. In light of the activities and the policies and the actions of the Iranian Government with respect to Christians and Jews, I am very concerned about this.

I wonder if the gentleman from Kentucky could inform me about what steps, if any, might be taken in this regard.

□ 1430

Mr. MAZZOLI. Will the gentleman yield?

Mr. LEVITAS. I yield.

Mr. MAZZOLI. The gentleman brings up a very timely question, because just as recently as this morning at 10:30, in the office of the gentleman from New York (Mr. FISH) we met with the gentleman from the State Department, Elliott Abrams, who heads the Office of Humanitarian Affairs. The very first order of business was with respect to Jews in Iran, Christians and Baha'i. The Baha'i's have been for the most part not caused to be returned to Iran. There has been some indication that perhaps Christians and maybe Jews would be.

We had a very interesting conversation with Mr. Abrams, a very exceptional conversation. Mr. Abrams has given us to believe that indeed, within a relatively few days, perhaps a relatively few hours, there will be a solution agreed to on the part of the Department of State which would not require the Jews nor the Christians from Iran to have to endure the prospects and the problems which a return to their country would lead to.

Mr. LEVITAS. I thank the gentleman for that response. I am very encouraged by it. This Nation has always been, throughout its history, a haven for the oppressed, and I think this certainly will go a long way toward that end.

Mr. RODINO. Mr. Speaker, I yield 1 minute to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Speaker, I certainly want to commend the chairman and the committee responsible for this resolution. I know so many people of Polish ancestry will be very grateful and I think it is important that we show our commitment to the Polish people not only in this country, but in Poland.

The Polish people have been so courageous in their quest for freedom and they are a role model for the world community. I thank the chairman and those members of the committee, along with my colleague, Congresswoman MIKULSKI, for all the good work that they have done.

Mr. RODINO. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. RODINO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

CONFERENCE REPORT ON H.R. 4119, AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATIONS, 1982

Mr. WHITTEN. Mr. Speaker, I call up the conference report on the bill (H.R. 4119) making appropriations for the Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1982, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore (Mr. OBERSTAR). Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of November 4, 1981.)

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. WHITTEN) will be recognized for 30 minutes, and the gentlewoman from Nebraska (Mrs. SMITH) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may require.

AGRICULTURE ESSENTIAL

Mr. Speaker, in bringing you the conference report on the appropriations for the Department of Agriculture, I feel that once again I should call my colleagues' attention, and others, to the fact that the basis for all our prosperity, the basis for our economy, goes back to the wonderful job that those engaged in agriculture do for the rest of us. I do not believe there is any nation in history other than the United States where 4 percent of the people provide food, clothing, and shelter for the other 96 percent of the people so that they can do something else. That 4 percent of our people also supply food to our neighbors abroad, to people abroad who are so badly in need of food.

In addition, they are also the biggest supporter for our maintaining a balance of trade. I would like to say once again, for the RECORD, and to my colleagues who are on the floor, that agriculture is the biggest buyer of the products of industry that we have. By being the biggest buyer for American industry, they also are the biggest supporter of American labor.

FARM PROGRAM ESSENTIAL

Frequently I read, and I think it is time that we realize, that which goes to the farmer which is identified as subsidy is nothing in the world but returning to him a share of the consumer dollar that through law and through the passage of time goes into the hands of the manufacturer and the middleman, the nonfarmers. Yet, over the years, while the farmers' costs have increased and while his investment has greatly increased, and his risk greatly increased, his share of the consumer dollar has declined.

I want to repeat again, and I hope our President, I hope those who advise our President will realize that preceding the Great Depression that we had, we had a collapse in farm income. As I have tried to point out many times, farm income is price times volume, less cost. At the present time, with the volume being restricted, with the cost going up and the price going down, we have reached the point where we are going to have, in the legislative bill, to be sure that we keep a balance among agriculture, industry, and labor.

I regret to say that in bringing you the bill today providing appropriations for the Department of Agriculture, we are having to reduce it as a result of the continuing resolution (H.J. Res. 370) which was recently passed and has become law. I say to you that we need all the help that we can get. If 4 percent of the people are going to keep the rest of us in some other kind of business, we are going to see to it that farm income is kept up. Do it by price—that is fine. Do it by volume—that is fine. But, we had better do it, because the price of food, Mr. Speaker, is going to be paid either by the purchaser of the product or by the land itself.

I repeat again, Mr. Speaker, that throughout history, man has often failed to recognize that the cost of producing food, clothing, and shelter must be paid—either by the consumer of the products of such land or by the abuse of land from which they come. Man has ignored the fact that—due to lack of knowledge and responsible stewardship—that the land cannot be cultivated year after year, unless as much fertility is put back each year as is taken out.

Twenty-eight out of twenty-eight times we have had to override recommendations of the President's Bureau of the Budget who tried to cut out the soil conservation programs. I do not know whether Members have had it in their areas or not, but for weeks now we have had stories carried in local papers about soil erosion and the loss of topsoil. Stories which talk about the wasting away of our very basis for our well-being, our topsoil. And all the time they are reducing the funds that go into helping the farmer, the custodian of the land today on which our children and our children's children will be dependent.

So, I say to the Members that we bring them a bill on which all the rest of our economy depends, and yet as we

become more and more urban we find fewer and fewer people that realize the order of things within our economy.

AGRICULTURAL EXPORTS ESSENTIAL

Through the years, Mr. Speaker, the committee has done everything possible to encourage exportation of U.S. agricultural commodities which are surplus to domestic needs. We have continued to insist that the United States be a consistent supplier of such commodities in world markets at competitive prices.

The Department's failure to sell abroad competitively in the 1950's—despite authority in basic law to do so—did great damage to American agriculture. Inventories of CCC held stocks increased nearly tenfold from 1953 to 1960. This large accumulation of commodities was then used by the Secretary of Agriculture to reduce acreage and thereby force thousands of producers off their farm.

It should be recalled that when the Secretary of Agriculture—at the insistence of our committee—finally offered the first cotton for sale overseas for dollars in 1955, 1 million bales were sold in a few weeks and 7 million bales were sold soon after the sale was announced.

Failure to export American farm products competitively has a number of adverse effects. it depresses prices at the farm level to the point of total national distress. It impairs our ability to earn much needed foreign exchange. It damages our image as a consistent supplier in world markets and it denies food to other countries to feed their hungry people.

Mr. Speaker, our rural and urban people both benefit from agricultural exports. It is estimated that as many as half a million American producers are able to stay on the farms due to production for export markets. It is estimated that an even larger number of urban dwellers are engaged in the processing, transportation, and marketing of farm products sold in export markets.

WE MUST BE A NATION OF PLENTY

Mr. Speaker, it is a far more sound national policy to produce abundant supplies of food and fiber—and sell or even donate domestic surpluses to hungry people in other parts of the world—than to limit production in an attempt to force reasonable prices at the marketplace. A national policy of agricultural "abundance" rather than "scarcity" is not only beneficial to the American economy, it is also a humane approach to helping to meet world food needs—an approach worthy of the American people. While the control of price through limiting of production may possibly be justified for the products of industry and labor, no such practice can ever be condoned for the production of food and fiber—the basic necessities of life.

Stability of market prices should be assured through a price support policy which provides fair prices to producers and adequate food for consumers at reasonable prices.

Mr. Speaker, I have urged the President and Secretary of Agriculture to follow this approach in dealing with farm programs of the future, so that a strong agriculture will be used to make a significant contribution to the goals of national financial recovery and economic stability.

DAIRY SUPPLIES NOT SURPLUS TO WORLD NEED

Mr. Speaker, the reason I mentioned that is that in recent months we read about $2 billion in dairy products that the Department of Agriculture has in storage. The reason we have them in storage is that we did not offer them for sale. We will not sell them. Oh, we will sell corn, we will sell wheat, but we kept dairy products off the world markets. Not only that, but I read in the paper where they are prohibiting the use of these surplus commodities in our own school lunch programs, wanting schools to pay whether they have the money or not.

I say here and now that this Congress must insist that the farmer be permitted to farm and that his products be allowed to move in world trade. Imagine a country, with the world starving, selling guns but withholding food. Food is what they so badly need. I say right now that I expect to go as far as it takes to see that these products are made available to the people of the world.

I understand that much of this is at the insistence of our State Department.

I think the Secretary of Agriculture agrees with me. I know they all agree with me that we have the right to sell competitively for what the market will bring. In doing so, we will be a real friend to people around the world.

As we bring this bill to you today, may I say that it is $2.8 billion less than 1981. It is $1.2 billion less than the budget request in March. It is $2 billion less than the congressional budget target. The full amount of the budget request for food stamps is in the bill, but we have placed $292 million in reserve so that if they can save it by proper regulation, by enforcement of the requirements that we have spelled out, they can save it. It is the best approach I know. I have found in the years I have been here, the best approach is to hold a portion in reserve and try to save it.

I could go on and on, but we bring you a bill, not with any pleasure, because we cut some places where we hated to see the bill cut. We have to propose these reductions because we are in the times in which we live and under the circumstances we face. But I repeat again, our very well-being is dependent on the fact that 4 percent of our people provide all of these things so the rest of us can provide the thousand and one things that make up our standard of living.

LESSONS OF HISTORY

I repeat again that the Great Depression, if we study history, started out with a fall in the income of those engaged in agriculture. If the Members will read the history of the Great Depression, and I hope they will, they will find that the farm programs were first passed in an effort to restore the purchasing power of the farmer. In my area, Mr. Speaker, we have had three short crops. Over 60 percent of our people are borrowing money from Farmers Home Administration to stay in business. I have urged the Director of the Office of Management and Budget, and I have urged the Secretary of Agriculture to study each of those cases. In those cases where they can stretch out the time of payment, I have asked them to do everything they can to help the borrower to work his way out of his present situation because once you start foreclosing, it will spread like wildfire.

Many Members wonder why I feel so strongly about this. It is because I came to Congress right after the Great Depression, which lasted 10 years. Many economists can tell you why we had the Great Depression, but I have never heard of one who can explain why it lasted 10 years. You could drive 100 miles from my hometown in any direction and be lucky to find one man who owned his land. As a youngster of 21 I voted to extend from 1 to 3 years the time to redeem land sold to the State for taxes. You could not buy a bag of flour on the credit of the State of Mississippi.

May I say to the Members that the course we are following today is exactly the course that was followed preceding the depression, first by Mr. Hoover and then by Mr. Roosevelt. When Mr. Roosevelt found it did not work, he turned the other way.

Mr. Speaker, we bring you a good bill, and we hope that we will have your support in its passage.

Mr. Speaker, I will provide detailed tables for the RECORD at this point:

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I appreciate my colleague yielding, and I appreciate his comments about what happened during the Great Depression of 1930 and why we need the farm program to help stabilize a way of living for the farmers. Of course, we did not have $10.3 billion worth of food stamps in that bill like we do in this appropriation. How many farmers are using food stamps?

Mr. WHITTEN. Farmers?

Mr. ROUSSELOT. Yes.

Mr. WHITTEN. I do not know, perhaps the gentleman knows. Does he know?

Mr. ROUSSELOT. Well, my understanding is, very few farmers utilize the food stamp program. So, what I am saying to the gentleman, you know as well as I do this program has grown out of control. We now have almost 21 million people getting food stamps, which is also in this bill. What has that to do with helping the farmer?

Mr. WHITTEN. One of my colleagues said that he spoke to the Cattlemen's Association and they said $1 billion of their product was purchased with food stamps. May I say that we have tried to hold this program in line. Some years ago we reduced it $2.5 billion by our committee's recommendation. That bill passed and was signed by the President. One judge stopped it. Not only that, but the next President got rid of the regulations which would have achieved these savings.

So I say to the gentleman that we have tried to hold those things in line. But I also say that those stamps are used to buy food, food we are holding off world markets and storing.

Mr. ROUSSELOT. As the gentleman well knows, there is $10.3 billion in this bill for food stamps and it is hard

for me to accept the fact that that really helps the farmers that the gentleman has been talking about. I appreciate the fact that we want to keep our farm community in place, especially the producers, and I understand that, but it is hard for me to believe and accept the fact that this $10.3 billion helps the farmer.

□ 1445

Mr. WHITTEN. Well, Mr. Speaker, may I say that those food stamps go for the purchase of food.

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Indiana.

Mr. MYERS. Mr. Speaker, I thank the gentleman for yielding.

I certainly am in sympathy with what the gentleman from California (Mr. ROUSSELOT) is saying, but he is chasing the wrong rabbit, to use the old Hoosier vernacular.

Mr. ROUSSELOT. I have never called the gentleman from Indiana a "rabbit."

Mr. MYERS. Mr. Speaker, we agree completely, and as the chairman of the committee said, we have tried to do something. We tried to do something years ago, and the Court stopped us. This bill is the vehicle we must use to fund the program, but the authorization for the food stamp program is not in our committee's jurisdiction. So our hands are tied.

Mr. ROUSSELOT. We will be taking that up later this week, and what are we doing in that bill to stop it?

Mr. MYERS. That is what we are talking about now, in the entitlement.

Mr. ROUSSELOT. I want to talk about it now, because this is the money to fund the program.

Mr. MYERS. We have no choice but to fund it, because the courts have told us to do this. Our hands are tied. We are in sympathy with what the gentleman says, but our hands are tied.

Mr. ROUSSELOT. That is what we always say. We point at the other committee and say that it is the authorizing committee's fault, and then the authorizing committee says, "We have to do what the Appropriations Committee said," and it just goes around in a circle. We still have not put a control on this program. It is out of control, as the committee chairman himself has said.

Mr. MYERS. If the gentleman understands entitlements and what our problem is, I am sure he knows the situation.

Mr. ROUSSELOT. Oh, I understand entitlements as well as the gentleman does.

Mr. WHITTEN. Mr. Speaker, I thank my colleague for his comments. May I say that he has an understanding of the problem, and we have all worked together on the problem. As I say, we have a subcommittee that works together.

But let me go back to the point that, as the chairman of the committee that set-up the Budget Act, I worked to have that committee set-up to do something about entitlements and backdoor spending. Instead of that, unfortunately they are working on the discretionary programs and leaving these entitlement programs alone.

We might say that the same thing is happening downtown. But I do say one thing, at one time we had a program where we distributed surplus food.

Mr. ROUSSELOT. Yes, but if the gentleman will yield, that was when it started out.

Mr. WHITTEN. But the Congress passed a measure to hold this program in line, and the courts have held against us. We have worked hard on this, and we have done the best we can.

Mr. ROUSSELOT. The gentleman has worked with the authorizing committee, but what if they do not do anything with the food stamp program to make sure it is not out of control? As a result, we have kids going to college and getting food stamps.

Mr. WHITTEN. We have done the best we can, I say to the gentleman. Apparently, the way the gentleman describes it, it must be beyond his control, too.

Mr. ROUSSELOT. The point is, if the gentleman will yield further, that we are waiting for the authorizing committee. But here we are on an appropriation bill, and the gentleman tells us he has done the best he could, but it is still basically a little out of control.

When are we going to bring this thing under control? I ask that because this is the biggest part of this bill.

Mr. WHITTEN. Mr. Speaker, the gentleman has as much to do with that as I do. It is beyond our control, because nobody has brought in a bill from the legislative committees, nor have I read about anything coming from downtown that will fully present the concerns of the gentleman. Maybe there has been, but I have not heard about it. But it is beyond my control as much as it is beyond the gentleman's control.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

I would like to know, how closely does the appropriation we have before us here track the farm bill that we are going to vote on either later today or tomorrow?

Mr. WHITTEN. Mr. Speaker, I am not too positive about what the farm bill does or does not do. I have talked to various Members about the bill. As the gentleman knows, I have been working day and night on matters that are my primary responsibility. I am not an expert on what is in that bill. I have not heard of anybody being happy about it.

Mr. WALKER. I am concerned about the fact, for instance, that there is money in the diary price support program. Is the money in this bill going to be sufficient to fund a program which might go beyond what is in the farm bill? Are we committed to spending money on the peanut and sugar programs, for instance, in this bill?

Mr. WHITTEN. The gentleman, I know, is interested in that. He will be around here, I know, and I suggest that he talk to those Members who are handling that bill. I have not been able to keep up with the details of that bill.

Mr. WALKER. I have one other question, Mr. Speaker, if I may.

Is there sufficient money, so far as the gentleman knows, in this bill to fund the food stamp program for the entire year, or are there projections that we are going to have to come back with a supplemental to get additional money later on in the year?

Mr. WHITTEN. Of course, when we get updates on the projections and anticipations of what the economy might do and all that, we will know. What with the present rate of unemployment, the chances are that the demands are going to increase. We could say that it looks like that is true now.

May I say that in an effort to try to make savings, we put $292 million in reserve. If the Department can correct all this misuse and fraud, as we hope, they will have the $292 million left.

I wish the gentleman would wait until we get to the legislative committee's bill.

Mrs. SMITH of Nebraska. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the bill, and I want to highly commend our distinguished committee chairman. Certainly producers and consumers alike are richly placed in the knowledge and concern of our chairman. It has been a great privilege to work with him, as well as to work with all the members of the committee. I want to assure the Members that we have worked on a bipartisan basis in the interest of agriculture.

Now, we have made additional budget cuts in this appropriation bill in line with the President's request and in line with the continuing resolution. In fact, our figure today is slightly below the continuing resolution.

We were very careful in those budget cuts and tried to protect ongoing action programs, soil programs, re-

search programs, and agricultural marketing programs, which certainly in this time of heavily depressed agricultural prices are even more important than ordinarily, and it is important to protect the Extension Service.

I think this is a good bill. It is $2.8 billion less than the 1981 bill. I support the bill.

Mr. Speaker, I have no requests for time at this point, and I reserve the balance of my time.

Mr. WHITTEN. Mr. Speaker, I yield 5 minutes to the gentleman from Oklahoma (Mr. WATKINS).

Mr. WATKINS. Mr. Speaker, I thank my committee chairman for yielding this time to me, and I will not take that much time. I would like to state that I am in support of the bill, and I also express my appreciation to the committee chairman, the dean of the House of Representatives, the gentleman from Mississippi (Mr. WHITTEN), for a tremendous job in difficult and trying times in bringing out this agricultural appropriation bill.

I know that the gentleman shares with me the thought that there is a lot of things we would like to do to achieve more, but under the circumstances we are going to be faced with a tremendous dilemma in trying to finance agriculture. A lot of farmers are going to be facing bankruptcy.

I want to thank the gentlewoman from Nebraska (Mrs. SMITH) for her hard work. We are glad to have her help, and we appreciate very much the work she has done.

I would like to say one thing further to those who have some reluctance in supporting this bill. This bill does not do what we all would like to have it do because we have a very difficult and trying time in the farm belts of this country. There needs to be more money to be able to allow the farmers to survive, especially when we look at the relationship of the amount of money that is here for emergency disaster loans compared to what has been put in the foreign aid bill. There is much more money in the foreign aid bill to provide guaranteed loans for foreign aid than there is in this bill.

To those who are worried about the amount in this bill, I would like to say this: Last Friday there was an appropriation bill approved for foreign aid that exceeded the continuing resolution by more than $2 billion. That was more money, exceeding the amount in that particular bill, than what the President was using in order to shut down the Government the Monday before.

Mr. Speaker, I would just like to say that I think all the members of the Agriculture Appropriation Subcommittee worked hard in trying to get this bill out here to do the job. Hopefully and prayerfully, it will do the job, and I want to commend the committee chairman, the gentleman from Mississippi (Mr. WHITTEN), and the gentlewoman from Nebraska (Mrs. SMITH), the ranking minority member, for their tremendous work.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Iowa (Mr. SMITH) who is a long-time supporter of agriculture.

Mr. SMITH of Iowa. Mr. Speaker, I thank the gentleman for yielding this time to me.

I really did not intend to take any time on this bill, but I began to wonder about the rhetoric I have heard and about the actions I have witnessed the past week.

On Thursday of last week, this House passed a bill that reduced by $1.1 billion the amount of money that goes to grants for local governments for health and education because they said we could not afford the expenditures. Then we came in here on Friday, and the majority voted for a 25-percent increase in foreign aid. We saw the same Members voting for a lower figure for the grants to local governments so they can provide needed services on Thursday that voted for the big increase in foreign aid on Friday.

It is hard enough to rationalize that, but then comes an agriculture bill like this, and the agricultural economy in this country is in bad shape. We have unemployment in agri-business and we have farm machinery companies going broke. These big consumers of steel and coal and electric motors are not buying them, and agriculture needs some support. So we should do something about it.

I commend the Agriculture Appropriations Subcommittee for doing as well as it did, but it was forced to cut back on consumer protection, and now we hear a lot of rhetoric about food stamps. Let me say something about food stamps.

Food stamps in this country cost three-tenths of 1 percent of our national production. That is three-tenths of 1 percent, and then the other people who can afford to buy all the food they need secure their food for 17 percent of their income.

No other country in the whole world has been able to do what we have been able to do simultaneously for producers and those poor people who cannot pay for enough food. Other countries, in order to secure the food for the poor people, have destroyed their productive system. They have had revolutions, and after the revolution is over they find they have destroyed incentive to produce or the ability to produce. But we have found a method in this country by which, for a little bit of money, three-tenths of 1 percent, we can let the poor people who cannot find food in any other way have the minimum amount of food and at the same time preserve the incentive for producers to continue producing.

This has been a successful program. All we hear on the floor is rhetoric about how bad it is. The fact of the matter is that no other country in the whole world has been as successful as we have been in accomplishing this dual purpose of providing food for the poor and protecting the producers, and at the same time we did not destroy our productive system. I think it is about time that we look at how good the program is instead of always hearing rhetoric about how we cannot affort to give poor people a minimum amount of food, that is for those who through no fault of their own cannot secure needed quantities of needed food.

Mr. Speaker, it seems that if we must cut back on consumer protection because funds are not available, it is inconsistent to say we have plenty of money for a foreign aid increase of 25 percent and an increase of $28 billion in 1 year in the Defense Department. That does not make sense.

I do commend the Appropriations Subcommittee for doing as well as they did with this bill under the circumstances.

Mrs. SMITH of Nebraska. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Indiana (Mr. MYERS).

Mr. MYERS. Mr. Speaker, I rise in support of this compromise.

It has been said here that this is not the first choice of any Member of this Chamber, but it is a compromise worked out primarily by the committee chairman and certainly the ranking minority member, the gentlewoman from Nebraska (Mrs. SMITH), along with other Members and the staff who worked very hard for several months to come to this compromise. I think it is worthy of our support.

However, there are, of course, parts of this bill that we are not very pleased with, and they have been identified by several Members. I must take exception with my good friend, the gentleman from Iowa (Mr. SMITH). There is too much money in this bill for food stamps. But we are not ever intending to take food out of hungry people mouths. There has been abuse and misuse of the food stamp program. The gentleman from California (Mr. ROUSSELOT) is right, there is too much money in it.

But that is not this committee's fault. Our hands have been tied, and I think it is appropriate that early action in the next session in January should be taken to correct those parts of the authorization committee bill that allowed this to be first, an entitlement.

Second, we should tighten up the reins and close the holes. I know the gentleman from Iowa did not mean to

leave the impression that we should not for a moment ignore the waste in the food stamp program.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. MYERS. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Speaker, there are some things that we cannot do with Federal legislation. For one thing, in the food stamp program there are two people who administer it. One is the local governments, and there are, second, the grocers.

Now, how can we pass a law that makes them administer the law better? As for the grocer, if he permits them to buy food they are not supposed to use food stamps to pay for, the grocer is the one that really is responsible rather than the law. We should be doing what we can do to prevent people from getting it that should not have it but just passing another Federal law is not going to correct the situation.

□ 1500

Mr. MYERS. Possibly another Federal law would not be. But a correction of the mistakes we have made in the past would, in permitting these things and these accounts that are not conducted today, first off, on the eligibility. You will have to admit that the eligibility requirements today are pretty loose, that the individual can apply for food stamps and they get them regardless of having to prove the need or justification.

We cannot raise enough tax money, let alone pass enough laws if we are going to make an entitlement that the individual is entitled to them just because they asked for them.

Mr. SMITH of Iowa. You cannot have more Inspectors General when you are cutting the money down for Inspectors General.

Mr. MYERS. I would not disagree. But we have to start someplace. When we start enforcing the laws maybe we will not need quite so many Inspectors General.

Nevertheless, I am not going to condone what is wrong in the bill today about the food stamps. It is not our fault. We are going to try now to vote with the gentleman from California to help correct this mistake, but today we are fixed with a situation where they have not corrected the entitlement and the authorization.

The gentleman from California asked a question, if there would be a supplemental. Of course, no one knows. But I expect to see several supplementals on a number of things in this next year and I am sure the gentleman from California would agree. Several of those supplementals are going to contain agricultural items. Food stamps is one of them, without any question. We are going to run out of money by some time late in the summer.

I have another concern and that is I am concerned about the Commodity Credit Corporation. I do not think we have enough money here to support prices because of the low commodity and grain prices that we have today. There is going to be a big demand for commodity credit lending in this next year and I am sure we are going to have to put additional money in for this purpose.

The chairman talked about Secretary Benson several years ago not selling grain. I am concerned about the Commodity Credit Corporation being able to sell any through the Public Law 480, and I am afraid the cutback in Public Law 480 may tie our hands somewhat.

I realize the compromise worked out here is with the White House. This is coming under the target. We have done the best we can do. But I am concerned about what is going to happen. I think we are going to be in trouble with Public Law 480 because we simply have cut back a little bit too deep. But faced with the situation we have today, we are going to build up larger surpluses because we have them today. If we are not going to be able to sell them through the channels of Public Law 480, we are going to have to come back in with higher Commodity Credit Corporation supports and more loans.

So I think we may be doing the wrong thing here, but it is a compromise.

As my last remarks I do want to say I think the committee has done the best job we can do considering the situation. I believe this bill deserves the support of everyone here. The President has made a compromise with us. He has on other items. I agree with the chairman in his remarks the other day, we do not want the White House writing appropriation bills and we do not want them writing authorization bills. But we must recognize that we did not have enough votes to override any veto.

So we have to compromise. The President in this spirit of compromise has also compromised. He did not get everything he wanted in this bill. But I think it is a bill that he will sign. I know he will sign it. It is a bill that we can all agree to. It is the best we can come with today and still, I completely agree, too, we do not want to continue to run the country on a continuing resolution.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. MYERS. I yield to the gentleman from California.

Mr. ROUSSELOT. I think the point the gentleman has made is correct, that our basic problem, as was pointed out by the chairman, is what we do in our entitlement programs. The reason I brought up the food stamps is that is the biggest chunk of this bill, $10.2 billion. That is a lot of money. My colleague from Iowa can kind of downplay it, that we are only taking care of the poor. That is not true.

The General Accounting Office has pointed out time and time again, not everybody, but many of the 21-some-odd million participating in the food stamp program would not normally be eligible, as the gentleman pointed out, for food stamps. They really are not in the class of the very poor.

The point is that we need at some time in this Congress to take the responsibility to tighten up on the entitlements, to disallow the overuse of the food stamp program.

Nobody is claiming that the really poor should be denied, those that are not able to care for themselves. The point is that we have allowed the program to get out of hand.

I appreciate my colleague pointing out that we should not defend the overuse or the misuse of the food stamp program, which is the biggest chunk of this program. It is $10.2 billion. My friend from Iowa may be able to play down that that is only a certain percentage of the total gross national product or something else, but it is still being carried on the backs of the taxpayers of this country.

Mr. MYERS. A few billion here and a few billion there and it soon becomes real dollars, does it not?

Mr. ROUSSELOT. It certainly does.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. MYERS. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. I would point out that yes, it is a lot of money, but it is one-third of the increase in defense that we just voted a few days ago.

Mr. MYERS. In fairness, I would say to the gentleman, who else in this country takes care of U.S. defense except your U.S. Government. In welfare programs, in all of these programs, helping poor people, helping those less fortunate people, local government, city, county, and State help contribute.

Other agencies, churches help do this. But who takes care of the national defense except your U.S. Government? We are the only ones.

So I do not think it is fair to compare the increases on national defense with welfare programs when we are the only ball game in town funding national defense.

Mr. SMITH of Iowa. The fact is we cannot spend that much additional money in 1 year without wasting it. They are going to waste $10 billion of that $30 billion because it cannot be spent that fast without wasting it. That is the fact of the matter.

But the thing I really want to point out in regard to all of this, to clear it

up, is we are depending upon local governments and upon the grocers to enforce the bill. If we employ people who will prosecute those people, it is not a matter of changing entitlements. Entitlements do not permit them to get them now where there is an abuse. But we do not have a method, and I do not know of anybody proposing a better method other than using inspectors general. But we are cutting down on the inspectors general.

Mr. MYERS. This committee 3 years ago tried to provide some language in the report strengthening the hand of the Department of Agriculture to enforce, and we were struck down by the courts because it is an entitlement.

So I think we are going to have to go to the problem, and I think you will all agree, and I am sure the gentleman from Iowa is not condoning the misuse and the mishandling and the abuse of the food stamps because it is unfair to the needy people of this country for so many greedy ones to be receiving stamps. We have to start tightening our belts. It is a small item, sure, but a lot of small items add up to the $100 billion increase in the national debt.

Mr. SMITH of Iowa. The other thing is that they issue food stamps—and we cannot condemn the whole program because this happens—they issue food stamps to people who claim they have lost them and then they sell them and people can buy them. They could get away from this whole thing by having an electronic system or a credit card system, but they have not proposed to do that.

Mr. MYERS. I think we need to tighten up. We all agree with the gentleman, but this is a committee that cannot do that. It is going to take the authorization committee and the full Congress to really put some teeth in this.

I yield back the balance of my time.

Mr. WHITTEN. Mr. Speaker, I would like to note how fortunate we are in the membership of the committee. I would like to say to the House that through the years my colleagues on this committee have done a tremendous job. This year particularly, they have all made major and essential contributions to the development of this bill.

Mr. Speaker, may I say that I would particularly like to express my appreciation to the gentlewoman from Nebraska, Mrs. VIRGINIA SMITH, as the ranking minority member of the subcommittee, for her diligent and thoughtful work in developing this legislation. I would also like to add my thanks to the gentleman from Michigan (Mr. TRAXLER), our ranking majority member, the gentleman from Arkansas (Mr. ALEXANDER), the gentleman from New York (Mr. MCHUGH), the gentleman from Kentucky (Mr. NATCHER) whom I have worked closely with for many years now, the gentleman from Texas (Mr. HIGHTOWER), the gentleman from Hawaii (Mr. AKAKA), and the gentleman from Oklahoma (Mr. WATKINS). I would also like to commend our other minority members, the gentleman from Virginia (Mr. ROBINSON), the gentleman from Indiana (Mr. MYERS), and the gentleman from California (Mr. LEWIS).

Mr. Speaker, may I also say it has been a pleasure this year, not only on this bill but all bills we deal with, to work with the gentleman from Massachusetts (Mr. CONTE), the ranking minority member of the full committee.

Mr. Speaker, all of these people have done a marvelous job, and we have been able to bring this bill to you because the House has confidence in them and in their efforts on this bill, which is so important to the standard of living of every American. I give my personal thanks to each and every one of them.

I have arisen at this time to pay special tribute to the gentleman from Indiana, (Mr. MYERS.) I do not know of any man who has better standing in this Congress or who is held in higher esteem on both sides of the aisle. He was the ranking member of this Subcommittee on Agriculture. He is now the ranking member on the Public Works Subcommittee. But I appreciate his continuing contribution here. Through the years he has been the one who told it like it was and held the line and got things done.

I just want to say for the RECORD about the gentleman from Indiana, Congressman MYERS, that there is none better in this House and I appreciate his contributions here.

COMMITTEE RECOMMENDATION

Mr. Speaker, as I mentioned earlier, this has been an extraordinary year. Circumstances have changed yet again in the brief time that has passed since the conference report on this appropriations bill was submitted. In response to these changing circumstances, the committee is offering an amendment to the conference report which will make reductions from the conference in 22 specific accounts. These reductions are designed to achieve a total savings of $317,330,000 in budget authority and $211,571,000 in outlays in areas not involving direct assistance to those engaged in agriculture.

Mr. Speaker, the amendment offered by the committee also provides that, where applicable, these reductions shall be applied proportionally to each appropriation account and activity, unless justified in writing and concurred in by the House and Senate Appropriations Committees. Further, it is the intention of the committee to continue to give close attention to actions taken by the Farmers Home Administration to help avoid bankruptcy or forced sale of assets for those engaged in agriculture. Therefore, the committee directs that the reductions in the FmHA accounts be taken from activities other than farmer programs and single family housing. In addition to this instruction, it is the intention of the committee that the Food and Drug Administration is still expected to establish a project entitled "Orphan Drugs" which will account for no less than $1.5 million of the resources currently available to the human drugs program.

Mr. MOFFETT. Mr. Speaker, I want to commend the House conferees on their efforts to provide viable levels of funding for the child nutrition programs. Actually, I use the word "viable" for lack of a better word, under the circumstances. The school lunch administrators I am hearing from will tell you that a budget cut of $1.5 billion to the lunch program hardly leaves them with viable funding. But we did not have much to work with, so we have the best we could get. For that, I am indeed thankful.

Now with the across-the-board cutbacks contained in the latest continuing resolution, I have to take a minute to express my very grave concern about the school lunch program.

By approving further spending reductions in the school lunch program, Congress is gouging a program that is essential for the growth of thousands of poor children.

Ask the USDA—their own studies show that poor kids rely on school lunches for as much as one-half of their needed nutrients. Back in the spring, when President Reagan proposed his austerity budget, persons who understood that the school lunch program is administered on the local level as a business warned that schools could not sustain the program with huge cutbacks. The paying students' participation in the program is essential, we were warned; if prices for lunch have to be increased, these students might just drop out of the program altogether. And then there would be no lunch program for anyone, affluent or poor.

As with Cassandra, these warnings went unheeded by the administration. Mr. Stockman testified at hearings last April:

> All of these dire predictions are based on an assumption. I don't believe those assumptions have been verified. It seems to me middle- and upper-income students will stay in the program and that their families will be willing to put in 30¢ more a meal because it is still a good deal.
>
> If there is a major retention of participation, which we believe there will be, there will be no changes in the unit costs for running these programs, and the kind of dropout, the kind of attrition that has been predicted, in my judgment, won't happen.

Given the recent accounts of Mr. Stockman's inner feelings about supply-side economics, it is likely that he did not believe what he was saying

about school lunches, either. But his statements certainly have been questioned. In a recent New York Times article, it was reported that participation in the school lunch program is down by 15 to 20 percent in my home State of Connecticut, 20 to 30 percent in New Jersey, 30 to 35 percent in California, 20 percent in Wisconsin, 22 percent in Idaho, and by 15 percent in Florida. And, prices for lunches have indeed risen, to $1 in some schools in Connecticut.

The school lunch administrators at home are telling me that they cannot bear another round of budget cuts. Already, five towns have dropped out of the lunch program. What do we have to look forward to? Eliminating the paying student from the program and a rehash of the USDA's deleterious regulations? Is there anything but bleak news ahead for school lunches? Hopefully not.

My colleagues Representative GEORGE MILLER and Representative TONY HALL have introduced legislation that represents meaningful action to protect the school lunch program. First is a resolution which expresses the sense of Congress that the USDA retain the traditional and longstanding goal of the lunch program to provide participating children with approximately one-third of their daily nutritional needs. As the authors of the resolution stated, even though funding for the program has been reduced, there are ways to accommodate adjustments without impairing the nutritional value of the meals. It is not necessary to lower the standard, which has been unchanged since the creation of the lunch program in 1946.

The second positive step for the program is the legislation introduced by my friend and colleague GEORGE MILLER, which will reduce the business lunch and entertainment tax deductions to a 70-percent subsidy, and target the savings to restore the school lunch program. This is not punitive legislation; it simply seeks to have the Nation's businessmen share a little bit of their subsidy with the Nation's children.

I am cosponsoring both initiatives to protect the integrity and future of the school lunch program. I encourage you to do the same. By these efforts, we can restore a vital nutrition program which represents a very wise investment in our future society.

Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 15: Page 7, line 18, strike out "$6,596,000" and insert "$2,000,000".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 15 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert the following: "$8,596,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 23: Page 10, line 2, strike out "$219,936,000" and insert "$222,506,000".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 23 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert the following: "$225,548,000".

The motion was agreed to.

□ 1510

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 30: Page 11, line 8, strike out "$314,783,000" and insert "$315,179,000".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 30 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert the following: "$314,381,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 35: Page 12, lines 20 and 21, strike out "not to exceed $14,983,000 shall be available for the Mediterranean fruit fly program and".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 35 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows: "not to exceed $8,983,000 shall be available for the Mediterranean fruit fly program and".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 37: Page 13, line 19, strike out "insect infestations" and insert "pests".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 37 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 38: Page 13, line 22, after "amended," insert "including not less than $6,000,000 for the eradication of infestations of the Mediterranean fruit fly in the continental United States,".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 38 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 71: Page 31, line 25, after "amounts" insert "but during 1982, total commitments to guarantee loans pursuant to section 306, shall not be less than $5,145,000,000, nor more than $6,400,000,000 of contingent liability for loan principal".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 71 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 82: Page 40, after line 10, insert

FORESTRY INCENTIVES PROGRAM

For necessary expenses, not otherwise provided for, to carry out the program of forestry incentives, as authorized in the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2101), including technical assistance and related expenses, $12,500,000, to remain available until expended, as authorized by that Act.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 82 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 94: Page 43, line 7, strike out all after "$751,400,000" down to and including "law" in line 9.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 94 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows: ", of which not to exceed $500,000 shall be available for the pilot supplemental food program when authorized by law".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 98: Page 44, line 4, after "law" insert ": *Provided further,* That not less than $65,000,000 of the amount provided herein shall be used for work registration and job search activities".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 98 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 111: Page 51, line 4, after "480;" insert "Mutual and Self-Help Housing;".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 111 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the last amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 112: Page 51, line 22, after "utilized" insert ", and ceilings on full-time equivalent staff years established for or by the Department of Agriculture shall exclude overtime as well as staff years expended as a result of carrying out programs associated with natural disasters, such as forest fires, drought, floods, and other acts of God".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 112 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

, and ceilings on full-time equivalent staff years established for or by the Department of Agriculture shall exclude overtime as well as staff years expended as a result of carrying out programs associated with natural disasters, such as forest fires, drought, floods, and other acts of God: *Provided,* That notwithstanding any other provision of this Act, appropriations under this Act for the following agencies or activities shall not exceed:

	Thousands
Governmental and Public Affairs	$8,628
Agricultural Research Service:	
Salaries and expenses	432,410
Scientific activities overseas (Special foreign currency program)	
Cooperative State Research Service:	
Hatch Act payments	141,109
Animal Health and Disease programs	5,760
Special grants	21,899
Competitive grants	16,320
Extension Service:	
Smith-Lever payments	219,376
Renewable resources	2,000
Animal and Plant Health Inspection Service: Salaries and expenses	277,382
Food Safety and Inspection Service	323,250
Economic Research Service	39,360
Statistical Reporting Service	51,636
Agricultural Stabilization and Conservation Service: Salaries and expenses (Transfer from Commodity Credit Corporation).	−309,000
Federal Crop Insurance Corporation: Administrative and operating expenses	117,600
Farmers Home Administration:	
Rural Housing Insurance Fund reimbursement	707,967
Rural Development Insurance Fund reimbursement	180,040
Salaries and expenses	276,418
Soil Conservation Service: Conservation operations	310,809
Special supplemental food programs (WIC)	934,080
Public Law 480	−1,000,000
Titles I and III	−325,127
Title II	−674,873
Food and Drug Administration:	
Salaries and expenses	328,032

: *Provided further,* That, where applicable, the reductions made by this provision shall be applied proportionally to each appropriation account and activity, unless justified in writing and concurred in by the House and Senate Appropriations Committees.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and that I be permitted to include tables, charts and other extraneous material, on the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken later today, and other privileged business may interrupt the consideration of the suspension list.

BLACK LUNG BENEFITS REVENUE ACT OF 1981

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5159) to amend the Internal Revenue Code of 1954 to provide a temporary increase in the tax imposed on producers of coal, and for other purposes

The Clerk read as follows:

H.R. 5159

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Black Lung Benefits Revenue Act of 1981".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. TEMPORARY INCREASE IN AMOUNT OF TAX.

(A) GENERAL RULE.—Section 4121 (relating to tax on coal) is amended by adding at the end thereof the following new subsection:

"(e) TEMPORARY INCREASE IN AMOUNT OF TAX.—

"(1) IN GENERAL.—Effective with respect to sales after December 31, 1981, and before the temporary increase termination date—

"(A) subsection (a) shall be applied—

"(i) by substituting '$1' for '50 cents', and

"(ii) by substituting '50 cents' for '25 cents', and

"(B) subsection (b) shall be applied by substituting '4 percent' for '2 percent'.

"(2) TEMPORARY INCREASE TERMINATION DATE.—For purposes of paragraph (1), the temporary increase termination date is the earlier of—

"(A) January 1, 1996, or

"(B) the first January 1 after 1981 as of which there is—

"(i) no balance of repayable advances made to the Black Lung Disability Trust Fund, and

"(ii) no unpaid interest on such advances."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to sales after December 31, 1981.

SEC. 3. BLACK LUNG DISABILITY TRUST FUND.

(a) GENERAL RULE.—The Internal Revenue Code of 1954 is amended by adding at the end thereof the following new subtitle:

"Subtitle I—Trust Fund Code

"SEC. 9500. SHORT TITLE.

"This subtitle may be cited as the 'Trust Fund Code of 1981'.

"CHAPTER 98—TRUST FUND CODE

"Subchapter A. Establishment of Trust Funds.
"Subchapter B. General provisions.

"Subchapter A—Establishment of Trust Funds

"Sec. 9501. Establishment of Black Lung Disability Trust Fund.

"SEC. 9501. ESTABLISHMENT OF BLACK LUNG DISABILITY TRUST FUND.

"(a) CREATION OF TRUST FUND.—

"(1) IN GENERAL.—There is established in the Treasury of the United States a trust fund to be known as the 'Black Lung Disability Trust Fund', consisting of such amounts as may be appropriated or credited to the Black Lung Disability Trust Fund.

"(2) TRUSTEES.—The trustees of the Black Lung Disability Trust Fund shall be the Secretary of the Treasury, the Secretary of Labor, and the Secretary of Health and Human Services.

"(b) TRANSFER OF CERTAIN TAXES; OTHER RECEIPTS.—

"(1) TRANSFER TO BLACK LUNG DISABILITY TRUST FUND OF AMOUNTS EQUIVALENT TO CERTAIN TAXES.—There are hereby appropriated to the Black Lung Disability Trust Fund amounts equivalent to the taxes received in the Treasury under section 4121 or subchapter B of chapter 42.

(2) CERTAIN REPAID AMOUNTS, ETC.—The following amounts shall be credited to the Black Lung Disability Trust Fund:

"(A) Amounts repaid or recovered under subsection (b) of section 424 of the Black Lung Benefits Act (including interest thereon).

"(B) Amounts paid as fines or penalties, or interest thereon, under section 423, 431, or 432 of the Black Lung Benefits Act.

"(C) Amounts paid into the Black Lung Disability Trust Fund by a trust described in section 501(c)(21).

"(c) REPAYABLE ADVANCES.—

"(1) AUTHORIZATION.—There are authorized to be appropriated to the Black Lung Disability Trust Fund, as repayable advances, such sums as may from time to time be necessary to make the expenditures described in subsection (d).

"(2) REPAYMENT WITH INTEREST.—Repayable advances made to the Black Lung Disability Trust Fund shall be repaid, and interest on such advances shall be paid, to the general fund of the Treasury when the Secretary of the Treasury determines that moneys are available in the Black Lung Disability Trust Fund for such purposes.

"(3) RATE OF INTEREST.—Interest on advances made pursuant to this subsection shall be at a rate determined by the Secretary of the Treasury (as of the close of the calendar month preceding the month in which the advance is made) to be equal to the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the anticipated period during which the advance will be outstanding.

"(d) EXPENDITURES FROM TRUST FUND.—Amounts in the Black Lung Disability Trust Fund shall be available, as provided by appropriation Acts, for—

"(1) the payment of benefits under section 422 of the Black Lung Benefits Act in any case in which the Secretary of Labor determines that—

"(A) the operator liable for the payment of such benefits—

"(i) has not commenced payment of such benefits within 30 days after the date of an initial determination of eligibility by the Secretary of Labor, or

"(ii) has not made a payment within 30 days after that payment is due,

except that, in the case of a claim filed on or after the date of the enactment of the Black Lung Benefits Revenue Act of 1981, amounts will be available under this subparagraph only for benefits accruing after the date of such initial determination, or

"(B) there is no operator who is liable for the payment of such benefits,

"(2) the payment of obligations incurred by the Secretary of Labor with respect to all claims of miners or their survivors in which the miner's last coal mine employment was before January 1, 1970,

"(3) the repayment into the Treasury of the United States of an amount equal to the sum of the amounts expended by the Secretary of Labor for claims under part C of the Black Lung Benefits Act which were paid before April 1, 1978, except that the Black Lung Disability Trust Fund shall not be obligated to pay or reimburse any such amounts which are attributable to periods of eligibility before January 1, 1974,

"(4) the repayment of, and the payment of interest on, repayable advances to the Black Lung Disability Trust Fund,

"(5) the payment of all expenses of administration on or after March 1, 1978—

"(A) incurred by the Department of Labor or the Department of Health and Human Services under part C of the Black Lung Benefits Act (other than under section 427(a) or 433), or

"(B) incurred by the Department of the Treasury in administering subchapter B of chapter 32 and in carrying out its responsibilities with respect to the Black Lung Disability Trust Fund,

"(6) the reimbursement of operators for amounts

paid by such operators (other than as penalties or interest) before April 1, 1978, in satisfaction (in whole or in part) of claims of miners whose last employment in coal mines was terminated before January 1, 1970, and

"(7) the reimbursement of operators and insurers for amounts paid by such operators and insurers (other than amounts paid as penalties, interest, or attorney fees) at any time in satisfaction (in whole or in part) of any claim denied (within the meaning of section 402(i) of the Black Lung Benefits Act) before March 1, 1978, and which is or has been approved in accordance with the provisions of section 435 of the Black Lung Benefits Act.

For purposes of the preceding sentence, any reference to section 402(i), 422, or 435 of the Black Lung Benefits Act shall be treated as a reference to such section as in effect immediately after the enactment of this section.

"Subchapter B—General Provisions

"Sec. 9601. Transfer of amounts.
"Sec. 9602. Management of Trust Fund.

"SEC. 9601. TRANSFER OF AMOUNTS.

"The amounts appropriated by any section of subchapter A to any Trust Fund established by such subchapter shall be transferred at least monthly from the general fund of the Treasury to such Trust Fund on the basis of estimates made by the Secretary of the Treasury of the amounts referred to in such section. Proper adjustments shall be made in the amounts subsequently transferred to the extent prior estimates were in excess of or less than the amounts required to be transferred.

"SEC. 9602. MANAGEMENT OF TRUST FUND.

"(a) REPORT.—It shall be the duty of the Secretary of the Treasury to hold each Trust Fund established by subchapter A, and (after consultation with any other trustees of the Trust Fund) to report to the Congress each year on the financial condition and the results of the operations of such Trust Fund during the preceding fiscal year and on its expected condition and operations during the next 5 fiscal years. Such report shall be printed as a House document of the session of the Congress to which the report is made.

"(b) INVESTMENT.—

"(1) IN GENERAL.—It shall be the duty of the Secretary of the Treasury to invest such portion of any Trust Fund established by subchapter A as is not, in his judgment, required to meet current withdrawals. Such investments may be made only in interest-bearing obligations of the United States. For such purpose, such obligations may be acquired—

"(A) on original issue at the issue price, or

"(B) by purchase of outstanding obligations at the market price.

"(2) SALE OF OBLIGATIONS.—Any obligation acquired by a Trust Fund established by subchapter A may be sold by the Secretary of the Treasury at the market price.

"(3) INTEREST OF CERTAIN PROCEEDS.—The interest on, and the proceeds from the sale or redemption of, any obligation held in a Trust Fund established by subchapter A shall be credited to and form a part of the Trust Fund."

(b) REPEAL OF SUBSECTIONS (a), (b), AND (c) OF SECTION 3 OF THE BLACK LUNG BENEFITS REVENUE ACT OF 1977.—Subsections (a), (b), and (c) of section 3 of the Black Lung Benefits Revenue Act of 1977 are hereby repealed.

(c) CLERICAL AMENDMENTS.—

(1) Clause (iii) of section 501(c)(21)(B) is amended by striking out "established under section 3 of the Black Lung Benefits Revenue Act of 1977" and inserting in lieu thereof "established under section 9501".

(2) The table of subtitles for such Code is amended by adding at the end thereof the following new item:

"SUBTITLE I. Trust Fund Code."

(d) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall take effect on January 1, 1982. Section 9501(c)(3) of the Internal Revenue Code of 1954 (as added by subsection (a)) shall only apply to advances made after December 31, 1981.

(2) SAVINGS PROVISIONS.—The Black Lung Disability Trust Fund established by the amendments made by this section shall be treated for all purposes of law as the continuation of the Black Lung Disability Trust Fund established by section 3 of the Black Lung Benefits Revenue Act of 1977. Any reference in any law to the Black Lung Disability Trust Fund established by such section 3 shall be deemed to include a reference to the Black Lung Disability Trust Fund established by the amendments made by this section.

SEC. 4. Amendments to Section 424 of the Black Lung Benefits Act.

(a) INTEREST ON OPERATOR LIABILITIES.—

(1) RATE OF INTEREST.—Subsection (b) of section 424 of the Black Lung Benefits Act is amended by adding at the end thereof the following new paragraph:

"(5) THE RATE OF INTEREST UNDER THIS SUBSECTION.—

"(A) for any period during calendar year 1982, shall be 15 percent, and

"(B) for any period after calendar year 1982, shall be the rate established by section 6621 of the Internal Revenue Code of 1954 which is in effect for such period."

(2) CLARIFYING AMENDMENT.—The first sentence of section 424(b)(1) of the Black Lung Benefits Act is amended by inserting "plus interest thereon" after "attributed to him.".

(3) EFFECTIVE DATE.—The amendment made by paragraph (1) shall take effect on January 1, 1982, and shall apply to amounts outstanding on such date or arising thereafter.

(b) CONFORMING AMENDMENT.—Subsection (a) of section 424 of the Black Lung Benefits Act is amended to read as follows:

"(a) For purposes of this section, the term 'fund' means the Black Lung Disability Trust Fund established by section 9501 of the Internal Revenue Code of 1954."

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 5159, presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Committee on Ways and Means has reported a bill, H.R. 5159, the Black Lung Benefits Revenue Act of 1981. This legislation represents the culmination of the efforts of many in the Congress, in the administration, and in the coal industry to restore the black lung disability trust fund to fiscal solvency over a period of years. It deserves the support of all those in Congress who desire a fair and balanced resolution to the controversies that have plagued this program since its inception. Let me now provide my colleagues with a summary of present law and the principal provisions of the bill before us.

PRESENT LAW

Mr. Speaker, the black lung disability trust fund was created in 1978 pursuant to the Black Lung Benefits Revenue Act of 1977. Revenues for the fund are derived from an excise tax on coal. Currently, the tax is 25 cents per ton for surface-mined coal and 50 cents per ton for underground-mined coal, with a cap of 2 percent of the sales price. Expenditures from the fund are made to pay benefits to coal miners who are totally disabled by coal workers' pneumoconiosis—"black lung" disease—and to their survivors. The fund was intended to place primary financial responsibility for the black lung disability program on the coal mining industry rather than the Federal taxpayer.

The fund pays benefits for miners who terminated coal mine employment prior to January 1, 1970, and filed a claim after June 30, 1973. If a miner's last coal mine employment occurred after December 31, 1969, and the miner filed a claim after June 30, 1973, one of his employers—designated as the "responsible operator"—pays any benefits to which the miner may be entitled. If no "responsible operator" can be found, or if that operator is in default, the fund will pay the benefits. The fund also pays the administrative costs of a portion of the program.

This system was intended to be self-sustaining, but since its creation in 1978, coal excise tax receipts have never been able to meet trust fund expenditures. As a result, the fund has had to borrow money from the general revenues of the Treasury. Since the trust fund must pay interest on advances from the Treasury at increasing rates, the deficit of the fund is growing. The cumulative deficit of the fund as of October 30, 1981, was approximately $1.5 billion, and the projected deficit for 1995, absent this legislation, would total $9 billion.

OVERSIGHT HEARINGS AND REPORT

Mr. Speaker, the Subcommittee on Oversight of the Committee on Ways and Means conducted two hearings on the fiscal insolvency of the black lung disability trust fund on July 27, 1981, and September 28, 1981. A formal report containing the recommendations of the subcommittee was filed with the full committee, and the legislation which the committee reported is consistent with the recommendations of the Oversight Subcommittee.

PROVISIONS OF THE BILL

H.R. 5159 contains only those provisions of the black lung disability program and the trust fund that are within the jurisdiction of the Committee on Ways and Means. As such, it provides for a temporary doubling of the present coal excise taxes on coal producers, from 50 cents to $1 per ton for underground-mined coal and from 25 cents to 50 cents per ton for surface-mined coal. The cap on these taxes is also doubled, from 2 percent to 4 percent of the sales price of the coal. These tax increases will remain in effect until the fund becomes solvent or until January 1, 1996, whichever occurs first.

The bill also includes provisions which require that certain payments due to or due by the trust fund carry a current market rate of interest. In addition, the bill standardizes and modernizes provisions of the trust fund to conform to the language of other trust funds, and transfers the trust fund provisions to the Internal Revenue Code.

The trust fund's expenditure purposes are expanded to include claims previously denied but subsequently granted due to the retroactive application of the 1977 black lung disability amendments and to exclude certain retroactive lump-sum payments when claims are contested.

Finally, the bill provides that fund moneys will be available to meet obligations incurred under sections 402(i), 422, and 435 of the Black Lung Benefits Act, as such sections are in effect immediately after the enactment of this bill. This provision requires that the expenditure purposes of the fund be conformed to reflect substantive changes relating to eligibility and benefits that may be made by other appropriate committees in the future, before the fund will make payment for any such amended purpose. This provision is to insure that the fund will have sufficient revenue to satisfy obligations arising from amendments made after enactment of this bill.

Mr. Speaker, an important element in the effort to reform the black lung disability program and to restore the trust fund to solvency involves changes in the eligibility standards and benefit provisions. These provisions are within the jurisdiction of the Committee on Education and Labor. Changes to these provisions will be proposed at a later time. However, all parties affected by this legislation have agreed that the Committee on Ways and Means should go forward with those tax and trust fund provisions within its jurisdiction. As reported by the Committee on Ways and Means, the legislation is supported by the administration and a broad coalition of coal producers, mineworkers, insurers, and others affected by the legislation.

This bill represents a compromise among a number of competing interests. As such, we have resisted amendments to this bill because of a concern for jeopardizing the consensus behind this bill. I would hope the Senate will follow our example in this regard to assure speedy passage of this critical legislation.

Thus, I urge my colleagues to vote to suspend the rules and adopt H.R. 5159, the Black Lung Benefits Revenue Act of 1981.

□ 1520

Mr. CONABLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, with reluctance I support H.R. 5159 as a modest forward step in establishing solvency of the black lung disability trust fund. The proposal was developed by a coalition of interested and previously contrary parties, including the coal industry, the insurance industry, the Labor Department, and the executive board of the United Mine Workers.

First, the bill temporarily doubles the manufacturers' excise tax on coal, from $0.25 per ton for surface coal and $0.50 per ton for underground coal to $0.50 and $1, respectively. The tax would not exceed 4 percent of the sales price for a ton of coal, however, and the increase will terminate either on January 1, 1996, or on the first January 1 after this year when there is no balance of repayable advances made to the fund and no unpaid interest thereon.

The increased excise tax on coal is estimated to increase receipts of the trust fund by $193 million in fiscal year 1982, $299 million in 1983, $313 million in 1984, and $327 million in 1985.

The increased excise tax on coal is estimated to increase net tax receipts after accounting for lower income tax receipts as a result of the coal excise tax by $141 million in fiscal year 1982, $218 million in 1983, and so forth.

These figures are set out in the committee report.

A second reason for supporting this measure is that liability for certain claims would be transferred from responsible operators to the fund. Generally, these are the claims which had been denied, or were pending prior to March 1, 1978, and which were re-reviewed and approved as a result of the Black Lung Benefits Reform Act of 1977.

Third, the bill eliminates the requirement that the fund pay retroactive lump sum benefits after eligibility is determined, when the claim is being contested by the responsible operator. The fund will, however, still pay benefits accruing after the initial determination of eligibility is made.

Fourth, the rate of interest paid by responsible operators on repayment to the fund of amounts paid by the fund on claims for which the operator is liable, is increased from 6 percent to the prime rate, determined annually. The rate for calendar year 1982 would be 15 percent. The bill also amends the method for computing interest paid by the fund to the general fund for repayable advances.

Basically, the rate would be equal to the current average market yield on outstanding U.S. obligations with comparable maturity for the calendar month preceding the month in which the advance is made.

Finally, the black lung disability trust fund—and the provisions by which amounts appropriated to the fund are transferred from the general fund—would become part of a new chapter of the Internal Revenue Code and the language would be updated and standardized to conform with the language of the other trust funds.

The provisions in this bill would take effect on January 1, 1982.

Mr. Speaker, this measure will begin the difficult task of salvaging the currently bankrupt fund. It represents a compromise on the part of almost all the interested parties, although it is considerably less than the best of legislative compromises.

I personally am persuaded that it improves our fiscal position with respect to a badly conceived program and that we should not delay this possible improvement in the faint hope of rationalizing further the many inconsistencies, definitions, and abuses which seem to have defied resolution over the life of the black lung program.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 5 minutes to the gentleman from West Virginia (Mr. RAHALL).

Mr. RAHALL. Mr. Speaker, today the Congress considers the Black Lung Benefits Revenue Act of 1981 which is aimed at reducing the large and ever growing deficit of the black lung disability trust fund. I would like to take this opportunity first, to read the following excerpt from an article published by the Journal of Public Health Policy, entitled "Black Lung" for the benefit of my colleagues who have never been in a coal mine.

> At work, coal miners are covered with dust. It's in their hair, their clothes and their skin. It gets between their teeth and they swallow it. They suck so much of it into their lungs that until they die they never stop spitting up coal dust. Some cough so hard they wonder if they have any lungs left. Gradually the miners notice they are getting short of breath when they walk up hills. On the job they must stop work to catch their breath. Finally, just walking across the room at home is an effort.

Many of my colleagues know full well the devastating effect coal dust has on the health and welfare of the brave souls who daily descend deep within the bowls of the Earth to extract coal to power the industrial and utility boilers of this Nation. We also know full well the horrors of mine disasters, a horror deeply implanted in the American public's mind on November 20, 1968, when the Nation watched on television the devastating coal-mine explosion at Farmington, W. Va., where 78 miners were slaughtered. There were countless mine disasters before that, at Farmington, and there have been countless disasters since. Within the first half of this month, for example, 24 coal miners have been killed by three disasters in West Virginia, Kentucky, and Tennessee.

Mine disasters and black lung represent a two-pronged risk faced by coal miners. The only difference between them is that the former brings immediate death, the latter a slow and agonizing death.

Mr. Speaker, I am often disturbed by the insensibility some have toward those who mine coal. The administration appears intent on reducing the number of coal mine inspectors and even the level of federally mandated inspections of the Nation's deep mines. In the same sense, some of my colleagues who do not represent coal regions, and who have no idea of the social impacts of coal mining, have proposed measures to reduce the eligibility for black lung benefits. All this, they say, because of economic considerations.

This is wrong. It is, to say the least, immoral. There comes a time when economic considerations no longer apply, when the value of human life must take precedent.

We are at such a time now.

While the legislation pending before us today seeks to bring solvency to the black lung disability trust fund, we must be very careful that other nontax-related provisions which may be added in the near future are not done at the expense of the health of the human beings who mine this Nation's coal supplies.

Back in 1952, Alabama was the first State to provide compensation for victims of black lung. However, it was not until Congress enacted the Federal Coal Mine Health and Safety Act of 1969 did Congress, for the first time, mandate that an occupational disease occurring in a major industry be eradicated. This landmark law sought to decrease the levels of respirable dust in the coal mine along with setting up a Federal black lung benefits program.

The 1969 act was then amended in 1972 and again in 1978 with the passage of the Black Lung Benefits Reform Act. These amending statutes sought to clarify and fine-tune eligibility for black lung benefits and the manner in which they were to be funded. The 1978 law specifically stipulated that coal mine operators must assume a greater share of the cost of financing the black lung benefits program.

Today, we again consider legislation which will place a heavier burden on coal mine operators. The Black Lung Benefits Revenue Act of 1981 would temporarily double the present coal excise tax paid by every operator on a per-ton basis into the trust fund. This increase would remain in effect until the fund reaches solvency or until January 1, 1996. The bill also contains provisions which require these payments carry a current market rate of interest, and it authorizes the fund to assume liability for previously denied

claims which were granted due to the retroactive application of the 1977 amendments.

This bill is supported by coal producers, coal miners, and the administration. It is commendable legislation and I congratulate the distinguished chairman of the Committee on Ways and Means for bringing it to the floor in such an expedited fashion. I fully intend to support this bill and urge my colleagues to do likewise.

In conclusion, I might add that black lung statistics are alarming. It is estimated that some 138,000 persons are receiving black lung benefits. However, the important thing to remember is that each one of these people is a human being whose lungs have been diseased, and at some point, disabled. This is the penalty they pay for mining coal. It is a risk they take for contributing to this Nation's energy security. Yet, it is a dreadful price to pay for this contribution.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. RAHALL. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank the gentleman for yielding.

I am very happy to hear my colleague speak as he has spoken of the suffering of those with black lung, and I would like to bring to the attention of this House another equally terrible disease, white lung, which is caused by working with asbestos. I have today introduced a bill which will bring help to those who suffer from this disease and I trust that my colleagues will look at it kindly.

□ 1530

Mr. CONABLE. Mr. Speaker, I yield 2 minutes to a valued member of the committee, the gentleman from Tennessee (Mr. DUNCAN).

Mr. DUNCAN. Mr. Speaker, I rise in support of the Black Lung Benefits Revenue Act of 1981, H.R. 5159. This bill will take immediate action to correct the growing deficit of the black lung disability trust fund. The bill will accomplish this through a temporary increase in the coal excise tax and adjustments in the trust fund to prevent further revenue loss.

The financial status of the black lung disability trust fund requires immediate action to head off an increasing deficit. The trust fund has been operating in the red since it was set up in 1978. At the end of fiscal year 1981, the cumulative deficit stood at $1.5 billion. If the present situation continues, a deficit of $9 billion is projected for 1995.

To correct this situation, this bill doubles the coal excise tax, and assumes responsibility for certain cases by the trust fund. This action will increase the revenues of the trust fund and reduce the drain on the fund which results from advances out of general revenue which must be repaid with interest.

I believe this bill provides an adequate and just solution to the fund's fiscal problems. The miners who suffer from black lung disease will continue to be protected and cared for in the future. The bill supports the intention of Congress for the coal industry to provide the revenue for this fund.

The Labor Department issued a statement today which states the bill represents a major element of the Reagan administration's comprehensive black lung reform proposal. This legislation has also received the support of the business and labor spokesmen of the coal industry. The National Coal Association and the United Mine Workers' Union have both endorsed this action.

In light of the consensus support for this legislation and the need for immediate action to prevent a greater deficit in the trust fund, I believe this bill should be passed by the House. We must continue to protect coal miners and provide benefits to those suffering from black lung disease. This bill insures that this protection will continue in the future. I urge my colleagues to support H.R. 5159.

Mr. CONABLE. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Speaker, this bill has been brought to the floor of the House in haste. The bill was introduced on the 10th of December. It was reported yesterday by the committee and only a few moments ago was the report of the committee made available here on the floor.

Let me read to you a description of the bill as contained in the Daily Labor Report published by the Bureau of National Affairs:

> The measure would raise the tax on coal from 50 cents per ton of underground-mined coal to $1 per ton and from 25 cents per ton of surface coal to 50 cents.
>
> Essentially, the draft bill separates revenue provisions from proposals to scale back black lung benefits. A committee aide explained that the strategy is to get the revenue portion of the plan adopted by the House and sent to the Senate, where the Finance Committee is expected to concur. The Senate Labor and Human Resources Committee then is expected to offer benefit reduction amendments to the measure.
>
> After clearing it on the Senate floor, the measure would be returned to the House. The House panel with jurisdiction over black lung benefits—the Education and Labor Committee—is more willing to concede to benefit cuts approved by the Senate than to initiate its own reductions, the aid said.

Mr. Speaker, in spite of the fact that this administration and the representatives of the coalition supporting the bill before us gave me repeated assurances over the past year that this kind of procedure would not be utilized, but rather the bill would go through our committee, would come on the floor under a rule, subject to full debate, subject to amendment, we do now find this procedure designed to deny to the House the opportunity for full debate. We will have one vote up or down here without amendment. We will have one vote when the bill comes back in a motion to concur with the Senate amendments, and that is a rotten way to legislate.

Mr. Speaker, under the bill certain claims which have been assigned individual coal operators would be transferred to the black lung disability trust fund. In general these are claims which had been denied prior to March 1, 1978, but which have been rereviewed and approved under the liberalized eligibility criteria and evidentiary standards of the Black Lung Reform Act of 1977.

The committee estimates the cost of transferring the obligation of these claims from coal companies and insurance companies to the trust fund will be one and a half billion dollars.

Now, the gentleman from New York has already told us that the increased excise tax over the next several years will be x number of dollars each year. In the report I have that for the next 5 years. That totals $1.48 billion, or a little bit less than needed to make up for the additional obligations of the trust fund caused by the transfer; but what is even more interesting is the net revenue effect, because income taxes are reduced by the payment of these excise taxes and in the next 5 years the net revenue effect is $1.08 billion. That means we have a one and a half billion dollar additional obligation and we are going to collect $1.08 billion, or almost a half billion dollar net loss in revenue over the next 5 years.

Now, we have been told everybody supports this, insurance companies, coal companies, the United Mineworkers, the administration, the only one I cannot understand is the administration. The insurance companies love because they are going to be reimbursed for claims they have already paid when we transfer the obligation of these claims to the trust fund.

The coal companies are losing the obligation and will be reimbursed for claims they have already been paid. Of course, they like it.

These 10,200 claims being transferred are now subject to controversion by the insurance companies and coal companies and some coal companies have had a 70-percent rate of cases being overturned on appeals to the courts.

Of course, the United Mine Workers love this bill because the trust fund by law is not allowed to controvert claims, so these claims all of a sudden become claims that will be allowed with

nobody allowed to defend against them; so of course, the United Mine Workers like this.

Mr. Speaker, I have said often and I think it is quite true of this bill that when insurance companies, coal companies, and mineworkers get together, the consumers and the taxpayers better watch out. In the next 5 years the taxpayers have a net one-half billion dollar loss of revenue, and that hurts your taxpayers.

What about the consumers? The Edison Electric Institute in the Senate yesterday testified that these excise taxes actually will be paid in the main by electric utilities that buy the coal. They can automatically pass this on in their rates without even going to rate commissions as a fuel adjustment allowance, so it is your electric consumers who are going to be picking up the bill and the taxpayers are going to be picking up the bill and coal companies and insurance companies will have more money in their pockets. This is not the way to legislate.

I agree, we should make the trust fund solvent. I think it should be done in the normal legislative fashion instead of rushing this through. It will be back tomorrow. They want to have the bill on the President's desk before we adjourn. Let us wait until next year and use the regular legislative process.

Please vote "no."

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 5 minutes to the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Speaker, we can always say one thing about the gentleman from Illinois (Mr. ERLENBORN). He always runs true to form. He was against this legislation from day one, even before we marked it up in 1969.

Mr. ERLENBORN. Mr. Speaker, will the gentleman yield?

Mr. PERKINS. I would like to compliment him on his perseverance. He has gone all the way ever since day one, 1969.

Mr. ERLENBORN. Mr. Speaker, will the gentleman yield?

Mr. PERKINS. Yes, I yield.

□ 1540

Mr. ERLENBORN. Mr. Speaker, just to correct the record, I supported and voted for the Coal Mine Health and Safety Act as it passed the House in 1969. It was only after it was grievously changed in the conference that I voted against it.

I thank the gentleman for letting me correct that record.

Mr. PERKINS. Mr. Speaker, let me say to the gentleman, when we undertook to tie the black lung legislation to the mine safety legislation in 1969, I should have stated, that was the time that he so vigorously opposed that strategy.

But be that as it may, I do not think this House should forget that one time we had more than 800,000 coal miners mining coal which furnished fuel for two World Wars, and I want to say that the consumers benefited from that cheap fuel.

No matter who testified on the other side yesterday, the gentleman representing the utilities was way out of bounds when he tries to place responsibility for increased coal cost to the consumers on the coal miners of this country.

This law should have been enacted 20 or 25 years ago. In fact, the Congress was derelict for not enacting the legislation sooner than we did.

Mr. SIMON. Mr. Speaker, will the gentleman yield?

Mr. PERKINS. I yield to my friend, the gentleman from Illinois.

Mr. SIMON. Mr. Speaker, I want to associate myself with the remarks of the gentleman from Kentucky.

If I could just respond very briefly to my colleague from Illinois, for whom I have great respect, while I differ with some of my colleague's conclusions, I differ strongly, if he is correct as to what will happen when this goes over to the Senate and comes back in the conference report, I may join the gentleman on the floor in opposition to the bill.

But right now what this does is to put the trust fund in decent shape, and I think it is a bill that ought to be supported by all Members of the House.

Mr. PERKINS. And that is all we are doing here. And we reserve the right to see what is in this bill when it comes back before the House.

Mr. Speaker, I urge my colleagues to join me today in support of H.R. 5159, a bill which will restore solvency to the black lung trust fund.

It may not be necessary for me to remind my colleagues, as I have in the past, of the hazards, indeed the peril, faced by coal miners in their work throughout the years in producing energy for the Nation. Only in the past several days have we again been reminded of the perils of this most hazardous occupation by the tragedies at Topmost, Ky., Bergoo, W. Va., and near Palmer, Tenn., which claimed the lives of 24 miners underground.

Tragic as these highly publicized events are, there is an equally tragic peril which claims the lives of thousands of miners each year. Coal miners disease—black lung—pneumoconiosis—whatever name is applied to it, the disease is progressive and irreversible. Sufferers have marked lung impairment and sharply restricts a person's physical capabilities. It often induces death by heart failure and may contribute to other causes of death.

Contrary to what some opponents of the program may try to lead you to believe, all miners who apply for benefits and are impaired as a consequence of the inhalation of coal dust do not have their claims approved. In fact, only a small percentage do. The approval rate this year for claims by the Department of Labor through November 20, 1981, was only approximately 14 percent—372 cases being approved, 2,333 being denied. To date, under part C administered by the Department of Labor, there have only been 77,841 approved claims out of 28,160 decisions. There were still 4,289 undecided claims as of November 29, 1981. Overall, only about a third of these claims have been approved.

Mr. Speaker, the excise tax on coal, which is the source of revenue for paying claims through the black lung trust fund, is insufficient to pay these benefits. Accumulated deficiencies which have been made up by borrowings from the Treasury, amount to almost $1.5 billion. These will reach $9 billion by 1995 unless this legislation is enacted into law.

If the legislation is enacted, there will be no need after 1985 for Treasury advances. Moreover, if this legislation is enacted into law, by 1995 the trust fund will be able to make repayment to the Treasury of accumulated principal and interest.

In mentioning interest, I might stress that one of the major reasons for a deficiency in the trust fund is the extremely high level of interest charges, which is not novel to this program. Also major aspects of the deficit are the insufficiency of the tax level and the requirement in the 1977 law for a re-review of approximately 118,000 claims which had previously been denied by which the new law required a review under the new eligibility standards.

The bill before us would double the tax, making the tax 50 cents a ton for surface coal and $1 a ton for underground coal. Under existing law, the tax could not exceed 2 percent of the sales price. Under the amendment proposed by this bill, the tax could not exceed 4 percent of the sales price.

This is responsible legislation and I urge my colleagues to join me in giving it wholehearted support.

The SPEAKER pro tempore. The time of the gentleman has expired.

(On request of Mr. ROSTENKOWSKI and by unanimous consent, Mr. PERKINS was allowed to proceed for 2 additional minutes.)

Mr. PERKINS. Mr. Speaker, let me say in conclusion that this act has helped deserving and in many cases desperate people. I would hope that all the Members would vote for this bill which will put benefit payments on a solid financial basis.

Many of these miners worked in the 1920's and in the 1930's and in the 1940's, more than 50 years in the coal mines of this country. And today we want to keep this fund solvent. That is all we are asking.

It is true enough that there were more claimants than any of us anticipated when we first enacted the legislation. There were more coal miners than we ever anticipated when we enacted the legislation. And we have given benefits to the coal miners throughout the country, that were and are suffering from this disease. But for this assistance throughout the 1970's, I do not know how those people would have lived. Many of them, most of them, would have been on relief, to say the least.

This legislation has been well considered. It is nothing new. And if we establish a trust fund there is only one way to pay for it, and that is from coal.

Let all of us—I would hope that everyone, every Member in this House would—support this legislation, Mr. Speaker, and then we can see what the Senate puts on this bill, and in conference I am very sure the House conferees are going to stand together. The chairman of the House Committee on Ways and Means, the gentleman from Illinois (Mr. ROSTENKOWSKI) and I have already discussed a conference, and we want to be fair to everybody concerned. This is something that I think this legislation, this increased tax, that there should not be any votes in this Chamber against.

The SPEAKER pro tempore. The Chair will state that the gentleman from Illinois (Mr. ROSTENKOWSKI) has 3 minutes remaining, and the gentleman from New York (Mr. CONABLE) has 10 minutes remaining.

Mr. CONABLE. Mr. Speaker, I now yield 3 minutes to the gentleman from Kentucky (Mr. ROGERS).

Mr. ROGERS. Mr. Speaker, I rise today in strong support of the bill H.R. 5159, the Black Lung Benefits Revenue Act of 1981. And I would like to commend my distinguished colleagues from Kentucky, New York, and Illinois for their fine leadership in bringing this bill to the floor.

As my colleagues have pointed out today, the black lung trust fund is in a serious financial condition. It is paying out more than it is taking in.

And prompt action is needed to restore the trust fund to solvency.

Next year, the fund will be $300 million short. It will have to borrow this money from the U.S. Treasury in order to go on paying out black lung benefits. And this will mean higher financing costs in the long run and increased pressure to cut back on benefits, even for those miners and ex-miners who are truly disabled.

And both of these alternatives are totally unacceptable.

Mr. Speaker, I suspect that many of my colleagues have no idea of why the black lung benefits are so vitally important. It would be difficult for a Representative from Massachusetts, Iowa or Oregon, for example, to understand the dire necessity of a black lung beneficiary. So I would like to tell my colleagues some of the reasons why this program is absolutely essential.

Let me paint a picture for you. I want you to imagine a young man who goes down into the mines every day. He steps out of the fresh, crisp air and goes into the damp mine with its dust-laden air.

He can do everything right—he can check for problems with the roof and he can keep an eye out for faulty electrical systems. He knows that mining is risky, especially after the horrible mining accidents over the last week. But no matter what he does, he can not help breathing the dusty air.

After a number of years, he begins to notice a few problems. He has some difficulty walking up a little hill—he is just a little short of breath.

Then a few years later, he starts that violent and painful cough. He starts dreading going to sleep at night since he is terrified of suffocating in his sleep.

And in your mind's eye, I want you to think of what this miner's wife and children are going through when they hear their husband's and father's racking cough.

Mr. Speaker, it is not a pretty picture. But it is a picture we have to face and which we must work to improve.

These miners are fighting our country's energy war. Every time one of your constituents in Florida switches on a light, every time one of your constituents in New York turns up the heat in his apartment, one of the miners in Harlan, Middlesboro, or Hyden is paying the cost. Those coal miners are providing the energy needs of constituents in nearly every district throughout the country.

And we have an obligation to take care of those miners who become disabled as a result of fighting our country's energy war.

Mr. Speaker, the bill before us today is one step in the right direction. By increasing the tonnage tax on coal, it will help to get rid of the sky-rocketing deficit in the black lung trust fund. A $9 billion deficit has been projected for 1995, but as a result of this bill we should be able to entirely eliminate this deficit.

It is high time we got this trust fund into good sound financial shape so we can be sure that it will continue to be capable of paying out benefits for those miners who have been disabled by black lung.

I urge my colleagues to join with me in supporting this bill.

□ 1550

Mr. CONABLE. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania (Mr. MCDADE).

Mr. MCDADE. Mr. Speaker, my colleagues, I rise in strong support of this legislation. I want to commend the administration for bringing us this bill and bringing it to us in a way that represents such an effort toward consensus between so many diverse parties reacting with it. I want to associate my remarks with those of my friend from Kentucky who just preceded me in the well.

Those of us who have seen first hand the ravages of black lung disease can speak with some authority to the Members of the House who have not seen those who suffer from this dread disease. My colleagues on the Ways and Means Committee have taken the first vital step in restoring to solvency a program that has projected before it a deficit that puts at jeopardy future claims under this act. They are to be commended for taking this necessary step to restore the balance to this program.

I hope my colleagues will support the recommendations of the Labor Department, of the administration, and join together with the broad coalition of mine workers and mine operators who support this bill, and keep in mind that those who suffered from this horrible affliction called black lung because they had the courage and the guts to go underground and mine the Nation's energy when it was so dearly needed, and it has never been more dearly needed than today when we try to break the shackles of the OPEC cartel by using our own resources at home, and as everyone knows, our most abundant resources at home is a fossil fuel called coal.

To those who mine it and must endure this occupational risk, we have a national, I believe, commitment to recognize the continuation of that risk and to take care of those who contract this dread disease, and put some kind of a floor under the individual miner who is afflicted and his widow and his dependents.

Mr. Speaker, I hope this bill is passed with a resounding vote.

Mr. CONABLE. Mr. Speaker, I now yield 2 minutes to the gentleman from Virginia (Mr. WAMPLER).

Mr. WAMPLER. Mr. Speaker, I rise in strong support of H.R. 5159 and request permission to revise and extend my remarks.

As a supporter of the black lung program since its inception, I have grown increasingly concerned with the ability of the financing mechanism that was established to meet the obligations due by law to our disabled coal miners.

The black lung beneficiaries deserve the security of a healthy and stable trust fund for their benefits, and the temporary user taxes imposed by this bill will help to assure that the original intent of the black lung disability trust fund is met. When this fund was established, it was felt that the level

of the tonnage charge on coal imposed at that time would be sufficient to cover the costs of the program. However, at the same time the program was substantially expanded, and huge deficits are now projected for the fund if action is not taken.

Other language of the bill establishing the average prime rate as the annual interest rate on deficiency payments owed by mine operators to the trust fund is also necessary. Especially in these budget-conscious times, advances to the fund from the Treasury financed by borrowing on the commercial market and being repaid at lower interest rates cannot be justified.

An injustice to the coal operators is also corrected in this measure, by allowing the trust fund to assume liability for claims denied prior to, but allowed subsequent to, the enactment of Public Law 95-488. With approval of this law, operators were suddenly made retroactively responsible for claims approved as a result of the 1977 black lung amendments. Problems arose, and still exist, with the insurance companies and their obligations to the coal operators they insure as a result of this law. I urge my colleagues to approve H.R. 5159, the Black Lung Benefits Revenue Act of 1981. Most importantly, this measure will help to assure the solvency of the black lung disability trust fund, and keep the promise made by the Congress to the coal miners of this Nation.

The SPEAKER pro tempore (Mr. DE LA GARZA). The gentleman from New York (Mr. CONABLE) has 2 minutes remaining.

Mr. CONABLE. Mr. Speaker, I yield those 2 minutes to the gentleman from West Virginia (Mr. BENEDICT).

Mr. BENEDICT. Mr. Speaker, the black lung disability trust fund which makes payments to miners disabled by black lung disease is financed from a coal tax on underground and surface-mined coal. Benefit payments from this fund currently exceed revenues and the fund has been forced to borrow the difference from the U.S. Treasury.

When the Omnibus Reconciliation Act was considered by the House, provisions were included to help alleviate this problem. Unfortunately, the final version of the bill did not contain the needed fee increases for the coal tax. My colleagues now have another opportunity to vote their support for this provision, and I urge them to do so.

The Reagan administration has proposed revisions which will preserve the program—revisions which have been worked out with careful consideration of all interests involved and which have the support of coal operators, insurance companies, and the United Mine Workers. These changes are included in the bill before us now. This bill also addresses the problem of excessive payments, fraud, and abuse which have been an unfortunate part of the black lung program.

If these changes are enacted, the trust fund would be solvent by 1995. Our current economic constraints and the needs of our miners demand the action of this body. I urge my colleagues to support the bill.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. MURPHY).

Mr. MURPHY. I rise in support of H.R. 5159, the Black Lung Benefits Review Act of 1981, which is now being considered and is designed to bring solvency to the black lung disability trust fund.

No one wants to see the cost of our energy or our natural resources related to energy increase; however, this Congress has for many years now, determined that there are aspects in the mining of coal that demand the focus of our attention. Stream clearance, mine reclamation, clean air, and the health of the men and women who are mining the coal must be considered. In this instance, Congress has decided for many years that those miners who go far beneath the surface of the Earth in damp, dark, dusty conditions to mine our Nation's chief energy resource—coal—are subjected to a hazard known as miner's anthrocylicosis, commonly referred to as black lung. I have visited the homes of miners afflicted with black lung. They have visited my offices. I have been in their company at meetings and at their workplaces and believe me, my colleagues, it is a most debilitating disease; one that progresses as they continue to work in the mines and progresses, as they continue to age, to the point where when they are in their midfifties to sixties, many miners are no longer able to perform the physical functions that are normal in everyone's daily life.

This bill is consistent with the administration's proposal to amend the black lung program. The purpose of the administration's proposal is to bring solvency to the trust fund and to make certain adjustments to eligibility standards and benefits for future claims and claimants and to transfer to the fund the liability of responsible operators in certain cases affected retroactively by the 1977 black lung amendments.

The administration's proposal was developed by the Department of Labor in consultation with the major parties directly affected by the black lung program, including representatives of the mine workers, the coal industry, and insurers. While the amendment may not reflect the idea for any of the particular interest groups, I believe that the package as a whole represents a fair compromise and is a necessary and important step forward for the black lung program. We also recognize that the package is responsive to the compelling public interest in resolving immediately the major concerns about the existing program.

The black lung disability trust fund pays benefits to coal miners disabled by black lung. The benefits are financed by a tax on coal; however, in recent years benefit payments are currently exceeding revenues to the fund. The fund has had to borrow from the U.S. Treasury to meet the payments promised by the prior action of this Congress. The bill will only temporarily increase the tax on coal sold by producers from 50 cents per ton to $1 per ton on underground coal and from 25 cents per ton to 50 cents per ton on surface mined coal. It also increases the overall limit on the tax from 2 percent of the sales price of the coal to a maximum of 4 percent. The temporary increase would remain in effect until January 1, of the first year after which the trust fund becomes solvent and we expect that date to be sometime in the late eighties, or the imposition will last no longer than January 1, 1996, whichever date occurs first. The bill also places the black lung disability trust fund within the Internal Revenue Code and standardizes the trust fund provisions to conform to the provisions of the other trust funds. The bill does permit the fund to assume liability for claims which had been denied before March 1, 1978, and which were subsequently allowed under the 1977 black lung disability amendments. The bill eliminates the provision in current law which requires the fund to pay retroactive benefits in the event of operator nonpayment. This is a compromise agreed to by representatives of the mine workers even though for the past several years, this Congress has recognized the equities of making these retroactive payments.

The gentleman from Illinois pointed out the burdens by adding to the cost of coal and we are all aware that we do not want to add additional costs to our Nation's major energy resource; however, in many States of this country they are already adding costs onto each ton of coal mined in that State and these funds are not used in direct relationship to the mining industry. They are instead used for general tax purposes in many of those States. We are by congressional action already assessing a tonnage on coal for the reclamation of our former mined areas. So it is not unusual for us, in this instance, to have the cost of coal pay for the human losses suffered in its mining. I am, this date, requesting the chairman of the committee involved to take into consideration in this measure, when it reaches the conference committee the method and timing of

payments of this tax by the coal mine operators.

It is my understanding that currently an operator has two tax liability periods each month—from the 1st to the 15th and from the 16th to the end of the month. The operator has only 9 days from the end of each liability period to make his report and payments on the tax to the Federal Government. If he is late a penalty is immediately assessed. It would seem to me to be more reasonable to suggest that the method of payment be made less cumbersome. Instead of having two reporting periods each month I would suggest that payments be made once each month and add the reporting period times together for a total of 18 days allowing payment to be made on/or before the 18th or the 20th day of the following month. It would certainly eliminate a great deal of paperwork on behalf of the coal operators, postage bookwork, and so forth. It would also allow the coal operators to receive payment from the shipments of their coal at approximately the same time they must report and pay to the Federal Government a portion of those proceeds.

In short, I believe that this measure can bring about equity to a very essential program that we for several years now have recognized the necessity of having. Thank you.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. BAILEY).

Mr. BAILEY of Pennsylvania. Mr. Speaker, I rise in support of the legislation. I think it reflects a hard job extremely well done.

Mr. ROSTENKOWSKI. Mr. Speaker, at this time I would like to extend my gratitude to the gentleman from Kentucky (Mr. PERKINS) for the cooperative effort with which we brought this bill to the floor.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 5159.

The question was taken.

Mr. ERLENBORN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

Mr. ERLENBORN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

Under the rule, the point of order of no quorum is withdrawn.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills and a concurrent resolution of the House of the following titles:

H.R. 4431. An act to provide for the designation of the E. Michael Roll Post Office;

H.R. 4910. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act and the charter of the District of Columbia with respect to the provisions allowing the District of Columbia to issue general obligation bonds and notes and revenue bonds, notes, and other obligations; and

H. Con. Res. 215. Concurrent resolution expressing the sense of the Congress with respect to the imprisonment and treatment by the Govenment of the Soviet Union of Alexander Paritsky and his family.

The message also announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 1797. An act to direct the Secretary of the department in which the United States Coast Guard is operating to cause the vessel *Capt Tom* to be documented as a vessel of the United States so as to be entitled to engage in the coastwise trade.

The message also announced that the Senate agrees to the amendments of the House to the bill of the Senate of the following title:

S. 1551. An act to amend title 5, United States Code, to extend the period within which physicians comparability contracts may be entered into, and for other purposes.

The message also announced that the Senate disagrees to the amendments of the House to a bill (S. 1503) entitled "An act to authorize the President to allocate supplies of crude oil, residual fuel oil, and refined petroleum products during a severe petroleum supply shortage, and for other purposes," agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MCCLURE, Mr. WEICKER, Mr. DOMENICI, Mr. WALLOP, Mr. WARNER, Mr. JACKSON, Mr. JOHNSTON, Mr. FORD, and Mr. METZENBAUM to be the conferees on the part of the Senate.

The message also announced that the Senate hereby disapproves the proposed deferral of budget authority (deferral numbered D82-193) for the Office of Justice Assistance, Research, and Statistics of the Department of Justice, as set forth in the special message transmitted by the President to the Congress on October 29, 1981, under section 1013 of the Impoundment Control Act of 1974.

The message also announced that the Senate had passed bills and Joint Resolutions of the following titles, in which the concurrence of the House is requested:

S. 1131. An act to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes;

S. 1808. A bill to authorize an Under Secretary of Commerce for Economic Affairs;

S.J. Res. 118. Joint resolution to authorize and request the President to designate the month of January 1982 as "National Cerebral Palsy Month"; and

S.J. Res. 121. Joint resolution to provide for the designation of the year 1982 as the "Bicentennial Year of the American Bald Eagle" and the designation of June 20, 1982, as "National Bald Eagle Day."

MISCELLANEOUS REVENUE ACT OF 1981

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4961) to make miscellaneous changes in the tax laws, as amended.

The Clerk read as follows:

H.R. 4961

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—TAX PROVISIONS

SECTION 101. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This title may be cited as the "Miscellaneous Revenue Act of 1981".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 102. AMENDMENTS TO SECTION 280A.

(a) RENTAL TO FAMILY MEMBERS AND SHARED EQUITY AGREEMENTS PERMITTED.—

(1) IN GENERAL.—Subsection (d) of section 280A (relating to disallowance of certain expenses in connection with business use of home, rental of vacation homes, etc.) is amended by redesignating paragraph (3) as paragraph (4) and by inserting after paragraph (2) the following new paragraph:

"(3) RENTAL TO FAMILY MEMBERS, ETC., FOR USE AS PRINCIPAL RESIDENCE.—

"(A) IN GENERAL.—A taxpayer shall not be treated as using a dwelling unit for personal purposes by reason of a rental arrangement for any period if for such period such dwelling unit is rented, at a fair rental, to any person for use as such person's principal residence.

"(B) SPECIAL RULES FOR RENTAL TO PERSON HAVING INTEREST IN UNIT.—

"(i) RENTAL MUST BE PURSUANT TO SHARED EQUITY FINANCING AGREEMENT.—Subparagraph (A) shall apply to a rental to a person who has an interest in the dwelling unit only if such rental is pursuant to a shared equity financing agreement.

"(ii) DETERMINATION OF FAIR RENTAL.—In the case of a rental pursuant to a shared equity financing agreement, fair rental shall be determined as of the time the agreement is entered into and by taking into account the occupant's qualified ownership interest.

"(C) SHARED EQUITY FINANCING AGREEMENT.—For purposes of this paragraph, the term 'shared equity financing agreement' means an agreement under which—

"(i) 2 or more persons acquire qualified ownership interests in a dwelling unit, and

"(ii) the person (or persons) holding one of such interests—

"(I) is entitled to occupy the dwelling unit for use as a principal residence, and

"(II) is required to pay rent to 1 or more other persons holding qualified ownership interests in the dwelling unit.

"(D) QUALIFIED OWNERSHIP INTEREST.—For purposes of this paragraph, the term 'qualified ownership interest' means an undivided interest for more than 50 years in the entire dwelling unit and appurtenant land being acquired in the transaction to which the shared equity financing agreement relates."

(2) DEFINITION OF QUALIFIED RENTAL PERIOD.—Subparagraph (B) of section 280A(d)(4), as redesignated by paragraph (1), is amended by striking out "to a person other than a member of the family (as defined in section 267(c)(4)) of the taxpayer".

(b) TREATMENT OF BUSINESSMEN WHILE AWAY FROM HOME IN PURSUIT OF TRADE OR BUSINESS.—Subsection (f) of section 280A is amended by adding at the end thereof the following new paragraph:

"(4) COORDINATION WITH SECTION 162(a)(2), ETC.—Nothing in this section shall be construed to disallow any deduction allowable under section 162(a)(2) (or any deduction which meets the tests of section 162(a)(2) but is allowable under another provision of this title) by reason of the taxpayer's being away from home in the pursuit of a trade or business (other than the trade or business of renting dwelling units)."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1981.

SEC. 103. AWARDING OF REASONABLE LITIGATION COSTS TO TAXPAYER WHERE TAXPAYER PREVAILS AND UNITED STATES POSITION WAS UNREASONABLE.

(a) IN GENERAL.—Subchapter B of Chapter 76 (relating to proceedings by taxpayers and third parties) is amended by redesignating section 7430 as section 7431 and by inserting after section 7429 the following new section:

"SEC. 7430. AWARDING OF REASONABLE LITIGATION COSTS WHERE TAXPAYER PREVAILS AND UNITED STATES POSITION WAS UNREASONABLE.

"(a) IN GENERAL.—In the case of any civil proceeding which is—

"(1) brought by or against the United States in connection with the determination, collection, or refund of any tax, interest, or penalty under this title, and

"(2) brought in a court of the United States (including the Tax Court),

if the position of the United States in such proceeding was unreasonable, the prevailing party may be awarded a judgment for reasonable litigation costs incurred in such proceeding.

"(b) LIMITATIONS.—

"(1) AWARD MAY NOT EXCEED $50,000.—The amount of reasonable litigation costs which may be awarded under subsection (a) with respect to any proceeding shall not exceed $50,000.

"(2) REQUIREMENT THAT ADMINISTRATIVE REMEDIES BE EXHAUSTED.—A judgment for reasonable litigation costs shall not be awarded under subsection (a) unless the court determines that the prevailing party has exhausted the administrative remedies available to such party within the Internal Revenue Service.

"(3) ONLY COSTS ALLOCABLE TO THE UNITED STATES.—An award under subsection (a) shall be made only for reasonable litigation costs which are allocable to the United States and not to any other party to the proceeding.

"(4) EXCLUSION OF DECLARATORY JUDGMENT PROCEEDINGS.—

"(A) IN GENERAL.—No award for reasonable litigation costs may be made under subsection (a) with respect to any declaratory judgment proceeding.

"(B) EXCEPTION FOR SECTION 501(c)(3) DETERMINATION REVOCATION PROCEEDINGS.—Subparagraph (A) shall not apply to any proceeding which involves the revocation of a determination that the organization is described in section 501(c)(3).

"(c) DEFINITIONS.—For purposes of this section—

"(1) REASONABLE LITIGATION COSTS.—

"(A) IN GENERAL.—The term 'reasonable litigation costs' includes—

"(i) reasonable court costs,

"(ii) the reasonable expenses of expert witnesses in connection with the civil proceeding,

"(iii) the reasonable cost of any study, analysis, engineering report, test, or project which if found by the court to be necessary for the preparation of the party's case, and

"(iv) reasonable fees paid or incurred for the services of attorneys in connection with the civil proceeding.

"(B) PERSONS AUTHORIZED TO PRACTICE BEFORE TAX COURT.—In the case of any proceeding in the Tax Court, fees for the services of an individual (whether or not an attorney) who is authorized to practice before the Tax Court shall be treated as fees for the services of an attorney.

"(2) PREVAILING PARTY.—

"(A) IN GENERAL.—The term 'prevailing party' means any party to any proceeding described in subsection (a) (other than the United States or any creditor of the taxpayer involved) which—

"(i) has substantially prevailed with respect to the amount in controversy, or

"(ii) has substantially prevailed with respect to the most significant issue or set of issues presented.

"(B) SPECIAL RULE FOR SECTION 501(c)(3) ORGANIZATIONS.—In any proceeding where—

"(i) the most significant issue (or set of issues) presented is the deductibility under section 170, 642(c), 2055, 2106(a)(2), or 2522 of a transfer to or for the use of an organization described in section 501(c)(3) and exempt from tax under section 501(a), and

"(ii) a party to such proceeding has substantially prevailed with respect to such issue (or set of issues),

such organization may also be treated as a prevailing party.

"(3) DETERMINATIONS AS TO UNREASONABLENESS AND AS TO PREVAILING PARTY.—Any determination under subsection (a) as to whether the position of the United States in the proceeding was unreasonable, and any determination under subparagraph (2) as to whether a person is a prevailing party, shall be made—

"(A) by the court, or

"(B) by agreement of the parties.

"(4) CIVIL PROCEEDING INCLUDES CIVIL ACTION.—The term 'civil proceeding' includes a civil action.

"(d) PROCEDURE ON APPEAL.—An order granting or denying an award for reasonable litigation costs under subsection (a), in whole or in part, shall be incorporated as a part of the decision or judgement in the case.

"(e) COORDINATION WITH OTHER PROVISIONS OF LAW.—Section 2412 of title 28, United States Code, shall not apply to any costs, fees, and other expenses in connection with any proceeding described in paragraphs (1) and (2) of subsection (a) (determined without regard to subsection (b)). Nothing in the preceding sentence shall prevent the awarding, under subsection (a) of section 2412 of title 28, of costs enumerated in section 1920 of title 28 (as in effect on October 1, 1981).

"(f) TERMINATION.—This section (other than subsection (e)) shall not apply to any proceeding commenced after September 30, 1984."

(b) PENALTY FOR USING TAX COURT PROCEEDINGS FOR DELAY; PENALTY FOR FRIVOLOUS OR GROUNDLESS PROCEEDING.—The first sentence of section 6673 (relating to damages assessible by instituting proceedings before the Tax Court merely for delay) is amended to read as follows: "Whenever it appears to the Tax Court that proceedings before it have been instituted or maintained by the taxpayer primarily for delay or that the taxpayer's position in such proceedings is frivilous or groundless, damages in an amount not in excess of $5,000 shall be awarded to the United States by the Tax Court in its decision."

(c) CONFORMING AMENDMENTS.—

(1) The table of sections for subchapter B of chapter 76 is amended by striking out the item relating to section 7430 and inserting the following new items:

"Sec. 7430. Awarding of reasonable litigation costs where taxpayer prevails and United States position was unreasonable.

"Sec. 7431. Cross references."

(2)(A) The section heading of section 6673 is amended by striking out "MERELY FOR DELAY." and inserting in lieu thereof "PRIMARILY FOR DELAY, ETC."

(B) The table of sections for subchapter B of chapter 68 is amended by striking out "Merely for delay." in the item relating to section 6673 and inserting in lieu thereof "primarily for delay, etc."

(d) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in this subsection, the amendments made by this section shall apply—

(A) to any action or proceeding (not in the Tax Court) which is pending on October 1, 1981, or commenced on or after such date, and

(B) to any action or proceeding in the Tax Court commenced after December 31, 1982.

Such amendments shall not apply to any costs, fees, or other expenses awarded before the date of the enactment of this Act.

(2) PENALTY.—The amendments made by subsections (b) and (c)(2) shall apply to any action or proceeding in the Tax Court commenced after December 31, 1981.

SEC. 104. LIMITATION ON ACCELERATION OF ACCRUAL OF TAXES NOT TO APPLY TO CERTAIN TAXPAYERS.

(a) SECTION 461(d)(1) NOT TO APPLY TO CERTAIN TAXPAYERS.—Section 461 (relating to general rule for taxable year of deduction) is amended by adding at the end thereof the following new subsection:

"(h) SUBSECTION (d)(1) DOES NOT APPLY TO CERTAIN TAXPAYERS.—

"(1) TAXPAYERS NOT PREVIOUSLY SUBJECT TO THE ACCELERATED TAX.—

"(A) IN GENERAL.—Subsection (d)(1) shall not apply to any action of a taxing jurisdiction with respect to which the taxpayer is a new taxpayer.

"(B) NEW TAXPAYER DEFINED.—For purposes of subparagraph (A), a taxpayer is a new taxpayer with respect to an action if, at no time before such action took effect, was the taxpayer (or a predecessor) liable for any tax the time for accrual of which was accelerated by such action.

"(2) TAXPAYER WHO ELECTS SUSPENSE ACCOUNT.—

"(A) IN GENERAL.—Subsection (d)(1) shall not apply to any action of a taxing jurisdiction if the taxpayer—

"(i) makes an election under this paragraph, and

"(ii) establishes a suspense account for each tax the accrual of which was accelerated by such action.

"(B) INITIAL OPENING BALANCE.—For the first taxable year to which the election applies, the opening balance of the suspense account with respect to any tax shall be the largest amount of such tax which would have been allowable as a deduction to the taxpayer for any of the 3 immediately preceding taxable years.

"(C) ADJUSTMENTS IN SUSPENSE ACCOUNT.—

"(i) REDUCTION.—At the close of each taxable year, the suspense account shall be reduced by the excess (if any) of—

"(I) the opening balance of the suspense account for the taxable year, over

"(II) the amount allowable as a deduction for the taxable year (of the current year and the 2 immediately preceding taxable years) for which the deduction for the tax involved was (or would have been) the largest.

"(ii) INCREASE.—At the close of each taxable year, the suspense account shall be increased (but not in excess of the initial opening balance) by the excess (if any) of—

"(I) the amount allowable as a deduction for the taxable year for the tax involved, over

"(II) the opening balance of the suspense account for the taxable year.

"(D) INCOME ADJUSTMENTS.—

"(i) REDUCTION ALLOWED AS A DEDUCTION.—In the case of any reduction under subparagraph (C)(i) in the account for the taxable year, an amount equal to such reduction shall be allowed as a deduction for such taxable year.

"(ii) INCREASE ADDED TO GROSS INCOME.—In the case of any increase under subparagraph (C)(ii) in the account for the taxable year, an amount equal to such increase shall be included in gross income for such taxable year.

"(iii) ADDITION TO GROSS INCOME WHERE INITIAL OPENING BALANCE IS BASED ON DEDUCTION FROM PRECEDING TAXABLE YEAR.—If the amount described in subparagraph (B) exceeds the amount of the deduction which would have been allowable (for the tax involved) for the taxable year preceding the first taxable year for which the election is effective, then an amount equal to the amount of such excess shall be included in gross income for such first taxable year.

"(E) ASSUMPTIONS FOR PRECEDING YEAR COMPUTATIONS.—For purposes of subparagraphs (B), (C)(i), and (D)(iii), the amount of a deduction for any preceding taxable year shall be determined by assuming that—

"(i) the election under this paragraph applied to all preceding taxable years, and

"(ii) the action with respect to which the election was made was in effect at all times during all preceding taxable years.

"(F) ELECTION.—

"(i) IN GENERAL.—An election under this paragraph may be made without the consent of the Secretary. Such an election shall be made in such manner as the Secretary may by regulations prescribe and shall be made for any taxable year not later than the time prescribed by law for filing the return for such taxable year (including extensions thereof).

"(ii) PERIOD TO WHICH ELECTION APPLIES.—An election under this paragraph shall apply to the taxable year for which it is made and for all succeeding taxable years, unless the taxpayer secures the consent of the Secretary to the revocation of such election.

"(G) COORDINATION WITH SECTION 481.—The establishment of a suspense account under this paragraph shall be in lieu of applying section 481 to the adjustments necessary (by reason of the action referred to in subsection (d)(1)) to prevent amounts from being duplicated or omitted.

"(H) COMPUTATION UNDER ELECTION TREATED AS METHOD OF ACCOUNTING.—Except to the extent inconsistent with the provisions of this paragraph, for purposes of this subtitle, the computation of taxable income under an election made under this paragraph shall be treated as a method of accounting.

"(3) SUBSTANTIALLY SIMILAR TAXES TREATED AS SAME TAX.—Under regulations prescribed by the Secretary, for purposes of this subsection, if any tax is enacted as a substitute for a substantially similar tax, such taxes shall be treated as the same tax.

"(4) TREATMENT OF CERTAIN NONRECOGNITION TRANSACTIONS.—The application of this subsection with respect to a taxpayer which is a party to any transacton with respect to which there is nonrecognition of gain or loss to any party by reason of subchapter C or K or any other provision of this title shall be determined under regulations prescribed by the Secretary."

(b) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as otherwise provided in this subsection, the amendment made by subsection (a) shall apply to taxable years ending on or after the date of the enactment of this Act.

(2) TAXPAYERS NOT PREVIOUSLY SUBJECT TO THE ACCELERATED TAX.—Paragraph (1) of section 461(h) of the Internal Revenue Code of 1954 (as added by subsection (a)) shall apply only with respect to actions of taxing jurisdictions taken after the date of the enactment of this Act.

(3) TRANSITIONAL RULE FOR CERTAIN TAXPAYERS WHO BECAME SUBJECT TO FRANCHISE TAX BASED ON INCOME AFTER IT WAS ACCELERATED.—

(A) TAXPAYER MAY ELECT NOT TO HAVE SECTION 461(d)(1) APPLY TO CONTINUOUS PERIOD.—If—

(i) an action of a taxing jurisdiction involved a franchise tax based on income,

(ii) at no time before such action took effect was the taxpayer (or a predecessor) liable for such tax,

(iii) for a continuous period which begins with the first taxable year in which the taxpayer (or a predecessor) was subject to such tax, the taxpayer (and his predecessor, if any) consistently accrued such tax in the year in which it would have accrued without regard to section 461(d)(1) of the Internal Revenue Code of 1954, and

(iv) the taxpayer makes an election under section 461(h)(2) of such Code (with respect to the action of the taxing jurisdiction) for the taxpayer's first or second taxable year ending on or after the date of the enactment of this Act,

then the taxpayer may make an election under this paragraph to have section 461(d)(1) of such Code not apply with respect to such action by the taxing jurisdiction for such continuous period.

(B) NO SUSPENSE ACCOUNT WHERE THERE IS NO GAP BETWEEN CONTINUOUS PERIOD AND PROSPECTIVE ELECTION.—If a taxpayer's election under this paragraph applies to a continuous period which ends with the taxable year immediately preceding the first taxable year for which the election described in subparagraph (A)(iv) applies, such taxpayer shall not be required to establish a suspense account under section 461(h)(2) of such Code by reason of the election described in subparagraph (A)(iv).

(C) TIME AND MANNER OF ELECTION.—An election under this paragraph shall be made at such time and in such manner as the Secretary of the Treasury or his delegate may by regulations prescribe, except that the approval of the Secretary of the Treasury or his delegate to the making of such an election may not be required.

SEC. 105. TREATMENT OF CERTAIN LENDING OR FINANCE BUSINESSES FOR PURPOSES OF THE TAX ON PERSONAL HOLDING COMPANIES.

(a) REMOVAL OF LIMITATION ON AMOUNT OF ORDINARY GROSS INCOME FROM LENDING OR FINANCE BUSINESS TAKEN INTO ACCOUNT.—Clause (ii) of section 542(c)(6)(C) (relating to exceptions from definition of personal holding company) is amended by striking out "but not $1,000,000".

(b) CHANGES IN DEFINITION OF LENDING OR FINANCE BUSINESS.—Clause (i) of section 542(d)(1)(B) (relating to exceptions from definition of lending or finance business) is amended to read as follows:

"(i) making loans, or purchasing or discounting accounts receivable, notes, or installment obligations, if (at the time of the loan, purchase, or discount) the remaining maturity exceeds 144 months; unless—

"(I) the loans, notes, or installment obligations are evidenced or secured by contracts of conditional sale, chattel mortgages, or chattel lease agreements arising out of the sale of goods or services in the course of the borrower's or transferor's trade or business, or

"(II) the loans, notes, or installment obligations are made or acquired by the taxpayer and meet the requirements of subparagraph (C), or".

(c) INDEFINITE MATURITY CREDIT TRANSACTIONS.—Paragraph (1) of section 542(d) (relating to special rules) is amended by adding at the end thereof the following new subparagraph:

"(C) INDEFINITE MATURITY CREDIT TRANSACTIONS.—For purposes of subparagraph (B)(i), a loan, note, or installment obligation meets the requirements of this subparagraph if it is made under an agreement—

"(i) under which the creditor agrees to make loans or advances (not in excess of an agreed upon maximum amount) from time to time to or for the account of the debtor upon request, and

"(ii) under which the debtor may repay the loan or advance in full or in installments."

(d) EFFECTIVE DATES.—

(1) SUBSECTION (a).—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1981.

(2) SUBSECTIONS (b) AND (c).—The amendments made by subsections (b) and (c) shall apply to taxable years beginning after December 31, 1980.

SEC. 106. ADDITIONAL 2-YEAR DELAY IN APPLICATION OF THE NET OPERATING LOSS RULES ADDED BY THE TAX REFORM ACT OF 1976.

Paragraphs (2) and (3) of section 806(g) of the Tax Reform Act of 1976 (relating to effective dates for the amendments to sections 382 and 383 of the Internal Revenue Code of 1954) are amended by striking out "1982" each place it appears and inserting in lieu thereof "1984".

SEC. 107. ADDITIONAL REFUNDS RELATING TO REPEAL OF EXCISE TAX ON BUSES.

(a) TIME FOR FILING CLAIM.—Subparagraph (C) of section 231(c)(2) of the Energy Tax Act of 1978 (relating to refunds with respect to certain consumer purchases) is amended by striking out "the first day of such 10th calendar month" and inserting in lieu thereof "December 31, 1982".

(b) PROCEDURE FOR PASSING THROUGH REFUND.—Subparagraph (A) of section 231(c)(2) of such Act is amended by inserting before the semicolon ", or, in lieu of evidence of reimbursement, he makes such reimbursement simultaneously with the receipt of such a refund under an arrangement satisfactory to such Secretary which assures such simultaneous reimbursement".

TITLE II—UNEMPLOYMENT COMPENSATION AND WELFARE PROVISIONS

SEC. 201. USE OF CERTAIN AMOUNTS TRANSFERRED TO STATE UNEMPLOYMENT FUNDS.

(a) GENERAL RULE.—Paragraph (2) of section 903(c) of the Social Security Act is amended—

(1) by striking out "twenty-four" each place it appears and inserting in lieu thereof "thirty-four", and

(2) by striking out "twenty-fourth" in the second sentence and inserting in lieu thereof "thirty-fourth".

(b) RESTORATION OF AMOUNTS USED TO PAY BENEFITS.—Subsection (c) of section 903 of such Act is amended by adding at the end thereof the following new paragraph:

"(3)(A) If—

"(i) amounts transferred to the account of a State pursuant to subsections (a) and (b) of this section were used in payment of unemployment benefits to individuals, and

"(ii) the Governor of such State submits a request to the Secretary of Labor that such amounts be restored under this paragraph,

then the amounts described in clause (i) shall be restored to the status of funds transferred under subsections (a) and (b) of this section which have not been used by eliminating any charge against amounts so transferred for the use of such amounts in the payment of unemployment benefits.

"(B) Subparagraph (A) shall apply only to the extent that the amounts described in clause (i) of such subparagraph do not exceed the amount then in the State's account.

"(C) Subparagraph (A) shall not apply if the State has a balance of advances made to its account under title XII of this Act.

"(D) If the Secretary of Labor determines that the requirements of this paragraph are met with respect to any request, the Secretary shall notify the Governor of the State that such requirements are met with respect to such request and the amount restored under this paragraph. Such restoration shall be as of the first day of the first month following the month in which the notification is made."

SEC. 202. TREATMENT OF CERTAIN SERVICES PERFORMED BY STUDENTS.

(a) GENERAL RULE.—Subparagraph (C) of section 3306(c)(10) of the Internal Revenue Code of 1954 (defining employment) is amended by striking out "under the age of 22".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply with respect to services performed after the date of the enactment of this Act.

SEC. 203. TREATMENT OF CERTAIN ALIEN FARM WORKERS.

Subparagraph (B) of section 3306(c)(1) of the Internal Revenue Code of 1954 (defining employment) is amended by striking out "January 1, 1982" and inserting in lieu thereof "January 1, 1984".

SEC 204. UNEMPLOYMENT BENEFITS PAID TO EX-SERVICE MEMBERS.

(a) RESTORATION OF PREVIOUS ELIGIBILITY REQUIREMENTS.—Subparagraph (B) of section 8521(a)(1) of title 5, United States Code, is amended to read as follows:

"(B) with respect to that service, the individual—

"(i) was discharged or released under conditions other than dishonorable; and

"(ii) was not given a bad conduct discharge or, if an officer, did not resign for the good of the service;".

(b) INCREASE IN REQUIRED LENGTH OF SERVICE.—Subparagraph (A) of section 8521(a)(1) of such title 5 is amended by striking out "365 days" and inserting in lieu thereof "730 days".

(c) PERIOD FOR WHICH BENEFITS PAYABLE.—Section 8521 of such title 5 is amended by adding at the end thereof the following new subsection:

"(c)(1) An individual shall not be entitled to compensation under this subchapter for any week before the fifth week beginning after the week in which the individual was discharged or released.

"(2) The aggregate amount of compensation payable under this subchapter to any individual with respect to any benefit year shall not exceed 13 times the individual's weekly benefit amount for total unemployment."

(d) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to terminations of service on or after July 1, 1981, but only for purposes of determining eligibility for benefits for weeks of unemployment beginning after the date of the enactment of this Act.

SEC. 205. SUPPLEMENTAL SECURITY INCOME ACCOUNTING PERIOD.

(a) REPEAL OF RECONCILIATION ACT PROVISION.—Effective on the date of the enactment of this Act, subsections (a) and (c) of section 2341 of the Omnibus Budget Reconciliation Act of 1981 are repealed, and the amendment made by subsection (a) of such section shall be of no force or effect.

(b) ESTABLISHMENT OF SUPPLEMENTAL SECURITY INCOME ACCOUNTING PERIOD.—Section 1611(c)(1) of the Social Security Act is amended to read as follows:

"(1) An individual's eligibility for a benefit under this title for any month, and the amount of such benefit, shall be determined on the basis of the individual's (and eligible spouse's, if any) income, resources, and other relevant characteristics in such amount. Eligibility for and the amount of such benefits shall be redetermined at such time or times as may be provided by the Secretary."

(c) EFFECTIVE DATE.—The amendment made by subsection (b), and the amendments made by section 2341(b) of the Omnibus Budget Reconciliation Act of 1981, shall be effective with respect to months after the first calendar quarter which ends more than two months after the month in which this Act is enacted.

SEC. 206. TREATMENT OF UNNEGOTIATED CHECKS UNDER SUPPLEMENTAL SECURITY INCOME PROGRAM.

(a) IN GENERAL.—Section 1631(i)(2) of the Social Security Act (as added by section 2343(a) of the Omnibus Budget Reconciliation Act of 1981) is amended by striking out "included in all checks payable to individuals entitled to benefits under this title but" in the first sentence and inserting in lieu thereof "included in all such benefit checks".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall become effective October 1, 1982.

SEC. 207. COLLECTION OF ADMINISTRATIVE COSTS FOR NONAID TO FAMILIES WITH DEPENDENT CHILDREN SUPPORT ENFORCEMENT.

(a) IN GENERAL.—Section 454(6) of the Social Security Act is amended—

(1) by inserting "including, at the option of the State, support collection services for the spouse (or former spouse) with whom the absent parent's child is living (but only if a support obligation has been established with respect to such spouse)," after "with the State," in clause (A);

(2) by striking out "services under the State plan (other than collection of support)" in clause (B) and inserting in lieu thereof "such services"; and

(3) by amending clause (C) to read as follows:

"(C) any costs in excess of the fee so imposed may be collected from such individual by deducting such costs from the amount of any recovery made, or, at the option of the State, from the parent who owes the child or spousal support obligation involved".

(b) CONFORMING AMENDMENTS.—

(1) Section 454 of such Act is further amended—

(A) by adding "and" after the semicolon at the end of paragraph (18);

(B) by striking out paragraph (19); and

(C) by redesignating paragraph (20) as paragraph (19).

(2) Section 2333(c) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "Section 453(a) of such Act is amended" and inserting in lieu thereof "Section 455(a) of such Act is amended".

(3) Section 303(e)(2)(A)(iii)(II) of such Act is amended by striking out "454(20)(B)(i)" and inserting in lieu thereof "454(19)(B)(i)".

(c) EFFECTIVE DATE.—The amendments made by this section shall be effective as of October 1, 1981.

SEC. 208. TECHNICAL AMENDMENTS TO CHILD SUPPORT ENFORCEMENT PROVISIONS IN RECONCILIATION ACT.

(a) IN GENERAL.—

(1) The first sentence of section 452(b) of the Social Security Act is amended by striking out "certify" and all that follows land inserting in lieu thereof "certify to the Secretary of the (Treasury for collection pursuant to the provisions of section 6305 of the Internal Revenue Code of 1954 the amount of any child support obligation (including any support obligation with respect to the parent who is living with the child and receiving aid under the State plan approved under part A) which is assigned to such State or is undertaken to be collected by such State pursuant to section 454(6).".

(2) Section 303(e)(2)(A)(i) of such Act is amended by striking out "of this subsection" and inserting in lieu thereof "of paragraph (1)".

(b) EFFECTIVE DATE.—The amendments made by this section shall be effective as of October 1, 1981.

SEC. 209. TECHNICAL AMENDMENTS TO SOCIAL SERVICES AND FOSTER CARE PROVISIONS IN RECONCILIATION ACT.

(a) USE IN TERRITORIAL SOCIAL SERVICES PROGRAMS OF CERTAIN AMOUNTS NOT NEEDED IN PUBLIC ASSISTANCE PROGRAMS.—Section 1108(a) of the Social Security Act is amended by adding at the end thereof the following new sentence: "Each jurisdiction specified in this subsection may use in its program under title XX any sums available to it under this subsection which are not needed to carry out the programs specified in this subsection."

(b) ALLOTMENT FORMULA UNDER SOCIAL SERVICES PROGRAMS.—Section 2003(b) of such Act is amended in the matter following clause (2) by inserting "(other than Puerto Rico, Guam, the Virgin Islands, and the Northern Mariana Islands)" after "the population of all the States".

(c) PARTICIPATION OF TERRITORIES IN SOCIAL SERVICES PROGRAM.—Section 1101(a)(1) of such Act is amended by striking out "American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands" and inserting instead "Guam, and the Northern Mariana Islands".

(d) FOSTER CARE STANDARDS.—Section 2353(r) of the Omnibus Budget Reconciliation Act of 1981 is amended to read as follows:

"(r) Section 471(a)(10) of such Act is amended to read as follows:

"(10) provides for the establishment or designation of a State authority or authorities which shall be responsible for establishing and maintaining standards for foster family homes and child care institutions which are reasonably in accord with recommended standards of national organizations concerned with standards for such institutions or homes, including standards related to admissions policies, safety, sanitation, and protection of civil rights, and provides that the standards so established shall be applied by the State to any foster family home or child care institution receiving funds under this part or part B of this title;'."

(b) EFFECTIVE DATE.—The amendments made by this section shall be effective as of October 1, 1981.

The SPEAKER pro tempore. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

□ 1600

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 4961, presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.
